From the outset it was a battle with the Republican administration which placed the state of the budget ahead of the state of the art. Right now the number of programed Polaris súbmarine systems could be increased four times. One would suppose that the Republican platform would have recognized the need for augmentation of the Polaris program. Only the Democratic platform did that.

In 1957 the Democratic Congress pressed for acceleration of the Polaris program. Finally in 1958, after observing that persuasion would not work, the Democratic Congress appropriated \$600 million more than the administration requested for the Polaris system. Under the administration plan, at that point in time, only five Polaris submarines would have been programed. The action of the Democrats in Congress almost doubled this number, but the Bureau of the Budget withheld the money except for one submarine.

Actually this 1958 action by the Democratic Congress paid off, for the moneys were released during 1959. However, the administration's release of funds was on a slower schedule.

The Polaris battle of the budget was waged again this year. The administration for fiscal 1961 requested only three submarines and funds for long leadtime procurement of three more. Congress, with its understanding of the missile gap, appropriated money for 12 Polaris submarines.

Let us look at the box score. Left to their own resources, the Republican administration at best would have programed only eight Polaris submarines and scheduled three for long leadtime procurement. As things now stand, and after a successful fight by the Democratic Congress, 14 Polaris submarines are fully funded, and 7 can be scheduled for procurement. The score is this: Democrats, 21 Polaris submarines; Republicans, 11 Polaris submarines;

Each Polaris submarine, by the way, will carry 16 missiles.

The box score with fiscal year breakdowns is presented at the conclusion of my remarks. It is plain to see from this box score that the urgency in the Polaris program has been recognized by the Democratic Congress, which has usually made available more funds than the administration proposed.

The Navy, too, has recommended more Polaris submarines than the administration was willing to approve. The Navy was restrained by the administration in two ways: First, it had to trim its budgetary sails specifically on Polaris planning; and second, it had to work within restrictive overall budget ceilings set by the administration.

The restraint on Navy planning for the Polaris may be gaged by official Navy testimony that the desired objective is 45 Polaris submarines—720 missiles—and that the rate of construction could be stepped up to 12 submarines a year with existing facilities. This is four times the role endorsed by the administration for the past several years.

It will be said by administration spokesmen that the state of the art did not justify a speedup in the Polaris program in prior years. The Democrats in Congress had more faith and confidence in the capabilities of our scientists and engineers than did the budget-conscious administration. That confidence has been fully justified. Democratic leadership kept pace with, and gave impetus to, the Polaris program. The Republican administration lagged behind.

In summary, the Democratic Congress added four Polaris submarines to the administration program in fiscal year 1959. This would have added 64 operational missiles 2 years earlier than requested by the administration. Recognizing the congressional leadership in this program, the administration yielded to a degree. It granted the Navy funds for one more than the two budgeted, to maintain a three-per-year program. It finally released the funds for the other three over a year later, in fiscal year 1960. The result was a delay of 1 year for three submarines.

Just recently, as the election nears, the administration released funds for five submarines for fiscal year 1961, instead of three. Also, by releasing funds for five of the seven partially funded submarines authorized by the Congress, it has indicated a limited program of five per year, in lieu of the former three-per-year program. Even so, the administration is holding back funds for two partially funded submarines, which cannot be begun for another year. The result is a delay of 1 year for two submarines.

The total administration deficit under the program Congress actually provided is thus 1 year's delay for five submarines, or 80 missiles, not on station during the coming years of the Nation's greatest peril.

Funding of Polaris missile submarines

	Number in adminis- tration budget		Number provided by Congress		Funds released (actually programed)	
Fiscal year	Fully funded	Partially funded (long lead time items)	Fully funded	Partially funded	Fully funded	Partially funded
1958	3 2	(3)	3 6	(3)	3 3 3 3 5	
Total through fiscal year 1961	8	3	14	7	14	1
	Total requested by administration		Total provided by Congress		Total programed	
	11		21		19	

<sup>&</sup>lt;sup>1</sup> Includes 3 (denoted in parentheses) partially funded in fiscal year 1960 program.

<sup>2</sup> As announced in Secretary Gates' letter of August 1960.

State Department Acts Belatedly on Banning of Masaryk Stamp by Government of Czechoslovakia

EXTENSION OF REMARKS

### HON. FRANK KOWALSKI

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES Wednesday, August 31, 1960

Mr. KOWALSKI. Mr. Speaker, the decline in American prestige abroad can be attributed in substantial part to the vacillation and delay which are characteristic of the State Department under the present administration.

Just a few days ago, on August 25, the State Department announced that it had sent a note to the Czechoslovak Government requesting information on the barring of U.S. mail bearing stamps honoring the great patriot of the Czech Republic of lamented memory, Thomas Masaryk.

As long ago as last May, Mr. Speaker, I asked the State Department not to seek information but to protest strongly to the Czech Government against its refusal to deliver mail carrying Masaryk

commemorative stamps.

I pointed out in May, and in another letter early in June, that the facts were indisputable—that the Czech Government was dumping some mail from America with Masaryk stamps, was returning other mail to the American senders with the notation, "Not Admissible." I also informed the State Department that the Czechoslovak National Council of America had evidence that in some cases letters were being delivered in Czechoslovakia with the Masaryk stamps removed from the envelopes.

These actions by the Czech Government are in clear violation of interna-

tional postal agreements.

After all these months, the best our State Department can offer is a request to Prague for information about the banning of the Masaryk stamp.

We do not need information, Mr. Speaker, since we have the facts. What we need is strong action by our State Department to compel the Communist rulers of Czechoslovakia to abide by international regulations and stop interfering with mail sent from this country.

Here we have had an opportunity, now largely lost, to bring before the world that the Communist government of Czechoslovakia is so apprehensive that it will not allow its people to see on postage stamps the picture of a great Czech leader who fought for and helped win freedom for his country.

Last spring, I suggested that our Government bring this story to the whole world, to underscore how reluctant are the rulers in Iron Curtain lands to let their people be reminded of their days of freedom.

I submit, Mr. Speaker, that this case called for much earlier action and for something stronger than a polite request for information. It is another administration fumble which has cost us a great opportunity.

Key Facts Relating to Agriculture

EXTENSION OF REMARKS

### HON, HAROLD D. COOLEY

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES Thursday, September 1, 1960

Mr. COOLEY. Mr. Speaker, by permission of the House, I am inserting in the Appendix of the RECORD extensive information on the position of agriculture in the Nation's economy, with the thought that this material may be useful to the Members of this body in discussing the problems of agriculture with their people back home:

Key facts relating to agriculture-Farm

theome	
1959 cash farm income	illions
1959 cash farm income	\$33.8
value (nome consumption) and rental	
value of farm dwellings	3.6
Gross farm income	
Farm production expenses	26. 1
Realized net farm income	
7-year total realized net farm income,	105 1
7 year total realized not form income	100.1
7-year total realized net farm income, 1953-59	84. 7
7-year loss in net farm income,	20.4
Farm population:	20. %
Per capita income from agriculture,	
1959	643
Per capita income from agriculture,	
1952	711
Per capita income from all sources,	960
Per capita income from all sources,	962
Nonfarm population:	902
Per conita income from all courses	
Per capita income from all sources,	9 909
Per capita income from all sources,	2,202
1952	
Average hourly earnings:	1, 010
Farmworkers (operators and hired	
labor), 1959	
Factory workers, 1959	2. 22
1959 to 1952 contrasts:	
Net farm income down 24 percent.	
Nation's income up 35 percent.	
Farmworkers' hourly earnings do	vn 13
Factory workers' hourly earnings	up 33
percent.	
Corporate dividend payments up 4 cent.	7 per-

### FARM-NONFARM INCOME DISPARITY WIDENS

In 1946, 41 percent of all farm-operator families were in the lowest income fifth of all families in the United States.

In 1953, the percentage had increased to 50; and in 1957, the percentage had increased to 55. When comparable data become available for 1959, the percentage may be even higher.

	Median income of lowest in- come third, farm families	Median income as percent of average income of nonfarm families	
1947	\$1,100	23	
1953	1,300	20	
1967	1,400	19	

#### FOOD COSTS

Retail cost, market basket of farm-produced food: (change, 1952-59) up 1 percent.

Farm value, market basket of farm-produced food: (change 1952-59) down 17 per-

Market basket of farm food products bought by average urban wage earner with family of three:

	Retail cost	Marketing charges	Farmer's return
1959	\$1,040	\$641	\$399
	1,034	552	482

Cost of market basket of farm-produced food as a percentage of industrial worker's annual earnings: 1953, 23 percent; 1952, 30 percent.

Pro rata share of Government cost of farm price supports, plus cost of market basket foods, as a percentage of industrial worker's annual earnings: 1959, 24 percent. Civilian expenditures for farm foods, mar-

keting charges and amount paid farmers:

[In billions]

	Civilian expenditures for farm foods	Marketing charges	Amount paid farmers
1959	\$58. 2	\$38. 4	\$19.8
	48. 2	28. 3	19.9

Note.—In 1959 there were 13 percent more domestic consumers than in 1952, and they purchased about 16 percent more food—yet paid farmers \$100 million less in total for it than 7 years earlier.

Quantities of food purchased by 1 hour of factory labor

	In 1929	In 1959
Bread, loavesSteak, pounds	6.4	11.3
Milk, pints delivered Butter, pounds	7.8	17.6
Pork chops, pounds	1.5	2.6
Bacon, pounds	1.4	3.8
Eggs, dozensPotatoes, pounds	1.1	4. 2 35. 2
Oranges, dozens	1.3	3.3

Source: Agricultural Marketing Service, U.S. Department of Agriculture.

#### FARMERS' EFFICIENCY

A man-hour of farm labor in 1959 produced nearly 3 times what it did 20 years ago. Crop yields in 1958-59 were at record levels;

39 percent above 1947-49 levels.

Total farm output per unit of resources used in 1959 was 24 percent above 1947-49

Farm production per han-hour has been increasing at the rate of 5 percent per year since 1950—more than twice the rate of increase in productivity of workers in industry.

#### Farmers' financial position [In billions]

	1959	1952
Value of real estate	\$125.1 59.0	\$06. 0 53. 0
in cooperatives	13.8	12.2 4.7
Total assets	203. 1 23. 3	165. 6 14. 6
Proprietors' equities	179.8	151.0

Note.—Equities have increased 18 percent while liabilities or debts have increased 60 percent since 1952. Furthermore, most of the increase in equities is the result of infated land values which accrued to many absentee landlords, can only be converted to each by owner operators when they quit farming, and may disappear even more rapidly than they have increased in recent years.

As of January 1, 1959, farmers' equities in real estate, personal property (other than household goods), cooperatives, and working capital, totaled \$161.5 billion. If farmers could have sold these assets at these paper values and loaned the money at 6 percent interest, they would have had 90 percent as much income in 1959 without doing a lick of work.

#### FARM PRICE-SUPPORT PROGRAM (Commodity Credit Corporation)

As of January 1, 1953: \$1,064,617,225 loss. As of January 1, 1960: \$6,891,035,440 loss.

(Note.—The losses in 7 years, from January 1953 through December 31, 1959, were more than five times the total of losses during the previous 20-year history of Commodity Credit Corporation price-support operations.)

Twenty-year loss (1933-52): \$1,064,617,225. Seven-year loss (1953-59): \$5,826,418,215. CCO price-support operations for basic crops only (wheat, corn, cotton, tobacco, rice, peanuts):

To January 1, 1953 (at end of 20 years): \$13,011,290 profit.

To January 1, 1960 (7 years later): \$3,081,-479,607 loss.

Dairy program losses\_\_ 1,854,688,705 CCC investments:

CCC investments in major crops (inventory and loans)

Crop	Amount	Value
Cotton (bales):		
Jan. 1, 1953	1,097,000	\$166, 779, 000
Jan. 1, 1960	7, 677, 000	1, 334, 113, 000
Wheat (bushels):		
Jan. 1, 1953	267, 847, 000	1, 081, 545, 000
	, 414, 464, 000	3, 435, 780, 000
Corn (bushels):	1	
Ja. 1, 1953	368, 349, 000	587, 274, 000
	1, 500, 370, 000	2, 482, 374, 000
Rice (hundredweight):	A STATE OF THE STA	The state of the s
Jan. 1, 1953	168,000	878, 000
Jan. 1, 1960	13, 351, 000	89, 394, 000
Peanuts (pounds):		
Jan. 1, 1953	192, 528, 000	22, 644, 000
Jan. 1, 1960	334, 109, 000	34, 354, 000
Tobacco (pounds):		
Jan. 1, 1953	544, 067, 000	250, 373, 000
Jan. 1, 1960	799, 679, 000	517, 133, 000
Dairy products:	1000	200,000
Jan. 1, 1953		8, 445, 000
Jan. 1, 1960		29, 209, 000

#### EFFECTIVENESS OF PRODUCTION CONTROLS

Official statistics show that in the years 1954-58 inclusive, the production of the non-controlled farm products increased 21 percent more than the production of the price-supported, controlled products (using 1952-53 as a base).

Value of stocks removed from commercial markets, 1953-59:

In the past 7 years, farm programs have limited farm production to some extent and have removed an average of \$2.2 billion of farm products a year from commercial markets: \$6.7 billion was removed by an increase in CCC stocks; \$7.9 billion was removed by Public Law 480 disposals; \$0.9 billion was removed by section 32 surplus removal purchases; total, \$15.5 billion equals 7 percent of cash receipts.

Had this additional \$15.5 billion of farm products moved into consumption through commercial markets, prices would have dropped sharply—perhaps 17.5 percent. Had this occurred, net farm income would have dropped 45 percent.

Farm production expenses: 1959, \$26 billion; 1952, \$22.6 billion. Farm production expenses have been increasing \$800 million a year for the last 10 years, and \$900 million a year for the last

Farm production expenses are increasing about 3 percent per year. Increasing population plus increasing real incomes results in demand for food increasing about 2 percent per year.

cent per year.

The disparity of the farmer's position probably is best illustrated by his prices in relation to the prices of the things he must buy.

In 1948 a corn farmer could sell 686 bushels of corn and buy a cornpicker with what he got for the corn. In 1959 it took 2,121 bushels of corn to buy a similar cornpicker.

In 1948 a wheat farmer could buy a combine with 2,107 bushels of wheat. In 1959 it took 3,771 bushels of wheat to buy a similar combine.

In 1948 it took 944 bushels of wheat to buy a farm truck, in 1959—1,760 bushels; 1,080 bushels of corn would buy the truck then, in 1959—2,879 bushels; 6,316 pounds of cotton then, in 1959—9,772 pounds.

In 1948 it took 991 bushels of wheat to buy a tractor, in 1959—1,771 bushels for a similar tractor; 1,133 bushels of corn would buy the tractor then, in 1959—2,897 bushels; 6,627 pounds of cotton then, in 1959—9,835 pounds.

#### Misinformation on the Middle East

EXTENSION OF REMARKS

### HON. LEONARD FARBSTEIN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES Thursday, September 1, 1960

Mr. FARBSTEIN. Mr. Speaker, I should like to draw your attention to a penetrating study of present developments in the Middle East which has just been printed in the latest issue of Prevent World War III, No. 56, summer 1960, published by the Society for the Prevention of World War III, Inc., 515 Madison Avenue, New York, N.Y. Under the title "Misinformation on the Middle East," this analysis cites pertinent facts showing that contrary to President Nasser's boasting of Arab unity, there are powerful forces opposing Nasser's claim to rule the Arab world. The Government of Jordan has displayed courageous opposition to Nasser's hegemonic policies. Even in the United Arab Republic there is growing unrest, particularly in Syria where Nasser's henchmen have established for all intents and purposes a military dictator-Those who believe that Nasser should be supported as the standard bearer of Arab unity, should bear these facts in mind. I include the article in the Appendix of the RECORD:

#### MISINFORMATION ON THE MIDDLE EAST

The Middle East fever chart is a subject which periodically attracts reputed experts in this field. Admittedly, it is not easy to reach a correct diagnosis simply because the patient is afflicted with a number of allments—some of them quite unique in terms of previous experience. Furthermore, the situation in that area is in extreme flux so that a prudent practitioner will hardly allow himself to make a definite prognosis either on the optimistic or pessimistic side.

Unfortunately, there are frequent instances where caution is thrown to the winds and the conclusions of experts are set down as though they were the last word on the subject. We say that this is unfortunate because such reporting adds to the confusion concerning developments in the Middle East and contributes to a great deal of misinformation. It goes without saying that realistic policies can hardly be hammered out on the basis of such fuzzy analyses, nor does it serve the cause of keeping the American people intelligently informed.

The Atlantic Monthly (February 1960) carried a report on the Middle East which, in our opinion, seems to fall into the category of misinformation. The doctors who wrote this report proclaim that Communist influence in the Middle East was on the skids. "Relations between the United Arab Republic," the report states, "and the other Arab States have suddenly improved. President Nasser appears to have learned the advantages of coexistence over conspiracy. The beginnings of common Arabic economic policies are discernible. Syrian complaints are being heard and demands for more local autonomy are heeded. There is, in short, less bickering within the Arab community and a good deal more energy is going into solving domestic problems."

Is there any grounds for such optimism? Our reading of the Middle East fever chart shows that the inner tensions and strife among the Arab States continue and, indeed, in some areas have increased. Let us examine briefly some of the points made in the Atlantic Monthly report.

#### JORDAN VERSUS EGYPT

The Atlantic's report on the Middle East alleges that the Arabs are closing their ranks. This is an amazing evaluation of the Middle East fever chart, because all of the indica-tions show that the differences among the Arab States have widened and are greater now than ever before. The sharp conflict between Jordan and Egypt is a case in point. There have been moments when Nasser extended the olive branch to King Hussein. However, for every gracious gesture there have been far more instances where Nasser has brandished the sword. At this writing, the Egyptian campaign of slander against the Jordanian Government is once again on in full force. When Nasser visited Syria in March of this year, he denounced the leaders of Jordan as having "yielded themselves to American and British imperialism to work against the Arab nation" (New York Times, Mar. 7, 1960). The following month, the Egyptian radio charged that Jordanian rulers were forging "a new path of treason—the path of overt treason." The same broadcast denounced the Jordanian Government as 'the face of imperialism in the Arab homeland" (April 14, 1960).

Why has Nasser once more turned his guns against the King of Jordan at this time? The answer is simply this: Nasser's plans for the creation of a Palestinian state which would have to include part of Jordan has been vetoed by King Hussein and his advisers. This area would also include the Gaza Strip. This has been the dream not only of Nasser but of the so-called Arab High Committee for Palestine, headed by the notorious pro-Nazi and war criminal, the ex-Mufti of Jerusalem. If Nasser could lay his hands on this entire area, then his empire would stretch from the borders of Turkey to the Sudan. This would provide Cairo with a viable nucleus for further expansion.

Jordan's adamant stand has infuriated Cairo. As a result, Egyptian propaganda has lashed out at the Jordanian Government as traitorous and a tool of Western imperialism. However, Nasser has not only resorted to verbal attacks. Contrary to the Atlantic's report that Nasser had learned the advantages of coexistence over conspiracy, agents

are operating within Jordan for the purpose of creating a climate of terror and to strike down by violence the rulers of that country. Thus, on March 30, 1960, the Jordanian Premier al-Majali held a press conference at which the agents of the UAR, who had confessed that they were to carry out a number of assassinations, were present. The Premier declared that the importance of this plot did not lie in the fact that it was aimed at the assassination of several Jordanian leaders "but that it reveals one link in the chain of continuous plotting against this country and its existence in a bid to distract it from development and construction." The Jordanian Premier further stated that the assassination plot was important, too, because it included "the truth of this country's relations with the UAR, which has always sought to split the Arab efforts asunder.'

#### JORDAN HITS BACK

Jordan's counterdenunciations of Nasser have been severe. King Hussein himself attacked the leadership of Egypt during his visit to Morocco in April. He charged that the Egyptians "by their will toward domination" were dividing the Arab world (New York Times, Apr. 29, 1960). In this connection, it is interesting to note that in January, King Hussein inferentially accused the Cairo Government of exploiting the plight of the Palestinian refugees "for selfish political pur-poses" (January 18, 1960). Obviously, the King's criticism was prompted by his knowledge that Nasser was trying to use the refugees as part of his plan to build up his Palestinian state which would inevitably result in the dismemberment of Jordan itself.

Referring to the situation in Syria, the weekly Jordanian magazine "Around the World" recently wrote that the present gov-ernment in Syria is "an unjust military regime which has planted the feeling of anxiety, terror, and fear among the Syrian people." This same magazine carried a pointed attack against Nasser's policies in Africa under the title "Secrets of the Black Continent: Why Do the Africans Hate Abdel Nasser?" The article purports to express the views of an unnamed Arab statesman who had recently traveled through Africa. cording to this Arab statesman, the African peoples first showed sympathy for the Egyptian revolution. "Things then developed and the African peoples began to hate Egypt and Nasser and even the mention of Nasser's name." Why the change? According to this statesman, the Africans became alarmed over Nasser's plot against other Arab states. African peoples felt the great cupidity of Nasser and sensed the danger in cooperating with him, trusting him and depending on his help. They saw Nasser as he is-a man who wants to dominate all the African and Arab peoples."

It is not surprising that there is hardly any love between Jordan and the leaders of the U.A.R., when we know that as recently as May, a second plot was uncovered in Jordan involving agents of the U.A.R., who were given the task of assassinating prominent Jordanian personalities.

#### THE SITUATION IN SYRIA

Has the situation in Syria improved?

From the point of view of the Cairo Government, unity between Egypt and Syria was regarded as a steppingstone in President Nasser's ambitious program of "gathering in" all Arabs under his absolute command. Therefore, Cairo approached the question of uniting with Syria approximately in the same way as Bismarck viewed the unity of the German states under the Kaiser. There was nothing democratic about the method employed and it was clear from the very beginning, as far as Egypt was concerned, that Syria would be incorporated as a virtual department of the Egyptian state.

On the other hand, the Syrians accepted unity in the hope that it would accomplish

two objectives, i.e., to preclude a Communist takeover of Syria and that all Syrians would be treated as equals in the unified state.

There is no doubt that this was the position of the Syrian Baath Party which was most instrumental in influencing Syrian public opinion to accept the merger with Egypt. The Syrian Baath Party preached the virtues of Arab nationalism. Furthermore, the Baath Party hoped that the establishment of the United Arab Republic would hasten the renaissance of Syrian power and prestige. Thus, it is clear that the motives which guided the Baath Party to champion the cause of unity with Egypt, were diametrically opposed to the plans and purposes of the Nasser regime.

#### A POLITICAL CRISIS

The United Arab Republic is now confronted with a grave political crisis. This is reflected by the fact that President Nasser was obliged to set up a military dictatorship in Syria under the command of his chief military collaborator, Field Marshal Abdel Hakim Amer. Marshal Amer's urgent mission to Syria was impelled by the growing revolt of Syrians of all classes against the dictatorial overbearing policies of President Nasser. The Syrian Baathists who had struggled so diligently for the merger, were now singing a different tune. However, they were merely reflecting the disillusionment which has swept all classes and strata of Syrian society with the exception of those who found it profitable to collaborate with Nasser.

It was, therefore, no coincidence that Nasser and his most trusted collaborator, Marshal Amer, should launch a frontal attack upon the Baathist Party. The net result of this onslaught has been the emasculation of the Syrian Baathists as a significant political force in present-day Syria. Indeed, all Syrian political parties which refused to kowtow to Cairo, have been swept aside, Many opponents of the Nasser regime have been in prison. Marshal Amer took steps to purge the Syrian armed forces. According to a London Times report (May 25, 1960), the Syrian armed forces are now "quiet—after the transfer of the more restless elements to Egypt."

The political solution which Marshal Amer has devised involves a virtual Egyptian takeover of all key political and military posts in The crisis reached a turning point last summer when four members of the Baath Party were obliged to resign from the Syrian Cabinet of the U.A.R. Subsequently, several more Ministers had to leave, so that by March of this year all Baathist members were ousted from the Syrlan Cabinet. Those who were forced to resign include such outstanding Syrian political figures as U.A.R. Vice President Akram Hourani, Salah Bitar, U.A.R. Minister of National Guidance, and Abdul Ghani Qannit, Minister of National Affairs and Labor for the Syrian region. Hourani was particularly active in obtaining Syrian consent for the original merger with Egypt. Today he is regarded by the Egyptian authorities as persona non grata. upon continued so that May 2 one could read in the press that only two Syrians were left in the Central Government of the United Arab Republic. Meanwhile, Egypt's grip over Syrian affairs tightens for the obvious reason that discontent is steadily increasing. Thus, having served Nasser's purposes in the beginning, the Baathists have now become expendable.

#### ECONOMIC WOES

In the economic sphere, the Syrian economy is still beset by trade deficits and by agricultural disorganization which has come on the heels of Nasser's land "reforms." Economic liberalism in Syria seems to be on the way out. In its place one can observe the steady encroachment of the Egyptian authoritarian control over the economy. The Cairo government has set up the so-called

Economic Development Organization (EDO) for Syria similar to that which has existed in Egypt for the past 3 years. In Egypt, the EDO has already acquired control of about 25 percent of Egypt's industrial and financial resources. This makes it "a dominant force in Egypt's economy" (Wall Street Journal, Feb. 29, 1960). The EDO is slated to move in the same direction in Syria and will also serve as an instrument of state policy. Private enterprise will surely suffer severely since the EDO is empowered by law to control and appoint senior executives to any concern in which it holds 25 percent of the The Wall Street Journal wrote that the Egyptian "Government-owned corporaterun businesses borrow something from Mussolini's corporate state notions." Thus, it is not without reason that there has been a continuous flight of capital from Syria which, in turn, has affected the value of the Syrian

currency.

Reports indicate that the Nasser government contemplates investments to develop the Syrian economy. However, upon examination as to how these funds will be spent, one finds a substantial portion will either go to the oil industry or into light industries, such as a plant for the manufacture of chocolate. This pattern of investment is obviously designed to keep Syria's economy in a subordinate status to its Egyptian counterpart while the Cairo government extracts maximum profits from Syrian oil. Not only does Egypt export its economic poverty to Syria, it is also hoping to convert the Syrian economy into a food supply center for Egyptian industry. Thus, economically and politically Syria is being milked while Marshal Amer and his forces keep order.

#### ARAB UNITY?

It is hard to find evidence that Nasser has been converted to the ways of peace and respect for the independence of other Arab States. Intrigue and conspiracy supported by ceaseless propaganda attacks characterize Nasser's dealings with his neighbors. The struggle between the Cairo strong man and General Kassem of Iraq continues unabated. One will recall the many plots hatched by Nasser to overthrow the Kassem regime when that government refused to submit as Syria did. The Iraqi Government has hit back in kind and shows no timidity and hesitancy in castigating Nasser. Thus, Kassem has publicly revived the idea of the fertile crescent which is an old Iraqi dream involving the union of Syria and Jordan under the domination of Iraq. This has been a nightmare to Egyptians. Yet, in the early part of this to Egyptians. Yet, in the early part of this year, Kassem promised our cousins, the Syrians help in their joys and sorrows and assured them that henceforth we shall not stand with hands tied toward any oppression against them because dictatorial oppression in Syria have reached their limit (London Times, Jan. 9, 1960).

Needless to say this has turned Nasser purple with rage. It has brought forth all of the abusive language that Nasser could muster against Kassem. However, Kassem has not at all been scared. Indeed, he has now given his views on the Palestinian question. Just as Nasser hopes to build up a Palestinian state at the expense of Jordan, so Kassem proclaims Iraq's determination to become suzerain over the Palestinian region of Jordan and the Gaza strip now under the control of the UAR. In short, we are witnessing a ferocious three-corner struggle among Jordan, Egypt, and Iraq, each proclaiming their rights to Palestine. How then can one accept the Atlantic Monthly's report on the Middle East which alleges that there is less bickering within the Arab community, and a good deal of more energy is going into solving domestic problems?

#### "A FLOP"

Even the Arab League which is supposed to be the organization to harmonize and

solidify Arab interests, has accomplished little. When the league met in February Nasir was quoted as stating, "We have agreed in all matters." (Reuters, Feb. 11, 1960.) But what are the facts? According to the New York Times (Mar. 1, 1960), the league failed to agree on the so-called Palestine problem. It failed to agree on any plan to divert the tributaries of the Jordan River so as to cripple the Israeli economy. It falled to agree on the proposal that all Arab states receive a percentage share from the oil income in the Middle East. Moreover, one should not ignore the fact that both Tunisia and Iraq boycotted the meeting because of their resentment over Nasser's domination of the league.

In this connection, it is interesting to note the comment of the Lebanese Minister of Public Works, Pierre Gumayel (Feb. 12, 1960): "We must inquire why these countries (Tunisia and Iraq) refuse to attend the meetings of the Arab League Council. With regard to this, I cannot but repeat what I have said on various occasions in the past, namely, that the seat of the Arab League should be removed from Cairo to a neutral Arab country. The Arab League should belong to all, so that it may become a strong and effective means and achieve success."

The point of view expressed by the Lebanese leader was reechoed and further elaborated by President Bourguiba in an interview on March 22, 1960: "When Cairo failed to attain its ambitions for seizure under the guise of Arab solidarity, it resorted to plots and intrigue and to press and radio campaigns, in the hope of creating chaos. All these attempts, however, have failed abysmally, because the Tunisian people are alert and conscious of their real interests. We harbor no enmity toward anyone. But we reject hegemony and interference in our domestic affairs in any shape or form.'

#### "A FIRM AND STRONG PRIENDSHIP"

The Atlantic Monthly report alleges that Communist influence in the Middle East is beginning to wane. We believe that this Judgment should not be hastily accepted. A similar view was taken more recently in a report prepared by the staff of the Senate Foreign Relations Committee (New York Times, June 9, 1960). In the first place, it must be kept in mind that Soviet economic influence in Iraq, Syria, and Egypt is sub-stantial. Indeed, it is estimated that for Syria and Egypt alone the Soviets have contributed \$750 million over the past several

How does Nasser feel about this? In his May 9 speech, wherein he insulted the U.S. Senate and described American aid in phrases that could have been easily employed by the Nazis, he praised the Soviet Union. He said: "It behooves me to express our appreciation for this noble cause and wise policy adopted by the Soviet Union. • • • We feel that the friendship which has brought together the Soviet and the Arab peoples is a firm and strong friendship. It can by no means be shaken by the clouds which appear over the relations between the two countries because of the differences over social and political principles."

In the last analysis, true unity among the Arabs can only come through democratic growth and freedom of expression. It cannot be imposed by "blood and iron" and/or through the imperialistic ambitions of a ruling clique. Perhaps it was this thought which prompted the Jordanian newspaper Hall al-Alam to write: "According to Abd an-Nasir's plan, Egypt should be the only industrial country among the Arab countries and the remaining Arab countries should be a vital field for Ezypt. • • • Abd an-Nasir's plan aims at getting hold of the oil of Iraq. Kuwait, and Saudi Arabia and spending the oil income on building the high dam and on financing other Egyptian projects which, so far, have not been carried out because of Egypt's lack of funds and heavy indebtedness. Abd an-Nasir's plan also provides that Egypt should be the only country with an army, navy, and air force, while other Arab countries should dedicate themselves to agriculture and cattle breeding and to working in Egypt's factories" (April 9, 1960). Does not Nasser's plan evoke memories of Hitler's

Nomination of W. O. Cooper of Dallas. Tex., as the National Commander of the Disabled American Veterans

> EXTENSION OF REMARKS OF

### HON. OLIN E. TEAGUE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. TEAGUE. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following extract from the speech of Albert L. Daniels when he placed the name of my good friend, W. O. Cooper, of Dallas, Tex., in nomination for the office of national commander of the Disabled American Veterans during their 39th annual convention in Seattle, Wash.:

A very pleasant duty has been cast upon me by an extremely kind fate this afternoon in this great city of the Northwest, that of nominating a candidate for national commander, a man who is pure of heart; sincere in his actions and just in his relationships with all people. Because of his sterling qualities as a man, because of his record of achievements and as a member of the DAV. his will to do good, his devotion to his home and fireside, and because of his service to the wars' disabled, I deem it a proud privilege to take part in the effort to have this man elevated to the highest office in the gift of the members of the DAV.

When we cannot continue a man in office like Bill Fribley, who has made a great record in office, the next best thing it to put a man in as his successor who is able and qualified to take up the job where he leaves off and who will carry on.

The candidate I shall nominate has a fine record of oversea service. He enlisted in World War II as a private, served in the European theater and earned five battle stars. He was promoted through the ranks and was discharged as a major. He has been prominent in church work as a Sunday school teacher in his home city of Dallas for a number of years. He is a successful businessman.

The candidate I shall nominate has served as a chapter commander, as a region commander, department senior vice commander, department commander, as a member of the national hospital committee; is presently serving as first national junior vice com-mander, and during the past fiscal year served as a member of the important national legislative committee.

He has acquired by experience all that you could expect of a man in order to give to the organization a splendid administration of its affairs from every standpoint and he has the determination to advance and protect the interests of the wars' disabled

and to build the DAV.

I have some knowledge of the DAV from Judge Robert S. Marx, the first national commander, to Bill Fribley, the present national commander. Great as is the history of the DAV, great as has been its accomplishments, great as in the future it will become, I feel confident that if you place the gavel of authority in the hands of this man you can say that standing as our leader before the American people, representing and expounding the principles which are his, and which he has proven to us he possesses, we will continue under his direction to march forward in the great work of the DAV.

The candidate I shall nominate is a worker and a builder. Elect this man as our national commander and you can go back to your chapters and say that this man not only has the knowledge of what is right and the desire to do right, but possesses the courage to do right and the ability and strength and determination to carry out his program of service to the wars' disabled, of the widows and dependents.

I nominate as a candidate for national commander, one of the best friends I have ever owned, one of the most valuable members the DAV has ever had, and one of America's finest citizens, W. O. "Bill" Cooper of Dallas, Tex.

### Hon. Graham Barden

SPEECH

### HON. JOHN L. McMILLAN

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES Wednesday, August 31, 1960

Mr. McMILLAN. Mr. Speaker, I certainly would not want to leave Washington without expressing my regrets over the fact that my colleague and personal friend, GRAHAM BARDEN, has decided to retire from Congress. The Nation and entire world, in my opinion, has suffered a great loss by Mr. Barden's decision to retire from the Congress of the United States. He has always been a tower of strength and has prevented more obnoxious legislation from passing the House than any other Member of Congress since I have been a Member of this great body. He is one of the leading exponents of constitutional government in the United States and its seems that that vintage is getting very scarce in his country. I have witnessed on numerous occasions, Mr. BARDEN's influence in preventing legislation from being enacted that would have completely circumvented our Constitution and would have placed in the hands of the Federal Government powers which were intended by our Founding Fathers to remain in the hands of the individual State governments. I certainly can understand why Mr. BARDEN has decided to retire as it is certainly no pleasure to serve on a committee or in any body where the cards are stacked against you. I know Graham BARDEN has had an uphill fight since the day he was selected as chairman of the House Education and Labor Committee in order to at least preserve a part of the Constitution and prevent us from having a total Central Government.

He was responsible to a great extent for the passage of the Taft-Hartley Act, a law which if properly administered, would curtail a number of the terrible strikes we have witnessed here in this country during the past few years. He was also the tower of strength in the passage of the Landrum-Griffin bill which also if properly administered would at least do something to curb the activities of some of our powerdrunk labor leaders.

I certainly do not believe in stacking any committee with any group whether they be liberal or conservative, to the extent that a chairman cannot properly administer the affairs of the committee. In fact, I think the Ways and Means Committee, who has jurisdiction of selecting Members to serve on the individual legislative committees, should consult with the chairman before they assign any new Member to a committee,

as the chairman is responsible for the

type of legislation that is reported from

his committee, and he should be given some preference as to who is assigned to his committee.

health and happiness during their retirement years and hope I will have an opportunity to join him on several fish-

I wish for Mr. and Mrs. Barden good

ing trips at a future date.

#### Abenaki Indians of Maine

EXTENSION OF REMARKS OF

### HON. CLIFFORD G. McINTIRE

OF MAINE

IN THE HOUSE OF REPRESENTATIVES Thursday, September 1, 1960

Mr. McINTIRE. Mr. Speaker, the Indians who roved American lands before these became the domain of the white man were a unique, though in many respects barbarian, lot of humans.

Under leave to extend my remarks in the Appendix of the RECORD, I insert an eminently interesting account, as published in the Bar Harbor Times, of the Abenaki Indians of Maine during the early 1600 period:

TRANSLATION FROM ARCHAIC FRENCH TO ENG-LISH AT ABBE MUSEUM PORTRAYS TALE OF 1600's HERE

(By Edith Favour)

The Robert Abbe Museum at Sieur de Monts Spring near Bar Harbor has in its library a set of volumes entitled the "Jesuit Relations," which, in its excellent translation from archaic French to modern English, gives the reader a dramatic and explicit account of conditions in Maine in the early 1600's. Reuben Gold Thwaite edited this edition, and the following words are taken from his introduction:

"It is to the Jesuits that we owe the great body of our information concerning the frontiers of New France in the 17th century. It was their duty annually to transmit to their superior in Quebec or Montreal a written journal of their doings. Annually, between 1632 and 1673, the superior made up a narrative, or relation, of the most important events which had occurred in the several missionary districts under his charge. The annual relation was sent to the provincial of the order in France, and, after careful scrutiny and reediting, was published by him in a series of duodecimo volumes. The Relations at once became popular in the court circles of France; their regular appearance was always awaited with the keenest interest, and assisted greatly in creating and fostering the enthusiasm of plous philanthropists, who for many years substantially maintained the missions of New France.'

The priests who were chosen to come to New France were men of trained intellect. They were acute observers, practical in the art of recording their experiences. Explorers as well as priests, they have proved invaluable to the present-day historian, geographer,

and ethnologist.

Since the Indians of New France were scattered in widely separated groups, it was necessary for the Jesuits to search for them before they could attempt any form of teaching or conversion. Many of the Relations were written in Indian camps amid conditions of almost unbelievable squalor and distraction. Often the journalists were subjected to insult and even torture by savages incited by their medicinemen, who were jealous of the new authority. We see such priests working their passage at the paddles, portaging cargoes, suffering often from disease, and often the butt of ridicule.

From the pages of the Relations emerge many vivid images. As we read the sometimes overlapping accounts of many priests, a coherent but exciting chapter of history reveals itself. Time and again we receive the impact of repeated impressions; and the one which this article is to deal with is the character of the Abenaki Indians of Maine. told by the priests in their own words.

A letter from Father Loyard states: "Of

all the savages of New France, those who have rendered the greatest service are the Abnaquis. This nation is composed of five villages. Two of these are situated along the River St. Lawrence near three rivers. three other villages are called Nanrantzwok (Norridgewock) upon the river Canibekki (Kennebec); Panawaniski, upon the river Pentagouet (Penobscot); and Medoktek, upon the river St. John."

Father Sebastien Rasles, writing from Norridgewock, gives us a further picture of the "I then went to dwell in a village Abenaki. of the Abenakis Tribe which is situated in a forest, only 3 leagues from Quebec. This village was inhabited by 200 savages, nearly all of whom were Christians. Their cabins were ranged almost like houses in cities; an enclosure of high and closely set stakes formed a sort of wall, which protected them from the incursions of their enemies.

"Their cabins are very quickly set up; they plant their poles, which are joined at the top, and cover them with large sheets of bark. The fire is made in the middle of the cabin; they spread all around it mats of rushes, upon which they sit during the day and take their rest during the night.

"The clothing of the men consists of a loose coat of skin. That of the women is a covering which extends from the neck to the middle of the leg, and which they adjust very leggings reach from the decently. Their knee to the ankle. Socks made of elk skin, and lined inside with hair or with wool, take the place of shoes. This footgear is absolutely necessary for the purpose of adjusting their snowshoes, by means of which they easily walk on the snow. These snowshoes, made in lozenge shape, are more than 2 feet long and a foot and a half broad \* \* \* important for hunting the wild beasts, especially the elk (probably moose). These animals, larger than the largest oxen of France, walk only with difficulty on the snow; therefor it is easy for the savage to overtake them, and often with an ordinary knife fastened to the end of a stick (spear) they kill them, and live upon their flesh. After having dressed the skins, in which the savage are skillful, they sell them to the French and the English who give them in exchange loose coats, blankets, large kettles, guns, hatchets, and knives.

"The occupation of the men is hunting or war. That of the women is to remain in the village, and with bark fashion baskets, pouches, boxes, bowls, dishes, etc. They sew the bark with roots, and with it make various articles, very neatly wrought. The canoes are also made of a single sheet of bark, but the largest can scarcely hold more than six of seven persons. It is in these canoes made of bark that they cross the arms of the sea, and sail on the most dangerous rivers, and on lakes from four to five hundred leagues in circumference.

"There is nothing equal to the affection of the savage for their children. As soon as they are born, they put them on a little piece of board covered with cloth and with a small bearskin, in which they are wrapped, and this is their cradle. No sooner do the boys begin to walk than they practice drawing the bow; they become so adroit in this that at the age of 10 or 12 years they do not fail to kill the bird at which they shoot.

The thing which most shocked me when I began to live among the savages was being obliged to take my meals with them; for nothing could be more revolting. When they have filled their kettle with meat, they boil it, at most, three-quarters of an hour, after which they take it off the fire, serve it in basins of bark, and distribute it among all the people who are in their cabin. Each one bites into this meat as one would into a piece of bread. Their meals are not regular, as in Europe; they live from day to day. While they have good food they use it, with-out being troubled as to whether they will have any at all for the following days.

They are devoted to tobacco; men, women, and girls, all smoke the greater part of the time. To give them a piece of tobacco pleases them more than to give them

their weight in gold.

"This mission is about 80 leagues from Pentagouet, on the river Kinibeki. We are at most only 2 days' journey from the Eng-lish settlements; it takes us more than a fortnight to go to Quebec. It was natural then, that our savages should trade with the English, and there are no advantages that these letters have not offered to them, for the purpose of winning them; but all their efforts have been useless; and nothing has been able to detach them from their alliance with the French. The only bond which has united them to us so closely is their firm attachment to the Catholic faith. They are convinced that if they submited to the English they would soon be without any missionary • • and that gradually they would be plunged back into their former unbelief."

In an account written a good many years later, Father Rasles continues: "Our savages have so destroyed the game of their country that for 10 years they have no longer either elks or deer. Bears and beavers have be-come very scarce. They seldom have any food but Indian corn, beans and squashes. They crush the corn between two stones, reducing it to meal; afterward they make of it a porridge, which they sometimes season with fat or with dried fish. When they are without corn, they search for acorns, which they value highly; after having dried these, they roast them in a kettle with ashes in order to take away their bitterness.

"At a certain season, our people go to a river where during 1 month the fish ascend in so great numbers that a man could fill 50,000 barrels in a day, if he could be equal These fish are a sort of a herto that work. ring; they crowd upon each other to the depth of a foot and are drawn up as you would draw water. The savages put them to dry for 8 or 10 days."

From the Relation of 1647, "The father asked of them three things-the first was, to give up the liquors of Europe, when ensues great intoxication among the savages. The Abnaquois promised to avoid these excesses."

From the Relation of 1651-52-"The people of Naranchouak-at all times the most influential of this region-show proof of their love for Jesus Christ by their ac-tions. They said to the Father, 'As for the demon of drunkenness that thou hadst driven out of our cabins, on thy first visit, the English brought it back as soon as thou didst leave us; but it must now be exterminated forever, for it deprives us of our lives, causes murders among us, and makes us lose our wits, regarding us like madmen. Let us go this moment and find the Deputy of the English and speak to him as follows Thou Deputy of Pleimot and Boston, paint our words on paper, and send them to those whom thou art dependent; and say to them that all the allied Savages dwelling on the river Kenebek hate firewater as much as they hate the Hiroquois; and that if they have any more of it brought hither to sell to the savages, the latter will believe that the English wish to exterminate them."

From the Relation of 1661-62\_"The Iroquois have directed their course eastward, toward New England, there to fight the Abnaquiois, savages of docile nature, and very susceptible to all good influences. They dwell on the banks of the Kenebeki, and cultivate a country so delightful, ac-cording to their account, that they maintain, that the Son of Him who made all things, more peaceful than their wherein to so-journ." choosing to become a savage found no land

Letters from Father Jean Enjalran, 1676-"These savages appear to me the most reasonable; and although in their manner of living one may with truth call them savages, their nature appears to me in some sense much more amiable than that of many Europeans."

In Maurault's "History of the Abnakis," (p. 15), we find-"These Abenakis were not wont to show their discontent or hatred by oaths or blasphemies; they have the greatest horror of imprecations and blasphemies; and there are no words in their language to express these, so often uttered by Cana-

Father Pierre Roubaud went to Montreal in July of 1757 with a band of Abnakis, and then accompanied the French and Indian forces led by Montcalm against the English at Lake Champlain. Soon after leaving Montreal, the savages gave a war feast. In another encounter, 300 English were cut to pieces. The captives taken by the Indians were cruelly treated, and it was with difficulty that the French could moderate the ferocity of their allies. The missionary did what he could to keep in check his own neophites, the Abnakis. He was disgusted at the insatiable and brutal ferocity of the Ottawas, which they displayed in hideous acts of cannibalism. He records—"I went to shut myself in my tent, and gave myself up to the reflection that religion and humanity can suggest in circumstances of this I had not thought of taking measures to warn my Abnakis against such shocking excesses. Although example is a formidable stumbling block in matters of morals, they were incapable of proceeding to these excesses; at the time when they were plunged deepest in the darkness of paganism, they never descried the odious name of cannibals. Their humane and docile temper on this point distinguished them even then from the greater part of the savages on this con-

Living words today—these chronicles of a brave and stalwart brotherhood, reiterating their faith in a savage tribe yielding to enlightenment, bring to us more powerfully than our television a picture of early America.

Congressman Griffin Reports on Student substituted for the limited scholarship-Loan Program and Landrum-Griffin Reform Act

EXTENSION OF REMARKS OF

### HON. ROBERT P. GRIFFIN

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. GRIFFIN. Mr. Speaker, when a bill actually becomes a law, the author of the legislation and those most responsible for its enactment are on the spot. With an anxious eye, they watch and hope that the new law will really operate in the manner intended. As helpless observers, they can only stand and wait while the law is being administered by another branch of the Government-the executive.

Promises and claims made as to thousands of bills which never become law are soon forgotten-20,164 bills were introduced in this 86th Congress; only 1,130 became law. But the bills that survive the rigors of the legislative process must stand in a lonely light to be judged.

During my 4 years of service in the House, I have had the rare privilege to cosponsor, and play a leading role in the enactment of two bills of great national importance which have become legislative landmarks. I refer to the student loan program, which is part of the National Defense Education Act of 1958: and to the Labor-Management Reporting and Disclosure Act of 1959-Landrum-Griffin Act.

Mr. Speaker, as this 86th Congress prepares to adjourn, it will be of interest to the Members of the House, I believe, to have a report on the administration and operation of those two significant legislative programs.

#### I. STUDENT LOAN PROGRAM

When Congress passed the National Defense Education Act late in the 1958 session. I doubt if there were many who envisaged the tremendous impact that would be felt throughout the Nation's colleges and universities as a result of one portion of the act entitled: "Loans to Students in Institutions of Higher

Although the story of the 1959 labor reform bill is well known; few people are familiar with some of the circumstances and events which led up to adoption in the House of the student loan program.

When administration recommendations were first made to Congress early in 1958 for legislation in the field of education to bolster our national defense capability, no reference was made to student loans, although a limited scholarship program was proposed to encourage talented high school graduates to continue their education.

The more I studied the proposed national defense education bill, as a member of the House Education and Labor Committee, the more I became convinced that a student loan program should be grant-proposal.

Relatively few students could have benefited under the scholarship program as proposed. Moreover, some danger existed that politics could creep into the selection of the chosen few.

On the other hand, Mr. Speaker, I was convinced that a great many more talented students would be willing to invest in an education if they could just borrow part of the needed funds from a revolving fund at low interest rates and have the opportunity to repay it over a long period after graduation. It was ridiculous-but true-that high school graduates could finance the purchase of expensive automobiles on easy credit terms-but few loans were available for ambitious but needy students who wanted a college education.

Fortunately, some of my colleagues on the Education and Labor Committee agreed with my views concerning the need for a loan program. They included Representatives Elliott, of Alabama; Frelinghuysen, of New Jersey; Wainwright, of New York; and Haskell, of

Delaware.

In May 1958, at our request, the Office of Education of the Department of Health, Education, and Welfare called into conference a number of outstanding administrators in the field of education who had experience with student loan funds. This conference and several that followed proved very friutful.

Later, in June 1958, several of us huddled with Dr. James R. Killian, the head of Massachusetts Institute of Technology who was then the President's special adviser on science and technology. Dr. Killian enthusiastically approved the student loan idea and he agreed to set up a meeting with President Eisenhower.

Thereafter, in early July 1958, Dr. Killian, then Secretary of Health, Education, and Welfare Marion Folsom, and Representatives Wainwright, Frelinghuysen, Haskell, and I met with the President at the White House. We were joined by Representative Robert J. Mc-Intosh, of Michigan who, while not a member of the committee, was intensely interested in active in promoting the loan proposal.

After a long discussion with President Eisenhower, which included some sharp and critical questions stemming from his experience as president of Columbia University, we left the White House satisfied that President Eisenhower would be with us.

From that point, Mr. Speaker, legislative developments moved rapidly. The appropriate education subcommittee, under the able chairmanship of the gentleman from Alabama [Mr. Elliott], agreed to incorporate the loan program in the comprehensive national defense education bill. The scholarship title was eliminated. The bill sailed through the House on August 8, 1958, and was passed by the Senate on August 13, 1958.

The student loan program provides for the establishment by each participating college and university of a loan fund from which needy and able students may borrow for the purpose of entering upon, or completing, courses of higher educa-

A participating college or university is required to contribute to the loan fund a sum equal to one-ninth of the amount supplied by the Federal Government.

An eligible student may borrow up to \$1,000 in any one year, and as much as \$5,000 in the aggregate. To be eligible, a student first, must be in need of the loan to pursue a course of study; second, be capable of maintaining a good academic standing; and third, have been accepted as a full-time undergraduate or graduate student

Interest on the loan, at 3 percent, does not begin to run until 1 year after graduation. The borrower can take up to 11 years after graduation to repay the loan.

Taking special note of the teacher shortage, the Senate added an amendment-which was retained-whereby borrowers who teach in public elementary and secondary schools will be eligible for cancellation of 50 percent of the loan if they teach full time for 5 years or more.

Currently there are 1,410 colleges and universities throughout the Nation participating in this program. Loans averaging \$500 have been made to well over 130,000 students in 50 States.

In this session, Congress has appropriated \$53,430,000 to meet the Federal Government's share of the funds which participating institutions have substantiated as being required.

Mr. Speaker, in a status report issued in June 1960, the Honorable Lawrence G. Derthick, Commissioner of Education. made these significant comments:

Contrary to what might have been expected the student loan program has not had the effect of drying up other sources of student loans; rather, it has stimulated non-

Federal loan activity.

Besides the very significant change in attitude toward using credit as a means of helping to finance a student's higher education and the increase in loan activity, there is evidence that the program is encouraging a change in the approach of many colleges and universities to student financial assistance. It is a change that can perhaps be characterized as the "umbrella" approach, Characterized as the "umbrella" approach, i.e., bringing all the institutions' financial aid resources-loans, scholarships, grants-inald, work opportunities-to bear on the problem of meeting the particular needs of each financially needy student. Such an approach, when combined with a careful assessment of financial need, offers considerable promise of achieving the optimum use of both national defense student loan and institutional student aid funds.

The comments below are illustrative of a great many that are pouring into the U.S. Office of Education:

From a junior college in Texas: "It ap-Pears that the National Defense Education Act has focused attention on the need for a student loan fund and more local participation by the public for scholarship programs in general. We have 13 new scholarships given by clubs and organizations that amount to tuition, books, and fees."

From a large western land-grant university: "Moneys received under the National Defense Education Act have been invaluable in that they have made it possible during

the past year for 350 students to obtain additional higher education."

From a State college in Alabama: "The college had no loan or scholarship program whereby a student could finance any significant part of his education. The national defense loan has helped to remedy this situation. Also, the national defense student loan program has had the effect of releasing a number of campus jobs to students who for one reason or another do not qualify for a national defense loan."

In my own State of Michigan, the impact of the student loan program is tremendous. About \$2 million will be available during the 1960-61 academic year for loans under the program to students in 39 Michigan institutions of higher learning. If the loans average \$500. about 4,000 students will be benefited next year in Michigan alone.

As it is operating, Mr. Speaker, the national student loan program is a dream come true for thousands of deserving students with the will who were searching for a way to a college educa-

Perhaps the Members of Congress who worked so hard to advance this legislation-and there were many-can be pardoned if they are a bit proud of this landmark achievement. It may be understandable that I treasure a letter received from Secretary of Health, Education, and Welfare, the Honorable Arthur S. Flemming, which reads in part as follows:

Many of us who have devoted long years to college teaching and administration can well wish that we may have made an educational contribution as far reaching as that made by you as a cosponsor of the national defense student loan program.

#### II. LANDRUM-GRIFFIN ACT

Mr. Speaker, this report concerning the adminstration of the Labor-Management Reporting and Disclosure Act of 1959-Landrum-Griffin-will not be as comprehensive as a report soon to be released by the Department of Labor based upon 9 months of operation-under

Although the act is still new, it is not too early to notice and begin to evaluate some significant results flowing from its enactment. Quietly but effectively, the Department of Labor has been assembling and putting into operation the necessary enforcement machinery to make the law meaningful.

I should like to take this opportunity, Mr. Speaker, to commend Secretary of Labor James P. Mitchell, Assistant Secretary John J. Gilhooley, Commissioner John L. Holcombe, and those associated with them, for their patient but firm and fair handling to date of the complex and difficult responsibilities of enforcement.

Referring to the new act in a recent statement, the Department of Labor said.

There has been an awakened interest on the part of many union members in the operation of their organizations. This has been reflected in the many letters and complaints received by the Bureau during its first half

In a speech delivered before the labor relations law section of the American Bar Association on August 30, 1960, Assistant Secretary Gilhooley revealed the following up-to-date statistics concerning the volume of enforcement activity handled by the Bureau of Labor-Management Reports:

Reports received, initially processed and made available for public disclosure.... Requests for information have been handled\_\_\_\_\_

Title I of the act, generally known as the bill of rights, is designed to guarantee rank-and-file workers important, fundamental democratic rights within their unions. Many examples could be cited to demonstrate that the bill of rights is having a wholesome impact upon the conduct of union affairs. The following item is illustrative:

The Akron, Ohio, Beacon Journal of January 18, 1960, carried the following

The Landrum-Griffin labor law has restored all 12,000 members of Operating Engineers Local No. 18 to the status of first class citizens in their union.

For the first time, all of them can vote in union elections and all can run for union

Before the Landrum-Griffin law was passed, the union was split into A, B, and C class members. Only class A members could vote or run for office. They comprise about half of the total membership.

The new Federal labor law bars such dis-

In his recent address before the bar association, Assistant Secretary Gilhooley noted that the bill of rights in the labor law requires still further amendment to provide protection against racial discrimination. He correctly pointed out that in many respects the AFL-CIO constitution and ethical practices code goes even beyond the compass of title I, and he said:

It occurs to me that if the AFL-CIO (and other labor organizations) vigorously promote these concepts, the need for enforcement proceedings under title I will certainly diminish as the years go by. The trade-union movement would do well to bear this in mind.

Title II, which requires labor organizations to disclose the details of their financial condition and transactions. should ultimately prove to be one of the most effective provisions of the act. Under this title the Secretary of Labor is given authority to conduct audits of account and to determine the accuracy of reports filed. Some concern has been expressed that criminal penalties attached to failure to file, or false filing tend to discourage union members from seeking or retaining union office. Unfortunately, most of the concern stems from the spreading of misinformation and misunderstanding. It should be carefully noted that criminal penalties apply only to one who makes a false statement, knowing it to be false; or to one who

knowingly fails to disclose a material fact; or who willfully makes false entries.

It should also be noted that simplified report forms are available for smaller unions and that the Bureau of Labor-Management reports and its area representatives stand ready to assist union officers, singly or in groups, with any problems concerning required reports.

The language of title II requiring the filing of conflict of interest reports may need clarification before the constructive purpose intended can be fully achieved. The Bureau has indicated that questions of interpretation may account for the fact that a relatively small number of reports have been filed under this provision. Thus far in 11 months, only 96 employers, 137 union officers and 71 labor relations consultants have filed such reports.

Title III of the act provides protection for local unions placed under trusteeship by an international union. The Bureau reports that over 300 trusteeships, or more than half of those known to be in existence when the law was passed, have now been dissolved. Under the new law an unscrupulous union official will think twice before seeking to impose a trusteeship over a subordinate local to obtain control of its finances or to otherwise manipulate it for undemocratic purposes. Title III of the act protects and promotes local autonomy in union affairs.

Title IV of the act which governs union election procedures is one of the most important parts of the new labor law. While many complaints have been filed under this title, the Bureau has moved cautiously and only recently filed its first suit challenging a union election under the new law. The Washington (D.C.) Post of July 29, 1960, carried the following story:

The Labor Department yesterday filed its first suit challenging a union election under terms of the Landrum-Griffin labor reform law.

Labor Secretary James P. Mitchell brought the action in U.S. District Court in Newark, N.J., asking that an election of officers last February by the Independent Petroleum Workers Union of Bayway, N.J., be set aside.

In his recent address, Assistant Secretary Gilhooley made this remark which is worthy of notice:

The best way, it seems to me, to keep the Government out of [union] affairs is for the trade union movement to take the initiative more vigorously than ever before to insure that all unions go even beyond the spirit of the Landrum-Griffin bill in administering their affairs. Here is an idealistic mission that can capture the imagination of union people. Here is indeed a moral crusade worthy of the militancy showed by the great [union] leaders of the past in their successful efforts to improve the material welfare of their membership.

For our part, I can assure them that in such a crusade they will have the whole-hearted support of the Department of Labor. It is not enough to say, as did one highly placed leader before the passage of the Landrum-Griffin bill, that the trade-union movement lacked the power to do a cleansing job. The power is now available to them if they will use it.

Tangible evidence of the cleansing effects of the new labor law is reflected in a Washington (D.C.) Star news

story—March 13, 1960—which reads in part as follows:

James Hoffa, Teamster president, announced publicly following the President's signing of the act that he had sent telegrams to his locals removing the ex-convicts who came under section 504 of the law. A private Department of Labor report indicated that more than 100 Teamster officials were suspended, although the Teamsters themselves will admit to only 5.

A 14,000-member Illinois local has been forced by its rank and file members to publish all that transpires in what were formerly closed leadership meetings. Attendance at the union meetings has so increased that a larger meeting hall had to be selected.

Mr. Speaker, in summing up its first status report on the new law, the Department of Labor said:

Reports received \* \* \* indicate that throughout the country union members have been expressing themselves more freely at their union meetings; union constitutions are being revised along more democratic lines; union members are obviously taking a greater interest in union elections; a number of ex-convicts holding union office in violation of the law have been removed from posts of leadership; trusteeships have been terminated; and, in most cases, both labor officials and employers have expressed their intent to comply with the law.

So far as rank and file union members are concerned, there is mounting evidence of their general support for the objectives of the new law. Illustrative is the following excerpt from an article which appeared in the February 1960 issue of the Great Lakelands magazine—formerly Inside Michigan:

UNIONS LOOK AT LANDRUM-GRIFFIN BILL

Recent statements appearing in union publications indicate that much of the opposition expressed in Washington previous to the enactment of the Landrum-Griffin bill, actually did not represent the opinions of large segments of organized labor. In fact, passage of the Landrum-Griffin reform legislation has aroused frankness and determination among many union officials, unheard of during the past decade.

For example, John L. Cooper, president of the Los Angeles joint executive board of the Hotel, Restaurant, and Bartenders Union, made the following observations in a speech on the west coast recently:

"In my opinion, had the Landrum-Griffin bill, as passed by the House of Representatives, been submitted by secret ballot referendum to only members of organized labor, union members would have voted in favor of this legislation by an even greater majority than when this bill was first adopted in the House of Representatives."

Opening Battle Lost for Social Security Medical Aid Program—But Fight for Objective Will Go On

EXTENSION OF REMARKS

### HON. FRANK KOWALSKI

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES
Wednesday, August 31, 1960

Mr. KOWALSKI. Mr. Speaker, we who believe in a social security program of medical aid for our senior citizens may

have lost a battle this past week but we have not lost the war.

I, for one, intend to carry on the fight until we have enacted into law the kind of program that the overwhelming majority of the American people want.

It is significant that when the Senate acted on the Anderson-Kennedy amendment, which would have established an insurance-type program of medical care for the elderly, under the social security system, only one Republican Senator voted for it.

When that vote came up, where was the vaunted "new Republicanism"? Where were the so-called Republican liberals?

It is significant also many of the very arguments which have been used against the social security approach to the problem of medical aid for senior citizens are the selfsame arguments that were used against the Social Security Act itself when it was adopted a quarter of a century ago.

The plan for medical aid under social security is being called socialistic by its bitter opponents; it is called regimentation. In 1936, the Republican National Committee referred to social security as a counterfeit insurance policy. Would it dare make such a charge today, after 25 years during which it has proved to be one of the greatest pieces of legislation ever adopted in America?

Mr. Speaker, the social security approach to medical aid for senior citizens is a sound, practical approach. It would utilize governmental machinery already established and whose worth is proved by 25 years of successful experience. It would not involve the huge subsidies to private interests which the President advocated in his program. And, above all, it would not involve the obnoxious means test.

To those who believe that we need an insurance-type program, it is heartening to find that the New York Times has editorially reaffirmed its support of the social security approach to this problem.

It is heartening, too, to find that the people of America are supporting us in this fight. This support comes not alone from senior citizens, but from Americans of all ages. The people, Mr. Speaker, want a medical care program under Social Security, and the voice of the people will be heard.

More Waste Uncovered—Bridgeport Post Criticizes Grain Storage Program

EXTENSION OF REMARKS

### HON. FRANK KOWALSKI

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES
Wednesday, August 31, 1960

Mr. KOWALSKI. Mr. Speaker, the Symington subcommittee has brought to public attention the vast amount of waste which has been so prevalent in the administration's grain-storage program. It has also underscored the conflicts of interest in which administration

officials have also had a financial interest in storage facilities.

An excellent editorial on this subject was carried August 30 by the Bridgeport (Conn.) Post.

The editorial reads as follows:

#### MORE WASTE UNCOVERED

Tremendous and inexcusable waste and lax attention to conflicts of interest in the Federal grain storage program have been revealed in a Senate report. The sharply worded document was signed by four Democrats and two Republicans after a year-long probe by a subcommittee headed by Schator SYMINGTON.

The report is, of course, highly political, coming as it does just before the national campaign gets up steam for the November election.

However, the facts are there and they should be made known, whether they will have a bearing on the election result or not.

More than \$2,700 million went into grain storage costs in the last 7 years. Contracts between the Government and 11,444 commercial warehouses and elevators. Stored farm surpluses rose from less than \$1.5 billion in 1952 to nearly \$10.5 billion this year. Storage and handling costs have mounted from \$263,000 a day in 1952 to \$1,253,000 a day at the present time.

The report points out that after the probe got underway the Agriculture Department studied its storage costs and in July effected a 19-percent reduction. This will save the taxpayers \$100 million this year—but it could have been done before, with a saving of at least \$1 billion.

There will be a lot more said about this during the campaign, including revelations that Federal employees also had interests in storage elevators. It is a sordid picture, at the rate of a million and a quarter a day.

We have had this horrible situation with Us 20 years, at least. It is high time that millions of American taxpayers, as well as the farmers, got some consideration. The candidate or the party that can solve this knotty problem will have the unanimous support of the American people.

Voting Record, 85th Congress

EXTENSION OF REMARKS OF

### HON, JACK WESTLAND

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960 Mr. WESTLAND. Mr. Speaker, I

firmly believe it is my duty to the people of the Second District of Washington State who elected me to represent them in Congress to compile and publish a record of my stand on important issues. It has been my custom during the four terms I have served in Congress to present my vote on this issue in the Con-GRESSIONAL RECORD so that it will be available to all my constituents.

More than 14,900 pieces of legislation have been introduced in the House of Representatives during the 2 years of the 86th Congress. Only a small percentage of the legislation introduced got to a vote. Even so, more bills came to a vote than can conveniently be placed in this voting record. Therefore, I am confining my record to issues of national importance and those of particular concern to constituents of my district.

To simplify my voting record, I have placed these measures into categories according to the general fields they encompass, although some are difficult to classfy because they are broad in scope and may overlap. If there are questions concerning any of these issues or my stand on a particular issue, I will be happy to answer them when I return to my district following adjournment:

BILLS AFFECTING NATIONAL DEFENSE, NATIONAL SECURITY, AND FOREIGN AFFAIRS

Voted for H.R. 11713 appropriating \$211.4 million for the development of atomic energy. This legislation included funds for many peaceful uses of atomic energy such as medical research, medicine, food preservation, power, and agri-

Voted for H.R. 10777 for construction at Army, Navy, and Air Force bases here and abroad.

Voted for H.R. 2260 to extend the draft to July 1, 1963, to extend the Doctor Draft and Dependents' Assistance Act, and to suspend the limit on strength of the Armed Forces.

Voted for H.R. 12049 to increase the authority of the National Aeronautics and Space Agency, the civilian space agency. Voted for H.R. 7007 providing \$485.3 million for NASA.

Voted for H.R. 11998 appropriating \$39.3 billion for the Defense Department, sufficient funds so we will continue to have a first-class defense system capable of deterring any aggression.

Voted for H.R. 11510 extending the Mutual Security Act to protect the security of the United States. Voted for H.R. 12619 providing appropriations for mutual security.

Voted for House Concurrent Resolution 369 expressing the sense of Congress that the Communist Chinese regime should not be seated in the United Na-

Voted for House Concurrent Resolution 459 expressing the sense of Congress that any variation in traditional interpretation of treaties with Panama shall only be made pursuant to treaty. In effect, it expresses opposition to any action to permit official flying of the Panama flag in the Canal Zone.

Voted for H.R. 12311 giving the President authority to cut the Cuban sugar quota as requested by the President in order to stop American aid to the Castrocontrolled government in Cuba.

BILLS AFFECTING VETERANS, SOCIAL SECURITY, EDUCATION, AND WELFARE

Voted for H.R. 12580 to provide grants to States for medical care of the aged. Program is voluntary, not compulsory, is under State control and is designed to help older persons who are unable to meet the costs of necessary medical aid. Bill also extends coverage under old-age, survivors, and disability insurance, unemployment compensation, and other programs under Social Security Act.

Voted for H.R. 7903 to extend for 2 years the veterans' guaranteed and direct home loan program to stimulate home construction.

Voted for H.R. 12259 to provide Federal aid to school districts on basis of need and local effort for emergency school construction. Voted against H.R.

10128 which provided no criteria for need or local effort and which would have led to Federal interference in local school matters.

Voted for House Concurrent Resolution 465 expressing the indignation of the Congress at desecration of houses of worship and other sacred sites.

Voted for H.R. 8601, the civil rights bill guaranteeing right to vote for all qualifled citizens.

Voted for H.R. 10341 to authorize grants-in-aid to universities, hospitals, laboratories and other public or nonprofit institutions to strengthen their programs of research and research training in science related to health.

Voted for H.R. 6769 and H.R. 11390 providing funds for school construction and operation in so-called federally impacted areas, such as those we have in the Second District.

BILLS AFFECTING ECONOMY, BUSINESS, AND TRADE

Voted for H.R. 10213 authorizing the Treasury to purchase \$1 billion of FHA and VA mortgages to stimulate construction of housing.

Voted for H.R. 11207 authorizing an increase of \$150 million, to \$725 million, the amount of loans the Small Business Administration may have outstanding.

Voted for S. 2611 to facilitate extension of credit to small businesses.

Voted for H.R. 10644 to increase subsidy for domestic ship construction to 55 percent of cost in foreign yards.

Voted for H.R. 10572 authorizing and directing the Secretary of Agriculture through the Forest Service to continue to manage national forests under principles of multiple use.

Voted for H.R. 47 to amend the Internal Revenue Code to permit stock of a small business corporation which is owned by husband and wife to be treated as owned by a single shareholder for purposes of determining number of shareholders in such corporations. The bill is of particular benefit to small businessmen in community property States such as Washington.

Voted for H.R. 5421 to provide differential payments for construction of fishing vessels to stimulate construction of fishing boats in the Pacific Northwest.

BILLS AFFECTING FARMERS AND AGRICULTURE

Voted for H.R. 8609 to extend for 2 years the Agricultural Trade Development and Assistance Act for sale of surplus abroad. This act helps to reduce our surplus commodities.

Voted against S. 1901 to provide unnecessary price supports for tobacco.

Voted for S. 662 to create an Agricultural Research and Development Commission to find and promote new industrial uses for farm products.

Voted for H.R. 9331 to extend the spe-

cial school milk program for children. Voted for S. 2917 to provide that the price of whole milk and butterfat shall be supported at not less than \$3.22 a hundredweight and 59.6 cents a pound respectively.

#### BILLS AFFECTING LABOR AND GOVERNMENT EMPLOYEES

Voted for H.R. 5610 to provide increases in benefits under the Railroad Retirement and Unemployment Compensation Acts.

Voted for H.R. 5640 to extend benefits to Temporary Unemployment Compensation Act of 1958 for 3 months to jobless whose State payments expired before

April 1, 1959.

Voted for H.R. 8430, the Landrum-Griffin bill, to protect rank-and-file union members, honest labor unions, and the public against labor racketeers and gangsterism.

Voted for H.R. 9883 to increase pay of postal workers and other Federal em-

plovees.

Voted for H.R. 12677 to increase the minimum wage to \$1.15 an hour and to

extend coverage.

Voted for S. 2575, identical to my bill H.R. 8787, to provide health insurance program for retired civil service workers. BILLS AFFECTING GOVERNMENT OPERATION

Voted for S. 50 providing for Hawaiian

statehood.

Voted against H.R. 3151 providing for withholding income taxes imposed by certain cities from pay of Federal

Voted for H.R. 12326 appropriating \$3.9 billion for public works construction including funds for Sammamish River flood control project, Snohomish River navigation project, Point Roberts survey and the Skagit, Nooksack, Snohomish, and Stillaguamish Rivers flood control surveys.

Voted for H.R. 10569 to prevent the loading of city mail boxes with "occupant addresses" junk mail from Members of

Congress.

Voted for H.R. 5160 to extend to June 1, 1961, the authority of the President to propose plans to Congress for more efficient reorganization of the Federal Government.

Voted for H.R. 10495 authorizing \$925 million a year for fiscal 1962 and 1963 in Federal aid for primary and secondary highway systems and their urban extensions. Provides nearly \$50 million for roads in Washington State in fiscal 1962.

Voted for H.R. 7634 authorizing certain public works including a survey at Point Roberts and the Snohomish River

navigation project.

Voted for H.R. 3 reaffirming States rights to legislate in the fight against communism.

Mr. Speaker, I believe this is about as complete a voting record that is possible to compile. Not all will agree with each and every vote, but I have always voted for the things I believe are right and for what is in the best interest of the Nation and the people whom I represent.

#### A National Urban Housing Program

EXTENSION OF REMARKS OF

### HON. ABRAHAM J. MULTER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES Thursday, September 1, 1960

Mr. MULTER. Mr. Speaker, recently, I had the pleasure of meeting Bill vanden Heuvel, my party's candidate for the House from New York's 17th District. I was impressed by his ability, his experience, and his insight into the problems that the country faces at this time. Because housing legislation is under the jurisdiction of the House Banking and Currency Committee on which I serve, he has sent to me a copy of the remarks he made on the subject of urban housing. I commend them to the attention of our colleagues to demonstrate his fresh and exciting approach to this vital national question:

New York City has fast become a concrete pasture where the rich pay exhorbitant rentals, the poor suffer in disgraceful housing, and middle-income familes have no place to

Taxpaying families are leaving the city. Slums are blighting neighborhoods faster than bulldozers can clear new ground. Neighborhoods are being broken up with drastic social consequences. Families are told to relocate; but there is no place to locate.

New York needs 430,000 new housing units. What has happened in New York City is typical of what has happened in large cities throughout the Nation. As a longtime resident of New York City I have watched with despair the rapid deterioration of large sections of this center of culture and commerce. Despite all the talk about urban renewal, there has been pitifully little action.

If today's urban renewal and housing problems are to be solved, we must focus our efforts in three directions: Planning, coordi-

nation, and procedures.

#### A. PLANNING

Perhaps the greatest inadequacy of our urban renewal program today lies at the planning stage. Without adequate plans, little progress can be made. The Federal Government must maintain a thorough, permanent master plan, subject to constant review in order to keep pace with dynamic city growth and change. The master plan should include a perpetual inventory of the Nation's housing.

In determining which urban renewal programs to promote, we must consider the needs of all areas of the country in the light of population changes, growth potential, natural resources, factories, and labor markets. We need to know about the people who will live in new homes-about their earnings, rent payments, shops, jobs, and children. We need to know about their employers and about transportation, utility, and communication facilities. We must consider local governments, schools, playgrounds, health centers and religious institutions. All of this varied knowledge must then be reduced to writing so that it will be available to those responsible for taking action in the urban housing field. In order to make this information available to the general public, we need a Bureau of Housing Information with a complete library of housing data.

Federal and State relocation practices must be thoroughly restudied. One of the most serious of the urban renewal problems is the movement of persons displaced by new projects. It is expected that during the decade of the sixties 5 million units will be demolished, vacated, or lost from the housing market of the country. The majority of residents are moved without concern for their neighborhood ties. Stipends, where paid, are inadequate and vary in amount according to the proposed use of the land and the particular government or authority con-cerned. Indeed, in New York City, for example, there need be no relocation payment if the land is to be used for private residential dwellings or for commercial buildings. It is time that we give all of the displaced a uniform, fully compensatory pay-

Another important problem is the displacement of small business. Public improvements and housing programs should be designed to allow space for small commercial We should encourage loans by the Federal Small Business Administration and other lending agencies to enable displaced firms to relocate. Local authorities should maintain advisory and information clearinghouse services for small businessmen.

#### B. COORDINATION

Urban renewal will never be able to stop deterioration until all agencies, authorities, and committees involved coordinate their efforts. The prime requisite for such coordination is the creation of a Federal agency which would create the master plan that I have previously referred to and which would direct the efforts of all groups to achieve the goal set forth in the plan. In addition, there should be established a joint committee of the House and Senate with the same type of accumulated experience and cohesiveness as the Joint Atomic Energy Committee which has been so successful in assuring coordination of the Nation's atomic energy activities.

We also need to enlist and coordinate the efforts of citizen groups throughout the Nation. They should be urged to work closely with local planning commissions. Public hearings should be held on specific neighborhood problems as well as on overall city planning. The Federal Government should render technical and leadership assistance to citizen groups to make them more knowl-

edgeable and effective.

#### C. PROCEDURES

By procedures, I refer to the tools, the techniques, by which urban renewal is accomplished-condemnation, subsidies, etc. These procedures must be improved. provement will come only through hard, expert study because the problems are often quite technical,

The basic tool of urban renewal is the power of government to condemn land for new uses. One of the most serious difficulties in acquiring properties through condemnation has been the high costs of the properties acquired. Condemnation awards on illegally occupied and slum buildings are based on income from the premises, whether the income is legally or illegally obtained. lation must be enacted to exclude illegally obtained income in determining condemnation awards.

Another major urban renewal weapon is the use of Government subsidies for the acquisition and maintenance of property. The most widespread use of such subsidies has been the title I program under the National Housing Act. The following steps are necessary to implement the title I program:

1. Increased Federal subsidies to stimulate further local government activity.

2. Increased State aid to local municipalities to decrease the local government's share of writedowns.

3. Creation of urban renewal revolving funds, under which increased taxes derived from renewed areas would be used to finance additional urban renewal, thus placing urban renewal programs on an essentially selfliquidating basis.

4. The title I program should be administered uniformly throughout the Nation, particularly with respect to the acquisition and clearance of property and relocation of tenants, in order to elminate various abuses that have risen in certain cities.

Perhaps the most important device for development of our cities is the use of lowinterest mortgage loans. That is the most effective way of reducing rentals and costs. A 2-percent difference in interest rates can mean over \$10 less rent per month and doubling of the amortization period can reduce rents by an even greater amount. States and local municipalities should also

be encouraged to make low-interest, longterm mortgage loans. Consideration should be given to the participation device, common in commercial bank financing, under which various authorities could share the costs of a particular project and thereby spread the burden of urban renewal.

Similarly, urban middle-income housing, particularly cooperatives, could greatly benefit from greater use of FHA mortgage insurance. The effect of the 11/2-percent rise in the interest rate on FHA insured mortgages since 1952 has been to increase enormously the cost of housing. For example, that increase has increased the financing cost by \$3,000 on a \$15,000, 20-year loan, or almost \$5,000 on a \$15,000, 30-year loan. Such premium interest rates must be eliminated for urban housing.

One of the most important tools of urban renewal is the construction of public housing. It is my sad duty to report, however, that public housing is today held in poorer regard than ever before. The remedy for the ills of public housing is not simply the building of new units, although many more units of public housing are required. Unfortunately, certain measures, initiated in the name of public housing and slum clearance, have created more problems than they have solved. For example, the tearing down of slums and their replacement with large-scale public housing units has not cured delinquency or the other social ills once identified solely with slum life. On the contrary, artificial communities have been created which, in many cases, are of less value than the original slum communities in helping to maintain stability in the lives of their tenants.

The widespread idea that slums should automatically be replaced with residential housing is an inadequate and naive concept. Many slum areas which were replaced by residential projects should have been allowed to become industrial areas or to have remained clear as parkland, Public housing should have been located in suitable residential areas providing adequate playground, park, and recreational facilities.

Housing legislation of earlier periods inadvertently stimulated the exodus of middleclass families to the suburbs leading to substantial deterioration in many urban areas. Public housing was established principally in central slum areas. Land available for FHA units, intended for families in the middle-income brackets, was primarily in outlying areas. That pattern set the stage for a greatly accelerated move to the suburbs, since FHA financing made FHA housing extremely attractive.

If that movement had been gradual, there Would probably have been time to prepare for the redistribution of urban population and to cope with the concomitant disruption of economic and social patterns. Both the suburbs, which received the bulk of the shifting middle-class population, and the urban centers could have avoided severe problems in such areas as schools and transportation. Most important, it would have been possible to bring gradually into existence some type of regional planning.

The fact that the land on which the slums

stood is considered the proper site for public housing has tended to make land costs a dominant consideration and has thereby contributed through the use of the "superblock" to higher population densities than would have otherwise been considered proper.

The majority of the families who entered Public housing at its inception constituted a cross section of the population, except of course for the wealthy. By the end of the depression most of the middle-class families had left public housing of their own accord or had become ineligible to remain due to rigid economic criteria for continued occupancy. They were replaced primarily by the postdepression poor, such as families on welfare and first-generation minority groups. In many instances, those families were quite unfamiliar with urban middle-class culture and "asocial behavior" became a regular feature of project life.

In more and more neighborhoods, residents made it plain that they did not want public housing located near them. Site selections thus became a political football. Antipathy to public housing spread to neighborhoods made up primarily of second-generation Americans. That situation still exists today, and it is unrealistic to ignore it.

It is apparent that the superblock project, almost a necessity for economic reasons, has exaggerated social problems in several ways. First, the numbers dwelling in such high density projects swamp the remaining residents in a neighborhood. Second, newcomers to urban life are often unfamiliar with modern elevator apartments. They find the colorless, bare, institutional appearance of the buildings discouraging to a feeling of personal pride in their homes and entirely lacking in warmth and community cohesiveness. Thus, the treatment of the buildings by their tenants is considered, in many instances, uninformed by the sympathetic observer, and shocking by the unsympathetic observer. Third, the superblock effectively serves to isolate the project from the sur-

rounding community.

It is fair to say that the administration today regards public housing as an adjunct of the title I program. Public housing is used merely to house those persons displaced by title I developments who cannot make private arrangements. Moreover, the social problems of public housing have increased at an alarming rate. Attempts by munici-palties to enlist Federal aid in meeting these problems have been fruitless.

Today's tally on public housing is very mple. The number of units of public housing available is grossly inadequate and those units which are available are poorly utilized and administered.

We must end the present stepchild role of public housing. We should particularly attempt to bring public housing into the urban renewal program. It would be desirable to make mandatory, to some extent at least, the use of title I markdown procedures in acquiring public housing sites in expensive central locations. Those municipalities which are eager to experiment with scattered sites and spot clearance and with new designs which stress amenities should definitely be encouraged. When a local author-ity is forced to turn to social workers for guidance, that action should be encouraged and financially aided. It is most important that local agencies be encouraged, by Federal aid if necessary, to build for the nonaverage families—large families, single-person families, and handicapped, and blind families.

This review has demonstrated, I believe, that progress can be made only by an administration which is sensitive to the needs of large cities. Only such an administration will have the experience and the energy to reach effective solutions to the myriads of special problems presented.

Hon. Carl Durham

SPEECH OF

HON. JOHN L. McMILLAN

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES Wednesday, August 31, 1960

Mr. McMILLAN. Mr. Speaker, I take great pleasure in saying a few words in

behalf of my good friend, Dr. CARL DUR-HAM, who was sworn in as a Member of Congress on the same date and the same hour as I was in 1939. Dr. Durham will be greatly missed by not only the Members of Congress but by the people throughout the United States, as he was one of the leading members of the House Armed Services Committee and was an authority on atomic energy.

I have thoroughly enjoyed Dr. Dur-HAM's friendship during the 22 years we have served as Members of the House of Representatives, and will look forward to seeing him often during his retire-

I wish for him all the happiness and good health possible during these years of retirement.

### Twentieth Anniversary of the Ukrainian Congress Committee of America

EXTENSION OF REMARKS

### HON, FRANK M. CLARK

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES Thursday, September 1, 1960

Mr. CLARK. Mr. Speaker, this fall Americans of Ukrainian descent will celebrate the 20th anniversary of the founding of the Ukrainian Congress Committee of America and I should like to pay tribute to this outstanding group of citizens, and especially to those residing in the 25th Congressional District of Pennsylvania which I represent in Congress.

Twenty years ago a group of patriotic. freedom-loving Americans, representing 40 million of their Ukrainian countrymen enslaved by Soviet rule, founded the Ukrainian Congress Committee of America. Since that time 21/2 million Americans of Ukrainian ancestry have sought to inform the world of the struggle and desire of the Ukrainians for independence from the Soviet Union. By exposing myths of Soviet unity and proposing means of defeating the Soviet in the cold war, the Ukrainians in America seek to keep alive the spirit of independence and individualism so characteristic of their enslaved countrymen, unable to speak to the world for themselves.

The Ukrainians declared themselves independent in 1918. In 1920 they were taken under Soviet domination. However, those 2 years of freedom still remain in the hearts of the Ukrainians. To be independent once again is their goal. To reassert their individualistic culture and to reap the benefits of their rich land in their own name is the desire to be always cherished.

The members of the Ukrainian Congress have worked arduously to keep alive the memory of the Ukrainian people. But they are realistic enough to realize that under existing world conditions and the might of the Soviet rule, independence for the Ukrainian people is not likely to come tomorrow. The Congress has done equally as valuable work in informing the world of the struggles not only of the Ukrainians but of all enslaved

peoples behind the Iron Curtain. Just to make their fellow Americans and the other free peoples throughout the world aware of Soviet disunity is a vast and rewarding task. If we are to win this war of the minds against tyranny, we must teach and keep alive those values and freedoms we think so valuable. This is what the Ukrainian Congress is doing. I congratulate it on its fine work, and I encourage it to continue to promote its ideals throughout the world.

### Celebration of 100th Anniversary of Jane Addams

EXTENSION OF REMARKS

### HON. EDITH GREEN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES Thursday, September 1, 1960

Mrs. GREEN of Oregon. Mr. Speaker, the celebration this year of the 100th anniversary of Jane Addams' birth gives us a superb opportunity to commemorate what this dedicated woman did in pioneering the field of social work, in furthering the basic American dream of brotherhood, and in questing after the fundamental goal which underlies all our hopes of social and individual betterment—world peace.

Jane Addams' unyielding and eventually successful fight against the evils of child labor, her insistence on freedom of speech, racial amity and equality-all these crusades into which she threw her full energies and her boundless talentsearned her the enmity of those who fought every kind of reform. At one point in her campaign against child labor, she was offered \$50,000 as a contribution to Hull House-her first loveif she would drop the campaign. Her opposition to child labor, instead, became more insistent. Her patriotism, her integrity, her good intentions were vilified by those who dreaded the achievement of her objectives. These attacks continue even today, when she is no longer here to defend herself.

In 1919 Mrs. Addams convened the Second Women's Peace Congress at Zurich, Switzerland. Sixteen countries were represented at that conference, and the delegates voted to form a permanent organization, the Women's International League for Peace and Freedom. That organization continues to work today for the great objectives for which Jane Addams gave a lifetime of devotion. In the cause of eliminating man's inhumanity to man, Jane Addams' name stands forth prominently among the truly great women, not alone of our country and our times, but of all nations and all eras.

I wish to call the attention of my colleagues to an outstanding address given by Agnes E. Meyer in June at the Jane Addams centennial dinner of the Women's International League for Peace and Freedom. Under unanimous consent, I include her remarks in the Recorn:

A VISION OF GREATNESS

(Address by Agnes E. Meyer to the Jane Addams centennial dinner of the Women's International League for Peace and Freedom, Hotel Willard, Washington, D.C., June 20, 1960)

After I got out of college I tried journalism for a year on the old New York Morning Sun. A young man reporter who was also beginning his journalistic career was sent out to cover a peace meeting. He returned to the city desk without a story. The editor asked him why. He replied "Because the meeting broke up in a row." He was promptly fired as having no sense of humor. In those days Jane Addams' fellow pacifists were called wild-eyed radicals who were a fit subject for ridicule and laughter at their expense.

It is of major importance at this moment, when peace is threatened and our Nation's international prestige has been seriously weakened, to celebrate the centennial of Jane Addams' birth. For serious as our situation is today, if we read Miss Addams' own account of her struggles to create worldwide understanding and good will, we realize she worked in a period just as disturbed as ours. When she describes how powerful the isolationist forces were after World War I, we have reason to hope that the American people today have a more enlightened interest in foreign affairs and a deeper understanding that to save our lives and our freedom, we must bend every effort for the maintenance of peace.

There are two main lessons to be learned from Jane Addams—that women should be in the forefront in this endeavor to protect future generations from the futile carnage and destruction which have always been the inevitable results of war—and secondly, that democracy must be made to work here at home if we are to be strong enough to lead the world toward peace. And by strength she was not referring to armaments but to the deep sense of security and the moral force that are engendered when a free people, united in high purposes, work cooperatively and individually for their realization through constructive action.

You may well ask whether our beleaguered, confused, and leaderless people have any common purposes. There can be no doubt that one purpose is common to all Americans. We all want peace. We want a world that need no longer live under terror of annihilation, a world in which no nation need live in fear of other nations.

Therefore, I call upon American women today to realize their power for good-I call upon them to emulate Jane Addams in demanding that in spite of the summit debacle, in spite of Mr. Khrushchev's vituperative language, in spite of the uprising in Japan, they assert categorically that they want disarmament discussions to continue as the basis of peaceful coexistence with Russia and all other nations. Now I realize only too well that anyone who resists the propaganda that we now arm to the teeth, produce bigger and deadlier bombs, and "get tough" with the Russians may be attacked as an "appeaser" if not an outright sympathizer with communism.

Think of what happened only yesterday. An abrupt summons was sent to the Nobel Prize winner, Linus Pauling, by the Senate Internal Security Committee because he advocated, while addressing your organization, what he has often said before, that we cease the testing of nuclear bombs. This is the type of authoritarian behavior one may expect from the ignorant members of this committee. If they behave in this ruthless fashion toward one of our greatest scientists it is enough to intimidate less famous people from suggesting the end of nuclear testing and the continuance of international discussion on disarmament.

The Senate Internal Security Committee is deliberately trying to destroy free speech. It is high time the Senate put an end to this committee. Not only is this committee a menace to free speech, but some of its members demean the dignity of the Senate by their absurd but dangerous antics, indulging in high living and low thinking.

Any woman who is intimidated by the pos-

Any woman who is intimidated by the possibility of these McCarthy-like attacks by the Senate Internal Security Committee should remember that Jane Addams met the same persecution with serenity. Because of her call for international peace negotiation she was called a Red, she was hounded by Secret Service agents, and innocent meetings at Hull House—even to hear music—were under police surveillance for subversive activities. This persecution was due mainly to the fact that she insisted on preserving the constitutional rights for free speech, free assembly, and the maintenance of civil rights.

My friends, we women have no personal axes to grind, we have a great idea to proclaim. Our deepest concern lies in saving the world from another holocaust. We must now have the courage of Jane Addams. We must demand that rational discussion between our Nation and all Communist nations be continued. We should also demand that the dialogue between the contending candidates for the Presidency be conducted on a high level, so that the American people may decide the issues on their merits. Otherwise our relationship to the Russians may well degenerate into an arms race.

Now let's face the fact that this will be difficult. The right to dissent from the administration's handling of foreign affairs has already been challenged when criticisms of the summit failure were expressed. Already it has been asserted by some political leaders and journalists that, if you criticized the President, you are disloyal, if you think that peace between us and the Russians is still possible you are "soft on communism."

If this vituperation continues instead of fighting the spread of communism in Asia and Africa, we shall find ourselves, if more restraint is not exercised fighting each other here at home to defend free speech, free assembly, and other civil rights guaranteed by the Constitution.

My friends, no emotion can so easily be stirred up as hatred—hatred of group against group here at home—and hatred by our Nation of other nations who have different philosophies of life.

Alas, I wish it were an easier task to encourage love of our fellow human beings regardless of nationality, race, creed, or ideology. But since this is the greatest task of mankind today—to light once more the flame which Jane Addams ignited—the passionate desire for mutual understanding, regard for the other fellow's point of view, tolerance even in the midst of an ever augmenting hostility, I call upon your distinguished organization, the Women's International League for Peace and Freedom, and all American women to realize that their greatest moment, their greatest opportunity for human service has come.

We American women must not wait for the Government to tell us what to think and what to do. We must rely on the American genius for voluntary action and organize constructive programs in such a way that our Government officials will be obliged to respond to our leadership. We women must act. For people who look too long upon evil without opposing it go dead inside. They get paralyzed like a chicken looking at a snake. Sometimes I fear that is the way our Government officials and our people are reacting to communism. What we need in this country is not more reliance on words and smiles and good intentions; what we need is clear thinking and positive action.

Why should we American women not call another international convention of women, to be held at The Hague or Geneva, including the Communist women? Surely Communist women do not wish their children slaughtered and their cities laid waste any more than we do. Such a conference of women should say to the leaders of whatever country they represent: "You are at present headed toward mass murder and catastrophe. We, as the mothers of the race, emphatically object." Such a conference should be carefully planned in advance, But if the agenda were limited in scope, if we brought to bear on such a conference the whole barrage of social and scientific knowledge we possess today, it could not but be effective.

For example, I think this international conference could well call upon all of the governments that have representatives at the meeting to create a ministry of peace to co-operate with the existing ministries of war.

Gov. Adlai Stevenson has already called for such a peace agency to be placed under the State Department. I am merely amplifying that proposal by calling upon all governments for similar action. If the Communist hations refuse to do this, the free nations should take the lead.

These ministries of peace should not be composed only of diplomats but chiefly of people scientifically trained in such institutions as the Johns Hopkins School for International Relations; it should also have representatives of the physical and social sciences to analyze the tensions, rivalries, and hostilities that make for war.

Assuredly our country must become militarily strong as one deterrent of war. But we run the risk of being frozen into a garrison state unless these ministries of peace study the complex problem of unilateral disarmament as seriously as the ministries of defense now study the production of new and deadlier armaments. As the distinguished scientist, Dr. James R. Killian, has said, "We need to develop an arms limitation technology that represents the kind of creativity and advanced thinking that has gone into our military technology."

These ministries of peace could also ex-change information with each other, since scientific men speak the same language regardless of their native tongue. Preliminary conferences between them would be far more fruitful than the present ill-prepared summit meetings. In fact, these ministries, working together could agree upon the agenda of any subsequent summit meetings. For the question of peace under present international circumstances is not a matter of one or two meetings by the various Presidents and Prime Ministers; it calls for a long process year after year of rational discussion. If an international meeting of women made only this one demand for a continuous rational approach to peace it would serve notice on our masculine world leadership that the women of all nations reject war as a solution of international conflicts. Furthermore, if we American women should lead the way to such an international conference we would Prove ourselves worthy of the noble example which Jane Addams gave to her equally difficult and dangerous era.

#### The Honorable Edward H. Rees

SPEECH

OF

### HON. BARRATT O'HARA

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES
Wednesday, August 31, 1960

Mr. O'HARA of Illinois. Mr. Speaker, the Honorable Edward H. Rees has served 24 years in this historic Chamber and his voluntary retirement at the close of his present term brings a pang of sorrow to his colleagues on this side of the aisle as well as on the side of the aisle that so long he has graced. It can truly be said that ED REES leaves with the friendship and good wishes of all his colleagues. I shall miss him very much. When the 87th Congress convenes and, if I am reelected, I shall miss the occasional meetings with him, the occasional little chats, and the warming of the heart and the cheering of the soul that always he gave to others. I do not think that ED REES ever thought ill of another human being. He served in the House quietly, unobtrusively, but with great ability and a steadfastness to his convictions.

I am sure I speak, not only for myself, but for all my colleagues from Illinois in wishing him in the years of his retirement the choicest of God's blessings.

#### Air Force Research and Development

EXTENSION OF REMARKS

### HON. OLIN E. TEAGUE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES
Thursday, September 1, 1960

Mr. TEAGUE. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following article from the August 1960 issue of the magazine Nucleonics concerning Gen. Irving L. Branch's prediction for the nuclear ramjet program:

#### GENERAL BRANCH SAYS RAMJET WILL PRECEDE ROCKET, AIRPLANE

Gen. Irving L. Branch, head of the Pluto nuclear ramjet program, is confidently predicting the "atomic stovepipe" will fly before either the nuclear rocket Rover or the manned nuclear aircraft. Branch said last month in an interview with Nucleonics he knows of no problems, technical or financial, which will keep Pluto from successfully completing nuclear-test flight before 1964. He believes the rocket and the nuclear aircraft will follow close behind in 1965—in that order. Branch has responsibility for all three in AEC's Reactor Development Division.

This rare, outspoken optimism at high quarters probably accounts for a rivalry which appears to be budding over which U.S. reactor manufacturer will take over this responsibility for the ramjet when the reactor's developer, Lawrence Radiation Laboratory at Livermore, is ready to bow out. Westinghouse and General Electric are making signs that each wants the reactor contract.

The nuclear ramjet is an air-breathing propulsion system designed to operate at three times the speed of sound (mach 3); it would probably fly at high altitudes, then approach its bombing target at treetop level. At such speeds and low levels it would be extremely difficult to defend against.

#### "IT'S GOING TO WORK"

"I believe in the Pluto project; it's going to work, and it's a good program," Branch said. He also said the fiscal 1961 combined AEC-Air Force budget of \$28.3 million was adequate. "We don't need more money this year," he said. Branch criticized the Air Force and Army practice of rotating their nuclear reactor chiefs, hinting that the reason for Navy's nuclear successes was largely due to their being under the control of one man (Adm. Hyman Rickover) for so long. Branch said he would continue in his present position as joint military-AEC head of Air Force reactors until Pluto proved out, "\* \* unless I'm fired."

He said work was progressing equally well on airframe and engine. On the airframe, Convair, North American, and Chance-Vought recently completed studies for Branch. Also, C-V has spent \$1 million of its own money on airframe work and intends to be ready for volume production when the time comes. Currently, C-V has a small \$600,000 contract with the Air Force for developing navigational and guidance systems generally, but which Branch says will also have specific application to Pluto for terrain-avoidance flight.

#### BEYOND PROOF OF PRINCIPLE

Test schedule of the Tory II-A begins in November under the direction of Theodore Merkle, chief of the Pluto project at Lawrence Radiation Laboratory. Tory II-A is now looked on as a going, engineering-test reactor and no longer is called a proof-of-principle device. Livermore has the principal AEC contract to develop Pluto and Marquardt has the principal Air Force contract for nonnuclear components (primarily the ramjet engine). Marquardt also has a small subcontract from Livermore to do systems integration on the reactor being turned out at Livermore.

Tory II-A is a direct-air-cycle reactor; it is expected to be followed next year with Tory II-C, a higher power and temperature air-cooled reactor with considerably larger air flow than II-A. The II-A core is fully enriched uranium homogeneously mixed in beryllium oxide, with the core arranged so that air is ducted through passages along its length. About half the surface of the leading end of the core is devoted to air entries, some of them to be used as moderator rod shaftways. Diameter of the ducts is theoretically ideal at one two-hundredths of the length of the core.

Engineering problems of the reactor, once the test phase is entered this fall, are expected to be severe. Major problem is how to deal with the pressure drop of many thousand pounds per square inch as the core transfers its heat to the air stream; the drop is expected to be at its worst between the core and rear nozzie. Thus, the most important engineering problem to be dealt with in the Tory II-A tests, it is felt, is this problem of how to hold the reactor in the airframe in the face of unbelievable temperature and pressure variances between front and rear of engine. "You can't just screw it down with an aluminum bolt," an official joked.

#### PLUTO FUNDING

AEC officials estimate that Pluto will fly its first mission for a developmental cost of \$200 million; \$64.3 million of this will have been committed by the end of this fiscal year, \$21.7 million of this by the Air Force. The Air Force, however, has not as yet placed any urgent requirement on Pluto as a needed military system. But this doesn't worry Branch. He says his tendency is to look on Pluto as offering a means to a wholly new and different kind of propulsion. He sees Pluto as a vehicle upon which to launch new scientific knowledge and progress rather than a weapons system with a 25-percent payload factor (conventional bombers, incidentally, are rated excellent if they can carry a bomb load equivalent to 10 percent of their weight).

#### REACTOR INDUSTRY RIVALRY

Branch says that if General Electric were taken out of ANP-where it is prime direct-

cycle contractor he would be anxious to see it continue in the Pluto program. "It see it continue in the Pluto program. "It would be very possible to have GE come into the Pluto program, for the direct-cycle engine work on ANP and Pluto is practically identical." He said both fuel elements were beryllium-oxide and the only differences were slight—primarily metallurgical configura-tion. He pointed out that GE had done some fuel-element work for Livermore, enough "to show that GE has terrific capa-bilities." Branch said that the technical problems encountered in Pluto development were much simpler than those of ANP and pointed out that shielding was greatly reduced in the Ramjet by comparison.

General Branch and Irving Hoffman (who Branch says is his vice president in charge of Pluto) confirmed that Westinghouse wants to get into the reactor part of Pluto-possibly in a business connection with Marquardt. Also, industry sources have reported informal talks between Chance Vought (entire system), Marquardt (ramjet), and West-

inghouse (reactor).

If the decision comes to let Westinghouse in, it would only be after the final researchdevelopment woolgathering has been completed by Livermore and probably after the choice of who is to build the airframe has been made. Both decisions will come after the results of the November Tory II-A tests are in. Westinghouse again will find itself in a tough race with its old competitor, GE, in nailing down the Pluto reactor.

### Chelsea, Mass., Boys First To Die Invading Virginia

EXTENSION OF REMARKS OF

# HON. THOMAS J. LANE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. LANE. Mr. Speaker, under leave to extend my remarks in the RECORD, I include an editorial which appeared in the Boston Globe:

AN ILL OMEN 3 DAYS BEFORE BULL RUN-CHELSEA BOYS FIRST TO DIE INVADING VIRGINIA

(By Frank Leary)

"Whereas the government and citizens of Chelsea having received intelligence of the death on the field of battle at Bull Run, Va., of Philander Crowell, Jr., Thomas Needham, Thomas Harding, James H. Murphy, and George Bacon, members of Company H, Chel-sea Volunteers; it is hereby resolved \* \* \*."

Manassas, Va .- The bus carrying the Gettysburg College Civil War study group drew alongside a rambling auction shed on the Manassas-Centreville Road.

Here, during a brief stop, Francis F. Wilshin, superintendent of the Manassas (Bull National Battlefield Park, explained that it was in this area—Blackburn's Ford that the opening skirmish of the first major battle of the Civil War occurred on Thursday, July 18, 1861.

Touring the major battlefields of that war-as millions of Americans, North and South, will be doing the next 4 Civil War Centennial Years-Blackburn's Ford will remain only a bus stop on the gory road of 1861-65, that stretched from Fort Sumter to Appomattox.

Yet here on a sweltering summer's day nearly a century ago occurred a clash of arms that snuffed out the lives of 5 young men, all from a single Mashachusetts community, left the mark of death on 8 other

homes in Greater Boston, not to mention the 20 wounded, and served notice on Northern firebrands that there would be more to quelling this secession than simply marching into Richmond.

Chelsea, than a city of about 13,500 had reason to be proud of its H Company Volunteers. They and the five men who were to die on the outskirts of Manassas-Crowell, Needham, Harding, Murphy and Bacon—had been the first to answer Mr. Lincoln's call for 3-year volunteers and their regiment, the 1st Massachusetts, was the first of the 3-year regiments to leave the State and the first to reach Washington.

The President's call had been issued in May and now, less than 3 months later, the tragic word from northern Virginia plunged the city of Horatio Alger, Jr., into the deepest mourning it would know until the following April, when the same Company H, storming the Rebel works before Yorktown, would leave four more Chelsea boys dead on the

One week after Bull Run, Chelsea paid tribute to its young hero dead and defiantly

resolved:
"No disaster nor defeat can impair our confidence in the justice of our cause, nor shake the firm determination of the people to sustain and carry it forward with a higher impulse and a grander devotion to its final triumph."

Those were trying days for the grandparents and great-grandparents of those who today complain about living costs and taxes.

Originally quartered at Faneuil Hall, the 1st Massachusetts later took over a vacant ice house on Fresh Pond, Cambridge, and finally moved into hastily constructed barracks in North Cambridge.

Besides the Chelsea Volunteers, the regiment included the North End True Blues (Company C); the Roxbury City Guards (Company D); the Pulaski Guards from South Boston (Company E); the National Guards of Boston (Company F); the Independent Boston Fusileers (Company G); the Schouler Guards of Boston (Company I); and the Chadwick Light Infantry of Roxbury (Company K).

The regiment left Boston June 15, traveling by train to Groton, Conn., by boat to Jersey City and by rail to Philadelphia, arriv-

ing on the 17th.

Approaching Baltimore later that same day (and remembering what had happened to the 6th Massachusetts only 2 months before at the hands of Southern sympathizers) ball cartridges were distributed, muskets loaded and capped. But there was no hostile demonstration.

The regiment reached Washington at 7 the night of the 17th, marched up Pennsylvania Avenue and was quartered in vacant buildings. The invasion of Virginia was

less than a month away.

The skirmish at Blackburn's Ford on July 18, 3 days before Bull Run, determined the future course of action. In being repulsed by Longstreet's brigade, McDowell, in command of the Union forces, learned that the Confederates were strongly entrenched along Bull Run in about an 8-mile line.

Instead of attacking the Confederate right, as originally planned, he set out to turn the Rebels' left with a surprise flanking attack.

For the 1st Massachusetts, the Ill-fated advance, less than 30 miles southwest of the Nation's Capital, was a bitter and costly baptism of fire. Besides the 5 Chelsea Vol-unteers, the 13 killed included 2d Lt. William H. B. Smith of Cambridge.

The regiment had been posted on the left of the road leading to the ford, Companies G and H under Lt. Col. George D. Wells being deployed as skirmishers. They were sharply engaged and suffered most of the loss.

What had been intended only as a movement to feel out the Confederate right got

out of hand, with the result that the Federal forces were smartly repulsed. tion had a depressing effect on Union morale but greatly boosted that of the Confederates.

After the sharp and costly engagement at Blackburn's Ford, the next day (Friday, the 19th) the 1st Massachusetts advanced to a point where its picket line opposed that of the Rebels until the battle of Bull Run the

following Sunday.

During that action three companies of the greater Boston regiment were posted as skirmishers and on special duty as outposts, but there was no engagement on their part of the field until the Union forces began to

retreat late in the day.

Even then there was little more than an exchange of shots on the skirmish line before a general retreat was ordered and the 1st Massachusetts withdrew, having lost Lt. Elijah B. Gill, Jr., of Company 1 (Schouler

Guards of Boston) killed and two wounded. For the 1st Massachusetts, Yorktown, Williamsburg, White Oak Swamp, Glendale, Harrison's Landing, second Bull Run, Fredericksburg, Chancellorsville, Gettysburg, and the Wilderness, would come later.

### Memorial to the Late Senator Richard L. Neuberger Urged

EXTENSION OF REMARKS

OF

# HON. HALL S. LUSK

OF OREGON

IN THE SENATE OF THE UNITED STATES Thursday, September 1, 1960

Mr. LUSK. Mr. President, I ask unanimous consent to have printed in the Appendix of the RECORD, along with my statement, a resolution by the Clatsop County Democratic Central Committee of Astoria, Oreg., urging the erection of a memorial to the late Senator Richard L. Neuberger.

There being no objection, the statement and resolution were ordered to be printed in the RECORD, as follows:

MEMORIAL TO THE LATE SENATOR RICHARD L. NEUBERGER URGED

The late Senator Richard L. Neuberger successfully sponsored legislation authoriz-ing the establishment of Fort Clatsop Na-tional Memorial, located in Oregon at the mouth of the Columbia River near the city of Astoria. This is Oregon's first national historical shrine. Construction is now underway and commenced in our State's centennial year, 1959. It was in 1958 that President Eisenhower signed into law legislation sponsored by the late Senator establishing Fort Clatsop National Memorial and its formal dedication is expected sometime next year.

Fort Clatsop has played an important role in our Nation's history. It was here that Meriweather Lewis and William Clark spent the winter of 1805-06, the western terminus of their historic expedition authorized by President Jefferson. For the first time men carrying the American flag had spanned the continent.

If it were not for the expedition of Lewis and Clark our Nation would not have been able to support its claim to the great Pacific Northwest. Our country's claim prevailed and as a result this district west of the Rocky Mountains is the only part of our domain which was neither fought for nor bought, but directly the result of the expedition of Lewis and Clark.

Mr. President, recently I received a resolution adopted by the Clatsop County Democratic Central Committee and the Demo-cratic Party of Oregon, urging the placing of a suitable monument or marker at the site of the Fort Clatsop National Memorial in honor of the late Senator Richard Neuberger.

I believe, Mr. President, that it is most appropriate and fitting that the memory of this great U.S. Senator be honored by such a memorial. I have considered it a privilege to serve as his successor.

The resolution follows:

"RESOLUTION OF THE CLATSOP COUNTY DEMO-CRATIC CENTEAL COMMITTEE, ASTORIA, OREG.

"Whereas it was due to the untiring work and devotion of the late Senator Richard L. Neuberger that Fort Clatsop was declared a national memorial by the Congress of the United States and the necessary funds were provided to carry out the work of making Fort Clatsop a national shrine; and

"Whereas the Fort Clatsop National Memorial is of great historical interest and will attract thousands of visitors in coming years: Now, therefore, be it

"Resolved, That the Clatsop County Demo-cratic Central Committee and the Democratic Party of Oregon acting jointly do go on record as urging that in recognition of Senator Richard Neuberger's work and devotion that a suitable monument or marker be placed at the site of Fort Clatsop in honor of the late Senator; and be it further

"Resolved, That copies of this resolution be presented to the Oregon congressional delegates, Department of Interior Secretary Seaton, Gov. Mark Hatfield, Mrs. Maurine Neu-berger, the Oregon Historical Society, Clat-sop County Historical Society, and other interested parties."

### The Ukrainian Congress Committee of America: A Tribute

EXTENSION OF REMARKS OF

# HON, ROBERT L. F. SIKES

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES Thursacy, September 1, 1960

Mr. SIKES. Mr. Speaker, 20 years ago one our most forthright and vigorous ethnic organizations was founded, the Ukrainian Congress Committee of America. This committee has performed yeoman service for the interests of Ukrainians at home and abroad but above all it has worked for the United States itself. What the committee has done so effectively is the patriotic task of demonstrating to all Americans the true nature of the Soviet Empire. It has shown, sometimes dramatically-and here I am thinking of its effective campaign for Captive Nation's commemorating Week-that the U.S.S.R. is not a monolithic empire of a homogeneous ethnic group; namely, Russians. But it is rather a massive empire of many oppressed people in which the Russians are only one group but they are the controlling group over all other peoples in the Russian Empire.

To call the attention of Americans to this fact has been a praiseworthy service of the Ukrainian Congress Committee. On this occasion I wish to express my gratitude to its leaders for their courage, Wisdom, and forthrightness in their efforts to enlighten the American people and in their general struggle against world communism.

Method of Detecting Carbon Monoxide car, and where no apparent reason or and Other Gases

EXTENSION OF REMARKS OF

### HON. CARROLL D. KEARNS

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES Thursday, September 1, 1960

Mr. KEARNS. Mr. Speaker, early in the next session-if my constituency sees fit to return me to Washington-I plan to introduce a bill for which it has been proven that there is a great need; namely, requiring the use of a method of detecting carbon monoxide and other gases, especially in public conveyances, where there has been tragic loss of life due to gas poisoning.

Mr. J. Roy Snyder, an outstanding young constituent of mine from Sharon, Pa., has spent a great deal of time developing a safety device which will sound an alarm when danger is imminent. He has a patent pending on his invention and recently demonstrated it to the Interstate Commerce Commission, where

great interest was shown.

Some of the reasons Mr. Snyder has devoted so much time to developing this

safety device are as follows:

First. There is no other method known of detecting and sounding an alarm in a motor vehicle. With the alarming increase of carbon monoxide poisoning and deaths, and the changing design of trucks and buses to cab over engine-thus placing the driver's location directly over the engine and exhaust manifold—this danger is being increased. Another increase in this respect is the exhaust outlets on trucks now carried to the top of the window of the cab. Some of these outlets are at such a height, and all are located on the right-hand side of the trucks, that on superhighways when a truck is being overtaken and passed by another truck, the passing truck's exhaust is blown directly in the open window of the truck being passed. In cabover-engine trucks, when the engine is checked for any purpose, the entire cab is constructed to raise. To do this, a joint is provided to allow the exhaust pipe to raise with the cab. If this joint is bumped or damaged, gas can leak directly into the cab. Extreme care must also be used when lowering the cab to normal position or the proper seal will not be made on the exhaust causing the same hazard.

Second. A great majority of trucks are now being equipped with either gasoline or bottled-gas type of heaters on which there is no provision of proper exhaust. Many drivers have met their deaths with this type of equipment, particularly in sleeper cabs of trucks. These are trucks designed with a bed in the cab of the truck. Many a driver has gone to sleep in these and never awoke. In the South and West trucks are now equipped with air conditioning. This requires all windows to be closed, thus increasing the danger of gas poisoning.

Third. With the alarming increase of truck accidents in which one truck runs into the back of the preceding truck or

cause can be found, it is quite logical to conclude, after assembling all the known facts from insurance investigation records, ICC reports, and 2 years' questioning of drivers and investigators, that human resistance is lowered by fatigue and, after arduous hours of driving, the known factors of carbon menoxide are lowered. The standard known effects of carbon monoxide on humans, as taken from the Bureau of Standards Tech Paper No. 212, shows that as little as 0.02 percent of carbon monoxide in atmosphere has perceptible effects in 11/2 hours and 0.04 percent is dangerous to life in 2 hours. It can be readily seen that this can be a major factor in national safety.

Fourth. All buses which are engaged in carrying the thousands of passengers each year should also be protected from this hazard. This can be attested to by such instances as the two busloads of Mexican workers who were casualties just this past spring and the 37 pupils overcome on the Pennsylvania Turnpike

this year.

Fifth. The Department of Education is also aware of this danger in the thousands of school buses engaged in transportation of our children each year, these being engaged in traveling over all kinds of unimproved roads where the danger of damage to the exhaust system is even greater. All kinds of safety equipment and fire protection have been installed on motorized transportation, but nothing has been done to overcome this greatest hazard, chiefly because nothing has been available.

There is now a unit available which is both economical and practical which will not only detect all gases and vapors, but will sound a visible and audio alarm when any such gas enters these vehicles.

The unit is self-contained in a box 5 by 7 by 2 inches and will operate from the electrical system of the bus or truck. It reads the air content of the vehicle on a meter and at all times shows any entrance of gas and the percentage of same, sounding an alarm or turning on a ventilation system to clear the gas and thus afford safety at all times to all occupants and make for greater safety on our highways which have become our Nation's greatest killer and where millions of dollars of material and equipment are lost each year.

Ted Connell Accepts National Leadership of Veterans of Foreign Wars of U.S.A.

> EXTENSION OF REMARKS OF

# HON. OLIN E. TEAGUE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES Thursday, September 1, 1960

Mr. TEAGUE. Mr. Speaker, under leave to extend my remarks in the REC-ORD, I include the following acceptance speech given by Mr. Ted C. Connell, of Killeen, Tex., at Detroit, Mich., during the annual convention of the Veterans of Foreign Wars of the U.S.A. as he assumed the post of national commander.

I commend it to my colleagues as the reflections of a young businessman of Texas whom I have known for a number of years and have come to greatly admire:

I would like to say something at this point which many of you might consider controversial. On first hearing many of you might disagree to some extent with what I say. However, I shall ask you to reserve any adverse judgment you might feel inclined to make until after you have thought it over. I feel certain that on reflection you will find yourselves agreeing with what I have to say.

I think you will all agree that we are living

today in a time of total crisis.

The crisis is nuclear. It is a scientific crisis, an educational crisis, an astronautic crisis, an economic crisis, a political crisis.

All this is true. But, more than all that, this is a period of moral crisis.

We are in a period of moral crisis not only on a broad international scale, but on a national level as well.

I don't think it is necessary to outline in detail the grim story of how the people of this Nation have been led down the garden path to a point where too many of us regard national cheating as a way of life. Despite the fact that church attendance has reached an all-time high in this country, we have reached an all-time low in the appreciation of, and adherence to, the principles and the tenets of morality which our churches teach. We have become almost used to scandals which at an earlier period of more vigorous morality in this country would have rocked the population to its foundations.

Certainly, we have always had a certain degree of corruption and graft in this country. We have always had our share of immorality. But, never before have we had such a bland acceptance of these things as

part of our national status quo.

Such words as payola, kickback, payoff, featherbedding, academic cribbing, income tax evasion, and that old GI word "goof off" have become such a familiar part of our language that we are hardly even shocked when we hear them applied to people who should be moral leaders in our community.

We have been lulled into an acceptance of fuzzy morality which is inducing in us a tendency to stampede away from responsi-

bility.

A French observer of the American sceneover a century ago-said this: "America is great because she is good and, if America ever ceases to be good she will cease to be

This is true and it is wise. Democracy gives to those who live under it benefits unrivaled by any other form of government. But, it also imposes upon those who live under it responsibilities unequaled in any other form of government. Democracy, if it works, must have from the people better-than-average honesty; better-than-average industry.

Are we better than average today? I am

not talking about the average among other peoples; I am talking about our own average. That's the only average that counts.

The majority of Americans are still good. But we have shown a growing tendency toward self-indulgence which could eventually be disastrous.

No nation can long survive an overdose of self-indulgence. We have the lessons of history before us: the great empires of Biblical times—the great empires of Greece and -a dozen or more empires which thrived in medieval Europe. They all fell prey to the temptation of national self-indulgence. This caused the inner decay which made them vulnerable to outer attack.

Lord Macauley, more than a hundred years ago, said this about the United States: "Your Republic will be fearfully plundered and laid waste by barbarians in the 20th century as the Roman Empire was in the 5th, with this difference; that the huns and vandals who ravaged the Roman Empire came from without and that your Huns and Vandals will have been engendered within your own country by your own institutions."

We carry with us no divine exemption from the lessons of history. The moral crisis which could lead eventually to internal decay is growing every day. And—hear this—it is my deep sincere belief that we, the veterans organization of the United States, must assume the leadership which will stem the tide of self-indulgence and irresponsibility which is threatening to submerge us.

This means we must always be true to this ideal: We are Americans first and we are

veterans second.

As veterans we have a certain hard-won and richly deserved rights. We enjoy certain rightful prerogatives and preferences. We have the right to certain Federal compensa-

But, in my sincere opinion, we above all others, must not permit ourselves to be sucked into the swirling stream of irresponsibility. We must not permit ourselves to be seduced into agreeing to blatant political raids on the U.S. Treasury to such an extent that financial integrity of the Nation could be imperiled.

It is we, the veterans organizations, who must fight against these latter-day huns and vandals who threaten us from within. We. above all others, must never join those barbarian hordes.

It is no excuse to say that others are raiding the Federal Treasury, so why shouldn't we do likewise? Why shouldn't we get our share of the plunder?

This is completely false reasoning. our job to oppose anyone getting something from the Government to which he is not entitled and which he does not deserve.

I am not advocating that we give up our rights. I am saying that we should not seek or accept nonrights-handouts which would never normally occur to us if some political didn't offer them to us in an election year. We must lead the fight against spiritual

delinquency. We must not permit ourselves to be trapped into becoming spiritual delinquents ourselves.

When Robert E. Lee was an old man he was asked by a widow woman to bless her son. General Lee replied to her: "Teach him he must deny himself."

This is a lesson many of us have stopped teaching in our homes. It is not being taught with sufficient strength in our schools. Even our churches are sometimes inclined to soft-pedal self-denial and to concentrate on the easier virtues.

As a result, we have come to a point where too many of us would rather be rich than right—where we would rather be safe than courageous-where we would rather be selfimportant than self-denying.

I said we would rather be safe than courageous. I know this is an unpopular thing to say; but how then can we explain the craven and timid attitude of this great country of ours toward Red China's barbarous and brutal treatment of American military and civilian personnel?

How else can we explain the shamefully ineffective way we have answered the arro-gance of Dictator Fidel Castro's communistic regime in Cuba-a small island which we liberated?

How else can we explain the cringing attitude we assumed over the U-2 incident in Soviet Russia?

We have all proved beyond doubt our patriotism in time of war. We now have the duty of proving ourselves eminently capable of a less glamorous but more exacttype of patriotism—the patriotism of

This is, if you will, a rallying call to all veterans and all veteran organizations to join in a crusade for improved national morality-a crusade which we must lead through our own example and our own dedication.

And what I say about the role we should and must play in the United States I extend to the broad international scene of the free world. No one hates war more than do vet-erans. Veterans are more aware of wer's Veterans are more aware of war's wastefulness and war's brutality. We have all seen it at firsthand. We know what it is.

Also, no one hates communism more than do veterans. We are, more than most, aware of its implications of slavery. We have all stood face to face against the hobnails of dictatorship and we know that the Communish brand of tyranny is no different, insofar as the humand mind, the human body, and the immortal soul of men are concerned, from the totalitarianism of the Nazis and the Fascists. The enemy may have changed its name, but it's still the same old enemy.

I also believe this: Other veteran groups in other parts of the free world fundamentally believe the same as we do. lieve that we have at our hand the instruments with which we can make an international network of potentially unlimited effectiveness

The number of nongovernmental agencies which are effectively combating communism on a no-holds-barred all-out international level is small. Outstanding among these are organized religion and organized labor. I firmly believe that through intelligent planning and industry we can build an equally strong force-a moral force and an intellectual force-organized veterans' groups of the world.

In all the lands of the free world there are tens of millions of veterans who, with local variations, feel fundamentally the same way we do. This could be a source of tremendous energy and persuasiveness, if we can only harness it effectively.

God knows I am not suggesting that we impair our separate identities as veterans organizations or that we contemplate any kind of organizational merger. That's not what I mean.

But I do mean this: As veterans we in this country and those in other countries have not even begun to realize our full potential for good in this deeply troubled world. We cannot realize this potential if we insist on working separately at local or regional levels—stamping out grass fires rather than attacking the catastrophe at its source on a massive, wholesale level.

This is what we must do if we are ever to achieve the maximum benefit from the brotherhood of idealism and integrity which we share with veterans throughout the free

### Anthony E. Candela

EXTENSION OF REMARKS OF

#### HON. ROBERT E. COOK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. COOK. Mr. Speaker, a very good friend of mine from Ashtabula, Ohio, Mr. Anthony E. Candela, recently made a European trip in which he visited Italy, Austria, part of West Germany, Switzerland, Leichtenstein, and Portugal. Prior

abroad:

to his trip. I asked him to represent me personally and to report to me any matters abroad which he thought would be of interest to me as Congressman from the 11th Congressional District. Upon his recent return, I have received the following letter which, I think, presents certain facts that should be brought once again to the attention of the Members of the House. I also feel these facts indicate that Mr. Candela, as a roving ambassador of good will for the United States, has been very observant of the present standing of the United States

> ASHTABULA, OHIO, August 30, 1960.

DEAR MR. COOK: I returned from Europe, arriving in New York City on August 26, after a most pleasant and informative tour.

I want to thank you for giving me the opportunity of representing you in the European countries which I visited. I called on many mayors and other officials of European cities in Italy, Austria, part of West Germany, Switzerland, the small country of Liech-tenstein, and Portugal.

Of all the countries I visited I found that Italy is in very bad condition politically. The Italian people are continuing to fall to the Communist side. I will give you some of the reasons.

The United States has spent \$50 billion throughout the world to fight communism, which brought no results. Russia has spent only \$2 billion and has won more results toward gaining prestige for the party and made every dollar count. With trained men instead of politicians they are getting a strong foothold in European countries, espe-

cially Italy.

The people feel that Nikita Khrushchev is continuously gaining leadership, especially against the United States. Many are leaning toward the Khrushchev bandwagon. With the trouble we are having in Africa and Cuba and the manner in which he has insulted our President and the United States the European people are getting the impression that he, Khrushchev, and the Russian people are world leaders.

I feel that the United States should do much more in these European countries, not with money, but with ways and means to win over the people. If Italy falls to the Communists then we must say that we will lose all Europe from the Western side.

I also feel that the workingman's conditions, especially wages, which are very poor, should be brought up to a living standard in Italy. Of course this is a problem for the

I will talk to you more about this when I see you personally in the near future.

In observing the civil defense activities

in these European countries which I mentioned formerly in this letter. I find that they have no appropriation for civil defense. If anything should happen, in case of war, the people of these countries will have a grave problem. The only way that I can see that they can save themselves from disaster is by going to the mountains for protection. Each city is protected by soldiers and sailors of the respective country who might be able to help evacuate people.

While I was in Florence, Italy, I had the honor of meeting Senator Young at the Grande Hotel. We had quite a pleasant chat with each other.

I enjoyed my trip immensely. We had perfect weather and I saw many beautiful and Interesting sights. I hope someday you will make this tour and see for yourself what is actually going on in these European countries.

I hope to see you in the near future. Very cordially yours,

ANTHONY E. CANDELA.

Donald G. Sutherland Receives Navy Distinguished Civilian Service Award

EXTENSION OF REMARKS

### HON. CRAIG HOSMER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES Wednesday, August 31, 1960

Mr. HOSMER. Mr. Speaker, recently the Secretary of the Navy awarded Mr. Donald G. Sutherland, a civilian employee at the Long Beach Naval Shipyard, the Navy's Distinguished Civilian Service Award. It was presented per-sonally by Rear Adm. Ralph K. James, USN, Chief of the Bureau of Ships, at ceremonies in Long Beach. Seldom has this award been so merited by any of its recipients.

Mr. Sutherland for over 10 years has conducted a magnificent battle to preserve the Long Beach Naval Shipyard against the consequences of subsidence that threatened its future. He mobilized community and civic forces. He successfully obtained action by the Legislature of California prerequisite to executing the legal steps required to bring subsidence under physical control. Mr. Sutherland exerted beneficial influence upon the myriad of private oil operators toward their eventual cooperation in a gigantic fieldwide repressurization that is pumping millions of gallons of water back into oil sands beneath the shipyard and bringing surface subsidence to a halt. As president of the Long Beach Naval Shipyard Employees' Association he has properly presented the case for this vital U.S. defense installation to the Congress and to the Navy Department.

All southern Californians, and, indeed, the Nation, owes a great debt of gratitude to Mr. Sutherland which cannot be paid in kind, but is symbolized by the Distinguished Service Award he has received.

On August 31, the Long Beach Independent-Press-Telegram newspaper commented appropriately respecting the award, as follows:

#### SUTHERLAND AWARD MERITED

An ex-Army man was presented a medal by the Secretary of Navy here last night, and the award was richly deserved.

Recipient of the award-the Navy's Distinguished Civilian Service Award-was Donald G. Sutherland, a parachute infantryman with the Army's 82d Airbone Division in World War II, who for a period of 8 years has headed the employes' association of the Long Beach Naval Shipyard.

He was presented the award, the highest the Secretary may confer on a civilian employe of the Navy, for an extraordinary personal effort in behalf of the Navy. No man has ever been more dedicated to a mission than has Don Sutherland in his unrelenting struggle to protect the Long Beach Naval Shipyard from destruction from subsidence.

Although four-times wounded in combat jumps for the Army during wartime, Sutherland has perhaps given even more of himself

in peacetime service to the Navy.

He first became alarmed over the dangers which subsidence posed to the future of the navy yard in 1053, and ever since he has worked tirelessly to enlist civic and governmental support to abate the problem.

Because of his constant prodding, poking, even protesting, some public officials might

think it is impossible to satisfy Don Suther-

land. But they are wrong,
Without such prodding, poking and protesting, some of them might give up too easily when the odds, and opposition, get tough.

Don Sutherland will be satisfied. But that day will not come until the future of the navy yard is secure and subsidence is no longer a problem for Long Beach.

### Encouraging Women To Take Part in Political Party of Their Choice

EXTENSION OF REMARKS OF

### HON. EDITH GREEN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mrs. GREEN of Oregon. Mr. Speaker, the past 60 years have witnessed great changes in this country. One of the most encouraging developments in modern times is the more meaningful role that women play in our communities and at the State level and at the National level. It is hard to realize that at the beginning of this century nearly 50 percent of our population did not have the rights and full responsibilities of citizenship. In 1900 women were allowed to vote in only four States of the Union. Women were a small minority among college graduates, in business, and in the professions. Even fewer held public of-

Today women are making their contribution as full-fledged citizens in all aspects of public life, including politics. One of the most outstanding leaders in this country is Katie Louchheim. She has traveled in every State of the Union, setting an admirable example and also encouraging women to more actively participate in the political party of their choice. Katie Louchheim is a persuasive speaker; she has a wonderful sense of humor. With her brilliant mind and understanding of national issues, she haswon the admiration and respect of not only countless women's groups but also men's groups across the country.

In her capacity as vice chairman of the Democratic National Committee, Mrs. Louchheim gave an excellent speech at the recent Democratic National Convention in Los Angeles. I believe her remarks will be of interest to the Members of this House and, under unanimous consent, I include them in the RECORD:

SPEECH BY MRS. KATE LOUCHHEIM, VICE CHAIRMAN, DEMOCRATIC NATIONAL COMMIT-TEE, BEFORE DEMOCRATIC NATIONAL CONVEN-TION, LOS ANGELES, CALIP., MONDAY, JULY 11, 1960

Good evening, for the women of the Domocratic Party, this convention marks the 60th anniversary of participation. It was in 1900 that the first woman delegate journeyed to a Democratic National Convention. traveled all the way from Salt Lake City to Kansas City-a long trip for those days-to make a seconding speech for William Jennings Bryan.

That year there were only four States where women were allowed to vote-a fact which probably accounts for the election of William McKinley.

This convention also marks the 40th anniversary of women's suffrage. Proudly armed with their newly acquired votes, women made their first appearance in numbers at the 1920 convention in San Francisco. A contemporary writer describes it like this:

"The ladies were arrayed across the gallery above the speaker's platform, where they lent beauty, dignity, and occasionally a piece of verbal counsel to the proceedings."

If the same writer could take a look at this convention hall I'm sure he would be astonished to find that the ladies present have traded in 1920's dignity in the balcony for

1960's bargaining position on the floor.

This year for the first time we have a woman chairing her State delegation. This trall blazer is the charming and able Congresswoman from Oregon, EDITH GREEN.

We have some other firsts for women in this convention. We have our first woman chairman of the committee on permanent organization headed by the capable national committeewoman from Michigan, Margaret Price. And as cochairman of the committee on rules and order of business we have another national committeewoman, a persuasive member of the Milwaukee Common Council, Vel Phillips.

Taken as a whole the women delegates and alternates to this 1960 convention are an impressive group. They serve in Congress and State legislatures. They hold top offices in their State, county, and city governments. Still others have their names on Democratic tickets and their sights set on the U.S. Senate and House and key posts in State government.

They are also wives, mothers, grandmothers, teachers, writers, businesswomen, labor leaders, and just plain homemakers. They have varied interests and backgrounds but they have in common a deep concern for their country and its future. They are issues minded, candidate minded and organization minded. In short, their common denominator is that they are politiciansfeminine gender.

Altogether 606 women delegates and alternates have come here to Los Angeles from the 50 States, the Commonwealth of Puerto Rico, the Canal Zone, the Virgin Islands, and the voteless District of Columbia.

Right here, as a voteless resident of the District of Columbia for 25 years, I would like to speak for the citizens of the Nation's Capital and ask all of you when you go home from this convention to persuade your State legislatures to ratify the pending constitutional amendment giving Washington the vote. We would like nothing better than to join you in 1964 in reelecting the Democratic President we all intend to inaugurate this coming January.

All the women here are proud to be politicians and especially proud to be Democratic politicians. They have met severe tests to earn their badges and they wear them with honor. So often women politicians are re-garded as a class apart, a special interest group with one foot in the caucus room but the other still in the kitchen. What kind of a woman is it, I'm asked, who can operate successfully in two such different areas?

Let's examine the portrait of a composite

woman politician.
She must have a natural drive to get things done, a sense of humor, and lots of listening power.

She must be agreeable but not timid; persuasive but not aggressive; determined but not inflexible.

She must have imagination and she must have patience.

She must be extremely sensitive but only to situations and people-never about what happens to herself. Where she is seated will be forgotten but her friendly smile will not.

She must be an expert cooperator and an unobtrusive innovator. No woman can ever

afford to be caught with a blueprint in her hand.

A woman politician must never let men think she knows it all. But she must never admit to knowing nothing. Men who admit ignorance may be considered honest but a woman would be considered dumb.

In other words the lady in politics must keep her aims high but her voice down.

The women who sit in this convention are past masters of these political techniques. They are year-round politicians. They know where the votes are and what the know where voters are thinking. They are expert tenders of the grassroots. They have tended them so well Mr. Benson may find he has another unstorable surplus-a surplus of determined Democratic voters.

Everywhere Democrats, Independents, and Republicans alike are talking about the lag in leadership, the lag in fulfilling public need, the lag in progress that has continually widened during the last 71/2 years of Re-

publican rule.

Throughout this period the Republicans have continued to regard government as a necessary evil at best rather than as an instrument of progress. To them government is not a means of fulfilling the aspirations of all the people, it is a threat, an imminent danger, an instrumentality which if unleashed might devour us all.

The concept of government as the property of the people has been lost and the Republicans have taken care of it much as a handyman who will do anything for a buck

except fix what is wrong.

As a nation we are weaker because the Republicans have attempted to run the Government as if it were merely a private enterprise with timid part-time board members in the office and the head man on the golf course.

Their downgrading of government has attracted to appointive posts only those men who consider public service as a form of private charity in which it pays the businessman to take some part but from which he withdraws and goes home as soon as he possibly can.

This is in sharp contrast to the attitude of Democrats who have always regarded government as an instrument of leadership. The Democratic Party recognizes the interdependence of modern society. While we may be a nation of individuals, rugged individualists alone cannot build atomic powerplants or electronics computers.

In fact, the only rugged individualists left in America are the billionnaires and the beatniks. The former have so much they needn't worry and the latter have nothing to lose but their beards.

The rest of us feel obliged to show more concern and would prefer a government by those who better comprehend the political and economic currents sweeping the world

today.

We know that we live only a few minutes away by missile from every other community on earth. We know we need the leadership of Democrats who are aware that the future of freedom here and abroad depends on the ability of the United States to find some hopeful course between the pessimism of armed isolation and the apathy of a spurious

If the Republicans are right, then progress is a perilous path. Certainly they have left it entirely to us Democrats to make the journey into a better tomorrow.

Of course we are better equipped than they for we are better travelers. willing to experiment, to break through the barriers of habit, to travel light, for ideas are not subject to the pull of gravity. All we need for our trip into the future are the Constitution, the Bill of Rights, and the dedication with which we are so fortunately endowed.

We know how to articulate a national purpose and how to fight for it. We can even enjoy arguing among ourselves as to how to translate our principles into action.

This is what we are assembled here to do. We are debating our platform and enthuslastically anticipating the balloting on candidates. We are not here as men or women, as Alaskans or Nebraskans, but as Democrats—with both a large and small "d."

We are here to return to government men and women who relish the challenge of our times. We are here to nominate a man to restore to government the vision and pride of workmanship our Democratic Presidents have written into history.

#### The Late William E. Keith

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES Wednesday, August 31, 1960

Mr. O'HARA of Illinois. Mr. Speaker, I would not wish the 86th Congress to complete its work before tribute had been voiced to the memory of William E. Keith, the manager of the Veterans' Administration regional office in Chicago and a dedicated public official who died on March 7, 1960. I had not heard of his passing until some time later, and the news came as a blow. There had not been a time when I had written him in behalf of a veteran constituent that I had not received from him prompt and sympathetic cooperation. This was the experience of other members of the IIlinois delegation, and the Congress of the United States, in noting his passing and paying tribute to his memory, is recognizing the kind of dedicated service that is the strength of our beloved coun-

Bill Keith was a veteran of World War I, and when World War II came he cringed a bit, his sister, Helen Herbold Lindquist, once told me when the new veterans called the old veterans treads." But Bill Keith's heart was with all veterans and their hearts were with

This is the biographical sketch of this great friend and champion of America's veterans furnished at my request by the Veterans' Administration:

BIOGRAPHICAL SKETCH OF WILLIAM E. KEITH

William E. Keith, manager of the Veterans' Administration regional office in Chicago, died March 7, 1960.

Mr. Keith was born July 1, 1898, in Chicago. A veteran of World War I, he served in the Army from 1917 to 1919. On his release from military service, he attended the University of Chicago, majoring in Business Administration. He received the LLB degree from John Marshall Law School in 1923.

From 1924 to 1933, he practiced law in Chicago. In November 1933, he joined the civil works administration in that city as a lawyer and investigator, and in October 1934 he became assistant department adjutant for the American Legion in Chicago.

Mr. Keith left his job with the Legion in January 1944 and worked as Veterans' Federal Employment Representative for the Seventh U.S. Civil Service region in Chicago until 1954. He was appointed assistant director for contact and foreign affairs service in the Veterans' Administration Department of Veterans Benefits in Washington, D.C. on May 24, 1954.

He was appointed assistant manager of the Chicago regional office in July 1955 and promoted to manager on June 18, 1958.

### Determination of Retail Price for Purposes of Excise Tax on Cigars

SPEECH

### HON. WILBUR D. MILLS

OF ARKANSAS

IN THE HOUSE OF REPRESENTATIVES Wednesday, August 31, 1960

Mr. MILLS. Mr. Speaker, your House conferees have reached agreement with the conferees of the other body on the bill H.R. 10960, which, you will recall, related to the determination of the retail price for the purposes of the Federal excise tax on cigars. The material contained in the House bill dealing with this subject was accepted by the other body and was not in conference. The other body did, however, add 10 substantive amendments to the bill unrelated to the specific subject of H.R. 10960, and these amendments were in conference.

The first of these amendments provided that a dividend received from a foreign corporation out of earnings and profits inherited from a predecessor corporation which was a taxable domestic U.S. corporation shall be subject to the regular intercorporate dividends received credit applicable to dividends received from a domestic U.S. corporation. This amendment is identical with H.R. 12036, which passed the House under unanimous consent on August 24, 1960, Under the conference agreement, this amendment was retained.

The second amendment added by the other body provided that a lease by a medical research organization to a medical clinic on premises adjacent to those occupied by the research organization shall be considered as being primarily for the basic purpose of the research organization if treatment of patients in the clinic, their medical history, and donated services of doctors in such clinics are used by the scientific organization for medical research purposes. This amendment was retroactive to years beginning after December 31, 1950.

Under present law rental income received under certain of such leases is taxable to the otherwise tax-exempt medical research organizations unless the leased property is used for a purpose which is related to the functions of such exempt organizations. However, whether or not the leased property is used for such a related purpose is determined by the facts and circumstances of each case and this amendment was designed to overcome what was considered by the other body to be too narrow an interpretation of the term "related" in the case of medical research organizations and their associated clinics.

The Treasury Department objected to this amendment on the ground that the determination of related purpose was essentially a factual determination which should be made on a case-by-case basis by field representatives of the Internal Revenue Service. The conferees deleted this amendment. However, the conferees were given assurance by the Treasury Department that it will expedite consideration of pending cases by the field representatives of the Internal Revenue Service so that the taxpayers involved may avail themselves of the administrative remedies provided by law and obtain a prompt decision in the matter.

The third amendment made by the other body corresponds substantially to the language of H.R. 5547 which was passed by the House on September 9. 1959. That bill was designed to limit certain tax advantages applicable to the Virgin Islands under the income tax laws and the estate tax laws. The House bill had been reported by the Finance Committee with several amendments relating to the Virgin Islands income tax provisions: First, a later effective date-since Senate action on this bill has been held up for a year; second, the present amendment, unlike the House bill, provides that gain or loss from the sale or exchange of securities shall not be treated as derived from sources within the Virgin Islands-and thus would not be eligible for any credits which the Virgin Islands government might extend. This amendment was deemed desirable since the mere fact that some security transaction took place within the Virgin Islands would not prove that the gain arose from Virgin Islands business. The other two amendments were essentially technical. Under the conference agreement, this amendment was retained.

The fourth amendment made by the other body was one of several amendments originally proposed by the Treasury and contained in H.R. 9625, the Technical Amendments Act of 1960. This related to the requirements for filing a declaration of estimated tax. The major effect of this amendment is that no declaration is to be required if the estimated tax of an individual can reasonably be expected to be less than \$40. Your conferees were of the opinion that this new provision would aid both the taxpayers and the Treasury in eliminating paperwork with respect to about 1.7 million annual declarations of estimated tax which show small or no tax liability. Under the conference agreement this amendment was retained.

The fifth amendment made by the other body adds a new section to the bill as passed by the House and provides that a taxpayer engaged in the business of farming may elect to deduct the cost of fertilizer and lime in the year in which it is paid or incurred rather than treating such cost as a capital expense to be prorated over the beneficial life of such items as the Internal Revenue Service has required in some recent cases. Your conferees were advised that this amendment is declaratory of the present practice of the field offices of the Internal

Revenue Service. Under the conference agreement this amendment is retained with certain clerical amendments which clarify the definition of the term "land used in farming."

The sixth amendment made by the other body would allow taxpayers a charitable contributions deduction for amounts paid to maintain an individual-other than a dependent or relative-as a member of his household during the period that the individual is a full-time student in the 12th or any lower grade at an educational institution located in the United States provided such individual is a member of the taxpayer's household under a written agreement between the taxpayer and certain tax-exempt organizations, which implements a program of the organization to provide educational opportunities for students in private homes. Under this amendment, the amount of such charitable deduction is limited, for each taxable year, to an amount equal to \$50 times the number of calendar months during the taxable year which fall within the period in which the student is a member of the taxpayer's household under the agreement described above. However, this amendment does not apply. to any amount paid by the taxpayer within the taxable year if the taxpayer receives any money or other property as compensation or reimbursement for maintaining the student in his household during such period. A number of House Members have introduced bills providing \$600 dependent's exemption for the taxpayer in these circumstances. Senate amendment provides this as a charitable contribution deduction instead. If a taxpayer qualified for the full \$50 for 12 months, he would get the \$600 deduction.

Under the amendment made by the other body, these new provisions would apply with respect to taxable years beginning after December 31, 1959, and under the conference agreement this amendment was accepted.

The seventh amendment made by the other body related to nonrefundable capital contributions made to the Federal National Mortgage Association. This amendment has substantially the same effect prospectively as the bill that passed the Congress last year but was vetoed because of the retroactive effect resulting from an amendment made thereto by the other body. As amended by the other body, this amendment is prospective only and is substantially similar to H.R. 7885 which passed the House on June 27, 1960. Under the conference agreement, this amendment is retained.

The eighth amendment made by the other body provides that the present 10 percent manufacturer's sales tax on mechanical lighters shall be either 10 percent of the manufacturer's sales price or 10 cents per lighter, whichever is the lesser. Your conferes were advised that this bill would overcome a competitive disadvantage that domestic manufacturers of such lighters are under as compared to the manufacturers of imported lighters. Your conferees were advised that the Treasury Department has no objection to this amendment and, ac-

cordingly, under the conference agreement, this amendment is retained.

The ninth amendment made by the other body amends the Internal Revenue Code of 1954 to provide substantially the same treatment for real estate investment trusts as present law provides for regulated investment companies. Under present law, regulated investment companies which distribute 90 percent or more of their ordinary income are taxed only on their retained earnings and the distributed earnings are taxed only to the shareholders. The same type of tax treatment is accorded to real estate investment trusts with respect to taxable years of such trusts beginning after December 31, 1960.

The substance of this amendment is the same as that of H.R. 12559, which was passed by the House on June 29, 1960. Under the conference agreement, this amendment is retained.

The tenth amendment made by the other body provides that a certain union pension fund shall be held and considered to have constituted a qualified employees' trust under section 401(a) of the Internal Revenue Code of 1954, and to have been exempt from taxation under section 501(a) of such code for the period beginning May 1, 1957 and ending May 11, 1959. Under the conference agreement, the substance of this amendment is retained with an amendment along the lines provided for certain pension funds in the conference agreement on H.R. 12536 which conditioned retroactive qualification of such funds only upon a showing to the satisfaction of the Secretary of the Treasury or his delegate that the trust has not in the period in question been operated in a manner which would jeopardize the interests of its beneficiaries.

Hon. Sid Carnahan

SPEECH

OF

### HON. W. R. HULL, JR.

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES
Wednesday, August 31, 1960

Mr. HULL. Mr. Speaker, when I first came to Congress in 1954 one of my earliest friendships was established with the able and effective Congressman from Missouri's great Eighth District, Sid Carnahan.

Mr. Sm was by that time already a veteran practitioner of the complex art of being a responsible representative of his people and he was unselfish in his assistance to more recent additions to the Missouri congressional delegation to the Congress.

As the second-ranking Democratic member of the House Committee on Foreign Affairs, he has participated in policy deliberations of epic importance. His wisdom and foresight in these deliberations are recognized by his many friends on both sides of the aisle.

SID CARNAHAN has ably served his country, his party and his people and he

enters his coming retirement from Congress with the affection and respect of his colleagues.

To Sm and his lovely wife go my warmest wishes for many future years of good luck, good health, and all happiness.

#### Federal Aid for Education

EXTENSION OF REMARKS

#### HON. EDITH GREEN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES Thursday, September 1, 1960

Mrs. GREEN of Oregon. Mr. Speaker, the State which I have the honor to represent in the Congress has long recognized that a first-class public-school system is an essential ingredient of democracy.

I am proud of the position the Oregon Democrats have taken on the vital question of Federal aid for schools, and I am proud to call the attention of my fellow Members to the recognition which one of my Oregon colleagues has received for his part in the struggle to improve our schools.

Since he came to the House in 1956, Charlie Porter has been an eloquent spokesman and an energetic worker with a variety of legislative achievements. I hope that the Congress and the people of his congressional district in Oregon will have the benefit of his able service for many years to come.

By unanimous consent, I include in the RECORD the text of a broadcast by Bob Fleming, chief of the ABC news bureau in Washington:

One of the more thoughtful, as well as energetic men, in the Congress is Charley Porter, a Democratic Representative from southwestern Oregon. Congressman Porter happens to be a neighbor of mine here in Washington, and he depresses me, at times, because he can return from a trip abroad or a strenuous week in his office still full of ideas and energies. But then, just because I am sometimes lazy, I should not criticize him.

I've been reading a recent statement he made in the House; one he titled "Good Education Costs Money." And it makes such good sense that I'd like to share it with you.

One point he made startled me, he noted that we spend more on 6 months' basic military training for a young man than the public schools spent on all his previous training.

Representative PORTER is an advocate of Federal aid for education. He says: "A basic fact to be considered in the financing of public education is that there is little or no relationship between the location of wealth in our country and the location of the children to be educated. We are a people continually on the move—35 million of us change our addresses every year. Thus the effects of education offered in a given school may be registered in a State far removed from where the education was removed."

He takes issue with two frequent criticisms of Federal aid. Of the complaint that such money would bring Federal controls, he points out that all proposed legislation specifically bans such controls, and even provides that when the money is given to

the States, they can decide the formulas for distribution within their States. And Representative Portes cracks down another complaint:

"The frequently heard argument that cost of collection and administration of the Federal dollar is too high, send a buck to Washington and 50 cents stays there for cost of administration, does not seem to have much basis in fact. Actually, the cost of collecting Federal taxes is approximately 44 cents per \$100. The cost of collecting State taxes ranges from 95 cents to \$2.34 per \$100. The cost of collecting and administering local revenues has run as high as \$5 to \$10 per hundred. Contrast this to the cost of administering 10 Federal grant programs—they average 1.2 percent of the amounts distrib-This means the cost of collecting the Federal tax dollar and administering Federal grant programs totals about 1.6 percent. That's quite a difference from 50 percent.

"The quality of education in the United States is a national issue, rather than a merely local one." Congressman Porter said. "Yet it is the only national problem that we have not attempted to solve on a local basis.

"Looking at statistics, we find that from 1870 to 1955, our population grew from 40 million to 165 million. During this period, while our general population increased 4 times, our total school population increased approximately 80 times. Under our present rate of population development, the bulge of the future will press down even more heavily on our already burdened facilities.

"More classrooms, and more teachers, are the two great needs. And many local governments cannot meet the demands without Federal aid. What is most needed, I think, is general understanding of the problem. And it was phrased, simply well, in the Rockefeller study of our schools:

"The Nation's need for good education is immediate, and good education is expensive. That is a fact that too many Americans have never been quite prepared to face. At stake is our national greatness, and our aspirations for the dignity of the individual."

### Safeguard Colorado River Water Supply

EXTENSION OF REMARKS

### HON. D. S. SAUND

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES
Thursday, September 1, 1960

Mr. SAUND. Mr. Speaker, in May of this year, the special master appointed by the Supreme Court of the United States in the Arizona against California water suit issued his recommendations. They produced consternation among the people of southern California, dependent on a water supply from the Colorado River.

In view of the fact that the special master, the Honorable Simon H. Rifkind, will allocate more than 4 million acrefeet of Colorado River water to the State of Arizona with a population of about 1 million people as against 3.5 million acrefeet to 7 million people in southern California, it is fitting for us to study the history surrounding the claims, appropriations, and settlements for the Colorado River water supply.

The need for a dam in the Colorado River for flood control and to regulate the supply of water in the lower Colorado River Basin was first emphatically voiced by President Theodore Roosevelt in 1907. Claims had been filed for Colorado River water by Palo Verde and Imperial Valleys in southern California before the close of the 19th century. The first water was diverted for agricultural purposes in Imperial Valley and Mexico in 1901. The Imperial Valley, situated 200 feet below sea level, was always in danger of floods during the river's heavy flow periods and short of water during the summer months when the river was low.

But there was powerful opposition to the building of such a dam from three sources: the State of Arizona, the opponents of public power development, and American owners of land in Mexico. Water was being appropriated in the lower regions of the river, and the upper basin States feared that, if a storage dam was constructed, faster development in California and Arizona would take the river water before development could begin in the upper basin.

Mr. Speaker, to resolve those fears and to find a basis for equitable distribution of the water supply in the river it was found necessary to form a compact between the different States. After several attempts, representatives of the seven Colorado River Basin States-Colorado, Wyoming, New Mexico, Arizona, Utah, Nevada, and California-reached an agreement to hold a conference between the representatives of the seven States and the Federal Government. The conference started early in 1922 and continued until November of that year. It was presided over by former President Herbert Hoover, then Secretary of Com-

After nearly 30 meetings in Washington and other parts of the country, as well as personal inspections and thorough study of reports of various commissions. agreement was reached and the Colorado River compact was signed in Santa Fe, N. Mex., on November 24, 1922. The compact divided the available supply of water in the Colorado River equally between the upper and lower basins. Lee Ferry was established as the point of division between the two basins. The compact was ratified by all of the basin States except Arizona. Failure of Arizona to ratify the compact has been the cause of litigation in the Federal courts, including the U.S. Supreme Court, for nearly 30 years.

Legislation was introduced in Congress by Congressman Ralph Swing and Senator Hiram Johnson, both of California. Finally, after long delays and filibusters, the fourth Swing-Johnson bill, authorizing the construction of Hoover Dam at the Black Canyon-Boulder Canyon site, was passed by the Congress on December 21, 1928.

The Boulder Canyon Project Act provided for the authorization of \$260 million in Federal funds for the construction of the dam. This sum would be reimbursed, with interest, from sale of electric power to be produced at the dam. It was stated in the law that the act would not become effective until the seven basin States had ratified the compact, or lacking that, at least six States, including California, ratified the act and California passed a limitation act, where-

by it agreed to limit its claim to Colorado River water to 4.4 million acre-feet a year. Further, no work was to begin on the dam until the Secretary of Interior had received firm contracts for the sale of power sufficient to pay the entire cost of the dam, with interest, within 50 years. The Colorado River compact was an integral part of the Boulder Canyon Project Act. Water contracts hereafter made by the Secretary of Interior for water stored behind Hoover Dam were to be governed by provisions of the Colorado River compact.

President Hoover declared the Boulder Canyon Project Act effective on June 28, 1929, after all the States except Arizona had ratified the compact and California had passed its limitation act.

Twenty-five million dollars of the cost of Hoover Dam construction was apportioned to flood control, which was to be paid out of the excess revenues from sale of power. This was a unique provision because in all reclamation projects, the flood control portion is nonreimbursible and borne completely by the Federal Government.

After the contracts for the purchase of power at the dam were completed between the Secretary of the Interior, the city of Los Angeles, the metropolitan water district, and the Edison Co., the construction bids were opened.

Mr. Speaker, there is another feature of this project that should receive careful attention. The State of Arizona demanded remuneration from the sale of power at the dam, claiming that because the power was to be developed under Federal control, it would be deprived of tax revenues. In order to satisfy this and other objectives it was provided that the people of southern California not only underwrite the entire cost of the dam but, in addition, agree to pay excess price of power over and above the need to make payments of construction costs. California has been paying \$300,000 a year each to the States of Arizona and Nevada and \$500,000 a year for development of the upper basin States. The States of Arizona and Nevada did not have to guarantee anything, and in addition, reserved the right to demand 18 percent of the firm power production at rates equal to those charged to southern California.

The irony of the situation, brought out forcefully by the special master's recommendations, is that the State of Arizona fought against the Boulder Canyon Project Act, and it refused to ratify the Colorado River compact. And yet now it will be guaranteed 2.8 million acre-feet of water a year stored in Lake Mead. The State of California, which guaranteed and paid the entire cost of the dam, will receive only 200,000 acre-feet more than it was receiving from the Colorado River before the dam was constructed. People of the State of California have spent nearly a billion dollars to develop their projects. This includes \$500 million for the Colorado River aqueduct constructed by the metropolitan water district with its own money, raised by the sale of bonds

Mr. Speaker, if the special master's report is accepted by the U.S. Supreme

Court, the Colorado River aqueduct, which supplies water to the Los Angeles metropolitan area and adjoining cities, the city of San Diego and municipalities in my own congressional district, will become completely dry after the State of Arizona and the upper basin States begin using their full share of water of the Colorado River granted in the special master's recommended decree. This can occur within 10 years.

Today fear hangs over the heads of millions of people in southern California who, placing reliance upon Federal statutes and contracts with the Secretary of the Interior, have built their economies and constructed their lives upon the assurance of receiving their share of the Colorado River water.

Within 2 years, the Glen Canyon Dam will be closed and storage of water in the upper basin will begin. Projects are already authorized and under construction which will store 35 million acre-feet of water. The Secretary of the Interior has issued preliminary criteria for the allocation of water during the filling period behind the dams of the upper basin. The criteria mildly assures that the users of water in the lower basin will receive their present supplies during the filling period. People in southern California, particularly my own district, want assurance that their rights for domestic and agricultural needs will be guaranteed during the filling period, and that there shall be no water stored for power at the

Already the people of my district have been threatened by our neighbors in the metropolitan areas of our own southern California. A proposal has been made by Congressman Craig Hosmer, of Long Beach, for a California, Arizona, and Nevada interstate compact to control all existing and future waterpower development on the Colorado River. Key point of this proposal would be the elimination of existing priorities on use of Colorado River water for irrigation purposes.

expense of agricultural and domestic

users in the lower basin.

Mr. Speaker, after adjournment of Congress, I propose to meet with my constituents and leaders of water companies and water districts to bring to their attention the danger that they face if their rights are not recognized and officially guaranteed by law before the filling period starts 2 years from now.

Of course, Mr. Speaker, we do not accept and in no way agree with recommendations of the special master. We have filed our comments, suggestions, and motions before the special master and we propose to carry our pleas before the Supreme Court of the United States.

Hon. Paul Brown

SPEECH

OF

HON. O. C. FISHER

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Monday, August 29, 1960

Mr. FISHER. Mr. Speaker, I wish to join with his many other friends in expressing regret that the gentleman from Georgia, Mr. Paul Brown, is retiring from Congress at the end of this year. I have known Paul quite well personally since I came here many years ago. He has always been recognized and respected because of his sincerity and outstanding ability. He has been an inspiration and a comfort to me as I know he has been to scores of others.

I join in wishing Paul Brown and his family the very best of everything in the years ahead.

### Parallel of Two Republican Presidents

EXTENSION OF REMARKS

### HON. JAMES ROOSEVELT

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES Thursday, September 1, 1960

Mr. ROOSEVELT. Mr. Speaker, I had thought before the Republican National Convention that both President Eisenhower and former President Hoover were in agreement about what policies to pursue and what economic social and moral conditions our Nation is in. Well, imagine my surprise when I heard their speeches and later having an opportunity to read them. They do not agree at all. Let me give you some examples:

How is free enterprise working these days under Republican rule? Here are President Eisenhower's words:

Private enterprise, dependent upon the vigor of healthful competition, leads to individual responsibility, pride of accomplishment, and, above all, national strength. This has always been, is now—and I pray will always be—basic Republican doctrine.

Yet one must wonder whether God is really blessing free enterprise as that term is interpreted by the Republicans. Listen to what President Hoover has to say about that matter as he looks around from his perch in the Waldorf Towers:

Beyond the terrifying warnings of statistics, we can hardly believe that integrity and moral steadfastness are increasing when we witness the constant exposure of State and municipal corruption. We daily read biazoned headlines in the press exposing corrupt practices in some nationwide services and the fraudulent practices of some distributors of our daily necessities.

And what about our moral posture and our image as the commentators call the ideals and values of America? Listen to President Eisenhower, the fervent crusader, who sees nothing but happiness and joy about him while our Nation suffers from a crisis as serious and as insidious as has ever faced a people.

The irrefutable truths are that the United States is enjoying an unprecedented prosperity; that it has, in cooperation with its friends and allies, the strongest security system in the world, and that it is working ceaselessly and effectively for a peace with justice and freedom. Our own mounting living standards and the history of the Republican years, provide the proof that these are facts. \* \* I have come before you in this assembly to testify to my great pride in the America of today; and my confidence in the brightness of her future. I glory in the

moral, economic, and military strength of this Nation in the ideals that she upholds before the world.

But that other purveyor of prosperity who at another time gloried in our economic and moral strength while a nation went hungry and lost its way has this to say about the Eisenhower years.

I do not need to tell you that today our country is faced with the gravest dangers from overseas in all of our history. Today, America is in the midst of a frightening moral slump. During the 14 years following the Second World War, our statistics show that major crimes in most of the years have increased three times as fast as the population. \* \* During this same period since the end of the war, our cities have become increasingly infected with teenage gangs with criminal intent.

Mr. Hoover closes his speech saying that the moral decay of the last 14 years must stop.

Yours is the task to stop the moral retreat, to lead the attack and to recapture the meaning of the word—America.

And President Eisenhower says in his close exordium for more of the same.

Over and above strictly material accomplishments, the American people have every reason to be proud of their many domestic achievements during these Republican years.

Mr. Speaker, I am sure that the American people are ready to turn away from two-headed Hoover-Eisenhower brand of politics and leadership. Theirs is the politics of drift, of inaction and frustration. Both while in office faced problems of the most serious kind. Neither was able to fulfill the position of the Presidency with the kind of acumen, understanding, and leadership the times demanded. However, President Hoover has certainly shown himself to be the shrewder analyst and commentator on today's world than President Eisenhower judging from a comparative analysis of the speeches which they made at the Grand Old Party's convention.

Hon. Edna (Mrs. Sid) Simpson

SPEECH

OF

### HON. LEO E. ALLEN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES
Wednesday, August 31, 1960

Mr. ALLEN. Mr. Speaker, our industrious and greatly admired colleague, Edna Simpson, is voluntarily retiring from Congress. During her short service in the Congress of the United States she has won the love, affection, and esteem of her colleagues, both Democrats and Republicans. No Member's retirement has caused more regret than that of Edna Simpson. Her integrity, honesty, and reliability will be an inspiration to all that have had the privilege of serving with her and those who follow.

For many years I had the honor to serve in this body with her late husband, Sid Simpson. Like him, she has served the 20th District of Illinois, the State, and Nation with distinction.

We of the Illinois delegation wish that in her retirement she enjoy health and happiness.

#### Bracero Labor

EXTENSION OF REMARKS

### HON. OLIN E. TEAGUE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES Thursday, September 1, 1960

Mr. TEAGUE of Texas. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following resolution adopted by the Ellis County Farm Bureau of Waxahachie, Tex., in their July 1960 meeting.

I believe the resolution to be selfexplanatory and further that it no doubt reflects the feelings of all farmers in the

South and Southwest:

RESOLUTION ADOPTED BY THE ELLIS COUNTY FARM BUREAU OF WAXAHACHIE, TEX.

Whereas once again the Republican administration has proposed that hired farm workers should be brought under the minimum wage law, the Secretary of Labor having stated publicly that "a minimum wage for hired farm workers is both feasible and desirable," and having further stated that the Labor Department has made a survey that will show that the recommendation for a minimum wage would apply only to the large farms, but not apply to nor affect the family farmer: and

Whereas even now Congress is considering raising the minimum wage to \$1.15 for covered workers; and

Whereas it is the unanimous opinion of the board of directors of the Ellis County Farma Bureau, representing 1,555 farm familles of Ellis County, in regular meeting assembled, that the placing of farm labor under the minimum wage provisions of the Fair Labor Standards Act would be disastrous not only to the large farmer but to the family-size farmer; and

Whereas in Ellis County, as well as in most of Texas and throughout the South and Southwest, the farming industry directly involves 40 percent of the productive resources of the region, in that 11 percent of its total gross product is directly engaged in farming, 18 percent in the processing of farm products, and 11 percent in the supplying of the farmer, thus making farm legislation of grave importance to all the Nation and its economy; and

Whereas it is the considered opinion of the board of directors of the Ellis County Farm Bureau, as well as representatives of business, banking, government, the press and the radio assembled in this board meeting, that in addition to the immediate demoralization of the farm economy, such an act of legislation (or of administrative fiat) would have a nationwide inflationary effect, and, in addition, would result in a drastic readjustment of the national economy by forcing even more family farmers off the land: Now, therefore, be it

Resolved, (1) That the Members of the U.S. Senate and House of Representatives from Texas be immediately advised that it is the sense of the Ellis County Farm Bureau and of the business, banking, governmental, press and radio leaders in Ellis County, that farm labor should not be brought under the minimum wage provisions of the Fair Labor Standards Act, now or in the future; and (2) that copies of this resolution be furnished to appropriate agencies of the Government, members of the Senate and House

committees, and other interested groups and individuals, in the hope that the proposal or suggestion of the present administration may be thoroughly illuminated and its effects revealed before it can be put into effect.

The Highway Investigation—Massachusetts and Elsewhere

EXTENSION OF REMARKS

### HON. JIM WRIGHT

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES
Thursday, September 1, 1960

Mr. WRIGHT. Mr. Speaker, the chairman of the Special Subcommittee Investigating the Federal-Aid Highway Program has denounced on this floor the hit-and-run politics indulged in by certain minority members of this subcommittee. In particular, he rebuked the ranking minority member for having issued a press release in which he charged the subcommittee was ignoring a Massachusetts highway scandal that was the granddaddy of them all and that the subcommittee purposely was avoiding it like the bubonic plague. Everything the chairman said in repudiating this statement has my hearty concurrence. The tactics being employed by the minority members are of the disgusting type that serve only to bring congressional committee investigations into disrepute.

What we have here is a situation in which certain minority members, the Bureau of Public Roads, and the Republican National Committee obviously are all linked in a conspiracy to manufacture political fodder for the fall campaign. Great indeed must be their desperation when we find them showing such complete and ruthless disregard for common decency that the text of a letter addressed to the chairman by the Bureau of Public Roads appears in the public press in Boston prior to its delivery to the chairman's office.

It is significant also that black headlines in the same newspaper proclaim "Millions Involved—Land Appraisals Raised 300 Percent—High State Official Is Under Suspicion," when the letter itself contains absolutely no such statements and there is no indication of where such information originates. I fully expect that some minority members will see to it that all of the furor emblazoned in the Massachusetts newspapers will be reflected in due course in the pages of the Congressional Record.

The Republican Party's candidate for the Presidency of the United States has made the lofty pronouncement that he intends to follow the high road and there is the implication that the Democrats have chosen to travel along the low road. The record is abundantly clear that certain minority members of this subcommittee propose to travel by subway, with their transportation underwritten by the Republican National Committee.

I do not want anything I say to be construed as indicating that there is nothing wrong in Massachusetts. Frankly,

at the moment, I do not know. There may very well be a scandal in Massachusetts and the subcommittee, in due course, will attempt to determine the nature and the extent of any irregularities.

I want to state this for the record, that as long as I am a member of this subcommittee and have any voice in its operation, investigations will be conducted in an orderly and intelligent way and will not become instruments for political purposes. I think it not an unreasonable assumption that the minority members of the subcommittee may have entertained some hope that their fanatical and frenetic fulminations about Massachusetts would stampede majority members into abandoning investigations under way in other States which have occupied most of the time of the subcommittee's staff for the past couple of months. I cannot help but wonder if the attempt to divert the staff from the investigations now being pursued in these other States may be generated by a fear that some of the minority members may be embarrassed.

The political motivation insofar as Massachusetts is concerned is all too apparent. It is the home State of the Democratic candidate for President. The Republicans are also anxious to reelect a Republican U.S. Senator. The Republicans also would like very much to elect a Republican Governor. The Republican candidate for Governor is John A. Volpe who is a former U.S. Public Roads Commissioner and a close friend of many officials who are still in the Bureau of Public Roads.

The participation of the Bureau of Public Roads in the creation of the glaring headlines in the Massachusetts press is so wanton and flagrant as to suggest the advisability of an investigation by the Department of Justice to determine whether or not employees of the Bureau of Public Roads have engaged in political activity violative of the provisions of the Hatch Act.

The blatant irresponsibility so brazenly displayed by the minority members of the subcommittee must be answered. The minority members have had complete access to the facts concerning the progress of this investigation the same as I have. They have twisted and distorted factual information that appears in the official documents of the Bureau of Public Roads and it is for that reason that I set forth the real facts so that anyone so disposed may have the opportunity to judge what has happened with respect to the Massachusetts investigation.

The Bureau of Public Roads last December came into possession of information indicating that there may have been improper activities in relation to right-of-way acquisitions. The subcommittee staff learned about it from the Bureau of Public Roads in January. As I previously mentioned, the staff was busy with other matters at that time and has been ever since, but liaison was maintained with the Bureau of Public Roads right up through the month of May.

During that month the Bureau of Public Roads hired the firm of Beasley &

Beasley here in Washington to go to Massachusetts and make appraisals of all the parcels involved in three different projects. There was an agreement between the Bureau of Public Roads and the subcommittee staff that our investigators would not go into Massachusetts until the Beasley firm had completed its work.

It was felt that the Beasley Co.'s work would be materially hampered if it were conducted in an atmosphere which is created by public knowledge of an investigation. Secondly, the results of the Beasley reappraisals work must be completed before there can be an intelligent comparison made with the appraisals that were conducted under the responsibility of the State.

On August 23, 1960, C. W. Enfield, General Counsel of the Bureau of Public Roads, sent a letter to Walter R. May, chief counsel of the subcommittee, in which he gave the following information:

In response to the request of your office to furnish you with a proposed timetable of completion of review of certain appraisal practices in the State of Massachusetts, we have conferred with Beasley & Beasley relative to the probable dates of submission of their appraisal reports and have arrived at what appears to be the likely completion dates for this matter.

Beasley & Beasley have furnished the Bureau of Public Roads their appraisal reports on all the parcels they are appraising in Wakefield, on one-third of the parcels in Attleboro, and all but a few of the parcels in Reading. They have advised that they will complete their appraisals on the remaining parcels in Attleboro by August 31, the parcels in Gardner by September 15, those remaining in Reading and other appraisals on a few special properties by October 1, 1960. Within a few days after receipt of these appraisals, Public Roads will complete its preliminary review to determine those parcels for which the appraisals submitted to the Department of Public Works of the State of Massachusetts appear to be unreasonably high.

Beasley & Beasley further advised that they will furnish Public Roads with complete narrative reports pertaining to those parcels for which the State's appraisals appear to be unreasonably high, which narrative reports will list all pertinent data upon which the Beasley & Beasley appraisals are based. These narrative reports will be submitted within 30 days after determination of the parcels involved, unless the number of such reports is excessive in which event a longer period of time will be required. The analysis of the appraisals and narrative reports relative to those special parcels should be completed by the Project Examination Division of the Bureau of Public Roads within 2 weeks after receipt of the narrative reports.

According to my calculations, the completion of the analysis of the appraisals and narratives referred to in the foregoing letter cannot come about until sometime in November or possibly later. The subcommittee cannot be expected to proceed with a logical, intelligent investigation until there is a determination of what it is supposed to investigate. If there are wide variances in the comparison of the figures there must then be an investigation to ascertain why.

I am informed that Bureau of Public Roads officials and representatives directly in charge of these particular projects failed to review the appraisals during all of 1959. I am also given to understand that the Bureau of Public Roads regional office did not make any reviews in 1959. You can bet all the tea in China that I am going to have a deep and abiding interest in the question of where the Bureau of Public Roads was all that time if we do uncover evidence of irregularities in Massachusetts.

It seems rather surprising to me that the newspapers can predict the actions and assess the values involved when the Bureau of Public Roads right at this minute supposedly does not have such information and cannot have it until Beasley & Beasley completes the reap-

praisal work.

What I particularly resent is the making of public statements impugning the motives of the committee and, in general, seeking to destroy what should be a thoroughly nonpartisan investigation on behalf of the American taxpayers. I, for one, will not be a party to covering up anything, anywhere in the United States. I am all for an investigation in Massachusetts just as soon as the fundamental data is available to us, but I do not propose for one minute that any subcommittee of which I am a member will go racing into a State in a witch-hunting manner.

I quite agree with the chairman in his public statements that this subcommittee will not conduct public hearings until a complete and full investigation is made in any case that comes to its attention and until all the available facts have been ascertained.

### Hon. Aldous Dixon

SPEECH

OF

### HON. CLIFFORD G. McINTIRE

OF MAINE

IN THE HOUSE OF REPRESENTATIVES Tuesday, August 30, 1960

Mr. McINTIRE. Mr. Speaker, under leave to extend my remarks in the Record, I would like to say that it is with a certain sense of sadness that I avail myself the privilege of paying tribute to a Member who will not—because of a decision to retire—be with those Members who meet at the inception of the 87th Congress: the distinguished Member from Utah, Mr. Aldous Dixon.

Mr. Dixon has given outstanding service to his constituency, displayed dedication, devotion, and love for his country, and exhibited great compassion and understanding for his fellow man. He is a man possessed of the highest of ideals, applying these in his everyday living, and these are supported by a deep religious conviction. In him do we truly find a personification of real character, and through him do we really see the operation of those principles upon which America was built.

"Doc" Dixon came to the Congress after distinguishing himself in Utah as a leading educator, and he was, in fact, the president of the land-grant college

in his State. His intelligence and broad experience combined to make a very valuable contribution to the function of the Congress, and in serving with him on the House Committee on Agriculture I have had the opportunity of availing myself of his sound counsel.

I have had an additional pleasure, for it has been Mrs. McIntire's and my privilege to have a personal acquaintance-ship with Dr. and Mrs. Dixon, as well as members of their family. We have found all of them to be truly wonderful persons.

These fine folks will certainly be very much missed in the environs of Washington, but the harsh aspect of their absence can in some respects be tempered by the realization that these vigorous persons have earned their just due of a less strenuous life. I would, however, venture to say that the luster of activity will never depart from their future lives, for their love of and interest in their fellow man will continue to lead them into the dynamic current of social service.

Mrs. McIntire joins with me in extending to "Doc" and Mrs. Dixon our very best wishes for the years that lie ahead, and it is our fervent hope that these will be replete with good health and great happiness. We would also like to say that our lives—having touched theirs—have become fuller, richer, and deeper.

### On Bearing False Witness

EXTENSION OF REMARKS

### HON. EDITH GREEN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mrs. GREEN of Oregon. Mr. Speaker, on August 25, the Mail Tribune of Medford, Oreg., published an excellent editorial which I believe is worthy of consideration by the Members of this House. I am proud that the press of my State includes such outstanding newspapers as the Medford Mail Tribune. Eric Allen is making a valuable contribution to American journalism and to the cause of civil liberty, at a time when such voices are greatly needed in the world.

I am sure that this editorial entitled "On Bearing False Witness," will be a source of encouragement to many who, like myself, are deeply disturbed at the amount of vicious misinformation being circulated in this election year by the opponents of religious freedom. Under the unanimous consent of my colleagues, I include it herewith:

#### ON BEARING FALSE WITNESS

In the little town of West View, Pa., a minister of the Gospel has been haled into magistrate's court and charged with criminal libel.

The crime?

He had quoted a document which is falsely described as the Knights of Columbus fourth degree oath. When it was pointed out to him that the oath has been proven, time after time, to be a libelous falsehood, he still re-

fused to retract it-for reasons best known to him.

September 8

The only reason we mention this is the sad fact that this vicious, slanderous and untrue oath is now in circulation, limited we hope, in the Medford area.

We have seen a duplicated copy.

There are only two sorts of people who would circulate such a libelous document:

1. Those who are incredibly naive and, perhaps, somewhat bigoted to begin with; and

2. Those who, for whatever motive, would bear false witness against their neighbors.

No one now knows how the oath originated. Presumably it was dreamed up by a deprayed and vicious mind.

But it has been kicking around, in one form or another, since about 1912. Usually it is passed, surreptitiously, from hand to hand, or distributed in anti-Catholic meetings.

But in 1928 it was widely circulated during the presidential campaign in which Al Smith, a Catholic, was a candidate. And it is being revived again this year, when Senator John F. Kennedy, a Catholic (and a KC), is a candidate.

It's a sad commentary on America in 1960 that, through stupidity or unthinking hate or deliberate malice, the dirtiest form of lie would be used to blacken, not only one man, but several hundred thousand of our countrymen.

Over the years a number of people have been fined, or jailed, or both, for printing and circulating the untrue and libelous document.

The Knights of Columbus, the Catholic men's organization, has pressed some of these prosecutions (and quite rightly), and in other instances, by pointing out the falsity of the oath, have obtained retractions, and promises to desist from its publication.

If necessary, it will continue to do so.

But let us hope that sanity will prevail, and that those who are responsible for its circulation in Jackson County will stop it before criminal prosecutions become neces-

There's one odd thing about this false oath.

In most cases, where it is published and distributed, it has the phrase "From the Congressional Record" attached to it.

This is true—it has appeared in the Congressional Record.

What is not reported is that it was printed in the RECORD as an example of a false, victous, and libelous document, after a study of its origin by a congressional committee way back in 1913

of its origin by a congressional committee way back in 1913.

It has also been proven false in many courts of law, and by detailed investigations conducted by high-ranking Masonic committees, and groups of Protestant churchmen.

In 1928, the St. Louis Post-Dispatch, in an editorial on the discredited oath, said:

"The oath is so vile and contains pledges of such malignant hatred and murderous intent, that no citizen with a spark of decency would charge it against any other citizen. It is the product of a gangrened brain and is utterly unfit for publication. Several clergymen who read the oath publicly and several publishers who printed it were convicted of criminal libel. The Knights of Columbus have offered from time to time rewards of from \$5,000 to \$25,000 for one lota of proof that any oath of this kind has ever been in the records of the organization or ever used in its ritual."

The reward has never been claimed.

And, finally, the Supreme Court of the State of Oklahoma, in sustaining the conviction for criminal libel of a man for having printed the "oath," had this to say:

"It is remarkable that in this country, where freedom of conscience in religious

matters was one of the chief basic doctrines upon which the Government was founded, people who hold themselves forth as possessing even ordinary intelligence would indulge in this character of criminal conduct.

"There are few, if any, intelligent people who can be duped by that class of writers who indulge in these vilifications and misrepresentations of those who happen to disagree with them in church or fraternal mat-

"The charge that members of an honorable organization, secret, religious or other-Wise, subscribe to such an oath as that complained of or the doctrines alleged is not tolerable, and is not permitted by law . . The law is intended to, and does, protect the self-respecting law-abiding citizen against calumnies, whether made against an individual specifically, or a class of individuals

The Knights of Columbus fourth-degree

obligation, the real one, follows:

"I swear to support the Constitution of the United States. I pledge myself, as a Catholic citizen and a Knight of Columbus, fully to enlighten myself upon my duties as a citizen and conscientiously perform them entirely in the interest of my country, regardless of all personal consequences. I pledge myself to do all in my power to preserve the integrity and purity of the ballot and to promote respect for law and order. I promise to practice my religion consistently and faithfully, and to so conduct myself in public affairs and in the exercise of public virtue as to reflect nothing but credit upon our holy church, to the end that she may flourish and our country prosper to the greater honor and glory of God."

This is an obligation which does credit

to the man subscribing to it.

There are, God knows, already enough causes of conflict-political, religious and other-in this Nation of ours.

Let's keep lies, libels, and vicious false-hoods out of it.

Negro Federal Judges

EXTENSION OF REMARKS OF

### HON. BARRATT O'HARA

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES Wednesday, August 31, 1960

Mr. O'HARA of Illinois. Mr. Speaker, Attorney Russell DeBow, prominent member of the bar in Chicago and who, as my congressional staff representative, has rendered invaluable service to the Deople of the Second District in Illinois, has called my attention to the report by Chairman Edward B. Toles for the Committee on Judiciary at the Midwestern Regional Conference of the National Bar Association. It relates to Negro Federal judges, of whom there have been but 11 from 1863 to 1960, and all but 6 of the 11 served on the municipal court in the District of Columbia. Two of the Negro Federal judges served on the district court in the Virgin Islands, two on the U.S. Customs Court and one, Judge William H. Hastie, both on the district court in the Virgin Islands and on the U.S. Circuit Court of Appeals, to which he was appointed in 1949 by President Harry S. Truman. No Negro ever has been named as district judge in any of the 86 Federal judicial districts in the 50 States,

and there is a total of some 235 Federal district judges.

Mr. Toles presents an unanswerable case for larger representation. I am extending my remarks to include excerpts from his report, as follows:

NEGRO FEDERAL JUDGES, 1863-1960

(By Edward B. Toles, chairman Committee on Judiciary, the National Bar Associa-

Almost a century has passed since the Great Emancipator, President Abraham Lincoln is-sued his Emancipation Proclamation of September 22, 1862, and a half century has elapsed since the 1910 census listed 779 Negro lawyers out of a population of 9,800,000

Today the number of Negro lawyers is more than 4,000 but since 1945 when Presi-dent Harry S. Truman appointed the first Negro Federal judge, Irvin C. Mollison, of Chicago, Ill., to a lifetime term on the U.S. Customs Court only 3 Negro lifetime Federal judges have been appointed. And there still has never been appointed a Negro Federal district court judge among the more than 235 district court judges of the 86 district courts in the 50 States.

For 35 years since the organization in 1925 of the National Bar Association representing 4,000 Negro lawyers of the United States resolutions at the association's annual meetings have been adopted directing attention to Presidents of the United States of the inadequate Negro representation on the Federal judiciary and requesting the appointment of more Negro lawyers to the Federal judiciary.

Perhaps it would not be completely fair to say that the association's pleas to the Chief Executives have had little effect, but in the 35 years of the association's existence, Presidential appointment of Negro Federal judges has crept at a snall's pace from the first Presidential appointment of a District of Columbia justice of the peace on December 17, 1901, to the present three Negro members the Federal judiciary appointed for life. But meanwhile in this span of 60 years, the Negro population has increased from 7 million in 1901 to 20 million in 1960, and still there has never been appointed a Negro Federal district judge in history.
Only 12 Negro lawyers have been appointed

judges by U.S. Presidents in the entire history of the U.S. Federal judiciary. They include three Federal judges appointed for life, six judges appointed to the municipal court for the District of Columbia, and three judges to the Virgin Islands district court.

It was more than 60 years after the first Negro lawyer, Macon Allen, was regularly admitted to the bars of Maine and Massachusetts in 1844 that the first Negro judge, Robert H. Terrell, was appointed by President Theodore Roosevelt on December 17, 1901, as 1 of 10 justices of the peace for the District of Columbia for a term of 4 years. Upon creation of the municipal court for the District of Columbia by Congress in 1909 the commissioned justices of the peace including Judge Terrell, who had been reappointed, composed the first bench of the municipal court for the District of Columbia.

Presidential appointment of a Negro lawyer to the municipal court for the District of Columbia came some 40 years after John S. Rock, first Negro lawyer to practice before the U.S. Supreme Court was admitted by the Court on motion of the famed abolitionist Senator Charles Sumner, of Massachusetts, on March 1, 1865.

The 1901 appointment followed by some 30 years the election of Judge Jonathan Jasper Wright, first Negro State supreme court justice, who was elected in 1870 to a full 6year term as associate justice of the South Carolina Supreme Court. He was the first

Negro lawyer to be admitted to the bar of Pennsylvania in 1866.

The South Carolina reports (vols. 1 (1871) through 8 (1876)) are replete with full and opinions of Justice Wright. concurring Three opinions delivered by Mr. Justice Wright are cited in Creighton v. Pringle (3 S.C. 77 (1871)); Redding v. S.C. R.R. (3 S.C. 1 (1871)); Hair v. Blease (8 S.C. 63 (1876)). Other Negro judges prior to 1900 were Judge Mifflin W. Gibbs elected a mu-nicipal judge in Little Rock, Ark., in 1873. Judge George L. Ruffin appointed judge in Boston, Mass. He also served two terms in the legislature and two terms in the Boston City Council; Judge Joseph E. Lee was elected municipal judge of Jacksonville, Fla., in

Notwithstanding such ample precedent, Presidential appointment of a Negro Federal judge took almost a half century after Lincoln's Emancipation Proclamation of September 22, 1862, the Civil War, adoption of the 13th, 14th, and 15th constitutional amendments in 1865, 1868, and 1870, respectively.

Indeed, the election and service from 1869 to 1901 of 22 Negro Congressmen, including 2 Senators, 6 of whom were lawyers, witnessed no presidential appointments of Negro Federal judges to the U.S. courts. Following the 1901 appointment and for 30 years, this single-token appointment the 'ederal judgship to the District of Columbia's municipal court was charitably doled out as the Negro lawyer's sole participation in the Federal administration of justice by Presidents, Democratic and Republican alike from T. R. Roosevelt, Wilson, Taft, Harding, Coolidge, Hoover, to Franklin D. Roosevelt. However, the late Franklin D. Roosevelt extended and enlarged Negro participation in the Federal judicial process when he ap-pointed William H. Hastie, U.S. district judge for the Virgin Islands in 1937 for a term of 4 years. Thus in 36 years the Negro lawyer had achieved the distinction of having two minor Federal judgeships for 4-year terms but not the independence and power of lifetime tenure appointments accorded to Federal district court judgeships.

The Federal judiciary has over 235 Federal district judges, but no Negro lawyer has ever been appointed. At least 15 Negro Federal district judges should be appointed by the President to represent 20 million Negro citizens of the United States, in the U.S. district courts at Los Angeles, Calif .; District of Columbia; Chicago, Ill.; Detroit, Mich.; St. Louis, Mo.: Newark, N.J.; New York City; Cleveland, Ohio; and Philadelphia, Pa.

(The American Bar Association in 1943 elected a Negro justice, James S. Watson, of New York, the first to be admitted since 1912 when three Negroes who were not known to be Negroes were accepted. The same year the Federal Bar Association of New York, New Jersey, and Connecticut, opened its membership to Negro attorneys. The Chicago Bar Association first accepted Negro members in 1945 but many other State and city bar associations still do not accept Negro members. Nonacceptance of Negro lawyers caused the formation of the National Bar Association in 1925 and the Cook County Bar Association in 1914 and others.)

For our purpose in this report we have begun with the appointment of the first Negro judge by President Theodore Roosevelt The list of appointments would appear to indicate that one Negro Republican judge, Robert H. Terrell, was consistently appointed by both Democratic and Republican Presidents until his death in 1925. Among Franklin Roosevelt's Democratic ap-pointments was the first Negro Democratic judge of the municipal court for the District of Columbia, Judge Arnold W. Scott. He was later to appoint the second Negro Federal judge in history and the first Negro judge of the territorial district court of the Virgin Islands, William H. Hastle, in 1937.

President Harry S. Truman with a determination to give Negro lawyers more recognition, appointed the first Negro Federal circuit court of appeals' judge in history (the second highest judgeship in the Federal judiciary, and a lifetime position) Virgin Islands, Gov. William H. Hastie, in 1949.

President Truman had already created another first, for he appointed the first Negro Federal judge to a lifetime position in the U.S. Customs Court in 1945. He was Irvin C. Mollison, of Chicago, Ill. President Truman later appointed another additional judge to the District of Columbia municipal court, Judge Andrew A. Howard, of Washington, D.C., in 1950 for a 10-year term.

President Eisenhower thus far has appointed a Negro judge to the U.S. Customs Court, a lifetime position, in 1957—Judge Scovel Richardson, of Missouri, former Eisenhower appointee as Chairman of the U.S. Pardon and Parole Board.

Judge Austin Fickling was appointed to replace retiring Judge Armond W. Scott to the District of Columbia municipal court bench in 1956. Judge Walter A. Gordon was appointed judge of the Virgin Islands district court in 1958.

In 60 years under 9 Presidents, the Negro Federal judiciary appointments number only 12 (only 3 are lifetime appointments) and not a single U.S. district court judge, even though there is an immediate and pressing need for additional judges.

There are over 235 U.S. district judges in the 50 States of the Nation, including 48 States and the districts created for the new States of Alaska and Hawaii and the District of Columbia. There are no Negro district judges and there should be at least 15 appointed in the following districts which has a total of 105 judges:

State	Judges	Recommend Negro ap- pointments
California Illinois Michigan New York Ohio Pennsylvania District of Columbia	18 12 8 28 28 16 15	1 1 1 2 1 1 8

Hon. Carl T. Durham

SPEECH

OF

### HON. ROY A. TAYLOR

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES
Wednesday, August 31, 1960

Mr. TAYLOR of North Carolina. Mr. Speaker, I would like to join my colleagues in paying honor and expressing esteem for Representative Carl Durham. I was not permitted to serve with him very long as he is now leaving this body and I have been a Member for only a few weeks. However, I have been an admirer of Mr. Durham for many years.

During a long span of public service, he has demonstrated integrity, from which he has never wavered. He has given a full measure of his time and energy and talents to the duties of his office. He has aided in keeping this country strong and free. I wish for Carl Durham many more years of happiness and useful public service.

Invocation Delivered by Dr. Max Nussbaum at 1960 Democratic National Convention

EXTENSION OF REMARKS

#### HON. JAMES ROOSEVELT

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. ROOSEVELT. Mr. Speaker, under leave to revise and extend my remarks, I wish to insert into the Appendix of the Record, the invocation delivered by Dr. Max Nussbaum at the Democratic National Convention in Los Angeles.

Rabbi Nussbaum is one of California's most distinguished citizens. A scholar and philosopher who knows that knowledge and wisdom to be meaningful must be applied, Rabbi Nussbaum serves as the rabbi at Temple Israel in Hollywood, as well as the spiritual teacher to all who come in contact with him. Rabbi Nussbaum, since September of 1942, when he was appointed to the pulpit in Hollywood, has lectured across the United States many times to both Jewish and non-Jewish organizations, to universities and colleges on ethics, philosophy, and religion.

The invocation which Rabbi Nussbaum gave at the Democratic National Convention in Los Angeles is not one which is limited in meaning to one political party or to one religious group. The principles which the rabbi calls upon are as old as Abraham, Isaac, and Jacob, as fundamental as when spoken by the Founding Fathers, and more necessary for Americans today than all the material possessions, the missiles and nuclear weapons could ever be. These are principles which give men the power to build and maintain a nation that has a "passion for social justice," a "devotion to universal brotherhood," and "dedication to greater humanity."

Text of invocation follows:

INVOCATION BY DE. MAX NUSSBAUM, SPIRITUAL LEADER, TEMPLE ISRAEL OF HOLLYWOOD, FOR WEDNESDAY, JULY 13, 1960, SESSION, DEMO-CRATIC NATIONAL CONVENTION, LOS ANGELES, CALIF.

Heavenly Father, we humbly invoke Thy blessings upon the representatives assembled here in convention, upon the members of this organization throughout the land, and upon our beloved Nation which gave birth to free institutions by which a free society is governed.

We are meeting at a time in which mankind finds itself living in an atmosphere of uneasiness and discontent, even of distress and despair caused by fear of wars of selfdestruction and coextermination—wars which may result in an utterly disgraceful end to man's long experiment on earth.

In this moment critical for the survival of mankind—with a bewildered generation

unsure of itself and uncertain of its future—the world is in dire need of an America with a new image: an America motivated by historic purpose and possessed of a sense of destiuny; an America that recognizes the moral summons within her and is capable of moral response; an America that is ethically committed, and which reflects the ancient principles of our common religious heritage. It is for such an America that we pray tonight:

Thou, O Lord, who revealest Thyself in the workings of the mind, in the stirrings of the heart, and in the aspirations of the soul; Thou who directest the destinies of men and nations and Who hast bestowed upon this country the manifold bountiful blessings of overflowing abundance—cause us, we pray Thee, to be worthy of our noble legacy by kindling a veritable light to illumine a world in darkness, and to set an example to be emulated by others:

May we, in the future, spend as much energy in the attainment of spiritual values as we have, in the past, on the acquisition of material goods;

May we give to our own citizens of all races and all religions the rights and liberties that we so self-righteously demand of our adversaries for the inhabitants of their lands;

May we labor as zealously for the duty to pursue justice as we have so diligently for the right to pursue happiness;

And may we select for leadership men of inner integrity, creative vision, and moral responsibility;

Men who will remember tomorrow what they pledged today, and fulfill after elections what they promised at conventions;

Men with passion for social justice, with devotion to universal brotherhood, and with dedication to greater humanity;

Men who will thus fulfill the dreams of the Founding Fathers of this Republic and guide our Nation along the highway to genuine, effective, and well-deserved world leadership.

Paraphrasing a commentary of the "Sages of Ancient Israel" on the meaning of the priestly benediction in the Biblical Book of Numbers, we prayerfully invoke God's blessings, tonight, in the spirit of our common religious tradition:

May God bless us with material possessions and guard us from having them possessus:

May the Lord make His face of spiritual enlightenment and moral insight to shine upon us, and give us grace in the eyes of other nations;

May the Lord turn His countenance of tender care and loving attention unto this our land, and bestow upon us the blessings of security and tranquillity, of harmony and peace—with all men, here and abroad. Amen.

#### Hon. Carl Durham

SPEECH

OF

# HON. O. C. FISHER

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES
Wednesday, August 31, 1960

Mr. FISHER. Mr. Speaker, I sincerely regret that our distinguished colleague from North Carolina, the Honorable Carl Durham, has found it desirable to retire voluntarily from the House of Representatives.

Having served with him here for 18 years, during about half of that time on the House Committee on Armed Services, I have learned to respect and ad-

mire Mr. Durham. Few men are better informed on subjects in which they have specialized. In the field of atomic energy and in the military field, Carl Durham is an expert. That knowledge has been invaluable to him in connection with legislation dealing with these subject matters.

CARL DURHAM leaves behind him a legacy of distinguished service to his country. I join with his many friends in Congress in extending to him and his family best wishes for happiness and good health during the years ahead.

# Congressman Lester Holtzman Reports to the People

EXTENSION OF REMARKS

### HON. LESTER HOLTZMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. HOLTZMAN. Mr. Speaker, now that the 86th Congress has drawn to a close, I would like once more to bring my neighbors and constituents up to date on my activities as their Representative in the Congress of the United States. Due to limitations of time and space, this report must touch only on the highlights.

Believing that an alert, well-informed, and politically active electorate is the surest safeguard of democracy, I earnestly solicit the detailed views and reactions, as well as questions of the citizens of my district. I hope they will get in touch with me at room 107, House of Representatives, Washington, D.C., so that I may be in the position best to reflect their attitudes and serve their needs as their elected Representative.

#### INTERNATIONAL SCENE

A series of stunning diplomatic defeats makes total reevaluation of our foreign policy imperative. The launching of sputnik; the rapid growth of industrialization and productivity of the Soviet and the Red Chinese, together with their evergrowing military power; the college of the summit; the fiasco in Japan; and the extremely serious situation in Cuba; all point up vividly the transcending need for a positive, welldefined, and imaginative approach in our foreign relations. We must strengthen our ties with our allies and the uncommitted nations, including the new nations of Asia and Africa, and our Latin American neighbors. I am happy to report that just prior to adjournment the Congress passed legislation to provide assistance in the development of Latin America and in the reconstruction of Chile.

A big business administration, with its eyes firmly fixed on budgets and costs, has sometimes accepted less than the best in military power, space research, and economic assistance to the free world. In addition, an indecisive and vacillating leadership has substantially

weakened its appeal to the minds of men everywhere by reacting piecemeal to the moves of our opponents, instead of moving forward with an independent program of its own.

I have consistently supported our defense appropriations and have opposed crippling cuts in our mutual security program, which is so vital to our alliances throughout the world. I shall continue to do so, for I believe that the Communist leaders will negotiate honorable solutions with us only when and if they are convinced that we are in fact the strongest nation in the world.

#### ISRAEL AND THE WEST

The continued belligerence and lawlesness of Dictator Nasser in the Middle East has posed another international crisis which the present administration has badly fumbled. It has granted repeated loans and other assistance to the United Arab Republic in the face of Nasser's persistent denial of passage through the Suez Canal to Israeli shipping in defiance of a United Nations resolution. Israel is a vital bulwark of the democratic way of life. Its political integrity must be defended. In the House I vig-orously supported a resolution recently adopted by Congress authorizing the President to deny mutual security aid to any nation that engages in boycotts or blockades barring unrestricted passage through the Suez Canal. I deeply regret that the President has not seen fit to use this power.

#### CIVIL RIGHTS

At home a vital issue continues to be the protection and extension of the civil rights of every American, without regard to the circumstances of his birth. I served as a member of the subcommittee of the House Committee on the Judiciary which originated the Civil Rights Acts of 1957 and 1960, and I fought for their enactment. These laws are important initial steps, but much remains to be done. The disgraceful lynching of Mack Charles Parker in Mississippi, and the failure or inability of law enforcement officials to prosecute the perpetrators highlight the need for a strong antilynching measure such as is contained in my bill, H.R. 3965. Further, we must safeguard for every American not only his right to vote, but also his right to study, to travel, to be housed, to be employed-in short, to live with dignity in full freedom and equality.

# TAXES, SOCIAL SECURITY, MEDICAL CARE FOR THE

Our present system of taxation unfairly burdens many of our low and middle income families. To correct this inequity and at the same time stimulate our economy, I have sponsored three measures: H.R. 4710 to increase the present \$600 personal exemption to \$1,000; H.R. 4711 to exempt all retirement annuities and pensions up to \$2,500; H.R. 4712 to permit parents to deduct the cost of care for dependent children while the parents are at work.

Similarly, our social security program needs to be brought up to date. My bill, H.R. 3652, would remove the \$1,200 limitation on outside earnings—some slight

liberalization of this provision was contained in the recently passed social security amendments-reduce the eligibility age for receipt of benefits from 65 to 60 years for men, and from 62 to 55 years for women-the Senate had inserted a provision whereby men could qualify for benefits at age 62 but unfortunately this was stricken from the bill in conference-and further provide for payment of benefits to those permanently and totally disabled, without the present limitation to persons 50 years of age. I am happy to report that this last provision was included in the bill just passed by the Congress.

I regard it as equally essential that provision be made under the social security program for adequate medical eare for the aged. For that reason, I have joined with many of my colleagues in supporting the principle of the Forand bill, which provides prepayment for medical expenses for persons over 65 years of age under the social security system. This is not only the dignified approach, but the most practical way to cope with this ever-increasing problem of our elder citizens.

#### SALARIES AND WAGES

Despite glowing slogans by Madison Avenue about our great prosperity there are still large groups of wage earners—white-collar workers, retail-store employees, and retired folks—who cannot make ends meet.

My bill, H.R. 6103, calls for an increase in the minimum wage to \$1.25 per hour, and extends coverage to many unprotected wage earners. Unfortunately minimum wage legislation to provide such an increase and the added coverage died in conference.

H.R. 5905, H.R. 3014, and H.R. 7271, which I have also introduced, liberalize the provisions of the Civil Service Retirement Act by granting retirement after 30 years' service; by increasing the multiplication factor from 2 to 2½ percent for hazardous employment; by reducing the possibility of loss of annuities by disability retirees if they have temporary periods of high earned income, and by protecting restoration of annuities if the disability recurs later or if earning capacity diminishes.

Finally, my bill, H.R. 10538, provided for an increase in the salaries of our dedicated postal workers and civil service employees, all of whom have been hurt badly by the spiral of inflation. Happily, legislation in this vein was enacted by the Congress over a veto by the President.

#### SMALL BUSINESS AND MONOPOLY

As a member of the Antitrust Subcommittee of the Committee on the Judiciary, I have worked in Congress to prevent monopolies, strengthen the antitrust laws, and protect small business against predatory and unfair methods of competition. Due in large measure to the efforts of the Antitrust Subcommittee the Congress in recent years has enacted legislation to prevent monopolistic corporate mergers; increase tenfold the maximum penalties for antitrust violations; provide important safeguards

against monopolistic bank mergers; protect small business by preventing monopolistic practices by meatpackers and retail chains engaged in meat packing; and protect small business against the unfair pricing policies of large chains, by strengthening the enforcement provisions of the law against price discrimination.

Further, as a result of investigations by this subcommittee, long-distance telephone rates were cut \$50 million last September, with additional reductions still to come—all of which will inure to the benefit of the consumers of our country.

#### SCHOOLS AND TEACHERS

Every parent who reads this report is well aware of the critical shortage of classrooms and other school facilities. We simply cannot afford to be ostrichlike in our approach to this problem but must meet it head on with adequate funds and a long-range program. Likewise, it would be pennywise and pound foolish to forget our teachers, too many of whom cannot cope with their financial problems without additional and secondary employment.

#### OTHER ISSUES

In addition to the foregoing, a Congressman frequently has the obligation to speak out even where legislation may not be indicated. And so, during the 86th Congress I called on the attorney general of the State of New York to investigate the merger of two banking giants for a possible violation of the New York State antitrust laws: I protested vigorously when a private club barred the distinguished Ralph Bunche and his son from membership; I spoke out in concern over the unfair sentence imposed on Bishop Walsh by the Red Chinese; I expressed my horror at renewed outbreaks of anti-Semitism, so reminiscent of Hitler's Germany; and I voiced strenuous objections to the granting of a permit to the American Nazi Party for a meeting in the city of New York.

#### BACK HOME

Since I am fortunate enough to live within commuting distance of Washington, I have been able to return home on weekends and take an active part in my community. My membership in civic and other local clubs has made it possible for me to meet and talk with many of my constituents. When local problems have arisen, whether related to traffic regulations, police and fire protection, school construction, or juvenile delinquency, I have welcomed the opportunity to cooperate with leaders in my community toward their satisfactory solution.

Mr. Speaker, my greatest pleasure and privilege during the last 8 years has been the opportunity to meet with so many of my neighbors, to profit from their ideas and recommendations, and to try to serve their personal and civic needs. Their sincere interest in my efforts as their Congressman, and their friendship will always remain my most lasting compensation.

#### Latin American Failure

EXTENSION OF REMARKS

## HON. DANIEL J. FLOOD

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. FLOOD. Mr. Speaker, the meeting of the Organization of American States at San José, Costa Rica, is now history but its results will continue for a long time.

A thoughtful editorial on this conference in the August 30, 1960, issue of the News and Courier, Charleston, S.C., will be of interest to every Member of the Congress. The editorial follows:

#### LATIN AMERICAN FAILURE

The Organization of American States meeting in Costa Rica proved nothing but the fact that Latin nations are willing to sign the same sort of vague anti-Communist resolutions they signed in 1948 and 1954. While the meeting is being hailed in some quarters as a victory for U.S. diplomacy, it is nothing of the sort. The United States appears to have lost more than it gained in San Jose.

Whereas the Latin nations agreed to break off diplomatic relations with the Dominican Republic, a nation that is authoritarian but friendly to the United States of America, the diplomats of the Americas would not even mention Cuba by name in their final resolution. Not a word in the resolution condemns Cuba for political murders committed by Fidel Castro, imprisonment of 10,000 Cuban anti-Communists, suppression of a free press, seizure of almost \$1 billion in U.S. property, and attacks on the Christian religion.

The farcical nature of the conference can be seen in the fact that the U.S. delegation did not even demand that Cuba be specifically mentioned in the foreign ministers' resolution. That is the most disturbing aspect of the situation.

After all that has happened in Cuba, the U.S. State Department does not even ask that the name of that Communist-in-filtrated country be put before the world. Patriotic citizens will find it hard to believe that this is simply another case of poor judgment on the part of the State Department. The same U.S. State Department that let China fall into Communist hands and actively aided Castro's rise to power is still hurting rather than helping the American cause. It is a national disgrace.

As a result of U.S. weakness in San José,

As a result of U.S. weakness in San José, Fidel Castro is as secure as he was before the conference began. He knows that his Caribbean neighbors are not about to consider forming an army to march against him. Their unwillingness to name him as an aggressor implies that they fear his power and influence among their own people.

In exchange for a meaningless resolution, the United States has alienated the Dominican Republic. That nation now may turn to Russia and patch up its quarrel with Cuba. Thus the situation facing the United States is more dangerous than before. Instead of one country to worry about, the United States will have two or more serious problems in the Caribbean.

While the State Department is as determined as ever to do nothing effective about communism in Latin America, the United States is not paralyzed. Much depends on the press, the military and congressional

leaders to create public understanding of the need for action against Red Cuba. State Department influence can be shunted aside if the public is aroused.

What is clear above all else is that if the Red revolution in the Caribbean is to be stopped, the United States will have to do the Job.

### Determination of Retail Price for Purposes of Excise Tax on Cigars

SPEECH

### HON. WILBUR D. MILLS

OF ARKANSAS

IN THE HOUSE OF REPRESENTATIVES Wednesday, August 31, 1960

Mr. MILLS. Mr. Speaker, your House conferees have reached an agreement with the conferees of the other body on the bill, H.R. 12536, relating to the treatment of charges made for local advertising for purposes of computing the manufacturer's sales price in determining the base to which the manufacturers' excise tax is to be applied.

Mr. Speaker, all of the language of the bill that passed the House is in the bill that passed the other body and was not a subject matter in the conference. The other body did, however, add three substantive amendments to the bill unrelated to the specific subjects which were in the bill as passed by the House, and these were in conference.

The first of these amendments provides an election as to the percentage depletion cutoff point for years prior to 1961 in the case of limestone and other minerals when used in making cement.

The problem arose because of the uncertain status of present law following the Supreme Court decision in the case of United States against Cannelton Sewer Pipe Company.

In 1953 the Treasury published Revenue Ruling 76 which permitted in the case of minerals used in making cement the inclusion in the base for percentage depletion the value added by processes other than preheating of the kilnfeed which took place prior to the burning of the limestone in the kilns. These processes were primarily crushing and fine grinding. As you will recall, various lower court decisions, principally the Dragon Cement case, permitted in the case of certain limestones including the value of the finished cement in the depletion base. It was in respect to these cases that the Congress adopted section 302 of the Public Debt and Tax Rate Extension Act of 1960 which provided a statutory cutoff point for minerals used in making cement which was substantially the same as that provided by the 1953 Treasury ruling.

Following the Supreme Court decision in the Cannelton case, there is considerable uncertainty as to the exact requirement of prior law. On one hand, the Dragon case might still be good law. On the other hand, following Cannelton the definition of mining in these situa-

tions might be held to include only crushing of the limestone and not the grinding that was allowed under the 1953 ruling and the 1960 legislation.

The amendment permits taxpayers entitled to depletion on minerals used in making cement to elect to calculate their percentage depletion deduction on the basis of the 1960 legislation for open years prior to 1960. This election, which is irrevocable, would foreclose the taxpayer from litigating the issue. Your conferees were advised that the Treasury Department favored this amendment on the basis that it was a reasonable settlement from the standpoint of the United States interests. It is estimated that under this amendment the industry would be required to make additional taxpayments in the neighborhood of \$170 million. We have also been advised that 95 percent of the industry favors this amendment and could be expected to make use of the election provided. Your conferees accepted this Senate amendment.

The second amendment deals with six named pension plans which were established pursuant to the collective-bargaining negotiations and were in operation prior to the time that qualified status as tax-exempt employee plans was achieved. During this time of operation as nonqualified pension plans, the employers were not eligible for a deduction with respect to their contributions and the investment income of the pension trust was taxable. All of the six plans involved ultimately achieved qualified status. The amendment provides that the six plans will be treated as qualified pension trusts for periods varying in each case, but covering the time between the inception of such pension plans and the time when they received qualified

Under the conference agreement the substance of the amendment made by the other body is retained except that the language thereof has been changed in a manner which requires that it be shown to the satisfaction of the Secretary or his delegate that during the period from the inception of each of these pension funds to the date on which they qualified as tax-exempt employees' funds it is shown to the satisfaction of the Secretary or his delegate that each of these funds have not been operated in a manner which would jeopardize the interests of the beneficiaries of such funds. Under this language the trusts involved can achieve qualified status, and tax exemption, without meeting all of the formal requirements of sections 401, 503 and 504. Instead of the formal requirements it will only be necessary to show that the trusts have not been operated in a manner which would jeopardize the interest of its beneficiaries.

The third amendment added by the other body denies an accrual basis taxpayer the right to deduct more than 1 year's State or local taxes in one Federal tax year where the bunching arises because of an action of the taxing jurisdiction taken after December 31, 1960. This amendment deals with an abuse situation called to our attention by the Treasury in the bill which I introduced by re-

quest, H.R. 9625. The original Treasury proposal, unlike this amendment, reward. would have applied to State or local action taken in 1960.

In the ordinary operation, the new rule would simply postpone the deduction to a later year. The amendment gives the Treasury regulatory authority to limit this new rule wherever its application would result in the complete denial of deduction for some item, such as, for example where the taxpaver goes out of business. Your conferees accepted this amendment.

It is my view, which is reflected also in the statement of managers, that this amendment is a change from present law and accordingly any double deduction to which a taxpayer may be entitled by reason of the acceleration of the accrual date of State or local taxes prior to December 31, 1960, will be considered as a proper deduction in those years. In many of these situations the taxpayers had Treasury rulings to this effect. The law, until it is properly amended, should apply equally to taxpayers with and to those without rulings.

#### Hon, Graham Barden

SPEECH

OF

### HON. CLIFFORD G. McINTIRE

OF MAINE

IN THE HOUSE OF REPRESENTATIVES Wednesday, August 31, 1960

Mr. McINTIRE. Mr. Speaker, under leave to extend my remarks in the REC-ORD, I would like to say that as one travels down the pathway of life, he is sometimes privileged to meet rare and truly brilliant personalities.

Such a personality is GRAHAM A. BAR-DEN, a colleague with whom it has been a real honor to serve in the Congress of the United States.

Mr. Barden will no longer be with the House of Representatives, having determined to pursue the course of private life. As he leaves this Chamber, one is quickly led to think of the high quality and fine character of this man, an individual whose great ability, firm convictions, and high principles make him, in effect, shine forth like a bright light.

During the 9 years that I have served in the House of Representatives, the Honorable Graham A. Barden has served as an example for me, for one becomes completely convinced that in emulating a man of this sterling nature he spontaneously enhances his own nature. Firm of fiber as he is, he epitomizes the grand quality of those stalwarts who have gone before him, of those men in our Nation's history who activated those principles which functioned to make this country truly great.

It is my earnest wish that more men of his quality will come to the Halls of the Congress.

I shall always cherish the privilege that has been mine in serving in the Congress with Mr. BARDEN. May his future years harbor a bounty of health and happiness, for through his dedicated

He has been a man competent to the struggle, possessed of a perseverance born of deep faith in what he considered right. Great, then, is his reward, for he reaps the satisfaction that comes only to those who have labored hard, fought a fair fight, and adhered unflinchingly to principle.

Wherever Graham A. Barden walks, he will have my admiration for a compan-

#### Victory for Kremlin at San José

EXTENSION OF REMARKS OF

### HON, DANIEL J. FLOOD

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. FLOOD. Mr. Speaker, the tragic consequences of the recent meeting of the Organization of American States at San José, Costa Rica, are gradually coming to light. The result of that gathering was not a victory, but a defeat, as shown by the informative article of Mr. Constantine Brown in the September 1, 1960, issue of the Evening Star, Washington, D.C. The article follows:

VICTORY FOR KREMLIN AT SAN JOSÉ-OAS BLAST AGAINST DOMINICAN REPUBLIC AND WEAK ATTITUDE ON CASTRO DEPLORED

(By Constantine Brown)

On his return from the OAS meeting at San José, Secretary of State Herter announced solemnly that the conference had been a real success. All Secretaries of State throughout the many years that they have attended international gatherings feel, understandably, that they must pronounce even the worst failures as great victories. Mr. Herter is no exception.

Actually, by reading the official communique, it is obvious that outside unprecedentedly harsh measures adopted against the Dominican Republic, which for at least three decades has been a friendly and cooperative state in Latin America, nothing has been done to meet the original purpose of the OAS conference. This purpose was to try to bring a solution to the ever-worsening relations between most hemispheric republics and Fidel Castro's Cuba.

Because of the deep penetration of that close neighbor of ours by international communism; because Fidel and Raul Castro have become blatantly the voices and the tools of Moscow and Peiping in this hemisphere, and because of the outrageous flouting of inter-national law by these minions of the Kremlin, there had been pressures on the administration to do something about the Cuban situation. American public opinion began to be aroused, not so much about the arbitrary confiscation of American property in Cuba, but by the mass trials, wholesale murders of the anti-Fidelista suspects, and those Moscow-patented midnight knocks at the door.

To forestall a loud clamor for action against the Castro regime, we decided to place the whole matter in the hands of the OAS, in accordance with an agreement reached some years ago by all the Western Hemisphere republics. At the same time another subject was placed on the agenda: The undemocratic situation in the Dominican Republic and the accusations against Dictator Rafael Trujillo that his agents recently had attempted to assassinate Venezuela's President Romulo Betancourt.

The Dominican Republic matter was taken up before the Cuban situation. The Venezuelan Government is said to have produced tight evidence that the charges were true. What the actual evidence was, the American public never knew. It was not revealed in detail and factually, as it should have been, to the world. Not only was the Dominican Government sharply censured but we agreed, with the other sister republics, to take unprecedented, stringent measures against that prosperous republic, such as breaking off diplomatic relations and the establishment of an unofficial embargo on the Dominicans.

On the other hand, after long debates and discussions, nothing was done about Cuba, the core of all real troubles for this country and other Latin Americans. The victory proclaimed by our Secretary of State consisted of one for Moscow and Peiping—Castro and his gang—for interference in the affairs of Latin America. Castro as a matter of fact came out lilywhite.

The OAS meeting had been followed with intense interest all over Europe, Asia, and Africa. It was regarded as a test of America's determination to preserve the fundamentals of international right and justice. It also was to be a test of America's stamina when threatened, as we are now, by the Red plots and intrigues. Those under Communist discipline were delighted at the stringent measures adopted against the anti-Communist Dominican Government. The free world was astounded. It regarded our "victory," to use the words of an editorial in the conservative London Daily Telegraph, as "a major rebuff on the part of the Latin American countries to the United States."

It was obvious, even to the politically blind, that Cuba and not the Dominican Republic constituted a threat to the security of the United States. Yet, while the Dominican Republic is being severely punished, nothing of consequence has been done by the OAS against Castro, except possibly a mild slap on the wrist which caused him to rant and perorate for hours at one of the now customary mass meetings.

tomary mass meetings.

"No doubt the United States has been wise," continues the Daily Telegraph editorial, "to try and handle the situation within the continental family organization which the United States itself had set up. But as a test of solidarity, the experiment has been a failure. The Latin American Republics have now refused to accept the doctrine that anti-Communist states have a common interest to resist Soviet intervention."

That is the size of our diplomatic victory, as seen objectively by most of our friends across the Atlantic.

#### Hon. Ed Rees

SPEECH

OF

### HON. O. C. FISHER

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Monday, August 29, 1960

Mr. FISHER. Mr. Speaker, I cannot think of a more honorable and distinguished man who has served in this Congress during the time I have been here than the Honorable ED REES, of Kansas. He is the one man who has always commanded universal respect. He is one man who, when he speaks, is listened to because everyone knows it comes from a well-informed source that speaks from sincerity.

I wish to join with his other friends in expressing regret that Ed Rees is leaving Congress and to wish for him the blessing of good health and happiness in the years ahead.

### The Efficiency of Small Business

EXTENSION OF REMARKS

### HON. JAMES ROOSEVELT

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES
Thursday, September 1, 1960

Mr. ROOSEVELT. Mr. Speaker, under leave to revise and extend my remarks, I wish to insert into the Appendix of the Record an article which has come to my attention on small business. The article was written by Norman D. Louis for the Los Angeles Industrial News, and appeared in the June 6, 1960, issue. Mr. Louis knows whereof he speaks when he does so on questions relating to small business. His company, which he formed in 1945 with four employees, is among the West's largest cabinet hardware manufacturers.

In his article, Mr. Louis points out something that too many of us forget in this age of bigness. Because a firm is big does not mean that it is efficient, or that it is as efficient as a small firm. For many years, economists have known that oligopolistic and monopolistic markets are not efficient markets. Firms that are this size generally lack in flex-ibility, low overhead, and communication within the firm to allow for quick decisionmaking. The reason that these qualities exist in small businesses rather than in large ones can also be traced to the fact that usually small businesses are in highly competitive markets. Thus, in order to survive, these small businesses have to react quickly to the changing demand. On the other hand, in most markets which are organized around mammoth corporations, the sellers affect but are never affected. They can afford the dubious luxury of sloppy procedures.

On a policy level, the Congress, realizing that small business is the spinal column in our economic prosperity, passed last year the Small Business Investment Act. It is my guess that this act, when properly administered, will help small businesses become even more efficient than they are already. The article follows:

# SMALL BUSINESS IN THE U.S. ECONOMY (By Norman D. Louis)

Definitions of the Small Business Act do not cover my concept of what is meant by "small business."

With certain exceptions, the act uses the figure of 500 employees for a small manufacturer, annual sales of \$5 million for a small wholesaler and of \$1 million for a small retail or service establishment.

My concept embraces all manufacturing or commercial establishments, except the corporate giants who dominate the fields in which they operate. Thousands of firms whom the act excludes from its small business definition are definitely not in the class of the huge corporation.

#### MAJOR STRENGTH

One well-known manufacturer said a small business is "one in which lines of management are almost nonexistent." An oversimplification, perhaps. But it emphasizes a major strength of small business.

Peculiar to mass production is the vast amount of paperwork required for mere communications between departments. There is even an appreciable cost factor involved in keeping tabs on what is going on among the various departments.

In a smaller business, the few executives require a less complicated system of communication. Important decisions often can be made by one person, a saving of time and money.

#### FLEXIBILITY

There is a flexibility inherent in small businesses—from the decisionmaking executives to the final stages of production—that cannot be duplicated by large corporations. A small business has a vital time advantage in changing its production methods in bringing a new product to market.

Business-management seminars in recent years have stressed the uses major organizations could make of smaller, more flexible companies whose fewer people can design and produce a specified product more quickly than one burdened with the overhead and intermeshing of large departments.

Enlightened large businesses today are placing a large part of their work with small outside suppliers because they have found the cost of reactivating and maintaining idle machinery prices the product out of range. A well-operated small plant, for example, usually can cut to a fraction the time lag from design to engineering to tooling to production to marketing, required by a large industrial complex.

#### CAPTIVE SHOPS

In supplying products to the major manufacturers, small businesses must beware the pitfall of becoming captive shops. Too often, a firm will develop a special manufacturing technique and will follow the easy route of channeling all its sales to one or two major customers. The risks here are obvious: lose a customer and your business flounders.

Many small manufacturers, like ourselves, make it a strict rule never to sell more than 20 percent of their total output to any single purchaser.

#### QUALITY THE CORE

Since the small business cannot compete quantitatively with the large corporations, quality must be made the core of our products and services. A smaller operation allows us to exercise a more personal guidance and supervision over the manufacture, presentation, and sale of our products.

Quality and adequate financing usually go hand in hand. As business becomes more competitive, better and newer equipment must be purchased.

### LONG-TERM LOANS

The last Congress, taking a laudatory interest in the financial problems of small business, passed the Small Business Investment Act which enables banks and other lending institutions to make long-term loans on a very liberal basis.

The Government recognizes the important part small business must play in our economy and is extending a helping hand. It is up to the individual small businessman to utilize this assistance as he needs it.

As can be seen from the above, the top executive of a small business must be knowledgeable on all phases of his operation.

He needn't have the narrower specialized training usually required of the heads of large corporations. In my own business, I have had to make myself an expert in the fields of production, financing, and market-

ing. I still know most of our 200 employees and many of our customers by their first names. Compared with the industrial glants, we're a small business, but, frankly, I like it that way.

Gen. Robert L. F. Sikes: Citizen, Soldier, Legislator

EXTENSION OF REMARKS

### HON. PAUL G. ROGERS

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES
Wednesday, August 31, 1960

Mr. ROGERS of Florida. Mr. Speaker, today I had the pleasure of attending a luncheon in honor of our friend and colleague, Robert L. F. "Bob" Sikes, of Florida. This luncheon was given by the Reserve Officers Association to honor Bob Sikes in recognition of his long years of devoted service to the U.S. Army and the Army Reserve and to celebrate his promotion to the rank of brigidier general.

All of Florida is proud of this accomplishment of the dean of our delegation Who has served with such distinction and honor for 20 years in Congress. His great interest in the building and strengthening of the armed services of our country is well known to the Members of this body, particularly because of his effective service on the House Appropriations Committee concerned with the defense of our Nation. As one of Florida's outstanding citizens and legislators Bos Sikes has now added another feat to his accomplishment of service and I know I can speak for all of my colleagues not only from Florida, but from both Houses of the Congress when I say "Congratulations, General SIKES."

The luncheon was presided over by John T. "Jake" Carlton, executive director of the Reserve Officers Association of the United States, who has and is doing a magnificent job in helping to keep the U.S. Army Reserve as a ready and active force. Following are remarks made by the national president of the Reserve Officers Association, Maj. Gen. Carl T. Sutherland, U.S. Army Reserve, and the remarks of the former national president, Maj. Gen. STROM THURMOND:

Message From the National President on the Occasion of Luncheon in Honor of R. L. F. Sires, a Brigadier General of the U.S. Army Reserve

Please express to General Sikes my deep regret that I cannot be present with you today as ROA pays tribute to him, recognizeding his great achievements as a citizensoldier as well as a nationally recognized leader in the Congress. Bos Sikes for many years has been one who has exhibited great capacity for leadership and his new estate prepares him for broader service in the years to come. We are proud of him. As national president of ROA, I am especially pleased to pass to him the honor of again serving as ROA's legislative advisory chairman, Knowing Bos Sikes as I do I am confident that he will respond willingly to this call for service. My best wishes to you all on today's happy occasion.

CARL T. SUTHERLAND, Mujor General, U.S. Army Reserve. Bos Sixes has served national defense far beyond the call of duty in three elements of his activity.

First, he has taken seriously his duties as a Reserve officer and has carried forward his own personal training in order to make himself best qualified in his field. That achievement we particularly recognize today.

Second, as a Member of the Congress and

Second, as a Member of the Congress and a key member of the Appropriations Committee he has by diligent application to his duty become one of the best informed men in the Congress on military matters. Against this broad background he has contributed to the sound military strength we have today. We know also that he has gained his achievements in this field frequently against great odds. But fighting against odds neither dismays nor deters a man like Bob Sikes.

And third, and perhaps most important, BOB SIKES has combined his efforts in three roles: as citizen, as soldier, and as legislator to contribute to a substantially greater public understanding of our military needs as well as a better working relationship between the civilian components and the Regular services. In a true sense Bos Sikes has served the one Army concept and in so doing has encouraged development of a similarly satisfactory relationship between the Reserves and the Regular services. All of these have made our national defense forces more effective today than at any time in a peacetime period. We, therefore, honor him today for what he is and for what he has done and for what he now stands ready to do in the future.

STROM THURMOND,
Major General, U.S. Army Reserve.

Methodist Church Leaders in Indiana Call for Repeal of Right-To-Work Law

SPEECH

OF

#### HON. JOHN BRADEMAS

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES
Wednesday, August 31, 1960

Mr. BRADEMAS. Mr. Speaker, I would like to call to the attention of Members of Congress a statement by a group of prominent ministers of the Methodist Church in Indiana calling for repeal of Indiana's so-called right-to-work law.

I believe that many fairminded citizens will agree with the statement of these churchmen that "in the name of freedom the present right-to-work law denies freedom, compelling, as it does, all of industry to observe the open shop, thus negating free collective bargaining."

This law has been in effect in Indiana since 1957. It has had a fair trial. Now, this group of Methodist ministers has reached the conclusion that by destroying union security, the so-called right-to-work law creates an unbalance between labor and management harmful to the worker because his collective bargaining position is weakened, and equally harmful to management because the union cannot guarantee that nonunion members will honor a no-strike pledge in a labor-management contract.

METHODIST MINISTERS FROM THROUGHOUT INDIANA SIGN STATEMENT

The statement was signed by Rev. Lynn Garth, pastor of the Stull Memorial Methodist Church of South Bend, Ind., a highly respected minister of the Methodist Church in my State, who is chairman of Christian Social Relations of the 1960 Northwest Indiana Annual Conference of the Methodist Church, and a group of other Indiana Methodist churchmen. These include Rev. A. Summers Clark, of Westfield; Rev. Robert Smith, of Indianapolis; Rev. Vernon Bigler, of Terre Haute; Rev. Warren Anderson, of Dyer; Rev. Edward Boase, of South Bend; Rev. Robert Fields, of Kentland; Rev. Warren S. Saunders, of Goshen; Rev. Lyle Loomis, of West Lafayette; and Rev. Victor E. Ramsey, of Boswell.

I believe it is pertinent to note also that the statement of these clergymen supports the collective bargaining plank of the Democratic Party platform for 1960, adopted at Los Angeles, which pledged repeal of the Federal authorization in the Taft-Hartley Act for all right-to-work laws.

As a member of the Methodist Church in Indiana myself, I am particularly pleased to insert the statement of these Methodist clergymen in the Congressional Record. The statement follows:

We believe that members of the ciergy are obligated by their calling to speak strongly and forthrightly on all issues affecting the rights of man. To react timidly in the face of controversy is moral and social cowardice. To speak with honest conviction on issues inherent in the so-called right-to-work law enacted by the Indiana Legislature in 1957 is our desire and the intent of this statement.

We believe in the democratic process in labor-management relations. We believe that in the name of freedom the present right-to-work law denies freedom, compelling, as it does, all of industry to observe the open shop, thus negating free collective bargaining.

We are particularly concerned over evergrowing trend to sell ideas and legislation by "labels." Advertised as protection for a minority, the so-called right-to-work law is, in effect, a restriction of the freedoms of organized labor and management. We oppose the efforts of proponents of this law who proclaim themselves as the protectors of the rights of the worker, when, in fact, they have molded a legal instrument detrimental to the worker. By destroying union security, the so-called right-to-work creates an unbalance between labor and management harmful to the worker because his collective bargaining position is weakened, and equally harmful to management because the union cannot guarantee that nonunion members will honor a no-strike pledge in a labor-management contract.

Significant in evaluating the true purpose of this legislation is the list of organizations which supported its passage: the Indiana State Chamber of Commerce; the Associated Employers of Indiana; the Indiana Manufacturers Association; the Indiana Right-to-Work Committee, a group supported by industry contributions. These organizations are acknowledged as self-interest associations. Their primary purpose is to work for the interests of the employer. However commendable their other programs for Indiana might be, it is improper to translate this self-interest to a guise of protecting the rights of workers.

TERM "RIGHT-TO-WORK" MISLEADING

The misleading nature of the term "right-to-work" has been recognized by the various States where the issue has been on the ballot as a referendum. The States of Washing-

ton, Ohio, Idaho, and California refused to permit proponents of this measure to use the words "right-to-work" on the ballot because the phrase is deceptive. This law guarantees no one the right to work or the right to any particular job.

The arguments for the so-called "right-to-work" law have no real basis in fact. The Indiana "right-to-work" law has not at-tracted new industry that added to the prosperity of the Hoosier State, and has not cur-

tailed the number of strikes.

Although proponents of the present law have falsely convinced many persons that it is a step toward the control of corruption, we find nothing in the present right-to-work law that can prevent corrupt labor practices. We recognize that corruption has entered the union movement in some few instances and in this respect we strongly urge the use of existing legislation to combat corruption in the labor movement.

U.S. SUPREME COURT HAS UPHELD UNION SHOP

Those who honestly support this law because they believe it to be morally valid, actually ask a question on the meaning of freedom. At what point do you decide the limitations of a person's right to do as he wishes when there exists the very real question of his obligations to his fellow man? Specifically, we get to the question of whether union membership as a condition to employment is a violation of man's personal or constitutional liberties. The answer is simple. The U.S. Supreme Court has unanimously declared that the union shop does not violate the Bill of Rights or any other American constitutional freedoms.

Government, consequently, has three courses of action. By legislation, it could compel the union shop. But even labor doesn't want this. It can compel the open shop, as has happened with the so-called right-to-work law. The third course, is no action at all—the Government can keep hands off. In other words, if a company and a union agree voluntarily that all employees represented by the union must become members, the Government would leave them free to do so. Traditionally, this middle-of-the-road approach has been the American legislative policy.

American legislative policy.

ISSUE OF UNION OR NONUNION SHOP SHOULD NOT BE DETERMINED BY GOVERNMENT

We seek freedom for laboring people. point out that certain types of compulsion are not incompatible with freedom in a complex society. Whenever people work to-gether in groups, decisions made and rules adopted by the majority must be binding upon all. Collective bargaining is posited upon the democratic framework in which management and representatives of a majority of the workers jointly reach agreement incumbent upon all. The issue of nonunion or union shop should be one item which' is open to free collective bargaining and not determined by Government. lieve that the right-to-work law should be repealed in order that workers may be neither compelled to work in an open shop nor compelled to work in a union shop except through democratically determined labor-manage-ment contracts.

Sewer Solons

EXTENSION OF REMARKS

### HON. ABRAHAM J. MULTER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES Thursday, September 1, 1960

Mr. MULTER. Mr. Speaker, I commend to the attention of our colleagues the following editorial which appeared in the New York Herald Tribune of September 1, 1960.

SEWER SOLONS

"Mr. President," Senator Dopp declared portentously the other day, addressing, as per custom, that body's Presiding Officer, "time is running out for the free world."

One item acted on by the reconvened Congress while Mr. Dopp thus watched the sands of time disappear was S. 3834, an act to increase the maximum amount which may be borrowed by the District of Columbia for use in the construction and improvement of its sanitary and combined sewer systems, and for other purposes.

How long before Congress gets out of the local sewer business, and tends instead to the Nation's business? How much longer, that is, must both the District and the Nation wait before Congress deigns to yield the still distranchised District the elementary demo-

cratic right of self-government?

The Minimum Wage Conference

EXTENSION OF REMARKS

### HON. JAMES ROOSEVELT

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES
Thursday, September 1, 1960

Mr. ROOSEVELT. Mr. Speaker, the failure of House and Senate conferees to agree upon a satisfactory minimum wage bill has caused a temporary setback to present efforts to raise the minimum wage to \$1.25 an hour and broaden coverage under the Fair Labor Standards Act to include several million additional low-wage employees. I am confident, however, that this setback will be of short duration. I feel sure that the new Congress that will be elected in November, aided by strong Executive leadership which the election of Senator John F. Kennedy as President of the United States will provide, will speedily formulate and pass a minimum wage bill that will do an even better job of assuring economic justice for all American wage earners than would either of the minimum wage bills passed by the House or Senate this year.

The fact that Congress has been unable to pass a minimum wage bill this year provides an opportunity for the people to pass judgment in the November election on those responsible for this outcome. · Minimum wage legislation will assuredly be a most important issue in the forthcoming presidential and congressional campaigns. For this reason, and since I was a member of the conference committee representing the House, I should like to define the issue, as I see it, and describe what went on in our deliberations so that my colleagues and the American people may fairly judge where the responsibility for our failure lies and the people may cast their votes accordingly.

As I believe my colleagues are aware, statements were made before and during the conference committee sessions that the House conferees would not yield to the Senate and that the Senate conferees would either have to accept the House bill or be reconciled to having no

bill at all. I think this was a pretty fair and accurate statement of the problem with which the conferees had to deal. It is important, however, to inquire who made these statements and why the adoption of this position by the party who made them made inevitable the failure of the conferees to agree upon a satisfactory minimum wage bill.

The statements to which I have reference were not made by any of the conferees representing the majority party on the conference committee. As we all know, the statement was made, and often repeated during our deliberations, by one of the conferees from the minority party representing the House. Nor were these statements merely a prediction of what the conferees might be expected to do. They constituted a deliberate policy assertion without whose adoption by the three conferees representing the minority party from the House the truth of this prediction could not have been realized.

The willingness of the Senate conferees to work out and agree upon any reasonable compromises of the differences between the House and Senate bills has been described in detail in discussions which took place on the Senate floor the day before adjournment. There is no need for me to repeat that discussion here. I only want to add that all that has been said about the desires and the efforts of the conferees representing the majority party in the Senate, led by the conference chairman, Senator JOHN F. KENNEDY, were fully shared and supported by Congressman John H. DENT and myself. With the honorable exception of Senator WINSTON L. PROUTY, who made constant efforts to bring about a conference agreement, however, the Senate conferees representing the minority loyally supported the position of those conferees representing the House. responsibility for the "House bill or nothing" policy lies squarely at the door of the Republican members of the conference committee.

Why was it, however, that agreement on the House bill was not possible in conference? The answer to this lies in the fact that, as I told my colleagues at the time we debated the Kitchin-Ayres substitute for my bill, the House bill made only token improvements in the coverage of the Fair Labor Standards Act. Whereas the Senate bill provided for a minimum wage of \$1.25 an hour for employees presently covered by the Fair Labor Standards Act, the House bill provided for a minimum wage of only \$1.15 an hour. Whereas the Senate bill provided coverage for an additional 4,100,000 retail, service, laundry, telephone, and other employees, the House bill provided coverage for only an additional 1,400,000 employees limited to retail chains, doing business in two or more States and having at least-not severalbut at least five stores.

Whereas the Senate bill provided for a maximum workweek of 44 hours for newly covered employees during the second year after the date of enactment; 42 hours the third year, and 40 hours thereafter; the House bill provided no overtime protection for newly covered employees.

Some may say that even though the House bill was inadequate, it was better than no bill at all and that the conference committee should have accepted the House bill on the basis that it is more important to do semething than nothing at all for our low-paid wage earners. This argument, in my judgment, is completely without foundation. If the Congress had approved the House bill, the coverage of the act would have been frozen at the meager level provided for in the House bill for many years. Rejection of the House bill by the Senate conferees now gives us the opportunity and the duty, at the beginning of the next session of Congress, to begin again. As a result of what has been learned during the course of the discussion of this legislation in the legislative committees, during floor debate in the House and in the Senate, and in the conference committee, I am confident that we will be able to develop next year a new bill that will provide even more substantial new coverage and a minimum wage of at least \$1.25 an hour for employees at the low end of the economic ladder who urgently need this protection.

Passage of satisfactory fair labor standards legislation will be a matter of first importance in the next session of the Congress. Aided by strong executive leadership which I am sure the people will guarantee in this fall's national election, we will be able to accomplish much more than the miserable performance to which Congress and the people have been subjected during this recent session of the Congress.

#### Heptanoic Acid

SPEECH

### HON. WILBUR D. MILLS

OF ARKANSAS

IN THE HOUSE OF REPRESENTATIVES Wednesday, August 31, 1960

Mr. MILLS. Mr. Speaker, as it passed the House, the bill, H.R. 12659, simply provided for a 3-year suspension of the import duties on heptanoic acid. The Senate amended the bill by adding a new section relating to the definition of the term "waterproof cloth" as found in paragraph 907 of the Tariff Act of 1930. The purpose of this amendment is to close a loophole in the tariff laws, whereby certain cloth can today be imported as waterproof cloth and pay a lower rate of duty than that which would apply if the cloth were not able to be entered as waterproof cloth. The amendment would do this by providing that the term "waterproof cloth" shall be limited to cloths generally used in the manufacture of articles designed to afford protection against water, and by further providing that cloth possessing water-repelling characteristics shall not be classifiable as waterproof cloth unless it is of a kind generally used in the manufacture of such articles.

The House receded and accepted the Senate amendment.

I urge the adoption of the conference

### Report on Congress

EXTENSION OF REMARKS OF

### HON, KARL E. MUNDT

OF SOUTH DAKOTA

IN THE SENATE OF THE UNITED STATES Thursday, September 1, 1960

Mr. MUNDT. Mr. President, with the session of Congress at a close, I have issued my final report to my constituents in South Dakota which contains my observations on the record compiled, particularly in this short session ending in September. My report follows:

#### THE WINDUP

As this session of Congress came to an end, several significant "partial" victories were achieved on bills sponsored by your Senator. Of course the success attained cannot compensate for the lack of action by this Dem-ocrat-controlled Congress in other major areas, such as agriculture, or the need for legislation to prevent Communists from obtaining passports and using them against our best interests.

#### SENATE APPROVAL

Three bills which I introduced passed the The Freedom Academy bill, in receiving Senate approval, marks a major stride forward. Recognition has now been given that new approaches are needed in the cold war to launch a positive program in the political and economic fields to counteract the Soviet conspiracy. Senate approval also was given to the Mundt-Scott bill dealing with obscene and pornographic literature, and my bill for a special commission to study problems of small towns and rural counties.
While it is unfortunate House action was not taken, Senate approval places all of the bills in a much stronger position for the next Congress.

#### LAST-MINUTE ACTIONS

Before leaving for South Dakota, I conferred with Fish and Wildlife Service offi-cials on the new aquarium at Gavins Point. Agreement was reached on accepting a bid for construction and assurance given that facility will be completed in time for centennial ceremonies in Yankton next year. An additional \$100,000 for rehabilitation of forest areas recently burned in South Dakota and Nevada was obtained on recommenda-tions which Senator ALAN BIBLE of Nevada and I made in the Senate Appropriations Committee. Our committee was meeting at the time fires were burning in the Black Hills. The new funds were added to \$700,000, providing a sizable sum for rehabilitation work in national forest areas.

#### IT'S TIME FOR SCORECARDS

While various organizations "rating Congress" have not completed their voting charts, I can report some indication on studies already compiled. One scorecard gives me only a 13-percent record of voting 'right." This one I take as a badge of honor and as truly reflecting South Dakota interests, for the 13-percent "right" votes came in the ADA scorecard, the ultraliberal Americans for Democratic Action. I'm surprised the ADA socializers didn't rate me zero. Programs in which ADA says I voted "wrong" are the usual centralized government pro-posals or wildcat spending gimmicks which would cause a terrific inflationary spurt, further lower the value of the dollar, and take away the system of State and local government so vital to our Republic.

"Free Citizens Voting Record," compiled by Civic Affairs Associates, has your Senator voting "right" 69 percent, the same score, in cidentally, as that of Senator John McCLEL-LAN, my Labor Rackets Committee colleague. My "right" votes were for economy in government, limited government, and other sential principles enhancing economic and political freedom.

Americans for Constitutional Action, headed by Adm. Ben Moreell, retired, and the former Democrat Governor of New Jersey, Charles Edison, records me with a 73percent score in voting for "safeguarding the God-given dignity of the individual, and promoting sound economic growth." My percentage—a South Dakota percentage, because it is your scorecard as well as mine—came on my votes against inflation, for economy, conscryation, against Government Interference, against Government ownership, for individual liberty, against coercion, and for a strong national security.

#### BACK HOME AGAIN

As this final newsletter of the year reaches you, the Mundts will be in South Dakota again. In closing this report, I want to thank the many, many folks who have written to me during this session of Congress. Your letters have been most helpful, and my hope is that I have been able to be of service to you. My thanks, also, to radio and television stations, wire services, and newspapers which found the newsletter of use to them from time to time.

#### THE 86TH DEMOCRAT CONGRESS PAILS THE FARMERS

With the "bobtailed" session of Congress finished, the record is written on the 86th Congress, a Congress controlled by a 2-to-1 majority of Democrats. What is the record for the American farmer? It can be summed up thusly:

"One of abysmal failure in dealing with the

agriculture problem."

In the fresh bloom of the 1958 victory at the polls, Democrats promised the American farmer that at long last, something would be done to solve the problems which have plagued agriculture for generations.

The House Agriculture Committee opened

its session in January 1959, with 23 Democrats sitting in complete control over a handful (12) of Republicans. In the U.S. Senate, the Committee on Agriculture had 11 Democrats in control, with the minority represented by 6 Republicans, of which I am fourth ranking.

The record, after 2 years, is a sorry one. The prohises made in 1958 by the Democrat majority led to the election victory which achieved the 2-to-1 Democrat congressional control. The promises were repeated in 1959. And again, as the Congress returned in January 1960, we heard the same promises. Early in July, the Congress adjourned—but not without the promise that "action for the farmer is forthcoming in August."

We heard the national convention proceedings in Los Angeles. We heard the political platitudes reach a crescendo on a platform of glittering promises unmatched in American history. And we heard the candidates selected at Los Angeles again promise action in the August session of Congress action to solve the farm problem.

But there was no action. The promises, growing bigger, remain unkept. The American farmer has looked to the U.S. Congress for 2 years to take constructive steps to alleviate the difficulties of a cost-price squeeze. The American farmer has looked in vain. He was told of major new plans contained in omnibus legislation. "Look to this legislation or that measure as the answer to your problems," the American farmer was advised. And he looked, carefully, but eagerly. He found only controversy within the House Agriculture Committee, when Democrats, completely in control of that committee, could not agree on a farm bill. The House Agriculture Committee Democrats killed the bill sponsored by their own compatriots. When the majority in the Congress could

When the majority in the Congress could not agree on an omnibus bill, they turned their attention to the most critical area, wheat. The Senate Agriculture Committee tangled over various measures, and finally agreed on a compromise which I offered. But the Democrat Senate rejected this proposal, substituting another which could not do the job. And the House added the final death blow to wheat legislation, with rejection of all wheat bills presented for a vote.

In another area, the Senate approved a bill for a crash research program for industrial uses of farm products, legislation identical to that which I have sponsored over the years. The House approved a watered-down, sadly ineffective version, and for more than a year, no agreement has been reached, to work out a compromise on this program which would open a vast area of new markets for American farm products and bring to the farmer a fair price for a full crop.

The President, recognizing deeply the problems confronting agriculture, was willing to accept a compromise with which he was not in full agreement but which he felt should be adopted if it expressed the will of the Congress. On two occasions he sent messages to Congress offering in advance to sign a wheat bill or a general farm bill if Congress would enact one designed to increase farm income, reduce surpluses, and meet the public interest. But the Congress again falled to meet even this test, and again falled the American farmer.

The 86th Democrat-controlled Congress has not been a proud one in the history of American agriculture. It has falled to meet its responsibility in developing constructive legislation, either for the whole farm plant, or for specific areas such as wheat. The American farmer has once again been made the victim of the whims and caprices of politicians who appear dedicated to the proposition that problem for political purposes is better than a solution to end the dilemma and bring American agriculture full force into our vibrant economy. The inaction by a Congress that has placed politics above national interest is a scar that unfortunately is borne by the farmer rather than the legislative body which could not forget the last election results but failed to foresee the next returns.

#### Washington Report

EXTENSION OF REMARKS

#### HON. BRUCE ALGER

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES Thursday, September 1, 1960

Mr. ALGER. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following newsletter:

WASHINGTON REPORT

(By Congressman Bruce Alger, Fifth District, Texas)

The 86th Congress, 2d session's 2d session finally came to a halt, long overdue. In my view, this session was an object lesson in poor congressional leadership. Congressional work could have been programed for final

adjournment well before the political conventions. Few, if any, feel that this last session accomplished much. To our credit, it may be claimed that we did not pass aid-to-education or minimum-wage legislation. The danger was ever present (and will be in the future) and should be understood by everyone looking to the next Congress. Some may say our finest compliment will not be over what we did, but what we did not do. "Operation Veracity" is the title of the effort by Republican Members in 2 days of

"Operation Veracity" is the title of the effort by Republican Members in 2 days of floor debate to expose 14 misstatements of fact in the Democratic platform. These categorical contradictions thoroughly discredit the Democratic platform without even getting into the controversial issues themselves, such as the party differences on the right-to-work law, oil depletion, tidelands ownership, and others. These misstatements and the two sides of these conflicting views I intend to present in Dalias further to inform the voters.

The second supplemental appropriation bill, 1961, was the final spending catchall, some 70 items totaling \$162 million. Two record votes were taken on increasing foreign aid spending. An interesting spectacle developed. When it became apparent that the increase of \$65 million for defense support was losing, the leadership on both sides urged Members to change their votes. Eight Members switched from nay to yea (amounting to 16 votes difference) and the appropriation passed 203 to 193. Some felt as I did that \$65 million cannot be too important when you realize that the mutual security program already has \$8,486 million to its credit for spending this year.

A resolution concerning a Congressional Commission To Commemorate the Constitution's 175th Anniversary later became better known as the vehicle for a housing bill. Unbeknownst to most Members, a \$550 million housing expenditure was tacked on by the Senate and slipped quietly through the House under unanimous consent. This is questionable procedure at best. It does fit the pattern of the past when housing bills frequently have been delayed until the closing hours of Congress, precluding careful consideration. The bill extended FHA title I insurance authority for 1 year, added \$500 million for college housing, and \$50 million for community facilities. This keeps the Federal foot in the door for all three programs until the next session of Congress.

The Dallas Federal building again was rudely thrust into the limelight by a statement issued to the press by the Government Activities Subcommittee chairman, Jack Brooks, of Texas (subcommittee of Government Operations Committee, chairman, William Dawson, of Illinois), on subcommittee stationery listing all mempers. I challenged this statement on the floor as improper procedure and unfair. It became apparent that (1) the statement was solely that of Mr. Baooks, not the subcommittee, although the inference of committee action was plain; (2) hearings were not held; (3) congressional information (the GAO report on Dallas site acquisition) was withheld from Members of Congress; (4) Mr. Brooks had not looked over the GAO report until a Republican colleague called it to his attention; (5) the GAO report specifically gave a clean bill of health to the Dallas site acquisition; (6) another committee, that on public works, was holding up reauthorization of the Dallas building because of the alleged continued study of the Government Operations Subcommittee (GAO report was received by them last April); (7) the reference to "peculiar moral and ethical over-tones" related to Dallas businessmen was unwarranted in view of the April GAO report. This individual's personal attack on the integrity of Dallas business people under the guise of committee action could not go

unchallenged, as I saw it. Neither can this charge be allowed to stand if the Dallas Federal building is to be built.

It is now up to Mr. BROOKS and his subcommittee to complete their work and "to put up or shut up." If he is wrong, the record must be corrected—apologies would also be in order. Right or wrong, I agree, indeed, insist, that it is proper for Congress to investigate. Private property—the right to own property—is a precious cornerstone of personal freedom and free enterprise. If there was improper activity in the acquisition of the Dallas Federal Building site, we should know about it. The power of government under eminent domain can be ruthless and destructive. It is incumbent on Congress to protect the citizens from unfair exercise of this power. However, in the zeal of investigation, no Member of Congress has the right to forgo the rules of procedure, nor damage character. Hearings on both sides of the question should be held, Government reports requested and studied, the committee views developed and finally presented to the House for action. Federal buildings should be built based solely on the openly arrived at study of need and meritnot by political deals outside the committees of Congress. On this, as Congressman, just like all Dallas people, I stand. Political decisions and deals should not be allowed to replace dedication to our elementary beliefs in right versus wrong. Fortunately, in most congressional matters, right and wrong generally are readily recognizable. It is so in this case. Congress should get on with this work as needed and right or shelve it for an equally understandable reason-that it is illegal, uneconomic in use of the taxpayers' money or other reason, clearly recognizable as wrong.

### No "Lost" Generation

EXTENSION OF REMARKS

#### HON. FRANCIS E. WALTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES Thursday, September 1, 1960

Mr. WALTER. Mr. Speaker, I would like to insert in the Appendix of the RECORD the following editorial from the Josephinum Review entitled "No 'Lost' Generation":

No "LOST" GENERATION

The "lost generation" that dominated the Nation's headlines in the 1920's has now sired a new generation—one that does not admit of easy classification.

Some of the evidence to be presented on this page would seem to indicate that the proper adjective for certain representatives of this new generation may well be somewhat less flattering than the term "lost."

In Westbury, Long Island, a 17-year-old student stood up before an audience of 1,000 and publicly refused to accept the American Legion award for citizenship. He announced that he wouldn't accept "an award from an organization whose policies I can't respect."

This particular instance of nonconformity was greeted with paens of praise by editors and columnists; politicians who have been at odds with one or the other American Legion post were loud in their admiration of Stephen's rugged individualism; and the Westbury superintendent declared, "Come hell, high water, or the American Legion, I'll defend Stephen to the world. If I had a son, I would want him to be just like Stephen."

Quite apart from the fact that Stephen's grandstand play may well have been an indication, not of courageous independence, but of slavish acceptance of the opinions of certain teachers, one wonders what is so bad about the American Legion that it should bring down upon itself the anger of

a 17-year-old high school graduate.

Is the American Legion worthy of contempt because it spent \$8 million last year for the relief of needy children? Or because its members spend thousands of hours in hospitals to relieve the loneliness and the suffering of those whose bodies and minds were broken in a war fought to preserve the freedoms Americans cherish? because it teaches and trains millions of youths how to play baseball? Just what policies of the Legion are so offensive and contemptible in the eyes of this 17-year-old senior? Stephen doesn't say—but the reasons apparently are of no importance to those who view conconformity as a virtue to be prized above all others

At the Stuyvesant High School in New York City, before an audience of 1,400 persons, 700 seniors broke up their own graduation exercises by jeering and hissing the presentation of an American Legion citizenship award to one of their number, and by booing their principal every time he tried to speak. Dr. L. J. Fliedner was equal to the situation: he halted the ceremonies, told the seniors to pick up their diplomas the next day, and ordered the playing of the

recessional.

Dr. Fliedner reportedly had a reputation as a "disciplinarian"; but even granting the fact that he may not have radiated "popularity," surely on an occasion such as a commencement one has a right to hope that high school seniors will conduct themselves in a dignified and reasonable fashion, with some show of respect for authority. But apparently these students thought that the times called for an expression of their disapproval, and the result was an exhibition of cruelty (to parents and teachers), bad manners, and hoodlumism which one is reluctant to associate with America's youth.

May 12-14, young men and women, most of them students, staged riots during the hearings of the House Committee on Un-American Activities. This mob violence assumed such proportions that about 100 of

the rioters were arrested.

Judge Albert A. Axelrod dismissed the charges against 62 of them, in order that they might be spared the stigma of a court conviction. Of those 62, all but 4 signed a statement saying, "Nobody incited us; no-body misguided us. We were led by our own convictions and we still stand firmly by

FBI Director J. Edgar Hoover, in an official report, made it clear that these riots were part of a planned Communist program to discredit the House Committee on Un-American Activities. The leading organizer of the riots was Douglas Wachter, a sophomore at the University of California, who attended the national convention of the Communist Party last December as an official delegate from northern California.

On May 6, party leaders met to plan the riots, which were to be led by such key members as Archie Brown and Merle Brodsky, but who were to remain behind the scenes until the time set for the demonstrations. So cleverly were the riots manipulated that 58 of the students didn't even know What was happening to them: "Nobody in-

cited us; nobody misguided us."

All three incidents fit into a general pattern; all three indicate that there is, in this new generation, a frightening absence of loyalty, of patriotism.

Mr. Herbert Hoover put it this way: "We have been brainwashed with another Communist basic tenet. They the Communists, insist that love of country, pride of a people in their history, their ideals, and their accom-Plishments is wicked nationalism. Today,

we alone among the nations have a multi-tude of citizens who have sunk to a position of perpetual apology and seeming shame for ourselves."

There was something rather charming about the "lost generation" of the twenties; they radiated the joy of living. But there is nothing charming or delightful—in fact, there's something repulsive about a 17-yearold who publicly refuses a citizenship award by an organization whose members fought and died to make a free education possible for him; there's somthing repulsive about a group of high-school graduates who break up their own commencement by booing their principal; and there's something fearfully sad about a group of American college students who can be duped into aiding and abetents who can be duped into analyting the work of America's sworn enemy.

Those young men and women are "lost"; they are not even acceptable nonconformists. Basically, they're snot-nosed, smart-alecky brats. And to rise to the defense of their antics or to look upon those antics as evidence of a much-to-be-desired nonconformity, is but to promote a trend, a tendency which will one day rise up to de-

stroy us as a nation.

What the Nation seems to need much more than a platform of rights these days is a platform of obligations.

## The End of the Golfing Years

EXTENSION OF REMARKS

# HON. ABRAHAM J. MULTER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES Wednesday, August 31, 1960

Mr. MULTER. Mr. Speaker, I commend to the attention of our colleagues the following article by Bruce Roth-well as it appeared in the London News Chronicle of June 26, 1960.

### THE END OF THE GOLFING VEARS (By Bruce Rothwell)

Washington, Sunday.-Mr. Eisenhower came home this morning to a policy in ruins and a hesitant but burgeoning criticism that he has been a disastrous President.

He sent word ahead that he wanted no organized welcome-for he was arriving, as his astute press secretary put it, at the hour of church. On this public relations gesture so typical of this Presidency of the golfing years, the last of the great journeys of per-sonal diplomacy has ended \* \* \* not with tears but with silence; not with the victory salute, but with brooding second thoughts. Even so, 1,000 of the faithful were there to help him from the plane, and Mr. Nixon tendered his brotherly slap on the shoulder for a job well done against those inscrutable, anonymous Communists who provide these days the answer to every possible permutation of Washington ineptitude.

### IDYL

A Cabinet session, he suggested? Yes, said Eisenhower, as soon as possible-and he would report on the achievements of his 22,000-mile, 2-week trip. For he is convinced that it was almost totally successful; no matter that it caused the natural antiwar feeling of millions to express itself, of all things, in anti-Americanism, he will tell the Nation on television tomorrow night that all is for the best in this best of all possible worlds. At least his golfing idyl in Hawaii was successful; 6 days' golf to 7 days of state visits (3 of those at sea relaxing). Hawaii was included in the trip because it had just become the 50th State, but it saw nothing of him. He left the golf course of

Kanehoe Marine Air Station only once-to kanehoe Marine Air Station only once—to visit the U.S. Army golf course. He even received an honorary degree on the links. Hawaii University's elders had to don cap and gown and go, as the New York Times scathingly reports today, "to the unacademic surroundings of the club bar and dining room to spare President Eisenhower the halfhour drive to the university." The ceremony lasted 2 minutes 30 seconds.

#### EMPTY

So the golfing years are ending. very day when the summit was collapsing, it is being sadly recalled today, Press Secretary Hagerty found him in golfing rig ready for 18 holes, and spent 30 minutes pointing out that, public relationswise as the phrase goes, it just would not look right. These have been 8 empty years for the U.S. putting green on the White House lawn; places for chip shots at the Gettysburg farm and Camp David; a makeshift office above the pro's shop at Augusta National for signing Executive orders and holding emergency Cabinets. And still he is in the nineties. For policy there have been only slogans; the struggle in the world has been seen in terms of a baseball game and the only questions ever asked or answered have been: Who is winning, the Reds or us? There were no other players, no other issue.

Under Elsenhower all domestic problems were to be contained within the straitjacket of a balanced budget-so that today the economy is stagnant; material comfort was given priority over national needs; foreign became predicated upon trusted personalities in office who would contain communism-Adenauer in Europe; Rhee, Chiang, Kishi in the Far East.

Through the all-powerful Hagerty and the largely sycophantic White House press corps, which takes itself seriously as an annex of government, the image was created over the years of the hero President. For years he fumbled through press conferences, but the words came out in journalistic expertise, "President Eisenhower declared today \* \* \* proclaimed today \* \* \* asserted today." At least he seemed omniscient. It is late in the day to be writing him off a failure. At least he tried. But the Washington press corps is an enraged group this weekend, ashamed of itself as much as of their man, aware at last that heroes don't make Presidents, that America—and the world—needs and deserves more than a grin. Eisenhower came reluctantly to the Presidency, but it corrupted him. He had wanted to remain a legend the general of all the people. But he ignored, or was not told, or did not understand, that the American Presidency will not work unless the incumbent is a leader. He tried to run it as he did the war-by the widest delegation of powers; by compromise; and when Dulles, the ablest of his lieutenants, went, it collapsed. There was a time, just after the 1955 heart attack, when he thought of abandoning it. But they flattered him, told him he was the President of peace—and he believed it.

But he had neither the interest nor capacity for the most exacting role in the world; rather than preparing for hard negotiating he preferred and permitted public relations ventures—the open skies proposal of the 1955 Geneva summit was, 5 years later. still the best Washington could do to save the U-2 debacle. The roar of the crowds became both Eisenhower's alternative and his elixir. It transformed him. I was within 5 yards of him all the triumphant way into Seoul as millions lovingly mobbed his car. It was a revelation to see at such close range how he was mesmerized by his ability to mesmerize them. Now it is over, the bread and circuses are finished, history will take care of Eisenhower and the spotlight turns to the new men, to the Kennedys and Johnsons and Stevensons and Nixons, who will fight out the conventions next month in Los Angeles and Chicago for the privilege of be-coming the next President. Yet, for all this above. Eisenhower is still the king who can do no wrong. The Senate's investigation of the U-2 affair, out today, makes no reference to him in passing blame. And, if he were running for election in the campaign now upon us, the 27 percent, who bother to vote in this "home of the brave and land of the free' would insure that he was "Oh God, Oh Montreal, overwhelmingly reelected."

# Gov. Robert B. Meyner: New Jersey's Great Spokesman

EXTENSION OF REMARKS

# HON. FRANK THOMPSON, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES Thursday, September 1, 1960

Mr. THOMPSON of New Jersey. Mr. Speaker, there was absolutely no justification for the attempt of one of the newspapers in New York City to draw sinister conclusions from the trip abroad made by New Jersey's Gov. Robert B. Meyner to promote shipping for the New York-New Jersey port.

Some newspapers miss no opportunity to lambaste a Democrat, and this attack on New Jersey's distinguished Democratic Governor is typical of the unjust, unfair attitude taken in such matters by the country's Republican-controlled newspapers.

New Jersey's many fine newspapers, on the other hand, are distinguished by a more balanced approach to the news and it is with pleasure that I include as part of my remarks the following articles from the Newark Evening News, and the Newark Star-Ledger:

[From the Newark Star-Ledger, Aug. 27, 1960] MEYNER'S TRIP FOR PORT AUTHORITY WELL PUBLICIZED IN 1958

### (By Franklin Gregory)

Representative Walter S. Baring, Democrat, of Nevada, filed in the Congressional RECORD yesterday a charge that Governor and Mrs. Meyner went to Europe in 1958 at the expense of the Port of New York Authority.

What the western Congressman forgot to add was that the charge was over 2 years old and has been well publicized, and de-fended by Meyner, at the time. The cost was \$2,700.

What the Congressman also omittedmaybe he didn't know it-was that the Governor on at least one other occasion took a flying trip at port authority expense to promote port business.

That was in August 1959 when the Governor's round-trip fare was paid by the port authority from San Juan, P.R., to Caracas, Venezuela.

That trip was also well publicized at the time, and at press conferences the Governor announced that the port authority footed

The Governor and the port authority differed yesterday over who paid the bill for his February 1959 trip to Buenos Aires, where the Governor made a speech in behalf of the port authority.

Meyner said it was his recollection that the port authority paid for this trip. The port authority said its records did not show this.

#### DEFENDS POSITION

Both the Governor and the port authority were candid yesterday when informed of the action by Baring, who is a sworn foe of interstate agencies.

Said Meyner:

"The [European] trip was in the best interests of the port. I did a selling job. I don't think I should take my own money to sell the port. If I am trying to lend my name to a bit of port promotion, what am I supposed to do? Take it out of my own salary?

"I took about 10 days in April and May 1958. I spoke at a big luncheon in London. was entertained in Dublin. I was entertained by the mayor of Amsterdam. I gave a speech at the Brussels Worlds Fair and was entertained by Howard S. Cullman, former authority chairman.

"Everybody appreciated what I did for the port of New York. Everybody said, 'Wasn't it wonderful the Governor was taking the time to do this?"

A year later, following the Governors' conference in Puerto Rico, he attended a port authority luncheon opening a new Caribbean promotion office. The port authority then flew him to Venezuela for a speech and back.

#### MANY STORIES PUBLISHED

Recalling all this, the port authority publicity office said yesterday:

"There were no less than 135 stories in New York, New Jersey, and European newspapers on the magnificent port promotion efforts made by Governor Meyner, of New Jersey, in England, Ireland, and Europe.

"The fact that the port authority, the agency of the two States in the promotion of the port, and not the taxpayers of New Jersey were paying the expenses of Mrs. Meyner's government business trip was also

His expenses throughout this trip

The port authority spokesman said it would take a little more time to dig out the cost of the Buenos Aires and Venezuelan

The House, at the request of its Judiciary Committee, headed by Representative EMANUEL CELLER, Democrat, of Brooklyn, has cited three port authority officials for con-tempt of Congress. The charge is that they refused to supply interoffice memorandums. Both Governor Meyner and Governor Rockefeller, of New York, instructed the officials not to hand the material over. They emphasized that the port authority supplied CELLER's subcommittee, which is probing the port authority, with much other material.

[From the Newark Evening News, Aug. 27, 19601

TRIP NO SECRET-MEYNER PORT AUTHORITY JAUNT WELL PUBLICIZED

It was no secret in 1958 that the trip to Europe of Gov. and Mrs. Robert B. Meyner was being paid for by the Port of New York Authority in behalf of promoting business in the greater New York port area.

A brief tempest, however, was touched off yesterday by the revelation in the CONGRES-SIONAL RECORD that the bistate agency had picked up the tab for the 15-day trip.

A report on the trip was entered into the CONGRESSIONAL RECORD by Representative WALTER S. BARING, Democrat, of Nevada, an ardent foe of quasi-governmental agencies such as the authority. The charge was made that the itemized expenses of the trip were among information which the port authority had declined to give the House Judiciary Subcommittee investigating the agency.

Representative EMANUEL CELLER, Democrat, of New York, chairman of the subcommittee investigating the port authority, said "I want to find out about this expenditure. I want to know Meyner's trip costs, even if they are only a penny."

#### "NOT CHICKENFEED"

The Congressman said the port authority puts its annual promotion expenditure at \$1 million, a figure he termed "not chickenfeed." He said he wanted a breakdown of all promotion expenditures, adding that this was the kind of information port authority officials had withheld from his committee.

CELLER said "Meyner was the most vehement among those who wanted to stop this inquiry. Do you think he wanted us to know how much the port authority paid for his trip?" CELLER said he did not know the source of Baring's information.

Back in 1958, however, there was no secrecy about the trip. Announcement that the Meyners had accepted the port authority invitation was made before Newark business and civic leaders at a luncheon meeting of the Newark Chamber of Commerce. The luncheon marked the beginning of a \$232 million expansion program at Port Newark.

#### "WORKED LIKE A FOOL"

Meyner yesterday recalled he had "worked like a fool" on the promotion trip to Europe. He said he had made speeches in London, Dublin, and Amsterdam in an effort to sell businessmen abroad on the idea of making greater use of the port facilities in the metropolitan area.

Meyner said, "It was a working trip—certainly not a pleasure. It was part of the general effort to promote the entire port of New York."

He added: "What was I supposed to do, pay for the cost of the trip out of my own pocket?"

An authority spokesman said the agency had paid expenses totaling \$2,700 for the Governor. The spokesman added that it had been publicized at the time that Meyner was going abroad at port authority, not taxpayer, expense.

The bistate agency also noted there had been "no less than 135 stories in New York, New Jersey, and European newspapers" scribing the "magnificent port promotion effort" Meyner had made in Europe.

[From the Newark Star-Ledger, Aug. 27, 19601

#### NOTHING TO HIDE

There is absolutely no justification for the attempt being made to draw sinister conclusions from the trip made by Governor Meyner to Europe to promote foreign shipping for the New York-New Jersey port.

Representative BARING, a Nevada Democrat, is reported to have said he will enter into the Congressional Record the fact that the port authority paid for the Meyner trip in 1958. A Manhattan newspaper says the expense account for the trip was among the documents that the port authority refused to turn over to the congressional investigators and which led to a contempt citation of three top port authority officials.

There clearly is the implication of an attempt to hide something, that the Governor was taking a junket at the expense of the port authority and that the public was being kept in the dark.

There is no basis to any of these implications. Meyner's trip to Europe in behalf of the port authority was ballyhooed before he left, during his stay in Europe and on his return. The purpose of the trip was to drum up business for the port authority, which was developing Port Newark, and it was clearly stated on several occasions that the port authority was footing the bill for the trip.

The fact is that a mission to lure additional business to the port is not something highly unusual. And it was proper for the Governor to head such a mission, since his

State stands to gain tremendously by increased business at the port. In taking time out to go on this trip, the Governor was performing a service for the port authority and for the State. There was no reason for him to pay his own expenses. On the con-trary, if we require public officials to pay their own way on such missions, we will forfeit the advantages of such promotional ventures-or we will have to make sure public officials are men of independent financial means. Neither alternative is acceptable.

Bringing up the Meyner trip now smacks of an underhanded way of trying to smear the port authority, because of its stand in the controversy over the congressional investigation. It also looks like an attempt to embarrass Meyner because he has defended the port authority and joined with Governor Rockefeller in ordering port authority officials to refuse the demand for all the port authority records.

The trip is a matter of public record, and information about it is readily available. There was no attempt to withhold anything.

The trip, as a matter of fact, was publicized to the hilt-since it was to gain publicity that the trip was made in the first place.

# Analysis on What Can Be Done Concerning the Farm Problem

SPEECH

# HON. LEONARD G. WOLF

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 31, 1960

Mr. WOLF. Mr. Speaker, many lines have been written about the farm problem, but none have come to grips with the reasons why we have a farm problem, how our farmers are affected, and what we can do about it, as does the following analysis recently made by Marianne Means and Everett Swingle. I commend it to the attention of my colleagues in the hope that it will stimulate interest and ideas which can be applied toward the solution of this very serious national problem:

It is tragic that in the richest nation on earth, where 1 farmer easily feeds 24 city dwellers, there could be a farm problem.

How can this be?

We have come such a long way from the days when one out of every four Americans had to till the soil to keep the Nation alive.

Our modern farm production and the vast marketing, storing, transporting, processing, wholesaling, and retailing system which moves the food into our kitchens is one reason we are healthier than ever before. Our children are taller, and have a longer life expectancy, than we did at the same age.

We have the highest level of living the world has ever seen. The food we eat is tastier, more varied, and better for us-and It comes to us tidily prepared for a minimum of effort, as ready mixes, concentrated and dehydrated products, or "heat and serve"

And although most people of the world spend half their incomes for food, we in America spend only 21 percent.

If our farmers were no more efficient than those in the Soviet Union, 221/2 million Americans who now work in manufacturing, mining, construction, or other nonfarm busi-nesses would have to produce food, clothing, and forest products. For in Russia, one

agricultural worker feeds only four or five people, and more than 40 percent of the total labor force works in agriculture or forestry.

Obviously, the American farmer is doing a good job of making life better for the rest of us. But he is not doing so well for himself.

And "aye, there's the rub," as Hamlet said. For despite rising costs of food in our grocery stores, the average farm income has steadily dropped. Last year 56 percent of American farm families made less than \$2,500 a year.

Grain surpluses pile up in warehouses, costing taxpayers about \$1,500,000 a day. Government programs aiding farmers cost millions.

People who cannot make a decent living on their small farms are moving into the cities by droves, unprepared for city ways and untrained to handle city jobs.

What went wrong?

As the amount of food processing continues, the farmer's share of our food dollar generally declines. In 1959, the farmer only got 38 cents of every \$1 worth of food you put into your grocery bag. The rest went to the men who transported it, stored it, processed it, wrapped it in a fancy package, inspected it, and put it on the grocery

For example, the wheat used in baking a 20-cent loaf of bread costs only 3 cents. The remaining cost is for the trimmings.

The shopper, cringing at the high price rung up by the grocery clerk, often forgets this when he wonders why farmers are complaining. He sometimes forgets, too, that his grocery bill is increased by the large number of nonfood items—such as drugs, cosmetics, records, cutlery-he can purchase in today's supermarket.

The farmer's unique problem is that his costs are rising, as they are for every businessman-but he cannot pass on these increased costs to the consumer, as other businessmen can. The prices of fertilizer, seed, tractors, machinery repair, fencing, etc., keep going up. But the farmer can rarely increase the prices he gets for his own products.

He cannot control his prices, because he cannot control his supply. When his crop is ripe, he must sell it; he cannot hold it back until some other time when the going market rate may be higher.

He is selling his harvest of wheat, or strawberries, or tomatoes, the same time all his neighbors are selling their harvests, too. The market is glutted, prices go down, but the farmer must sell anyway.

The more abundant the harvest, the bigger

the supply, the lesser the demand, and the lower the prices.

Thanks to the technology and research which has replaced the horse with the tractor and the hoe with the combine, and taught the farmer to control drought through irrigation and insects through sprays, crop production has increased steadily for the past years. Production is 56 percent higher per acre now than it was in 1919-21. Output per breeding animal is 81 percent

greater than in 1919-21.

Productivity of the American farmer is

growing more than twice as fast as the productivity of workers in industry.

Yet the net income for 1 hour of farmwork, including income from capital assets, was \$1.29 in 1959. One hour's work in a

factory, however, averaged \$2.22.
And the hourly wages of food marketing employees, who handle the farmers' products, averaged \$2.10.

Thus the farmers' very efficiency has created its own problems. Seeking his own solution, the farmer has steadily increased the size of his farm during the past 20 years, as he found he could handle larger acreages. Machinery and fertilizer and the new hy-

brids are expensive, and the farmer whose land is too small to keep his costly machinery busy or to use up wholesale purchases cannot meet his production costs.

Thus, small farmers have steadily been forced to leave their homes, sell out to more prosperous neighbors, and make the sad trek to the city. Since 1950, about 5 million persons left their farms, leaving a present farm population of around 20 million.

Ten years ago, there were 4,700,000 farms; now there are only about 4,100,000.

True, some people, young folks usually, want to leave the old ways and share the opportunities of city life. But what about the small farmer who wants to stay on his land, into which he has poured his sweat and

tears and toil for many years?

The farm problem, then, boils down to four questions which the Nation has been

trying, unsuccessfully, to solve for 30 years:

1. How can we assure all farmers of a decent income, comparable to their city brothers'?

2. What should we do with our huge surpluses, costing taxpayers billions every year? How can we best distribute them to the needy?

3. How can we help the small farmer, but at the same time slash drastically the cost of our whole farm aid program, now at an all-time high?

4. How can we do these three things without complete Government control over the farmer?

Those bumper crops down on the farm and the steady drop in farm income have produced a bushel basket full of trouble which the Government has been trying to solvewith little luck—for the past 30 years.

The Nation is storing a record \$9 billion

worth of surpluses under the price support program. And it costs the taxpayers about \$1.5 million a day to store these surpluses, of which we already have enough to last 21/2

years if all production were suspended.
Politicians, aware that the big block of votes from Farm Belt States could turn an election tide, have been scratching their heads and wondering what to do about the farm problem for years.

In the past 5 years, the problem has be-come acute. During World War II and the Korean conflict, farmers were prosperous and surpluses reasonable because soldiers and warring allies abroad ate up the stepped-up production made possible by technological advances. In peacetime, however, this market disappeared, although production continued to increase.

The Department of Agriculture has been paying some farmers various combinations of price supports since the depression of the 1930's. This means the Government guarantees the farmer a fair profit, based on a formula. If the going market price doesn't reach that level, the Government buys his crop for the guaranteed price and stores the surplus. Law provides, however, for price supports on only 21 crops—the big ones, like corn and wheat-out of 250 commonly grown commodities.

Right now the Government is paying private warehouse and elevator owners to store 5 million bales of cotton, a billion bushels of corn, 800 million bushels of rice, 188 million pounds of peanuts, and over 1 billion bushels of wheat.

The size of these price supports, how flexible they should be, and which crops they should cover is cause for a yearly political storm, out of which both Democrats and Republicans try to make hay.

The battle over price support systems is by no means the only controversial point in the Government's efforts to help the The conservation reserve program, farmer. or soil bank, is also a victim of political crossfire. The Department of Agriculture is now paying farmers about \$342 million a

year to take a certain percent of their land out of production. This system of Govern-ment land rental is reducing production

by about 6 percent.

This year, neither the Democrats nor the Republicans have come up with a dramatic new program to aid the farmer. Basically, their major difference on farm policy is that Democrats favor higher price supports and more Government controls than do the Republicans.

Both Senator Kennedy and Vice President Nixon have vowed to expand versions of three aspects of farm help already urged by Secretary of Agriculture Benson. These are rural development (expanding vocational training and employment services and creating new job opportunities in rural areas); "food for peace" (stepping up shipments of surpluses (stepping up shipments of surpluses to underdeveloped countries); and research to find new uses and new markets for farm products.

Fifty-six percent of our farmers are still classified as "small" despite the increasing trend toward bigger and bigger farms. These are the families who live on \$2,500 a year, and who are the biggest "farm problem."

The Government does not subsidize their crops, which are usually small-volume specialties, such as strawberries, tomatoes, truck gardens. But just as the small neighborhood grocery has nearly disappeared because it cannot compete with the huge, efficient supermarket, these small farms are disappearing because they are no longer eco-nomically feasible.

In cold logic, the answer to their problem seems to be simply sell out and move off the

land.

But we are talking about human beings, used to one way of life. They are not trained for city jobs and often they do not like the crowded conditions and the rush of a city.

This is where rural development help. The Department of Agriculture 5 years ago launched a program of encouraging industry to locate plants in rural areas, where farmers can drive to work and also till their own land. As yet, efforts along these lines have been limited, however.

The per capita income of farmers from all sources averaged \$1,043 in 1958, as compared with a per capita income of \$2,073 for offfarm workers. An industry job close to home could preserve our Nation's small farms and supplement the farmer's income.

The farmer wants help to bring his income nearer the rest of the Nation; but he does not want Government handouts. Nor does the Government want to spend any more money than it has to.

So what is to be done? No one seems to

know.

Even the farmers themselves cannot agree. The three major organizations—the Farmers Union, the Farm Bureau, and the National Grange-have three different solutions. And the wide diversity of crops, and their often conflicting needs, sometimes leads the farm States to work against each other.

For example, Delaware's major commodity is chickens. Naturally, the chicken farmers of Delaware want cheap feed.

Out in Iowa, however, the major crop is feed corn. So Iowa farmers are all for anything which will raise the price of feed.

The Government, through the years, has tried various combinations of price supports and land retirement and other devices. None has been a complete success.

But should a Federal price-support program that costs billions of dollars a year be dumped if it isn't doing the job?

That's the problem our Nation faces. And it is not just a farmers' problem—it is everybody's problem.

In the presidential campaign, there will be much talk about it, as there has been already.

Meanwhile, the farmers wait.

Day-by-Day Diplomacy in Cleveland

EXTENSION OF REMARKS OF

# HON. FRANCES P. BOLTON

OF OHIO

IN THE HOUSE OF REPRESENTATIVES Thursday, September 1, 1960

Mrs. BOLTON. Mr. Speaker, the people of Cleveland have a justifiable pride in the Cleveland international program, which annually brings foreign youth leaders to this country for 4 months of study and participation in American life. This unique program is directed by Mr. Henry Ollendorff, and is made possible by the cooperative efforts of the Department of State, participating foreign governments, Cleveland citizens, and civic organizations. Each year hundreds of Cleveland homes are opened to the nearly 70 youthful visitors from abroad, and every effort is exerted to make them feel very welcome during their stay in this country. In this way, primary emphasis is placed upon person-to-person diplomacy, and friendships are formed which make a genuine contribution to international peace and understanding.

The Cleveland international program is now in its fifth year and increasingly cited as a model in the field of cultural diplomacy. Truly, every citizen and group who participates in its activities is to be commended for their role in international diplomacy.

The July issue of the Junior League magazine carried an article entitled "Day-by-Day Diplomacy in Cleveland," which describes the contribution of the Junior League to the international program. Believing this description of the program will be of wide interest, I include it together with my remarks:

#### DAY-BY-DAY DIPLOMACY IN CLEVELAND

"The citizens of Cleveland, Ohio, have just completed another unique contribution toward good will among nations \* \* \* they believe the most effective diplomacy between nations must be carried on by the people themselves. Thus, they sponsored the evergrowing international youth leaders ex-change program."—Representative Frances P. BOLTON in the CONGRESSIONAL RECORD OF August 30, 1957.

This "evergrowing program," which brings youth leaders to the United States for a 4-month period, has since 1958 been actively supported by the Junior League of Cleveland

The league's assistance includes a \$2,500 per year contribution to the educational phase of the program and several types of volunteer participation. Last year 45 league members assumed various responsibilities. Of this number, 6 served in an administrative capacity and 22 league families welcomed foreign guests into their homes for a 2-week period. Other members served as volunteer drivers and as hostesses at a welcoming reception.

In 1959, 71 leaders and social workers from 17 countries participated in this exchange. Highlights of their activities were 6 weeks of family life in three different private homes representing varying social, economic, religious and racial backgrounds; study at Western Reserve University; and a 10-week summer work placement in camps, settlement houses, or social agencies in either Cleveland or one of several other large cities.

Margaret Foster, one of the league host-esses, commented on the personal values involved, as follows: "Our Norwegian visitor was charming, adaptable, and gracious. It was a pleasure to have her in our home as well as being a wonderfully educational experience. Perhaps the desire to create a good impression of an American home was reflected in the experience of going 2 weeks without a crisis—a major accomplishment with three children."

The many glowing comments from the visitors reveal that the experience was of deep and enduring value to them. An Austrian social worker put it this way: "After living 16 weeks in Cleveland, I see the United States in another way; America now has a face for me, and I must say I like this face." And a Finnish high school teacher made this evaluation: "We are sure that, as the years go by, our sense of the past will have one dividing point; before or after I was in America."

Five Farm Vetoes-Facts and Fancy

EXTENSION OF REMARKS OF

# HON. CHARLES B. HOEVEN

OF IOWA

IN THE HOUSE OF REPRESENTATIVES Thursday, September 1, 1960

Mr. HOEVEN. Mr. Speaker, one of the most ridiculous statements being made by Democrat orators is that President Eisenhower's use of the veto has precluded any effective agricultural legislation. These orators point to five farm vetoes, wring their hands and thus apologize for their own failures, rather than face the unpleasant music that their own Democratic leadership in the Congress, not President Eisenhower, has repeatedly vetoed the American farmer.

I would like to go over with you the five Eisenhower farm vetoes and the numerous Democrat Congress farm vetoes, just to keep them in proper per-

There were three farm bills vetoed in the 86th Congress. The first was S. 1901, the tobacco bill of 1959; the second was S. 1968, the Wheat Act of 1959; and the third was S. 144, the Rural Electrification Administration bill.

The tobacco bill was simply a proposition whereby its sponsors wanted to have their cake and eat it too. The issue at stake was the method of computing the tobacco parity formula. Rather than forthrightly admitting that price support at 90 percent of parity, for tobacco was losing our export markets and was threatening further cuts in acreage for U.S. tobacco farmers, the proponents insisted upon changing the parity formula. It would of course have been much more simple and straightforward to lower the level of support to whatever figure was necessary to recapture the foreign markets. The bill which was sent to the President put tobacco under the so-called old parity formula, making that commodity the only one of some 170 which would be so calculated.

The President pointed out in his veto message that the American tobacco farmer could very easily be misled into believing he would receive 90 percent of

parity as computed for all other com- many millions of bushels of wheat into modities. many millions of bushels of wheat into subsidized competition with the feed

The defects of this bill, however, were not fatal because 1 year later, Congress passed and the President approved Public Law 86-239, a tobacco price support measure which accomplished the purposes of the vetoed bill without returning tobacco to the "old parity" formula.

S. 1953, the vetoed wheat bill of 1959, was vetoed because it raised price supports without providing for effective production controls. The Department of Agriculture estimated that it would cost an additional \$110 million per year if enacted. In addition, it contained a number of obvious loopholes which would have severely aggravated the already serious feed grain problem. It is interesting to note that those who do a great deal of crying about this veto fail to point out that the House of Representatives refused to accept the report of the House-Senate conference committee on this bill. However, knowing full well that the President would not approve the House bill, the Democratic leadership of the Senate sent it to him, rather than work on a realistic compromise. A year later the Senate did pass another wheat bill, but the House refused to consider it with the result that our wheat problem continues to grow. The President again appealed for action with no results on the part of Congress.

The third bill vetoed in the 86th Congress was S. 144, the Rural Electrification Administration reorganization bill. It had nothing to do with interest rates or with the basic operation of this program which has flourished in this administration. It was merely legislative shadowboxing and political muscleflexing by the newly organized Democratic Congress. It was a sacrifice of sound administrative procedure on the altar of political expediency.

In the 85th Congress the President vetoed Senate Joint Resolution 162, the so-called "freeze" resolution . This legislation was basically a cotton and rice bill designed to prevent then-scheduled acreage cuts from going into effect on these crops. Other commodities were included only at the sufferance of the South. After the veto of this bill, the House Agriculture Committee produced the hodgepodge omnibus bill of 1958 Which the Democratic-controlled Congress refused to even consider by defeating the rule on the bill. Finally in 1958 the Congress passed S. 4071, the Agricultural Act of 1958, which was signed into law by the President as Public Law 85-835. This bill provided a new cotton program, revised rice program, the present corn program under which farmers rejected all controls on corn, a 3-year extension of the Wool Act, an extension of the veterans and armed services milk program, and a number of minor amendments to the basic farm laws.

Going back to the 84th Congress, the President vetoed H.R. 12, a bill which contained a number of sound provisions, but contained an unworkable two-price plan for wheat which would have dumped

subsidized competition with the feed grain producers of the Corn Belt. The veto, however, did not end farm legislation in the 84th Congress because it was shortly followed by the Agricultural Act of 1956 signed into law by the President as Public Law 84-540. This act included the soil bank program, major amendments to the cotton program, barter amendments, the establishment of an Agricultural Research Commission to study industrial uses, additional donation and disposal authority, provisions dealing with Federal irrigation, drainage, and flood control projects, a number of amendments to the Agricultural Adjustment Act of 1938, the authorization for a study of rice certificate program, increased assistance to States for tree planting and reforestation, and a number of minor amendments to basic farm

The noise about these five farm vetoes is fundamentally an apology on the part of congressional Democrats for their failure to come to grips with the serious problems facing American agriculture. Certainly President Eisenhower has vetoed five farm bills, but he has never vetoed the American farmer as this Democratic-controlled 86th Congress has done.

One of our most valuable and effective farm programs, the conservation reserve, was allowed to expire. No new contracts will be authorized by the Department of Agriculture because the Democrat-controlled Congress has failed to act.

No action has been taken on a number of land retirement, soil conservation, and payment-in-kind proposals that have been introduced by Republican Members of the House.

This Democrat Congress has vetoed more effective research on agricultural commodities by failing to act on the Senate and House farm research bills. An expanded research effort holds a great deal of promise for the profitable use of our surplus production for some years to come. It is tragic that this legislation was killed.

Another Democrat farmer veto in the 86th Congress was the Farmers Home Administration bill which was killed in the Senate. This bill was designed to more efficiently meet the credit needs of farmers using the facilities of the Farmers Home Administration. This bill which had the sad misfortune of being sponsored by a distinguished Republican Senator was never allowed to see the light of Senate debate.

There were three other examples of vetoes of its own farm bills by the Democratic-controlled Congress. H.R. 5432, which would have raised feed grain price supports, and H.R. 8394, which would have up a Brannan plan for hog producers were both killed by the Committee on Rules which stands 8 to 4 in favor of the Democrats.

H.R. 12261, the residual fallout of what was originally known as the Poage family farm bill was so obnoxious that 100 House Democrats joined in killing it shortly before the recess for the conventions

The record then speaks for itself. In spite of their almost 2 to 1 majority in the Committee on Agriculture and in the House and the Senate, the Democrats have refused to act. In spite of their own 1960 platform which promises much for the American farmer, congressional Democrats have declined to act. In spite of the fact that President Eisenhower has repeatedly asked for action. and in spite of constructive farm bills that have been introduced by many Members, and in spite of many moans, groans, and crocodile tears about the farm problem, this Democratic-controlled 86th Congress has failed to act.

The outright failure and the down-right refusal of this Democratic-controlled Congress to act constructively is an example of the Democrat Party's fundamental attitude toward agriculture during the last 6 years: "There was no action, there is no action, there will be no action."

# Parental Delinquency

EXTENSION OF REMARKS

# HON. FRANCIS E. WALTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES
Thursday, September 1, 1960

Mr. WALTER. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following:

PARENTAL DELINQUENCY
(By Earl P. Xander)

So many times we read articles in the newspapers or discuss among ourselves the large amount of juvenile delinquency going on every day. Have we ever stopped to think what may be the cause of such actions? Have we ever considered the possibility that some of their actions may be through our own neglect as parents to these children?

Love is so very important in keeping a home together. We too easily criticize children when they make a mistake. Could it be that we fail to establish for them a pattern of behavior which they would unconsciously emulate?

Let us take a look at some of the possibilities of our children's action and see if we are perhaps sometimes to blame for their mistakes:

What is parental delinquency?
Parental delinquency is the failure in duty, or an omission on the part of parents in the caring and raising of their children

at an early stage of their lives.

There are many children throughout the Nation that lead abnormal lives due to their parents' failure or neglect in helping them during their early years. Many parents think of themselves first, rather than of their children. They prefer going out to some favorite tavern, nightclub, bridge party, etc., leaving their children unattended. Others will send their children to bed early in the evening in order to enjoy themselves, or to have a little quiet in the house after a long day's work. Yet, others will let their children roam about the neighborhood until all hours of the night, not knowing where they are, or what they are doing. They spend their time doing something other than sharing it with their

It was not meant for us to bear children and then neglect them. God, who is our

Father, lends us our children after they are born to be properly raised, not to be neglected.

Some time ago, on a radio program, it was said that in a small community a minister was walking down a street one evening and spied a young lad standing on the pavement smoking a cigarette. The minister approached the lad and asked him how old he was. The lad answered, "I'm 10 years old." The minister then said, "What would your father and mother say if they knew you were smoking that cigarette?" The lad replied, "Huh! they don't care what I do, besides they're never at home anyhow," and walked away still smoking the cigarette.

This child was certainly being neglected. They bore him and were then forgetting about him, not caring what he did, think-

ing only of themselves.

Being a parent, we must admit, is a fulltime job. We must begin to teach the difference between right and wrong when our children are old enough to understand us and continue to do so as they grow. Parents should discuss with their children their problems and help them in their youthful period. Children at an early age are much wiser than we think.

A child knows and realizes when he is being loved, or when he is being reglected. Yet, parents will continue to neglect their children and allow them to do as they please, go when and where they wish and say nothing about it, nor will they try to help them when they seem to be heading in the wrong

direction.

Here is another very important reason why there is so much juvenile delinquency. Our children do not have any place to go, nor do they have anything to do during their summer vacations or holidays, as well as evenings during school months. If parents would get together in each community to see that there is some sort of recreation or place such as an athletic club there would be less juvenile delinquency. Many communities do not have anything such as this.

As one of our ex-Presidents said, lack of a place to go after school is the most important cause of juvenile delinquency. Mr. Herbert Hoover speaking as chairman of the Boys Club of America said that 700,000 gangster boys were arrested in 1959 because they had nothing constructive to do and no place to go in their spare time.

If we parents would take more time and interest in our children, we would not have nearly as much delinquency as there is now all over the country. Parental delinquency will often times lead to juvenile delinquency.

A phrase in the Bible states: "Withhold not correction from the child: for if thou beatest him with a rod, he shall not die."

True, however, this does not mean for us to beat the child every time he does something wrong. More often instructing our child why he should not do certain things and correcting him before he is led on to a more serious problem, will help him more than by using the rod. If the child continues in his misbehavior after the parent tries to correct him, then is the time for the use of the rod.

Scholastic education is another very important factor in helping our children. haps they are not encouraged enough by their parents to continue their education; to learn a trade or skill. Children should be encouraged in getting all the education they possibly can during their early years. They should be encouraged by their parents not to quit school prior to completion of their education.

Very often as a child is growing, he meets other children who perhaps have more home advantages than he. He yearns to have the same things as others, or even more. His parents may be unable to give him what he desires or they simply do not care if their child lacks certain necessities. They sometimes say to the child when he asks for a toy or something other; "Why I never had anything like that when I was a child, so you can do without it too." This child begins to wonder how he can acquire what he desires. His first thought probably is money. It may lead to a dishonest way of getting money and he then is heading for serious trouble. He finds himself doing wrongs such as: stealing a few cents here and there, and then on to a dollar here and a dollar there. Soon his wants become greater. He wants more and more and commits larger crimes. He may begin to burglarize homes, offices, stores, gasoline sta-tions, etc. Every time he steals, he wants more than the last time.

Having things he did not have before, encourages him all the more. He has not been caught yet, and continues with his stealing. He has no work and thinks this is the easy way to get what his parents deny him. him there is no skilled labor or education required, only a little technique in keeping from being detected by the law. All of a sudden, as he continues, he is caught. He cannot figure out how, but he has slipped somewhere along the line and is sent to a

reformatory or prison.

Again, there are children who at early age consider themselves as adults. They are allowed to have automobiles or the use of their parents' automobile when taking their girl to a dance or a movie. This may or may not be all right, depending on the individual. Unfortunately some will take advantage of their parents by using the automobile for sporting around or heading to isolated areas where they may be alone with the girl. forget about everything else, begin petting and then on further. Suddenly both are in trouble. The girl may become pregnant. The girl is in trouble; as her young life is ruined, the character of the girl's parents is lost as well as the character of the boy's parents.

What has happened to these children? In being allowed the privileges of an adult without proper preparation, these children were led on to these tragic mistakes. These children cannot be held solely responsible for their mistakes. If their parents would have helped them solve their problems this might

not have happened.

It takes a lot of love. Self-indulgence and self-pity are powerful forces tearing apart the home. If there is love, each one in the family, the father, mother, and children alike should be alert to give loving care to each other. It takes a lot of patience to properly bring up children. The home properly bring up children. The home should be a place of understanding between parents and children. Only if each one performs his role with patience, responsibility, and loving care will there be happiness. Everyone must be held together firmly to give all the happiness of a family and a home. Neglect will lead only to unhappi-ness and the breaking up of a family.

Hon. Leo Allen

SPEECH OF

## HON. ROBERT B. CHIPERFIELD

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES Monday, August 29, 1960

Mr. CHIPERFIELD. Mr. Speaker. when I first came to Congress in 1939 LEO ALLEN was quite well seasoned as he had already served three terms. As a freshmen Member myself he was most helpful to me in his guidance.

Now after 28 years of service to his people and the country our colleague is retiring from the heavy burdens he has carried.

LEO ALLEN is an outstanding Member of this House who has always put his duty ahead of political expediency. has always held firmly to his convictions and fought for his high principles. In my 22 years of service I have never known a more dedicated Member or a man who has been more honest and frank in his convictions and faced every issue fairly and squarely.

I am sure every Member of the House of Representatives joins me in wishing for LEO ALLEN good health and happiness in the years to come.

## The Ukrainian Congress Committee of America

EXTENSION OF REMARKS OF

# HON. EMILIO Q. DADDARIO

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES Thursday, September 1, 1960

Mr. DADDARIO. Mr. Speaker, this fall marks the 20th anniversary of the establishment of the Ukrainian Congress Committee of America. On this occasion I would like to extend my greetings to the committee, and its members, and to congratulate it on the excellent job it has done in the past 20 years.

The Ukrainian Congress Committee is composed of approximately 1,400 civic, religious, social, and political groups. It is a national organization of Americans of Ukrainian background, with a membership of 21/2 million persons. The committee has a dual purpose: to educate and inform the American people regarding true conditions behind the Iron Curtain, and to fight for the right of the Ukrainian people to self-determination and a democratic, free and independent country. As the voice of the 40 million Ukrainians enslaved by Russia, the Ukrainian Congress Committee has pledged itself to expose Soviet tyranny in all its forms. It has, for example, exploded the myth of a unified, homogeneous society in the Soviet Union. It has emphasized the fact that the non-Russian peoples of the U.S.S.R. far outnumber the Great Russians. It has brought to light the various atrocities committed by Russia under the leadership of Nikita Khrushchev, from Vinnitsa in the Ukraine to bloody Hungary.

The committee strives to keep all Americans constantly aware of the almost hopeless life led by the people under Communist rule. It aids the free world in our struggle against communism by attempting to dispel any illusions we might have regarding the Soviet totalitarian form of government. The role of the committee and its chairman, Dr. Lev E. Dobriansky, in formulating and organizing Captive Nations Week is indicative of the effective job that the committee is doing in this regard.

On this 20th anniversary I can only wish the Ukrainian Congress Committee a speedy and successful end to their endeavors. The people of America and all the free world join me, I am sure, in the hope that the world will soon see an end to tyranny and slavery in all forms, and that the satellite nations will be able to join the free community of states as equals.

# Former Chairman Murdock Comments on the Master's Report

EXTENSION OF REMARKS

### HON. STEWART L. UDALL

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES
Thursday, September 1, 1960

Mr. UDALL. Mr. Speaker, the courtappointed master, Judge Simon Rifkind, of New York City, will shortly file his report with the Supreme Court, and there is every anticipation that within the next 18 months the Court will enter its decision in the protracted litigation between Arizona and California over the waters of the Colorado River.

The history of this dispute, and the ensuing litigation, is of current interest to the Members of Congress as in all likelihood, once title to the water has been finally adjudicated, additional projects will be presented to the Congress to put these waters to beneficial use.

No man within, or without, the Congress knows more of the intimate details of this dispute than my good friend, John R. Murdock, the former chairman of the House Committee on Interior and Insular Affairs.

In order to enlighten our colleagues as to the implications of the master's report I recently propounded a series of questions to Chairman Murdock, and these questions and his answers are reporduced below:

Question. John, you have been a student of the relations between Arizona and California for years, especially about the Colorado River. Will you answer for me for the record some questions about the case, Arizona v. California on which you have been reading recently or about which you know personally?

Chairman Murdock. Certainly I will be glad to answer any of your questions within my knowledge of existing facts or of historical happenings. When you say the case, Arizona v. California, to what particular case do you refer? Or to what class of cases which may be not inappropriately labeled? As a lawyer you probably mean, Arizona v. California, a case now in the Supreme Court of the United States, but I, a nonlawyer, may have In mind-without too great a stretch of language—one of the many historical cases Arizona v. California, in the Congress of the United States. In fact I can answer questions about legislative cases better than court. cases involving us.

Question. Well, lets not quibble over terms. To me a "case" usually means a law sult in a court. Since our contest with California is a quarrel between States, in this instances over dividing the waters of the Colorado River, the case I want to know about is in the Supreme Court. However,

if you want to call the hearings and proceedings on a bill in Congress, a case in Congress, I will not quarrel with you. I suppose you have been involved in many such cases.

Chairman MURDOCK. Yes, many cases in Congress—meaning bills, but not as many as has Carl Hayden, for he has been in these legislative battles with California in the twenties, the thirties, the forties and the fifties. I have participated in "legislative cases"—meaning bills in Congress—with Arizona opposing California in most of them about water—for the 18 years that I was a Member of the House of Representatives.

a Member of the House of Representatives.
Question. John, you have been lecturing
on the history of the Colorado River. Have
all, or most, of these legislative cases been
concerned with the Colorado River? And
has Arlzona won many of these so called
cases in Congress?

CHARMAN MURDOCK. Stewart, you are a native of Arizona and a lawyer, but even you may be surprised at how terribly complex the Colorado River problems are. One doesn't have to look at a map to see that the Colorado River separates Arizona and California in more than one sense. You might also be surprised how many legislative battles Arizona has won, but, of course, California in Congress has won most of them.

Question. I did want to question you about both kinds of battles with California, the legislative contests and the judicial contests, but before leaving this point I would like to know how you came to use the term case in Congress.

Chairman Murdock. I got that idea first from Mr. Charles Carson, one of Arizona's best lawyers. In discussing the procedure before my committee on a bitterly contested water bill, he said: "Those lawyers—the opposition—seem to want to try this matter like a case in court." I had noticed that the California forces seemed to use more lawyers than engineers and experts and were always harping on the law of the river which they interpreted to prove their way.

Question. Will you name one instance where Arizona won her case in Congress and then will you comment on and explain that phrase: The law of the river?

Chairman Murdock. My best example: Arizona won her case in Congress after a bitter fight through 1946 and 1947 to reauthorize the Gila project which gave us the important Wellton-Roll, Mohawk Valley development the ultimate importance of which cannot even yet be adequately measured.

#### THE LAW OF THE RIVER

As for the law of the river—I have studied it for many years, even before I came to Congress and I do not yet know exactly what it is until the Supreme Court has finally spoken. I am not a lawyer but I have heard good lawyers. I think we might study this law of the Colorado River as used before my committees during the period of controversy from 1945 to 1953 under four heads:

(1) What was the Arizona conception of the law of the river during this controversy? (Let us refer to it as "the law" for brevity.)

(2) What was California's conception, or view, of the law at this same time? (3) What would Arizona's conception, or view, of the law-if finally affirmed by judicial action of the High Court-allott to Arizona in water out of the Colorado River system? (4) What would California's conception, or view of the law—if fixed by judicial determination—probably allot in water to California out of the Colorado River system? California's determination and political power made it inevitable that the U.S. Supreme Court must eventually enter this controversy because California had stressed the law as they viewed it as final. I was well aware of this at all times, but was concerned chiefly about how and when the Supreme Court could best be brought into the controversy in a constitutional way.

At my committee hearing of April 18, 1951, I told the committee that I was not posed to having an early Supreme Court decision on it; in fact, I was extremely anxious for final Court decree, but was earnestly opposed to the California suit resoluwhich one of the three California members had just raised again at that meeting. I was extremely anxious for the highest court to tell Arizona and to tell California how much water each should have under the law of the river. However, good lawyers had told me that the Supreme Court does not render advisory opinions in disputes between States and, therefore, the Court probably would not do what I was so anxious to have done. I told the committee that the 4-yearold suit resolution, which was brought up again that day, would only lead us into a blind alley and get us nowhere, but only cause interminable delay. All of this is in the printed record of the hearing of April 18, 1951, and may be read by anyone interested. The three California members, it seemed to me, were trying to force Arizona to sue California, and in that way get the case into court on better terms for them. if at all.

I did not want Arizona to have to sue California, nor ask for an injunction against her for the water California was then taking and for some time previously, had been taking, through her huge existing facilities. Instead, I wanted Congress to pass a sensible authorization bill, which my central Arizona bill (H.R. 1500, 82d Cong.), could have been made into and was being made into—exactly as Congress had passed a similar authorization bill for California in 1928, and then both States could get into the Supreme Court constitutionally without one having to sue the other. Thus the High Court would interpret the law with a logical new element added.

When Arizona finally had to sue California—as they maneuvered it—it made a harder case for Arizona, bearing the burden of proof. But with 3 Californians on that committee against 1 from Arizona, 30 California Members in the House of Representatives against 2 from Arizona, they had the power to block my proposal, although their counterproposal—the suit resolution, which had been sponsored by all of their Members in both the 80th and also the 81st Congress was never put over. That California's suit resolution had been heard by two Judiciary That California's suit subcommittees in the 80th and again in 81st Congress through 4 years, and yet no favorable action was taken on it by all those lawyers who, as you know, are always the pick of the lawyer Members of Congress, Thus the case at law went to the Supreme Court in 1952 under terms disadvantageous to Arizona. There it is today-to this day after years of expensive litigation, although they said then it would take only a few weeks.

ARIZONA'S VIEW OF THE LAW BEFORE PRESENT COURT TRIAL

Question. Will you refresh my mind as to Arizona's view of the law of the river during the years you suffered with it?

Chairman Murdock. I have suffered with it for 46 years, or ever since I went to Arizona in 1914. But let us think only of the 8 years from 1945 to 1952, both inclusive. Because several changes were made and added thereto after I came to Congress, I'll pinpoint the time let us say, the spring of 1950. You see I am confining my answers right now to the hearings I have had in the House during the 8 years following 1945 when this case was tried in Congress before numerous committees, both of House and Senate, although Arizona tried three times before 1952 to get into court.

Question. What did Arizona think and contend by 1950 made up the law of the river? I'm not asking this for my information, but for the record.

Chairman Murrock. Our view included: (1) The seven-State treaty of 1922, known as the Colorado River compact, the basic instrument of law; (2) the Boulder Canyon Project Act of 1928-29; (3) the California Statute (Covenant) of Limitation of 1929; (4) numerous contracts for water out of Lake Mead with the Secretary of Interior, authorized by the Boulder Canyon Act, including Arizona's contract; (5) Arizona's Statute of 1944 ratifying the Colorado River compact of 1922 and authorizing an Arizona contract for water out of Lake Mead; (6) Nevada contracts for water out of Lake Mead; the Mexican Water Treaty of 1944-45 and (8) Gila Project Reauthorization Act of 1947. Of course, there were other items, but the above were the main ones all instruments in print available for reading by anyone who can read. Then, we must remem-ber, there was the general water law of the West, as old as white settlement out there, the law of prior appropriation and beneficial

#### CALIFORNIA'S VIEW?

Question. You have named the chief elements of the law of the river in Arizona's view, now how was it in California's view? Would it contain the same elements then as they saw it?

Chairman Muzdock. Not exactly the same elements-for as early as 1946 we and they differed not only in the reading of these related documents and instruments, but also as to which of the instruments to include as valid. California talked about the Colorado compact-not so much the seven-States compact, signed by all the seven States in 1922, but that compact modified into a six-States compact in 1929. They regarded the California statute of 1929, the irrevocable covenant, to be binding only with the six-States compact, excluding Arizona. They seemed to regard the numerous contracts of the California water agencies, signed in the early thirties, as having higher standing and firmer commitment than any later ones. They took a dim view of Arizona's statute of 1944 ratifying the compact of 1922 and they doubted the legality of Arizona's contract for water out of Lake Mead. Anyway, contracts signed by Secretary Ickes were not regarded by them as on a par with those earlier signed by Secretary Wilbur. And finally, California had fought the terms of the treaty with Mexico and after it passed, thought of ways to let Arizona suffer the consequences of that water burden, or so it seems to me in memory and as the legislative record shows.

Question. Now that you have indicated what Arizona considered to be the law of the river, and also what California indicated to be the law of the river, during the last years you were in Congress, what did each of these views spell out in water for each lower basin State If the Supreme Court should validate either of them?

### HOW MUCH WATER FOR ARIZONA?

Chairman Murdock. Well, Arizona authorities, while I was chairman of the committee having to do with these disputed waters, considered the law to furnish herassuming there was enough water in the river to do it-a gross of 2.8 million acre-feet out of Lake Mead annually, and in addition to that, all of the water of the Gila River system in Arizona and without diminution. And in further addition most Arizona authorities counted on 1 million acre-feet more out of the main stream annually in perpetuity, and also half of any surplus which was to be divided after 1963. Besides the above, some Arizona lawyers figured out that the law would give Arizona an extra million acre-feet of lower basin water. But disregarding this very last addition, as doubtful, we can add these sure items to total at least

3.8 million acre-feet annually of mainstream water plus the Gila River water.

WATER YIELDED BY CALIFORNIA'S INTERPRETATION

Question. And what did California authorities figure Arizona to have coming to her about 1950 by their view of the law? What did they think California had under the law?

Chairman Murpock. In 1947 one of their keenest lawyers implied that Arizona didn't have another gallon due her under the law as they read it. Furthermore that California had firm contracts for 5,326,000 acre-feet in perpetuity, plus half the surplus. She already had ample engineering facilities built by Uncle Sam, built on their orders to take practically all the flow of the river in the lower basin.

With such drastic conflicting claims of the two States to water to be divided in the lower basin, it certainly became necessary, after the committee action that day in April 1951 (April 18, 1951), for Arizona to sue in the Supreme Court-not as I thought it ought to be done to get into Court, but as they forced it to be done to the great disadvantage of Arizona because she had to sue and prove California wrong in action as well as thought.

Question, All that you have said brings much more to my mind of that long struggle in Congress of Arizona and California over the waters of the Colorado River. But you say Arizona was forced to sue California in 1952. Can you say what has happened since in this court trial?

Chairman Munpock. This trial cannot be said to be ended yet, as of this date, although the end of the suit seems to be near. Supreme Court appointed a special master once and he held hearings for about 2 years till his death. The present special master continued with the hearing of voluminous testimony for several years, mostly in San Francisco, and has finished his draft report this spring. His 400-page report contains a close analysis of the law of the river pertinent to this lawsuit-Arizona v. California-and also his rulings on 27,000 pages of testimony as well as the contentions of lawyers. To sum up this report to the Supreme Court the special master drafted a proposed decree which could be approved by the Supreme Court and become final. I will be very happy if it is approved as is and made final. This proposed decree was given to the press early last May and printed. It was hailed as a victory for Arizona, and I think it is. Of course, Stewart, I borrowed your copy while you were home and I have read it carefully, noting the points on which Arizona was held right or wrong according to the master's interpretation of the law and also the points on which California was held right or wrong, in their view of the law. This suit was narrowed down to the question: How shall the waters of the lower basin be divided among the three States under existing law?

Question. Did the master sustain Arizona on all points? Or did he overrule most of

Chairman Mundock. He overruled some of them but sustained some very important ones. For instance, this decree confirms Arizona's legal rights to 2.8 million acrefeet annually out of Lake Mead, as I read it. The surplus may be divided after 1963 but cannot be the basis of legal rights of appropriations before 1963. I believe this proposed decree allots Arizona her legal rights to a gross of 2.8 million acre-feet out of Lake Mead, plus 1 million acre-feet of mainstream water, and all the Gila River waters within the State. If I have been able to read the master's report aright, I believe it deals justly with Arizona according to the intent of the lawmakers and without injury to California.

Statement of Vice President George J. Burger of National Federation of Independent Business Before Democratic Platform Committee

EXTENSION OF REMARKS

## HON. EDWARD P. BOLAND

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES Thursday, September 1, 1960

Mr. BOLAND. Mr. Speaker, small businesses in the United States are an integral and important segment of the American competitive economic system. If our free enterprise system is to continue strong, this country must have healthy small business firms contributing to the greatness of the American economy.

I am sure that all of the Members of the House receive in their mail from small businessmen in their congressional districts the ballots sponsored by the National Federation of Independent Business. Through this media the small businessmen of the country have been expressing their views on legislation needed to strengthen their position in the American economic system.

Mr. Speaker, it is important to note that the recommendations made by the National Federation of Independent Business to the Democratic platform committee in Los Angeles early in July were based directly on the personal, signed opinions of federation members, taken by the organization in national polls. The statement of Mr. George J. Burger, vice president of the federation. was, in effect, the voice of small business itself

It is most gratifying to read in Mr. Burger's statement that the members of the National Federation of Independent Business appreciate the actions taken by Congress in carrying out 12 of 18 major action pledges made by the political parties at the 1956 conventions. I am sure that my colleagues join with me in expressing appreciation to federation members who constantly keep us informed of their views on legislation before Congress by mailing in their federation ballots.

Mr. Speaker, under leave to extend my remarks in the Appendix, I include herewith Mr. Burger's statement before the Democratic platform committee:

I am George J. Burger, vice president, National Federation of Independent Business. We are an organization of small, independent business and professional people from all vocations of American enterprise. We have the largest directly supporting membership of any business organization in the Nation, with chapters in almost all of the Nation's 437 congressional districts. We are the only organization that makes it possible for business-professional people to take an active interest in Government affairs by means of personal ballots voted in national polls, with signed opinions sent directly to the desks of lawmakers at both Washington and in the States. The attached Congressional Record excerpt is one of the many indications of the tremendous value Congressmen place on the federation program.

We have a single aim: "That our Nation remain the land of opportunity by giving small business fair consideration." Very definitely this eliminates any selfish pleading-for it goes right to the taproots of our freedoms: the personal dignity of each of our citizens, which is based in great part on the basic individual human right, rooted in the natural law, and reflected in our Con-stitution, to acquire, hold, and use private property consistent (be it noted) with dis-regard for the rights of others. In a real sense, this right to private property implies a right to independent enterprise opportu-Without the latter, the former is meaningless. Thus, our aim is not limited, but very directly touches on the welfare of all our people, on the basic freedoms and strength of this Nation under God.

By fair consideration, our members mean they want only honest enforcement of the rules of business fair play, equitable tax treatment, minimum Government interference and competition, equal consideration with all other segments of our Nation in policymaking. They seek neither special privilege nor handouts. They are independent enterprises, and want only to stand on their own two feet.

We are here for one purpose only: To urge you to commit your party to a strong independent business program that will further add to the fine progress registered over past years. Small businessmen are far from out of the woods. But they have taken heart from the fact that the parties have honored 12 of the 18 major action pledges made during the 1956 presidential conventions. Our members deeply appreciate this, and hope only that you will frame a constructive 1956 platform that will provide a springboard for further securing independent business opportunities in the years ahead.

Before going further, let us make this clear: the recommendations we are about to make on behalf of our members are based directly on the personal, signed opinions in our national polls; in short, we speak the voice of small business itself.

Mr. Chairman, as each member of the committee has been furnished with a copy of our complete statement covering in detail all recommendations in behalf of small business it is my intention at this time to summarize the various recommendations as set forth in our complete statement.

#### ANTITRUST

Our members urge continuation of the trend toward stronger antitrust enforcement which has marked the past few years, because this is basic to independent business opportunities. Let an independent enjoy ideal conditions in taxes, labor relations, etc.; yet without first having fairness in competition he is doomed to failure. Our recommendations on this subject are:

- 1. Extending tenure of office for Assistant Attorney General in Charge of Antitrust.
- 2. Equal pricing—compel manufacturers owning and operating retail stores to grant independents same buying price as they do their factory retail outlets.
  - 3. Stiffer penalties for antitrust violations.

#### GOVERNMENT REPRESENTATION

Experience has proven to our members that progress in sound small business programs is proportionate to study and attention in this field, and it is for this reason that we recommend:

- 1. Full standing committee status, with legislative authority for both the House and Senate Small Business Committees.
- 2. Control of SBA to rest with Adminis-
  - 3. Cabinet Secretary for small business.

#### TAXATION

Needless to say, our members are very pleased with the \$260 million first-step Small Business Tax Adjustments Act and with the recent action by Congress to grant the self-employed the same private retirement benefits as have been enjoyed by corporation executives and employees, which have flowed from the 1956 platforms. They hold a good start has been made, but much remains to be done, such as:

1. Reduce direct income tax load on smaller corporations by providing tax deductions for improvements in small business and same fast tax chargeoffs on purchases of used equipment as are allowed on new equipment.

2. Taxation of cooperatives the same as all other businesses.

3. Elimination of Government competition with independent business thus enlarging area of tax-generating private business.

4. Reduction in subsidies by Government

 Reduction in subsidies by Government to big business and big farm and in foreign aid expenditures.

#### LABOR-SOCIAL WELFARE

Our members, many of whom have risen from the ranks of labor and still proudly carry union cards, have enthusiasically greeted action by the 86th Congress which provides greater fairness in dealings between businessmen and labor unions. They urge that you and your party commit themselves to further progress along these lines, and recommend:

1. Restrict bargaining to local level.

 Unions draw pickets from struck businesses only and only picket a business if there is support of one-third of employees of a business.

#### INTERNATIONAL TRADE

Our members realize that helpful efforts have been made by Congress since 1956 to provide tariff laws which will promote fairer competition in international trade, and that will protect higher cost American businesses against cutthroat competition from lower-cost foreign goods that are sold in our markets. However, our members feel and we recommend:

1. That steps must be taken to provide greater fairness for American firms competing with foreign products in our markets.

#### HIGHWAY-POSTAL PROBLEMS

Our members have consistently opposed further increases in either Federal excise taxes on gasoline or in postal rates, as totally unfair additions to their personal and business overhead costs, and we further recommend:

 No increase in gasoline excise taxes to pay for highway programs.

2. Government assistance to business compelled to relocate due to highway construction (and the same assistance for urban renewal situations).

3. No increase in first-class postage rates.

Our members believe in a just division of powers between the National and State Governments. They realize the need, in this day and age, for strength at Washington. At the same time they realize that the taproots of our country's strength are still with the individual citizens in the towns and cities and States of the country, and for this reason we oppose all measures which seem to take just powers away from the States and repose them at Washington, and also oppose all measures which seem to take just powers away from Washington and repose them with the States.

#### CONCLUSION

Believe us, it has been a pleasure and privilege to appear here and counsel with you, just as we did with your platform

committees in your 1948, 1952, and 1956 conventions. We do appreciate all the progress that has come of your resolves in those years. We look for further advances in the years ahead.

Finally, may we say that this current business of yours and ours is most serious. Not so long ago, the Kremlin's Prince of Darkness declared that communism is the wave of the future. He prophesied that our children, in time, will live under Communist dictatorship.

Let's not kid ourselves, this could happen, unless we take action here and now to bulwark the only rock against which this wave will not prevail: the individual dignity of each of our people in full enjoyment of all their rights as found in the Natural Law and reflected in our Constitution.

We are, thank God, and thank our forebears for all their dreams and sacrifices, a free people. Let us maintain our freedoms by further strengthening one of their most important underpinnings—the right of each and every last one of our people to independent enterprise fair consideration and opportunities.

We request that our complete statement be made a part of the permanent record of these hearings.

# Quie Questionnaire Report and Highlights of the Work of Congress

EXTENSION OF REMARKS

# HON. ALBERT H. QUIE

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES
Thursday, September 1, 1960

Mr. QUIE. Mr. Speaker, in every year in which I have had the privilege of representing the people of the First Congressional District of Minnesota in the Congress, I have asked their views on some of the major issues confronting our country.

I have done this by means of the Public Opinion Questionnaire.

Since the inception of the questionnaire, the response has been very encouraging. The many people who have praised the questionnaire seem to regard it as a service with a twofold benefit.

First, the Public Opinion Questionnaire provides them with the opportunity to express easily, in as brief a time as possible, their thinking on a wide range of issues.

Second, the Public Opinion Questionnaire encourages them to take increased notice of the work of the Congress and its task of shaping legislation to affect all Americans.

Early in 1960, I prepared and ordered for printing at my personal expense the third annual edition of the questionnaire. This is an expanded and more comprehensive survey. It presents a variety of questions—mostly major considerations—which reflect, for the most part, the choices to be made in our national life. This year the questions deal with not only proposed legislation, but with broad areas of policy. Included is the question as to the type of diplomacy

to be employed to meet the challenge of the cold war. One question pertains to a concept of national defense and military strength. Another outlines possible economic policies for the future.

But for the most part, the questions pertain to legislative programs and proposals

One significant addition was made this year. Nineteen hundred and sixty is a presidential year and the contest for our highest office must necessarily, enter into many considerations. For that reason, I listed the candidates who, by March 1960, had been mentioned for the Presidency. The listing of names, in alphabetical order, included representatives from the two major parties.

In an effort to reach the homes of all First District residents, I mailed 100,000 questionnaires throughout the 12-county area. In some cases new residents may have falled to receive the survey. But I do feel that the canvass was as thorough as is possible.

The response to the questionnaire was very heartening. Experts in the field of direct mail and public opinion surveying list a 10 percent return as a desirable figure. This questionnaire attained an 11-percent return. I am grateful to all those who participated.

The questionnaire follows:

#### Questionnaire

No answer.  12. If Congress decides to deal with the problem of industrywide strikes, what course should it take?  (a) Compulsory arbitration.  (b) Restrict bargaining to individual companies rather than encourage industrywide bargaining.  (c) Set up Federal factfinding boards with power to make recommendations.  No answer.			24.0 28.2 24.8

#### THE PRESIDENCY

The following men have been prominently mentioned as presidential candidates for both major political parties. Whom would you favor as the next President of the United States? They are listed here in alphabetical order.

Hubert Humphrey	8.1
Lyndon Johnson	1.9
John Kennedy	6.5
Richard Nixon	
Nelson Rockefeller	11.7
Adlai Stevenson	2.8
Stuart Symington	2.1
No answer	13.2

### NATIONAL PLORAL EMBLEM

The following have been suggested, in resolutions introduced in Congress, for our national floral emblem. Which of the following plants listed in alphabetical order would you favor?

Corn tassel	14.2
Daffodil	3.0
Dalsy	4.9
Marigold	3.4
Mountain laurel	2.8
Rose	45.4
Wreath	8.8
No answer	17.5

#### HIGHLIGHTS OF THE SOTH CONGRESS, 2D SESSION

Mr. Speaker, along with the First District questionnaire tabulation, I believe it is appropriate to present a summary of the work of the 86th Congress, 2d session.

Such a report must begin with a study of the leadership of the Congress, because of the importance to fix major responsibility for action or inaction.

Under our system of legislative process, the credentials of leadership are given to the majority group. This is a sound concept because with strength de-

rived from the electorate should go authority for action. Such credentials include the major posts of power—including the position of House Speaker here, and the role of majority leader in the other body—as well as the committee chairmanships and the right to numerical superiority on the standing committees of the Congress.

With the authority of the majority comes responsibility—and for that reason, it is understood that the majority group has the greatest responsibility for the record written by the Congress. This does not mean that the minority can shrug off its obligations. Far from it. The minority and, in fact, every individual Member of Congress has the duty to strive for accomplishment.

But, the fact remains that, for the most part, credit or blame lies with the majority.

In this Congress, Democratic Members were in the great majority. The session began with a roster of 281 Democrats and 153 Republicans, plus 3 vacancies in the House—and with 65 Democrats and 35 Republicans in the other body.

Such heavy numerical strength intensified the responsibility of the majority for the record compiled by the Congress.

The report that follows specifies action taken in broad areas of legislation, arranged for convenience in alphabetical classifications. As such, this report is a highlight summary—not a minute examination of all legislation considered by Congress.

#### AGRICULTURE

Congress failed to enact major legislation to bolster farm income and to cope with the threat to the economy posed by the price-depressing surplus. Instead, in the closing hours of the session it enacted a bill which, while providing a measure of short-term benefit, does not even attempt to reach a long-range solution.

The bill raised support levels for manufactured milk and butterfat to a figure just under the average price received in the market this past year The legislation extends only until next March 31, 1961.

Although a hearing was held by a subcommittee of the House Interstate and Foreign Commerce Committee on legislation which would insure the free flow of milk from Minnesota to other States, no action resulted.

Two other important bills were allowed to die. The House-passed farm credit bill which would have streamlined the credit facilities of the Farmers Home Administration was never acted upon by the Senate Agriculture Committee. Agricultural research bills were passed by both House and Senate, but differences between the 2 versions were not worked out by the conferees.

On June 23, the House rejected—by a vote of 236 to 171—the Poage bill, which contained a wheat section similar to that included in a bill vetoed in 1959, as well as a program for feed grains. As seen by many, the great weakness of the bill was its intent to glean votes on election day rather than to serve as a program to solve the basic problem facing agriculture. In its original form it insisted on higher price supports for wheat coupled with inadequate measures to control production.

During debate on the measure, I pointed out that sound legislation to as-

sist farmers who raise grains and oilseeds should set as its objective the elimination of the price-depressant influence of Government-stored grains. I stated that total production must be reduced by the implementation of an effective program, rather than reliance on old Patchwork methods of the past by which one crop would be substituted for another.

Then I proposed a series of amendments designed to improve the Poage bill-measures which, if adopted, would have greatly increased the legislation's possibilities of passage. But when the final vote came, the Poage bill had itself become a legislative patchwork quilt and the measure was defeated.

With the defeat of this bill, the disappointing prospect of no legislation at all spurred many Midwest Members to urge passage of a sound measure representing a serious attempt to benefit farm-

Earlier in the session, I had introduced legislation outlining a payment-in-kind program which would give farmers the opportunity to idle their wheat, corn, and other feed grain acreage in return for surplus commodities from Government stocks. The twin objectives would be. of course, to bolster farm income and reduce the surplus.

I introduced also another measure which, when linked with payment-inkind, would spell immediate help for farmers, that is, prohibit the sale of Government stored commodities on the domestic market at less than 105 percent of full parity. I pointed out that if this step were taken, the result would be an immediate jump in the price of corn by 20 cents per bushel.

Adoption of some such program in the "bobtail" session seemed reasonable to expect. The leadership of Congress had explained how necessary it was to come back to Washington in order to pass top-Driority legislation. Certainly an effective farm program should be regarded as the No. 1 priority on the agenda of domestic business.

The two-part program was reintroduced and quickly accepted by a group of Midwest Members. The measure began to attract considerable support on both sides of the aisle. In hearings before the House Committee on Agriculture, a representative of the administration-Assistant Secretary of Agriculture Marvin McLain—stated the administration's approval of the bill, along with firm support for a payment-in-kind program advocated by the distinguished chairman of the committee.

Prospects were brightening when the leadership decided that there was not enough time remaining in the session for consideration of the measure.

No time for agriculture? No time for consideration of a sorely needed farm bill this year?

At any rate, progress halted and the legislation died.

One step taken by Congress-affecting agriculture and our policy regarding other nations—was the extension of the Sugar Act through next March 31, 1961. The extension gave the President the authority to reduce the Cuban sugar

The President took this step shortly after the extension was granted.

In the waning hours before adjournment, the Congress debated legislation to grant the President conditional authority to not give the Dominican Republic an additional sugar quota. However, leadership could not resolve disagreements between the two Houses. As a result, Congress abandoned action and adjourned without granting the President the authority he requested to block windfall sugar shipments from a nation whose diplomatic relations with the United States had been severed through action taken in the Organization of American States.

#### CIVIL RIGHTS

Legislation designed to protect the voting rights of all Americans—and to further the goal of equal protection and full rights under the law-was enacted during the 2d session of the 86th Congress. Passage came 3 years after approval of the historic Civil Rights Act of 1957 which served as a beacon for subsequent action.

The last step in approval of the 1960 measure came on April 21 when the House, by a 288 to 95 rollcall vote, agreed to amendments.

The Civil Rights Act of 1960 serves as guarantee of voting rights-and as protection against hate bombings.

On voting rights, the bill provides that records and registration papers in all Federal elections, including primaries, must be preserved for at least 22 months and must be turned over to the Attorney General on written request. The legislation states that on winning a civil suit brought under the 1957 act, the Attorney General can ask for a court proceeding to determine if a pattern of Negro disenfranchisement exists. Were such a pattern found to exist, any Negro in the area under survey could apply for a court order to declare himself qualified to vote consistent with State law, if it were proved that he had not been allowed to register. The court order could be reinforced by possible contempt proceedings.

To assist a court in making such a determination, voting referees can be appointed to receive applications, take evidence and report their findings to the court. If a referees report is not challenged by State officials within 10 days, the court would issue certificates stating that the citizen in question is a qualified voter. In the event of challenge, the legislation outlines additional procedure.

On bombings, the act specifies that flight across State lines to avoid prosecution or punishment-or to avoid giving evidence-amounts to a Federal crime punishable by a fine of \$5,000 or imprisonment up to 5 years, or both.

In addition, the act stipulates that when schools attended by children of Armed Forces personnel would close to avoid integration-and the U.S. Commissioner of Education would decide that no other agency could provide for their schooling-arrangements for their education could be provided.

Additional strengthening measures requested by the President in the post-

quota as he sees fit during that period. recess session were rejected with the explanation that the limitation of time prevented the consideration of civil rights.

#### CORPORATE AND EXCISE TAXES

Congress voted to extend for another year the corporate income tax of 52 percent as well as the excise rates on distilled spirits, beer, wine, cigarettes, passenger cars, and car accessories. Also continued were the 10-percent taxes on passenger transportation and local telephone service. A temporary increase of \$8 billion in the national debt limit for fiscal 1961 was provided for bringing it up to \$293 billion.

#### DEPRESSED AREAS

Because he believed that the Area Redevelopment Act did not provide an adequate long-range solution to the problem of unemployment in some economically depressed areas, and that the legislation evidenced fiscal irresponsibility, President Eisenhower vetoed the bill. The veto was upheld. The program had provided for \$251 million worth of Federal aid. This authorization was in contrast to the administration's proposal for a \$53 million outlay.

#### EDUCATION

Majority leadership in Congress failed to win necessary support from the House Rules Committee, foreclosing the possibility of passage of a new program of Federal aid to education.

Passed by the House on May 26 was a bill which authorized \$1.3 billion in Federal grants over 4 years to assist States in classroom construction. A bill passed by the other legislative wing authorized \$928 million a year for 2 years in grants to the States for school construction, teachers salaries, or both. Refusal of the Rules Committee prevented a conference reconciling the two measures.

#### FEDERAL PAY RAISE

The House, on July 1, voted to override the President's veto of a pay raise bill which authorized an across-the-board 8.8 percent and 7.5 percent increase for 1.6 million Federal classified and postal workers.

In his veto message, Mr. Eisenhower said he favored a salary increase to match the rise in the cost of living. He said the bill was inequitable-favoring those Federal workers who were already receiving adequate pay, and granting proportionately less to the employees who stood in greatest need of an increase.

#### HOUSING

Despite the fact that a comprehensive omnibus housing bill was included in the must legislation list approved by leaders of the majority in Congress, all that could be provided was a measure described as a stopgap bill to continue the program until January.

Earlier, a bill had been approved by the House Banking and Currency Committee which resembled legislation adopted by the other body. However, the House Rules Committee refused to grant the \$1.4 billion House bill a rule, and thus consideration on the floor was forestalled.

Shortly before adjournment, a bill was enacted which amounted to half the outlay originally forecast for housing by the leadership. Under the provisions of the bill, the FHA home improvement loan program was extended and allocations were made of \$500 million for college dormitory construction and \$50 million for community facilities construction.

INTERNATIONAL POLICY

Ratification by the other body of a formal treaty has been seen as one of the major steps taken during the post-recess session. The treaty, signed by 12 nations, pledges that it "is in the interest of all mankind that Antarctica shall continue forever to be used exclusively for peaceful purposes."

Associated in the agreement are the United States, the Soviet Union, Great Britain, France, Belgium, Norway, Japan, Australia, New Zealand, South Africa, Argentina, and Chile. The dozen nations are agreed to observe common ground rules—banning nuclear explosions and military utilization of Antarctica—with all countries having the right of unlimited inspection—waiving territorial claims for the next 34 years and banding together for research pools.

In the last hours of the session, the Congress endorsed another measure, while not a treaty, had international implications. Approved was a \$600 million authorization for Latin American aid—a program requested by the President. No appropriation was made as the measure was designed to serve mainly as a declaration of future intention, to be used to reinforce U.S. participation in talks at the inter-American economic conference at Bogotá, Columbia.

Earlier in the session, Congress had authorized U.S. membership in the International Development Association. The request again had been made by the President. The IDA was established as a lending agency to provide long-term, low interest assistance to underdeveloped areas of the world. Contribution to the fund will be made by the many financially able nations of the world.

MEDICAL CARE FOR THE AGED

Failure crowned efforts of some to enact a wide-sweeping medical care for the aged bill—although legislation was written which substantially enlarges the scope of Federal aid to States to enable them to assist in payment of medical bills of needy aged.

Rejected in two separate votes by the House Ways and Means Committee was the Forand bill which would have imposed compulsory health insurance coverage by means of the social security system. Instead, the committee introduced and won House approval for an omnibus social security bill with increase provisions and a moderate, State-option medical assistance program.

In the Senate, an unsuccessful attempt was made to pass legislation similar to the provisions of the Forand bill—but the measure failed 51 to 44. The administration's medicare program also failed.

Congress thus ended up adopting instead a program based mainly on the House-passed bill, the salient features of which include:

A program of matching funds to the States to participate in medical care for the aged, which will benefit an estimated 12,400,000 individuals. The Federal share will be 50 to 80 percent of the total cost—running about one-half billion dollars

A worker covered by social security who becomes permanently disabled will be able to start collecting the benefits for himself and his dependents regardless of his age. In the past, disability benefits have been limited to those 50 years or older.

Increased authorization for child welfare services to \$25 million.

No compulsory coverage for self-employed doctors—but clearance for additional ministers to obtain coverage.

Increase in the amount of yearly earnings a beneficiary can have and still receive all the benefits. For each \$2 earned over \$1,200 (the present limit), \$1 will be deducted from the benefit. Above \$1,500, the beneficiary will lose \$1 of benefit for every dollar earned.

#### MINIMUM WAGE

In what was regarded by observers as one of the most serious defects of the session, the failure of a joint conference to agree signaled the end of attempts to raise the Federal minimum wage.

The conference sought to reconcile a House bill raising the wage to \$1.15 per hour—extending coverage to a limited number of occupations—and a bill providing for \$1.25 per hour and including 5 million additional workers.

#### MUTUAL SECURITY

Appropriation of \$3.7 billion for mutual security followed strong attempts in Congress to water down the program designed to strengthen U.S. ties with friendly nations in a continued effort to maintain a bulwark against communism.

Throughout the session, moves were made to seriously curtail the military defense phase of the mutual security program. A drastic cut was restored by the other body in the final week before adjournment. The House followed suit—adding \$65 million in defense funds, but still falling short by \$125 million the supplemental funds approved by the other legislative wing.

#### RIVERS AND HARBORS

Legislation approving construction of 63 navigation projects, 9 beach erosion control projects, 43 control projects, 5 miscellaneous projects-and increasing authorization for 10 river basins-was sent to the President on July 1. House action had taken place almost a year earlier and contained a lower authorization-\$657,310,500 in navigation and flood control projects, contrasted with the \$1,583,768,352 figure in the bill as passed by the other body, and agreed to by both Houses. Rushford and Winona projects were included, both for planning. The President signed the measure into law.

#### VETERANS LOAN PROGRAM

Home, farm, and business loan programs for World War II veterans and the direct loan program for World War II and Korean veterans were extended by Congress. The programs were due to expire on July 25. Extension until July 25, 1932, was approved.

Authorized by the bill was \$150 million for direct loans in each of the 2 years and establishment of a revolving fund for the guarantee program.

Resolutions Adopted at the 63d Annual Convention of the Zionist Organization of America, August 28, 1960

EXTENSION OF REMARKS

### HON. SEYMOUR HALPERN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES
Thursday, September 1, 1960

Mr. HALPERN. Mr. Speaker, the Zionist Organization of America held its 63d annual convention in New York City from August 25 to 28. This outstanding organization of American citizens of the Jewish faith, with membership in some 700 major communities throughout the country, has worked unceasingly for the creation of a democratic State of Israel in the Middle East and for its sturdy development, and, for the introduction of our American way of life there.

Mr. Max Bressler, of Chicago, Ill., its newly elected president, voiced the feelings of this great organization on American-Israel relations when he said in his acceptance speech:

It is a good test of friendship for men or nations to recall the moment of their greatest loneliness and ask themselves who then stood by their side. By this crucial test our own beloved country, the United States of America, must surely be accounted Israel's most authentic friend.

At their convention, the members adopted a number of resolutions in respect to U.S. foreign policy in the Middle East and expressed their gratification at the extent of American economic assistance there. These resolutions represent the combined sentiments of local units and of the convention representatives, arrived at after spirited and lucid debate and deliberations.

The resolutions are exceedingly relevant to present affairs and under previous consent, I include them in the Appendix of the RECORD. They follow:

RESOLUTION ADOPTED AT THE 63D ANNUAL CONVENTION OF THE ZIONIST ORGANIZATION OF AMERICA, AUGUST 28, 1960

# AMERICAN FOREIGN POLICY ON THE MIDDLE EAST I. Arab-Israel peace

The tensions arising from economic and political instability in the Middle East make the region vulnerable to internal conflicts and subversion from without; they present an acute and ever-present threat to the world peace. We, therefore, urge upon our Government the need for intensified efforts toward economic development, political equilibrium, and peace in the Middle East.

The major obstacle to Arab-Israel peace is the continuing refusal of the Arab States to recognize Israel and the reality of her existence. In contravention of the U.N. armistice and the U.N. Charter, they illegally proclaim themselves to be in a state of war with Israel. The United Arab Republic has sought domination over the Arab world by intensifying the war against Israel and by challenging other Arab governments to join in its hostile

and intransigent actions. "The preservation of the State of Israel is one of the essential goals of U.S. foreign policy," declared our Government through Secretary of State Dulles in 1956. The objectives and policies of the United States qualify our Government to assume leadership in achieving an Arab-Israel peace. We urge our Government to undertake a new initiative to bring Israel and the Arab States into direct negotiation at the peace table.

#### II. Suez Canal

The Arab Republic, in defiance of international law, has barred the Suez Canal to Israel ships and cargoes. This blockade has been further extended to include ships and cargoes of a score of nations involving more than 300 ships, over 100 of them American. Our Government has long opposed the Egyptian doctrine that it is entitled to blockade the Suez Canal, notably in the U.N. Security Council resolution of September 1, 1951, and the U.N. Security Council debate on June 4, 1955. This position was reaffirmed by President Eisenhower on February 20, 1957, and by Secretary of State Herter on September 17, 1959. This convention urges the United States, through the United Nations and on its own initiative, to take positive action to enforce the principle of free passage through the Suez Canal for all nations and to halt the United Arab Republic's illegal blockade of the Suez Canal.

### III. Arab boycott

The Arab boycott which is carried on by the Arab Governments against the State of Israel and against American firms and individuals that trade with her is a grave cause of tension and of substantial economic injury to American as well as world commerce.

Despite the stand taken by the State Department that "there should be no discrimination against American firms because they carry on business relations with Israel," as stated by Assistant Secretary of State William B. Macomber, Jr., on January 9, 1959, the Arab boycott is being pressed with growing intensity. More and more American citizens have been discriminated against and blacklisted. U.N. authority is flouted and even U.S. Government agencies have yielded in some degree to the strictures of the boycott. In this light, we note with deep appreciation the position taken by the Congress of the United States, first in the Mutual Security Appropriations Act in 1959, which declared congressional opposition to discrimination by countries receiving American aid, practiced against Americans on grounds of race or religion; and further, in the mutual security authorization approved by Congress in May 1960, in which Congress, reaffirming the U.S. Position in favor of freedom of navigation in international waterways, in favor of economic cooperation between nations, and in opposition to boycotts and blockades, called upon the administration to give effect to these principles in administering assistance under the Mutual Security Act and the Agricultural Trade and Assistance Act of 1954. We hall these expressions by Congress as an effective statement of American opinion on the issues and urge upon the administra-tion their thoroughgoing implementation.

### IV. Arab refugees

The Arab refugees must remain an insoluble problem as long as the Arab Governments refuse to cooperate in any proposal for their resettlement. In this connection, we note that of the 40 million of all countries left homeless at the end of World War II, more than half have been reintegrated in every case by resettlement, never by repatriation. Arab demands that Israel agree to the return of the refugees are unrealistic and are merely attempts by Arab leaders to shift responsibility to Israel for the solution of a problem created when the Arab States

went to war in 1948 to prevent the establishment of Israel. Such proposals call upon Israel for a suicidal gesture destructive of her own security and survival.

Israel, which already has more than 220,000 Arabs within its borders, many of whom have entered Israel since 1949, has offered to compensate the Arab refugees for their abandoned property. We urge upon our Government and upon the United Nations continued and heightened initiative in effectuating practical resettlement programs, which must depend largely on the economic development of the Middle East as a whole.

### V. U.S. economic assistance

We heartily endorse continuance by the United States of its generous policy of assisting underdeveloped nations to build up their economies and their societies, in freedom and independence.

We take deep pride in the knowledge that our country continues to play a significant role in the strengthening of Israel's economy and the preservation of Israel's security. American economic aid has been used to constructive ends. Israel has made exemplary progress demonstrating to other new nations that a democracy which preserves free institutions does more than any other form of government to help its people. With American cooperation, Israel is strengthening the cause of freedom everywhere.

### VI. Party platforms

The convention welcomes the declarations of friendship for Israel embodied in the platforms adopted by the two major political parties of the United States at their recent national convention. A basic conviction of the Zionist Organization of America, which has consistently guided its program, is that there exists in the United States fundamental unity on a policy of friendship and cooperation with Israel.

This conviction is reaffirmed and reemphasized by the sentiments expressed in the party platforms, and we hereby record our deep appreciation to the Democratic and Republican Parties.

#### Congressman Bow's Report

EXTENSION OF REMARKS

### HON, FRANK T. BOW

OF OHIO

IN THE HOUSE OF REPRESENTATIVES
Thursday, September 1, 1960

Mr. BOW. Mr. Speaker, my customary report to citizens of the 16th Congressional District is both an obligation and a privilege.

I believe it is an obligation of a Member of Congress to report to the people he represents at the end of each Congress, and I have done so regularly since 1952.

It is a privilege to hold public office in a nation where the people rule through elected representatives,

#### THE DISTRICT

Some 500,000 people in Stark, Tuscarawas, and Wayne Counties are constituents of the Representative of the 16th District of Ohio, an increase in population of about 90,000 since Frank T. Bow first came to Congress 10 years ago.

They represent as great a diversity of interests as can be found in any congressional district.

Wayne County continues to be one of the foremost agricultural counties of the State and Nation, but small industry is expanding and providing greater balance in the economy.

Tuscarawas County continues to boast the largest concentration of clay industries in America, together with an increasing number of manufacturing plants. It is well known as a center of the swiss cheese industry and its farms form the solid basis of its economy.

Stark County's diversified industry has grown steadily through the 10 years of my tenure in office, and the city of Canton is celebrating a decade of progress that has seen many new industries established beside the giants whose names and products are known internationally.

Thus, farm and business legislation, problems of labor-management relations and of helping to secure Government contracts to keep production humming, problems of water conservation and flood control, city development and interstate highways occupy the time and attention of the 16th's Representative in Congress.

#### APPROPRIATIONS

During the 86th Congress, Frank T. Bow continued to serve as a member of the Appropriations Committee, and as the senior Republican member of the Subcommittee on the Departments of State, Justice, and the Judiciary, and the Subcommittee on Commerce and Related Agencies, as well as a member of the Subcommittee on Deficiencies.

Day after day through the session these subcommittees have had hearings on budget requests, seeking to find means of improving Government service while reducing Government expense.

In the first session of the Congress, the subcommittees of which I am a member recommended savings of \$675,979,859.

In the second session we have recommended savings of \$912,262,023.

#### KEY TO TAX REDUCTION

Taxes continue to be the biggest complaint of my people. They want tax reduction, but not at the expense of necessary Government programs.

The key to tax reduction of this kind is the careful scrutiny we give appropriations. If every officer of the agencies and bureaus of Government will do his best to cut costs, and if they will cooperate with our committee efforts to find further economies, we can save millions.

The budget surplus of \$1.1 billion in the fiscal year just ended, and the promise of another surplus in the current fiscal year, give hope that the increasingly distressing burden of taxes can be eased. If we continue to have an administration interested in economy and tax relief and if we can have a Congress dedicated to that end, the \$7½ billion tax cut of 1954, which has saved Americans over \$45 billion to date, can be repeated.

#### NEW FEDERAL BURDENS

Tax reduction history will not repeat itself, however, if the American people or their representatives create new burdens for the Nation's taxpayers.

Forty-five billion dollars' worth of such proposals were introduced during the 86th Congress,

One such proposal to provide from the Federal Treasury \$20 for each child of

school age to be spent for the public schools of the States without regard to whether such children attended public schools or, indeed, any school at all, came close to passage.

Who would pay the bill?

The same people who now pay school taxes in each district and State.

Why would it be any easier for them to pay additional taxes to Washington than to the local government?

Why should they send money to Washington for the Federal bureaucracy to take out its administrative expenses before returning a pittance to the people?

These are questions basic to every Federal aid something-for-nothing pro-

posal

There is only one source of tax dollars—the people. Tax dollars buy more when they are collected and spent by government closest to the people.

Federal aid costs more for collection, for administration, for unnecessary Federal requirements and—most of all—because we lose a part of our individual ibberty and our individual responsibility every time we turn to Washington to do a job we can do better for ourselves.

These are some of the reasons your Congressman, Frank T. Bow, has opposed unnecessary new Federal spending

programs.

PRINCIPAL BOW BILLS

Carrying out the political philosophy I have explained to the people of Ohio in five congressional campaigns and innumerable other occasions, I have prepared legislation as follows:

A bill to carry out the recommendations of the Hoover Commission to end commercial enterprises of the Government that compete with business and

take away job opportunities.

A bill to require a complete inventory of Government property so that property not essential could be disposed of and the proceeds applied to the national debt.

A bill to require the Government to live

within its income.

A bill to avoid new tax burdens and Federal control in our schools by turning over to the States for education onefourth of the cigarette taxes collected in each State.

A bill to restore the constitutional rights of servicemen stationed abroad who may now be tried and imprisoned in foreign courts.

A bill to recognize good citizenship in later years of men who received undesirable discharges from the armed services primarily because of immaturity.

An amendment to the Fair Labor Standards Act to protect the wages of American workingmen by authorizing special duties on products of foreign nations where substandard wages provide an unfair competitive advantage.

A resolution to declare that the Congress believes we should enter into no further tariff reduction negotiations at

this time.

A bill to protect and define the right of associations of dairy farmers to deal as a unit with the processors and distributors of milk.

#### LOCAL PROBLEMS

Working with Government agencies to assure proper Federal service for the 16th District is an important part of the Congressman's job.

During the past 2 years we have come closer to solving many longstanding problems.

Berlin Reservoir: For 10 years we have tried to find a means of maintaining the water level throughout the summer for recreational uses, compatible with the main purpose of the project. In 1960 we obtained a \$15,000 appropriation for a study by the Corps of Engineers which should provide a solution. Also, construction of the West Branch Reservoir will be helpful in augmenting water supply.

Chippewa watershed: The project won congressional approval this year and we are working to find some method of preventing unnecessary damage to families in the Orrville area.

Flash flood warning: At my request the Weather Bureau is establishing a flash flood warning system at Akron-Canton Airport that will help to prevent economic and possible human loss when flash floods occur in our three-county area.

Stark County flood control: My resolution authorizing the Corps of Engineers to prepare plans for flood control in the Stark County area, to prevent losses such as occurred in the 1958 floods, was approved by the Congress.

Air travel: Progress continues on improvement of the Akron-Canton Airport and we are endeavoring to secure new facilities and continued airline service

at New Philadelphia-Dover.

Government contracts: Cooperating with local industries, your Congressman has helped to bring important defense contracts to our area to help maintain employment levels.

Postal service: The Post Office has completed several new post office buildings and is working on improvements at others including Massillon and Canton. City and rural delivery routes have been extended to serve several thousand additional families.

#### MAJOR LEGISLATION

As shown in the accompanying voting record, I have been present and voted on all major issues presented in the 86th Congress.

This Congress has enacted 34 laws extending and improving the program of the Veterans' Administration, all of which I supported.

#### FARMING

No major farm legislation has been enacted because the Democratic majority in Congress and the Republican administration have disagreed on this subject. The Democratic majority insists upon continuation of the high price support which has encouraged tremendous surplus of certain favored commodities at terrific cost to the taxpayer. While constantly urging modification of this program, Secretary Benson has been forced to administer the Democratic incentive law and to take the blame for the cost of the surplus that law promotes. Farmers and taxpayers alike are suffering from too much Government interference in agriculture. We must break the legislative deadlock that has prevailed so we can give the farmer a

chance to produce at a profit which is the only way we can assure the rest of the population a continued ample supply of food and fiber.

Two programs in this field have proved successful. The conservation reserve, which the Democratic Congress refused to extend, has taken millions of acres out of production at far less cost than paying for surplus that would have been produced.

The use of surplus for relief and barter, at home and abroad, has continued to help millions of individuals while at the same time relieving our storage problem and spreading good will for our country. I am proud to have been a sponsor of this program.

#### FOREIGN AID

I have continued my unwavering record of opposition to the extravagant and lavish grant of funds to foreign countries. However, I have supported the Development Loan Fund which will help erase the necessity for foreign grants, and the special program for Latin America. We must create harmony and unity of purpose in this hemisphere. If we cannot do that much, we can look forward only to isolation in a hostile world.

#### LABOR-MANAGEMENT

I voted for the Landrum-Griffin bill—Labor-Management Reporting and Disclosure Act of 1959—because it provides an opportunity to give individual members of labor unions the opportunity to run their unions properly and rid them of graft and corrupt leadership.

The labor bosses of America are loud in their demands for civil rights, but nowhere in America are civil rights so trampled upon as in those unions where members are denied the right to secret ballots in union elections, denied the right to know how tremendous union treasuries, taken from their pay, are managed, and denied the right to take part in vital decisions that mean bread and butter to their families.

I voted also for the minimum wage bill that passed the House. This measure provided for a gradual increase to \$1.15 per hour and the coverage of about 1 million additional workers. Unfortunately, it was impossible for the House Committee on Education and Labor to compromise this reasonable bill with the more radical approach advocated by Senator Kennedy with the result that there is no legislation.

#### SOCIAL SECURITY

Several improvements in the social security program, including the disability program, were enacted in the 86th Congress. Unfortunately, the effort to remove or increase significantly the ceiling on earnings of retired persons was not successful.

After bitter controversy within the Democratic leadership of the Congress over various proposals for medical care to the aged, the Congress adopted a program that constitutes a small beginning toward Federal-State responsibility for elderly persons who, though not on public welfare, cannot afford proper medical treatment.

It is not my intention to make this a political message, but it is impossible to explain the social security medical care issue without raference to politics. Some constituents have written me heated letters blaming Republicans for failure to provide a broad medicare program for the aged. As a matter of fact, President Eisenhower proposed far more comprehensive medicare than anyone else.

The 86th Congress has been controlled by the Democrats in both House and Senate almost 2 to 1. The Democratic Senators and Representatives could pass any bill on which even two-thirds of them agreed. They could not agree on any feature of medical care for the aged; and if any blame is to be cast for legislation enacted, they must bear it.

#### VOTING RECORD

Proper titles of bills and the methods of voting on them make a congressional voting record sometimes difficult to understand. I have used descriptive rather than proper titles on some of the following important issues of the 86th Con-

	Bow vote	House action	Final action
Ist session: Agricultural Trade and Development Act Federal-Aid Highway Act Landrum-Griffin (labor bill) Deny passports to subversives Uphold validity State laws Foreign aid TVA, self-funneling 2d session: Redevelop so-called distress areas Civil rights Continued right controls on farms Federal employees salary increase Foreign aid Social Scourity Amendments of 1960 including medicare School Construction Assistance Act Increase minimum wage.	Yes Yes Yes Nay Nay Ycs Nay Yes Nay Yes Nay	do do do Defrated Approved do	Public law. Do. Do. No Senate action. Public law. Do. Do. Vetoed. Public law. Do. Do. Do. Failed of enactment Do.

### Good Old January

EXTENSION OF REMARKS OF

# HON. CHARLES O. PORTER

OF OREGON

IN THE HOUSE OF REPRESENTATIVES Thursday, September 1, 1960

Mr. PORTER. Mr. Speaker, under leave to extend my remarks in the REC-ORD, I include the following editorial Which appeared in the August 19, 1960, edition of the Coos Bay World, a thinking, hard-swinging newspaper published in Oregon's Fourth Congressional District. Executive Editor Forest Amsden Sees light ahead in January.

#### GOOD OLD JANUARY

President Eisenhower insists he knows of no mistakes this country made in its Cuban Policy which could lead to the growing Communist influence there.

The President sometimes exhibits a short memory, as do we all. And then again, even if his memory were not short it is probable he would not recognize as mistakes some of the U.S. actions under both his own and President Truman's administrations regarding Cuba.

Our policy in Latin America has for too many years been to support the stable government in power, hoping it could protect our business investments. When a revolution came along, as they frequently do in Latin America, our concern was to buy off the new regime and support it.

Such a policy is bound to hit rough spots sooner or later.

It hit a really rough spot in Cuba when the Castro regime came to power over the Prostrate regime of Dictator Batista, our boy in Cuba.

Batista maintained his murderous sway over the Cuban population, and hunted down Castro's guerrilla forces, with arms and money furnished by the United States. This was not an overt attempt by the United States to make Cubans suffer. It was an attempt to maintain the status quo, without official realization, we're sure, of what Batista's bully boys were doing.

Eventually unrest became so apparent even the blindest couldn't ignore it. It appeared Castro might be able to eventually mount a successful revolution, so Mr. Eisenhower or his subordinates ordered a halt to arms shipments to Batista. The regime fell immediately and Castro took over in what became a genuine popular social and economic revolution—the kind in which the status quo

The Castro government had precious little to thank the United States for. And as time went on and the Castro government need an outside scapegoat to blame its own economic troubles, the United States stood ready to take the blame. We got the blame. And that's where we sit at the moment.

The President knows of no mistakes we've made in our Cuban policy, which is, after all, the policy we are still pursuing in more than one other Latin American country.

Well, thank heaven, there will be a Janu-

#### Public Works Appropriation Bill

SPEECH

### HON, EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES Tuesday, August 30, 1960

Mr. DERWINSKI. Mr. Speaker, the action of the Congress in refusing to approve \$2.9 million for necessary reloca-tion of railroad and highway bridges over the Cal-Sag Channel constitutes a major detriment to the completion of this vital project. I wish to point out to you that this Cal-Sag navigation project easily ranks as one of the most vital in the Nation, since it represents the necessary link between the commerce now generating through the St. Lawrence Seaway and the commercial traffic on the inland waterway system which serves all of mid-America.

Work on the Cal-Sag Channel has continued at a rapid pace, a tribute to

the citizen communities that have provided the inspiration, and the recognition by the Corps of Engineers of the importance of this program.

Behind the Cal-Sag project stands a record of intense local participation; a record of accomplishments and spending amounting to millions of dollars. Three years ago, the Illinois General Assembly passed a bill which granted the metropolitan sanitary district the authority to issue bonds to provide purchase of land necessary for the channel-widening project. I must point out to you that local cooperation has been received from the city of Chicago and numerous suburban communities, county of Cook. through which the channel runs, State of Illinois, and, as indicated, the Sani-tary District of Chicago—all of which have contributed direct funds as well as tremendous amount of time and energy on the part of their officials to the furtherance of this project.

Mr. Speaker, an important phase of the Cal-Sag project is the replacement, alteration, or removal of railroad and highway bridges in conformity with the horizontal and vertical clearance requirements of the vastly improved channel. It must be pointed out that in the omnibus rivers and harbors bill of 1958, the House Public Works Committee, after a separate survey report had been ordered and processed through channels, authorized the inclusion of the Western Avenue Highway Bridge under the Truman-Hobbs Act. Their reason for so doing, that they felt this to be sufficiently justified, may I call your attention to House Report 1894, 85th Congress, 2d session, section 109, on page 69, which gives a detailed explanation of the reason for the inclusion of this project in the 1958 act:

The committee recognizes the importance of the Cal-Sag Navigation Project as a vital link, through commerce, between the Great Lakes and Mississippi-Ohio Inland Water-

Mr. Speaker, I regret the failure of the committee to properly assess this

My purpose in calling this matter to your attention at this time is in the hope that the Members of the House, especially those members of the Appropriations Committee, will carefully study this matter and in the early days of the 87th Congress move to rectify what I consider to be a serious error in judgment.

### A Welcome Treaty

EXTENSION OF REMARKS OF

# HON. VANCE HARTKE

OF INDIANA

IN THE SENATE OF THE UNITED STATES Thursday, September 1, 1960

Mr. HARTKE. Mr. President, when Congress recessed last July for a month, one of the matters pending for consideration was the Antarctica Treaty. returned for this short session to take

this matter up, together with several other items of unfinished business.

This was one of the first orders of business when we convened. The treaty was ratified by a vote of 66 to 21.

The Evansville Courier on August 28, 1960, had an excellent editorial on this matter. The editorial states concisely why this treaty is a step toward a more stable world.

I ask unanimous consent that the text of the editorial, entitled "A Welcome Treaty," be printed in the Appendix of the Congressional Record.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

#### A WELCOME TREATY

The Antarctic Treaty ratified by the Senate has two levels of meaning. On the surface, it is an agreement to ban military activity in Antarctica, open it to unrestricted scientific research, and shelve territorial claims for 30 years. But the treaty also attests the fact that meaningful agreement with the Soviet Union, one of the 12 signatory powers is not as hopeless as it often appears to be.

Even were it not for this deeper significance, the treaty would be welcome. The potential value of the Antarctic is just coming to be realized. Had the nations with real or fancied territorial claims not agreed to freeze the status of such claims for the time being, there might well have been a struggle to assert them.

Quite aside from that, placing the icy continent out of bounds for military activity and making it accessible to all powers removes a potential trouble source. And there are good reasons to hope that multination programs of scientific research in that area will contribute much to understanding of the earth and its weather. For these reasons, and because it is a milestone in our dealings with the Kremlin, the Antarctic Treaty is a step toward a more stable world.

### The Star Mop Contest

EXTENSION OF REMARKS

### HON. STUYVESANT WAINWRIGHT

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES
Thursday, September 1, 1960

Mr. WAINWRIGHT. Mr. Speaker, I should like to bring to your attention an action by a sports group that demonstrates the overall American spirit and philosophy of cooperative actions in worthy causes. I am referring to the August 14 star mop contest sponsored by the Empire State Underwater Council.

This group, whose members popularly are known as skindivers, worked its diving contest in cooperation with the Long Island oyster farmers, who breed these succulent crustaceans in the waters of Long Island Sound. One of their biggest handicaps in raising oysters, however, are star fish—predators who feed on young oysters. In star mop the contest was geared to 225 participants using and demonstrating their diving skills to gather as many starfish as possible from the underwater oyster farm area so they could be destroyed. Actually, the contest served to bridge an

underwater area gap that cannot be covered by now available mechanical equipment, such as dredges and special starfish brooms.

The manager of one of the benefiting oysterbeds, George Vanderborgh, of Long Island Oyster Farms, Inc., described this 1-day contest as a fine alliance between sportsmanship and conservation. I should like to echo that sentiment—and add this important fact, too.

It further pinpointed the need for more diversified usage of the underwater swimming skills of skindivers.

We already know the values of such skills in the military services.

But the numbers of devotees to this sport plus the areas in which they can practice and generate newer skills are limited and should, I feel, be amplified as much as possible. What has been done to benefit Long Island oystermen can similarly be done in other waters of our land where oysters are bred since predator starfish not only are prolific breeders—they are also good travelers.

There are undoubtedly some industrial services—such as cable checkings and repairs, and so forth—which would benefit from skindiving developments as well as the essential advantages of increasing the numbers of our peoples who can readily handle themselves safely in deep waters.

Were this latter phase the only aspect for encouraging skindiving, I would be most happy to add my enthusiastic voice. But I can envision many more nonsports benefits than already have been made apparent.

I think you will all find that what the Empire State Underwater Council did in my district for my constituents can be done in all districts bordering the oceans and the gulf. There are such underwater groups throughout the country, I am told, who will be most happy to coperate. They seek only the opportunity, plus the pleasure, of encouraging development in their sport.

Address by Dr. Abba Hillel Silver at the Convention of the Zionist Organization of America, New York City

EXTENSION OF REMARKS

### HON. SEYMOUR HALPERN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES Thursday, September 1, 1960

Mr. HALPERN. Mr. Speaker, from August 25 through 28 in New York City, the Zionist Organization of America held its 63d annual convention. One of the highlights of the sessions was a stirring and beautiful address on Saturday evening, August 27, by Dr. Abba Hillel Silver, of Cleveland.

Dr. Silver, who has gained a world reputation as scholar, theologian, and humanitarian, is loved and respected by those of the Jewish faith as the "Architect of Israel." His untiring efforts to secure a homeland for his people in the Middle East, his representations to the United Nations in 1947 and 1948 when the question was under consideration by that body, have earned him an honored and memorable place in history.

His address described the long years of work, of faith, and of discouragement as well, before the State of Israel became the reality which had been conceived by Theodor Herzl at the close of the 19th century.

Zionism was the outgrowth of Herzl's dedicated efforts. Throughout what Dr. Silver calls the age of struggle—the hard years of fighting enemies within and without, years of diplomatic missions and excursions, of frustrations and setbacks, the Zionist movement and organization supported the dream until. "The road which led our people through the long and terrible wilderness had brought them at long last, singing and triumphant, into the Promised Land."

Throughout his address runs the golden thread of faith which gave sustenance to tired bodies and minds when odds seemed overwhelming and success a never-to-be-obtained goal. It is this faith which is enabling the people of Israel today to produce miracles in the deserts of the Negev and which infuses them with the courage to create a thriving nation in the face of their neighbors' antagonism and defiance. It is this faith that steadies the country's leaders and buoys them in their belief that eventually the Arab States and Israel will work together on programs of progress, rehabilitation, and development which will benefit all the nations in the Near East.

It is this faith that induces the strong to perceive a vision of the future. "But greater than the State of Israel," declared Dr. Silver, "is the people of Israel, and greater than the people of Israel is the immortal vision and hope which sustained our people through the long centuries, which made of it a covenanted people, pledged to the ideal of Malchut Shamayin, the establishment of the Kingdom of God on earth."

"Zionism," he stated, "as the pledge of positive Jewish living in the spirit of our deathless prophetic tradition, can help us all, both in Israel and in the Diaspora, to work together for the coming of the next great age, the distant, the ultimate age, the Messianic Age, when justice and peace will be established on earth, when each man will live under his vine and under his fig tree with none to make him afraid."

Mr. Speaker, I include this magnificent address in the Appendix of the RECORD:

Address Delivered by Dr. Abba Hillel Silver at the Convention of the Zionist Organization of America, New York City

I am grateful and I am humbled by your tribute. During the heated days of our struggle, I was frequently subjected to unfavorable criticism, and I felt that while I deserved some of it, I did not deserve all that I was getting. Today I feel that I do not deserve all the praise I am getting, although I must say that as a weak and peccant human being, I harbor the more or less pardonable illusion that I deserve some of it.

The most beautiful day in our Jewish calendar is the Sabbath. It is called the Hemdat Yamim—the most beloved and desirable of days. Theodor Herzl called Zionism the Sabbath of his life. Personally, as I look back upon the years since my first identification with the Zionist movement more than half a century ago, I feel in very truth, that the Zionist movement has also been the Sabbath of my life too, as it has undoubtedly been for many of you who are here this evening. It has given us a Nesha-mah Yeterah, an additional gracious and precious Presence which has accompanied us all along our way through life.

The noted French philosopher, Boutroux, whom I had the privilege of knowing, was once asked what in his opinion was involved in the good life. He replied, "A good thought conceived in early life and developed

in maturity."

I might add to this observation a remark Which an old fisherman once made to Dr. Theodor Herzl and which the latter never forgot: "The most remarkable of all things is when a man never gives up."

For the gift of a good thought which was conceived early in life, and for the inspiration of the immortal leader of our movement who never gave up, I am not only very grateful, but I feel that they represent the complete reward that any man can wish for.

My dear friends, during the past few generations, our people experienced several dis-

tinctive ages or epochs of transition.

First was the age of drift. During the closing decades of the 19th century, our people could not make up its mind whether to stay in the ghetto indefinitely or to lose itself completely in the Western World. sense of peoplehood had become sharply attenuated and our national morale had seri-ously slumped. Many of our people drifted away entirely, and many others remained or were brought back rejuctantly to the fold by anti-Semitism which increased in virulence all through the closing years of the 19th century. It was anti-Semitism, con-fessed Herzl, which first made him and Nordau Jewish. Many brilliant Jews paid for their improved careers in the Western World by formal conversion. Many others felt no responsibility whatsoever for the future of their people or any loyalty toward it. was a case of "He took away understanding from the chiefs of the people of the land, and made them wander in a pathless waste."

Then came the age of decision—as so often happened before-in Jewish history, like a recurrent pattern, when a dangerous drift Was brought to a sudden halt. The life sense of the people, the life wish, the deep desire to survive, asserted itself. It happened long ago during the Babylonian exile. A defeated and uprooted people, beset by despair and faced with an unpredictable future took hold of itself, and by the rivers of Babylon, it vowed: "If I forget thee, O Jerusalem, may my right hand lose its cunning." It happened once again in the days of Ezra and Nehemiah, when the returning exiles found themselves in a ruined Judaea, beset by many enemies: "Behold, we are slaves today and We find ourselves in great trouble." theless, they assembled and made a firm Covenant with their God to carry on despite everything, to rebuild the broken walls, and to reaffirm the faith and disciplines of their Jewish heritage.

This miracle of decision happened once again in the days of the Maccabees. corruption from within and from without threatened to eat at the very vitals of the People's being, the cry finally went up: "He who is for the Lord, come with me." A great revolt ensued, a bitter struggle of the few against the many. Then came victory and a glorious new era was ushered in for our people, and through our people for humanity.

Toward the close of the 19th century, a

number of scattered and rudderless groups of faithful Jews began to make their voices hear, and to marshal their meager resources for a national renaissance, for a new covenant with destiny-the Bilu, the Hoveve Zion, and

The spiritual actalyst for all these groups was Theodor Herzl. At Basie he finally ral-lied the people for the heroic hour of decision. Herzl was the most eloquent and consequential spokesman of those who had come to understand the utter emptiness and futility of combating anti-Semitism. He was also the most clear-sighted among those who realized that the solution of the Jewish problem must be a national solution, one that would receive international sanction and approval. The solution, he realized, could not be accomplished through infiltrations into other lands, or through smallscale philanthropic colonization efforts in Palestine. Herzl favored only a kind of colonization which we could protect, if need be, with our own army. The day of little essays and ventures, he maintained, the Yom Ketanot, had to end.

As a result of successive disheartening ef-

forts and rebuffs, he had come to the further conclusion that the movement to establish a political home for the Jewish people and put an end to their national homelessness must be a mass movement. At first, Herzl did not want to stir up the masses. He hoped to appeal to the rich, the notables, hoping that they would finance his vast project of national transmigration. But when the Baron de Hirsh's and the Rothschild's failed him, he turned to the people-to those whose lives were dark with persecution, misery, and pogroms in the countries of Eastern Europe, and to those who felt the slings and slurs and the poison pens of anti-Semitism in the countries of Western Europe—an anti-Semitism was being lifted high on the rising tides of nationalism, capitalism, and racialism.

At Basle, the vanguard of the Jewish people met at the summons and under the inspiration of this mystic, statesman and man of action. There, in 1897, the Age of Decision was ushered in. "At Basle," wrote Herzl, "I founded the Jewish State." Not actually, of course, 50 years were to elapse before the Jewish State would be founded. But the decision was there made, and a worldwide Jewish organization was brought into existence to carry it out. Here for the first time was a clear purpose, a firm resolve, and a people pledged to a course of action. What was said at Sinai may very well have been restated at Basle: "this day you have become a people." Moses knew, of course, that many years would have to elapse and much hard welding and fusion would have to take place before his motley hoard of emancipated slaves, many-tribed and rabble-infiltrated would become a people in the true sense of the word. But at Sinai the group had been infused with a new life and a new mission which had made them a single community of shared interests and of single purpose. They were now bound of single purpose. They were now bound together. They had been given a collective soul and that soul had been ignited.

At Basle, the Jews who could not make up their minds in the Age of Drift had become a people again. Their physical resources for their enormous historic enterprise were limited indeed. But the indomitable will of the people had again asserted itself and it was finally on the march again. Herzl the mystic did not underestimate the power of physic resources. "Great things," he wrote in his diary, "do not need to have a firm foundation. An apple must be put on the table so that it should not fall. The earth swings in space . . . the secret lies in movement."

The age of decision was soon followed by the age of struggle—the hard years of fighting enemies within and without, years of diplomatic missions and excursions, of frustrations and setbacks; years of driving propaganda and organization. More than one generation of the best and bravest among our people engaged in this struggle, in the face of overwhelming odds, and many of them fell upon the high place of the battle. Herzl himself wrote in his diary on May 2, 1901: "Today, I am 41 years old; nearly 6 years have passed since I began this movement, which has made me old, tired and Two years later he was dead. At DOOT. where were the people whom he was strug-gling to liberate? Why did they not rally in great multitudes to the urgent cause and his earnest appeal? Why were they unloading upon his own tired heart all the bitterness and resentment of their unhappy lives? "Let it be inscribed upon my epitaph," once wrote, "he had too high an opinion of the Jews '

Other prophets of our people in the past, in the impatience of their love, cried out in a similar vein. But these prophets and seers came to understand, after their dark hours and disillusionments were passed, that their people was God's people, worthy of saving and deserving of sacrifice. Compact of firmness and compassion their hearts were full of concern for this very people which so often failed them. "Forgive the people's sins, O God," cried Moses, "or blot me out of Thy book."

The age of struggle moved on through years of political evasions on the part of the mandatory government, through illegal immigration, violent resistance, and through the appalling tragedies of two World Wars which saw the House of Israel ravaged as it had never been ravaged before in all its long checkered history. For a time, it looked as if European Jewry would be completely destroyed and there would be no need for a national homeland, but for a national grave-

But here again, the oft repeated miracle of our history recurred and the age of struggle culminated in the age of victory. Five years after Buchenwald and Dachau, 50 years after Basle, the State of Israel was proclaimed. The Galut ended; its curse was lifted from the shoulders and hearts of our people. Those who sowed in tears could now reap in joy. A new day had dawned, a wonderful day of great new beginnings. The road which led our people through the long and terrible wilderness had brought them at long last, singing and triumphant, into the Promised Land.

Today the age of consolidation is with us-the age of hammer, saw, and plow, the when architect, engineer, scientist and civil servant are proceeding with skill and eagerness to give body to the dream come true.

Fortunately for our people, we are now concerned more with tasks than with problems. Our people, in Israel and in the Diaspora, I am sure, will not fail in the new age of consolidation any more than they failed in the age of decision or struggle. They will bend to their many tasks in high resolution and in great confidence. It has been most gratifying to note that the initial period in this age of consolidation has not been attended by the sort of crisis, strife and disorder bordering on chaos, which has been the unfortunate experience of some of the recently founded states in Africa and Asia. In this regard, Israel has demonstrated a political maturity of a very high

order.
In this age of consideration the State of Israel will continue to face, for some time to come, one serious problem, the unresolved problem of its unreconciled Arab neighbors. This problem has been aggravated by the power struggle which has been going on between the Communist and the non-Communist blocs, in which struggle small, new states are often used as pawns or shuttle-

In this dangerous game, every form cocks. of political intrigue, adventure, and intransigence has been encouraged. Some day the great powers, which once wrecked the League of Nations, will come to realize the very real and present danger, not alone to the effectiveness, but to the very survival of the United Nations, which lurks in the heightened tensions of their increasing rivalries. They may then turn away from their lethal game and look for ways of cooperation. Some day, too, Arab statesmen will arise who will realize the utter futility of continuing boycotts and blockades against Israel, or conspiracles to mount military attacks upon it, in the hope of destroying it. They will then proceed to work out together with a very willing Israel, programs of progress, rehabilitation, and development which will benefit all the nations in the Near East. All this must some day come to pass. But until such time, Israel will have to carry on its work of consolidation under great handlcaps and difficulties. But carry on, it will. And the Jews of the world will assist it.

Of the Zionist movement, Dr. Herzl once wrote: "But one thing I regard as certain, and place beyond the reach of all doubt, The movement will endure. I do not know when I shall die, but Zionism will never die."

It were well if we were to reafiirm his words today: Zionism must never die. Zionism which built the State of Israel, must now buttress it. Zionism was always far more than scaffolding for the erection of the State of Israel. It was and is the expression of the unbroken will of our people to live and to live creatively and in freedom, which time and again rebuilt the fallen tabernacle of David. Zionism was the architectural design, the material out of which the State of Israel was built, and the will that built it. And Zionism will remain its sure and main support in the days to come. It would be folly to break the cask, and still hope that the wine will be retained. Nor is there any other cask available into which the wine can be poured and conserved.

It would be a grave mistake for Israel to rely exclusively on the economic undergirding of the Diaspora, and to expect this to continue indefinitely without having the loyalty and interest of our people in the Diaspora continuously nourished and replenished by a movement which is specifically directed to this end. "You shall not be redeemed with money."

This is a good admonition to keep before us at all times. The very fact that our enemies here and abroad are trying so hard to make of Zionism a hissing and a byword should prove to us how much Zionism is needed. Were Zionism a spent and used-up movement, they would ignore it. But they know better. What confronts them in Zionism is the ultimate force which they must overcome if they are to win.

Zionism must continue to invigorate the life of our people everywhere, not for the sake of Zion only, but for the sake of universal Israel. The Diaspora cannot solve all the problems of the State of Israel, but neither can the State of Israel solve all the problems of the Diaspora. Each has a life of its own and will continue to have a life of its own. But Zionism can serve both as a two-way bridge, open at all times for spiritual and cultural traffic, to transmit the inspiration of the one to the other. It must be the dynamo of historic Jewish values everywhere, in Israel and in the Diaspora. For we are and remain one people—not politically, of course—and the establishment of the State of Israel has certainly not divided

The State of Israel is a great and glorious fact in Jewish life which is destined to influence its every phase everywhere. But greater than the State of Israel is the people of Israel, and greater than the people of Israel is the immortal vision and hope which sustained our people through the long cen-

turies, which made of it a covenanted people, pledged to the ideal of Malchut Shamayim, the establishment of the Kingdom of God on earth.

Zionism, as the pledge of positive Jewish living in the spirit of our deathless prophetic tradition, can help us all, both in Israel and in the Diaspora, to work together for the coming of the next great age, the distant, the ultimate age, the Messianic Age, when justice and peace will be established on earth, when "each man will live under his vine and under his fig tree with none to make him afraid."

The establishment of the State of Israel is not the final act in the drama of Israel. Our people are moving on, the Ark of the Covenant is moving on, in greater freedom now and in greater confidence along the broad highways of the world, to Acharit Hayamin, to the end of days, prefigured by our seers, "when they shall not hurt, nor destroy in all My holy mountain, and the earth shall be filled with the knowledge of God, as the waters cover the sea."

PROCEEDINGS OF THE HOUSE SUB-SEQUENT TO SINE DIE ADJOURN-MENT

BILLS AND JOINT RESOLUTIONS PRESENTED TO THE PRESIDENT

Mr. BURLESON, from the Committee on House Administration, reported that the committee did on this day present to the President for his approval bills and joint resolutions of the following titles:

H.B. 383. An act to authorize the annexation of certain real property of the United States by the city of Wyandotte, Mich.;

H.R. 816. An act to convey certain lands in Okiahoma to the Cheyenne and Arapaho Indians, and for other purposes;

HR. 1526. An act for the relief of F. P. Tower, Lillie B. Lewis, the estate of Manuel Branco, John Santos Carinhas, Joaquin Gomez Carinhas, and Manuel Jesus Carinhas;

HR. 2565. An act to promote effectual planning, development, maintenance, and coordination of wildlife, fish, and game conservation and rehabilitation in military reservations;

H.R. 3536. An act for the relief of Guadalupe Villarreal, Jr.;

H.R. 7810. An act to credit periods of internment during World War II to certain Federal employees of Japanese ancestry for purposes of the Civil Service Retirement Act and the Annual and Sick Leave Act of 1951;

H.R. 7990. An act to provide for the conveyance of certain lands of the United States to the Citizen Band of Potawatomi Indians of Oklahoma;

H.R. 8156. An act for the relief of Jack Kent Cooke;

H.R. 8166. An act for the relief of the Crum-McKinnon Building Co., Billings, Mont.

H.R. 8424. An act to amend section 505 of the Classification Act of 1949 with respect to positions in the Library of Congress;

H.R. 8065. An act to amend the act entitled "An act to establish a memorial to Theodore Roosevelt in the National Capital" to provide for the construction of such memorial by the Secretary of the Interior;

H.R. 9715. An act for the relief of Otls Drinkard:

H.R. 10087. An act to amend the Internal Revenue Code of 1954 to permit taxpayers to elect an overall limitation on the foreign tax credit;

H.R. 10311. An act providing that certain provisions of Public Law 335 dated October 7, 1949 (83 Stat. 724), shall apply to the Mercedes division of the lower Rio Grande rehabilitation project, Texas;

H.R. 10341. An act to amend the Public Health Service Act to authorize grants-inaid to universities, hospitals, laboratories, and other public or nonprofit institutions to strengthen their programs of research and research training in sciences related to health:

H.R. 10543. An act to amend the Helium Act of March 3, 1925, as amended, for the defense, security, and the general welfars of the United States:

H.R. 10586. An act to enable the Oregon Short Line Rallroad Co. to convey title to certain lands in Idaho to the Pocatello First Corp. of the Church of Jesus Christ of Latterday Saints;

H.R. 10841. An act to amend the Tariff Act of 1930 to place bamboo pipestems on the free list:

H.R. 10960. An act to amend section 5701 of the Internal Revenue Code of 1954 with respect to the excise tax upon cigars, and for other purposes;

H.R. 11322. An act for the relief of Col. Joseph A. Nichols;

H.R. 11380. An act for the relief of Mr. Joe J. Farmer;

H.R. 12043. An act to amend sections 22, 23, and 24, title 13, United States Code, and for other purposes;

H.R. 12383. An act to amend the Federal Employees' Compensation Act to make benefits more realistic in terms of present wage rates, and for other purposes;

H.R. 12458. An act to increase the amount authorized to be appropriated for the work of the President's Committee on Employment for the Physically Handicapped;

H.R. 12536. An act relating to the treatment of charges for local advertising for purposes of determining the manufacturers sale price:

H.R. 12574. An act to amend the Longshoremen's and Harbor Workers' Compensation Act, so as to provide that an injured employee shall have the right to select his own physician, and for other purposes;

H.R. 12580. An act to extend and improve coverage under the Federal old-age, survivors, and disability insurance system and to remove hardships and inequities, improve the financing of the trust funds, and provide disability benefits to additional individuals under such system; to provide grants to States for medical care for aged individuals of low income; to amend the public assistance and maternal and child welfare provisions of the Social Security Act; to improve the employment compensation provisions of such act; and for other purposes;

HR. 12659. An act to suspend for a temporary period the import duty on heptanoic acid, and for other purposes;

H.R. 12699. An act to cancel a deed of trust to the United States from the predecessor in name of Gallaudet College and any evidence of indebtedness related to the same transaction, to quiet the college's title to property belonging to it, and for other purposes;

H.R. 12759. An act to amend title V of the Agricultural Act of 1949, as amended, and

for other purposes;
H.R. 18021. An act to provide for assistance in the development of Latin America and in the reconstruction of Chile, and for other purposes;

H.R. 13053. An act to increase the salaries of officers and members of the Metropolitan Police force and the Fire Department of the District of Columbia, the U.S. Park Police the White House Police, and for other purposes:

H.R. 13066. An act to amend section 4(a) of the Securities Exchange Act of 1934, as amended:

H.R. 13161. An act making supplemental appropriations for the fiscal year ending June 30, 1961, and for other purposes:

H.J. Res. 311. Joint resolution authorizing the erection of a statue of Taras Shev-

chenko on public grounds in the District of Columbia:

H.J. Res. 402. Joint resolution granting the consent and approval of Congress for the States of Virginia and Maryland and the District of Columbia to enter into a compact related to the regulation of mass transit in the Washington, D.C., metropolitan area, and for other purposes;

H.J. Res. 704. Joint resolution to remove copyright restrictions upon the musical composition "Pledge of Allegiance to the Flag,"

and for other purposes;

H.J. Res. 723. Joint resolution extending an invitation to the Federation Aeronautique Internationale to hold the 1962 world sport parachuting championships at Orange, Mass.; and

H.J. Res. 784. Joint resolution amending the act of July 14, 1960, to extend the time Within which the U.S. Constitution 175th Anniversary Commission shall report to Congress, and including certain amendments relating to housing.

#### BILLS AND JOINT RESOLUTIONS APPROVED AFTER SINE DIE AD-JOURNMENT

The President, subsequent to the sine die adjournment of the Congress, notified the Clerk of the House that on the following dates he had approved and signed bills and joint resolutions of the Senate of the following titles:

On August 31, 1960:3

H.R. 5789. An act to incorporate the Agricultural Hall of Fame; and

H.R. 11666. An act making appropriations for the Departments of State and Justice, the judiciary, and related agencies for the fiscal Year ending June 30, 1961, and for other purposes.

On September 2, 1960:

H.R. 900. An act to validate certain overpayments inadvertently made by the United States to several of the States and to relieve certifying and disbursing officers from liability therefrom;

H.R. 2339. An act to revise, codify, and enact into law, title 39 of the United States Code, entitled "The Postal Service";

H.R. 5747. An act to amend section 152, title 18, United States Code, with respect to the concealment of assets in contemplation of bankruptcy;

H.R. 7263. An act for the relief of Edward Ketchum;

H.R. 7792. An act for the relief of Martin A. Mastandrea;

H.R. 8989. An act for the relief of Ralph W. Anderson;

H.R. 9417. An act for the relief of Harry Kalojan;

H.R. 10431. An act for the relief of Isami Nozuka (also known as Isami Notsuka);

H.R. 10455. An act to amend the Mineral Leasing Act of February 25, 1920;

H.R. 10598. An act to clarify certain provisions of the Criminal Code relating to the importation or shipment of injurious mammals, birds, amphibians, fish, and reptiles (18 U.S.C. 42(a), 42(b)); and relating to the transportation or receipt of wild mammals or birds taken in violation of State, National, or foreign laws (18 U.S.C. 43), and for other

H.R. 11188. An act for the relief of Edward S. Anderson;

H.R. 11327. An act for the relief of Chauncey A. Ahalt;

H.R. 11390. An act making appropriations for the Departments of Labor, and Health, Education, and Welfare, and related agencies, for the fiscal year ending June 30, 1961, and for other purposes;

HR. 11420. An act for the relief of Ferdinand Hofacker;

H.R. 11460. An act for the relief of Edouard E. Perret:

H.R. 11486. An act for the relief of Richard J. Power; HR. 12326. An act making appropriations

for civil functions administered by the Department of the Army, certain agencies of the Department of the Interior, the Atomic Commission, the Tennessee Energy Authority and certain study commissions, for the fiscal year ending June 30, 1961, and for other purposes;

H.R. 12475. An act for the relief of Claude

L. Wimberly;

H.R. 12476. An act for the relief of John H Esterline:

H.R. 12619. An act making appropriations for mutual security and related agencies for the fiscal year ending June 30, 1961, and for other purposes; and

H.J. Res. 658. Joint resolution to authorize and request the President to issue a proclamation in connection with the centennial of the birth of Jane Addams, founder and leader of Chicago's Hull House.

On September 6, 1960:

H.R. 2178. An act to authorize the Secretary of the Army to make certain changes in the road at Whites Branch, Grapevine Reservoir, Tex :

H.R. 4826. An act for the relief of Arthur E. Collins:

H.R. 6084. An act for the relief of J. Butler Hyde:

H.R. 7758. An act to improve the administration of oversea activities of the Government of the United States, and for other purposes;

H.R. 8054. An act for the relief of William

Edgar Weaver;

H.R. 8289. An act to accelerate the commencing date of civil service retirement annuities, and for other purposes;

H.R. 9377. An act to provide for the protection of forest cover for reservoir areas under the jurisdiction of the Secretary of the Army and the Chief of Engineers;

H.R. 9406. An act for the relief of William J. Huntsman;

H.R. 11165. An act for the relief of Robert J. Reeves:

H.R. 12350. An act for the relief of Marion John Nagurski;

HR 12471. An act for the relief of Cant. Lucien B Clark O2051623, MSC, U.S. Army;

H.R. 12530. An act to authorize adjustment, in the public interest, of rentals under leases entered into for the provision of commercial recreational facilities at the John H. Kerr Reservoir, Va.-N.C., and

H.R. 12563. An act to amend the act entitled "An act to provide additional revenue for the District of Columbia, and for other purposes," approved August 17, 1937, as amended.

### HOUSE BILLS AND JOINT RESOLU-TIONS DISAPPROVED AFTER SINE DIE ADJOURNMENT

The message further announced that the President had disapproved of the following bills and joint resolutions of the House of the following titles:

STABILIZE MINING OF LEAD AND ZINC

H.R. 8860. I have withheld approval of H.R. 8860, "to stabilize the mining of lead and zinc by small domestic producers on public. Indian, and other lands, and for other purposes."

H.R. 8860 authorizes lead and zinc subsidies based on the difference between market prices and a price of 17 cents per pound for lead and 141/2 cents per pound for zinc. The subsidies would be paid on the output of mines producing not more

than 2,000 tons annually of each commodity.

The problems of our lead and zinc miners have caused me concern for some time. To help solve these problems, the administration has taken administrative actions and has twice proposed legislation which the Congress did not enact. Thereafter, in October of 1958, I reduced imports by imposing quantitative controls.

Now the Congress has enacted H.R. 8860, but unfortunately it would harm rather than help the lead-zinc industry. It would negate the progress of recent years, increase the problems of lead-zinc producers, subject the market to instability, and burden our taxpayers with unsound subsidies. Apart from the fact that the appropriations authorized by the bill would be completely inadequate to pay the proposed subsidieswith the result that the bill's intended beneficiaries could be misled into production for which they would not receive the promised subsides—the bill has these fatal defects:

First, H.R. 8860 would intensify the industry's problems by generating substantial additional production at the expense of other miners' jobs. Its subsidies would induce the opening for fulltime production of many mines which are not now operating, some of which have operated only intermittently in the past. The substantial additions to supply would depress lead and zinc prices and thus cause cutbacks and lavoffs of mineworkers in the unsubsidized mines.

Second, the subsidized production induced by this bill would complicate, even frustrate, programs now in effect that are gradually bringing the production and demand of these commodities into balance. As a result of existing import controls and continuing international cooperation, the volume of imports is at the lowest levels, and constitutes the smallest percentage of total lead-zinc in supply, in nearly a decade. This has made it possible during 1959 for domestic lead and zinc producers to reduce excess stocks and to increase mine out-While consumption of these two metals has been at disappointing levels, the domestic industry should, with increased demand, again move rapidly forward to normal and stable operation at reasonable prices. The depressed prices that would result from the subsidy program would represent a backward step. A lasting solution can best be achieved through a worldwide balance of production and consumption, and that is the object of past and current international consultations.

Third, approval of H.R. 8860 would generate demands for equal treatment and similar subsidies from other producers of lead and zinc as well as producers of many other minerals. Such a system of subsidies would make a substantial portion of domestic mining totally dependent on Federal appropriations and would thereby lessen incentives for the technological improvement vital to the continued health of American mining.

For these reasons, I am compelled to withhold my approval of H.R. 8860.

DWIGHT D. EISENHOWER. THE WHITE HOUSE, September 2, 1960. TARIFF-MARKING OF IMPORTED ARTICLES AND CONTAINERS

H.R. 5054. I am withholding my approval from H.R. 5054, "to amend the Tariff Act of 1930 with respect to the marking of imported articles and containers."

The bill would provide that new packaging for articles imported in containers required by present law to be marked with the name of the country of origin must be similarly marked by the repackager, whether the importer, distributor, retailer, or other handler of the merchandise. Goods in packages not so marked would be subject to seizure and forfeiture. The requirement could be waived only where found to necessitate such substantial changes in customary trade practices as to cause undue hardship.

H.R. 5054 runs counter to one of our major foreign policy objectives—the re-

duction of unnecessary barriers and hindrances to trade. The burdens the bill would impose are unnecessary because the Federal Trade Commission requires the disclosure of the foreign origin of repackaged imported articles when it is in the public interest to do so.

The United States and other principal trading nations of the world have recognized that burdensome marking requirements can be a hindrance to trade and have agreed to the principle that such hindrances should be reduced to a minimum. H.R. 5054 might well result in successive domestic handlers requiring written assurances of proper marking in order to avoid the severe penalty of seizure and forfeiture. The cost and the complications involved in such cumbersome paperwork would tend to discourage such imports. Moreover, this measure could prove ultimately damaging to our export-expansion efforts, for needlessly restrictive action on our part could readily lead to similarly restrictive action by other countries against American goods.

In addition, the bill would unnecessarily extend the Bureau of Customs into new areas by requiring the Bureau to follow goods after they have entered the stream of domestic commerce and to act against handlers of merchandise who are not importers. The Bureau would be required to determine the nature of customary trade practices and the possibility of undue hardship in a field outside its normal competence. Aside from the unnecessary additional expense, these new responsibilities would be most awkward for the Bureau to administer.

For these reasons I am withholding my approval of H.R. 5054.

DWIGHT D. EISENHOWER. THE WHITE HOUSE, September 5, 1960.

#### REGULATION OF LOBBYING ACT

In compliance with Public Law 601, 79th Congress, title III, Regulation of Lobbying Act, section 308(b), which provides as follows:

(b) All information required to be filed

under the provisions of this section with the Clerk of the House of Representatives and the Secretary of the Senate shall be compiled by said Clerk and Secretary, acting jointly, as soon as practicable after the close of the calendar quarter with respect to which such information is filed and shall be printed in the CONGRESSIONAL RECORD.

The Clerk of the House of Representatives and the Secretary of the Senate jointly submit their report of the compilation required by said law and have included all registrations and quarterly reports received.

#### QUARTERLY REPORTS

The following reports for the first calendar quarter of 1960 were received too late to be included in the published reports for that quarter:

A. Active-Retired Lighthouse Service Employees Association, Post Office Box 2169, South Portland, Maine.

D. (6) \$492. E. (9) \$281.36.

A. Claris Adams, 1701 K Street NW., Washington, D.C.

B. American Life Convention, 230 North Michigan Avenue, Chicago, Ill.

A. AFL-CIO Maritime Committee, 132 Third Street SE., Washington, D.C. D. (6) \$4,812. E. (9) \$5,362.51.

A. William B. Allen, 917 15th Street NW., Washington, D.C.

B. United Rubber, Cork, Linoleum, and Plastic Workers of America, High at Mill Street, Akron, Ohio.

D. (6) \$2,210. E. (9) \$19.25.

A. American Automobile Association, 1712 G Street NW., Washington, D.C.

A. American Civil Liberties Union, 156 Fifth Avenue, New York, N.Y. D. (6) \$2,030.07. E. (9) \$2,030.07.

A. American Cotton Manufacturers Institute, Inc., 1501 Johnston Building, Charlotte, N.C.

#### QUARTERLY REPORTS

The following quarterly reports were submitted for the second calendar quarter 1960:

(Note.—The form used for reports is reproduced below. In the interest of economy in the Record, questions are not repeated, only the essential answers are printed, and are indicated by their respective letter and number.)

FILE TWO COPIES WITH THE SECRETARY OF THE SENATE AND FILE THREE COPIES WITH THE CLERK OF THE HOUSE OF REPRESENTATIVES:

This page (page 1) is designed to supply identifying data; and page 2 (on the back of this page) deals with financial data.

PLACE AN "X" BELOW THE APPROPRIATE LETTER OR FIGURE IN THE BOX AT THE RIGHT OF THE "REPORT" HEADING BELOW;

"PRELIMINARY" REPORT ("Registration"): To "register," place an "X" below the letter "P" and fill out page 1 only.

ARTERLY" REPORT: To indicate which one of the four calendar quarters is covered by this Report, place an "X" below the appropriate figure. Fill out both page 1 and page 2 and as many additional pages as may be required. The first additional page should be numbered as page "3," and the rest of such pages should be "4," "5," "6," etc. Preparation and filing in accordance with instructions will accomplish compliance with all quarterly reporting requirements of the Act.

Year: 19.

#### REPORT

PURSUANT TO FEDERAL REGULATION OF LOBBYING ACT

Note on Item "A".—(a) In General. This "Report" form may be used by either an organization or an individual, as follows:

(i) "Employee".—To file as an "employee", state (in Item "B") the name, address, and nature of business of the "employer". (If the "employee" is a firm [such as a law firm or public relations firm], partners and salaried staff members of such firm may join in filing a Report as an "employee".)

(ii) "Employer".—To file as an "employee", write "None" in answer to Item "B".

(b) Separate Reports. An agent or employee should not attempt to combine his Report with the employer's Report:

(i) Employers subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their agents or employees.

filed by their agents or employees.

i) Employees subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are

filed by their employers.

Organization or Individual Filing:
 State name, address, and nature of business.

2. If this Report is for an Employer, list names or agents or employees who will file Reports for this Quarter.

Note on Item "B".—Reports by Agents or Employees. An employee is to file, each quarter, as many Reports as he has employers, except that: (a) If a particular undertaking is jointly financed by a group of employers, the group is to be considered as one employer, but all members of the group are to be named, and the contribution of each member is to be specified; (b) if the work is done in the interest of one person but payment therefor is made by another, a single Report—naming both persons as "employers"—is to be filed each quarter.

B. EMPLOYER.—State name, address, and nature of business. If there is no employer, write "None."

Note on Item "C".—(a) The expression "in connection with legislative interests," as used in this Report, means "in connection with attempting, directly or indirectly, to influence the passage or defeat of legislation." "The term 'legislation' means bills, resolutions, amendments, nominations, and other matters pending or proposed in either House of Congress, and includes any other matter which may be the subject of action by either House.—[§ 302 (e).

(b) Before undertaking any activities in connection with legislative interests, organizations and individuals subject to the Lobbying Act are required to file a "Preliminary" Report (Registration).

(c) After beginning such activities, they must file a "Quarterly" Report at the end of each calendar quarter in which they have either received or expended anything of value in connection with legislative interests.

C. LEGISLATIVE INTERESTS, AND PUBLICATIONS in connection therewith:

legislative interests have terminated,

place an "X" in the box at the left, so that this Office will no longer expect to receive Reports.

1. State approximately how long legisla- 2. State the general legislative interests of tive interests are to continue. If receipts the person filing and set forth the specific and expenditures in connection with legislative interests by reciting: (a) Short titles of statutes and bills; (b) House and Senate numbers of bills, where known; (c) citations of statutes, where known; (d) whether for or against such statutes and

3. In the case of those publications which the person filing has caused to be issued or distributed in connection with legislative interests, set forth: (a) Description, (b) quantity distributed; (c) date of distribution, (d) name of printer or publisher (if publications were paid for by person filing) or name of donor (if publications were received as a gift).

(Answer items 1, 2, and 3 in the space below. Attach additional pages if more space is needed)

4. If this is a "Preliminary" Report (Registration) rather than a "Quarterly" Report, state below what the nature and amount of anticipated expenses will be; and if for an agent or employee, state also what the daily, monthly, or annual rate of compensation is to be. If this is a "Quarterly" Report, disregard this item "C4" and fill out item "D" and "E" on the back of this page. Do not attempt to combine a "Preliminary" Report (Registration) with a "Quarterly" Report.

AFFIDAVIT

[Omitted in printing]

PAGE 14

or to to o: se

Note on Item "D."—(a) In General. The term "contribution" includes snything of value. When an organization or individual uses printed or duplicated matter in a campaign attempting to influence legislation, money received by such organization or individual—for such printed or duplicated matter—is a "contribution." "The term 'contribution' includes a gift, subscription, loan, advance, or deposit of money, or anything of value, and includes a contract, promise, or agreement, whether or not legally enforceable, to make a contribution"— Section 302 (a) of the Lobbying Act.

Section 302 (a) of the Lobbying Act.

(b) If This Report Is for an Employer.—(i) In General. Item "D" is designed for the reporting of all receipts from which expenditures are made, or will be made, in accordance with legislative interests.

(ii) Receipts of Business Firms and Individuals.—A business firm (or individual) which is subject to the Lobbying Act by reason of expenditures which it makes in attempting to influence legislation—but which has no funds to expend except those which are available in the ordinary course of operating a business not connected in any way with the influencing of legislation—will have no receipts to report, even though it does have expenditures to report.

(iii) Receipts of Multipurpose Organizations.—Some organizations do not receive any funds which are to be expended solely for the purpose of attempting to influence legislation. Such organizations make such expenditures out of a general fund raised by dues, assessments, or other contributions. The percentage of the general fund which is used for such expenditures indicates the percentage of dues, assessments, or other contributions which may be considered to have been paid for that purpose. Therefore, in reporting receipts, such organizations may specify what that percentage is, and report their dues, assessments, and other contributions on that basis. However, each contributor of \$500 or more is to be listed, regardless of whether the contribution was made solely for legislative purposes.

(c) If This Report Is for an Agent or Employee.—(i) In General. In the case of many employees, all receipts will come under Items "D 5" (received for services) and "D 12" (expense money and reimbursements). In the absence of a clear statement to the contrary, it will be presumed that your employer is to relimburs you for all expenditures which you make in connection with legislative Interests.

(ii) Employer as Contributor of \$500 or More.—When your contribution from your employer (in the form of salary, fee, etc.) amounts to \$500 or more, i

D. RECEIPTS (INCLUDING CONTRIBUTIONS AND LOANS):

Fill in every blank. If the answer to any numbered item is "None," write "None" in the space following the number.

Receipts (other than loans)  1. \$ Dues and assessments 2. \$ Gifts of money or anything of value 3. \$ Printed or duplicated matter received as a gift 4. \$ Receipts from sale of printed or duplicated matter 5. \$ Received for services (e. g., salary, fee, etc.) 6. \$ Toral for this Quarter (Add items "1" through "5") 7. \$ Received during previous Quarters of calendar year 8. \$ Toral from Jan. 1 through this Quarter (Add "6" and "7")  Loans Received	Contributors of \$500 or more (from Jan. 1 through this Quarter)  13. Have there been such contributors?  Please answer "yes" or "no":  14. In the case of each contributor whose contributions (including loans) during the "period" from January 1 through the last days of this Quarter total \$500 or more:  Attach hereto plain sheets of paper, approximately the size of this page, tabulate data under the headings "Amount" and "Name and Address of Contributor"; and indicate whether the last day of the period is March 31, June 30, September 30, or December 31. Prepare such tabulation in accordance with the following example:
"The term 'contribution' includes a loan"—Sec. 302 (a).  9. 8.———Total now owed to others on account of loans  10. 8.———Borrowed from others during this Quarter  11. 8.———Repaid to others during this Quarter	Amount Name and Address of Contributor  ("Period" from Jan. 1 through, 19)  \$1,500.00 John Doe, 1621 Blank Bidg., New York, N. Y.  \$1,785.00 The Roe Corporation, 2511 Doe Bidg., Chicago, Ill.
12. \$"Expense money" and Reimbursements received this Quarter	\$3,285.00 TOTAL

Note on Item "E".—(a) In General. "The term 'expenditure' includes a payment, distribution, loan, advance, deposit, or gift of money or anything of value, and includes a contract, promise, or agreement, whether or not legally enforceable, to make an expenditure"—Section 802 (b) of the Lobbying Act.

(b) If This Report Is for an Agent or Employee. In the case of many employees, all expenditures will come under telephone and telegraph (Item "E 6") and travel, food, lodging, and entertainment (Item "E 7").

E. EXPENDITURES (INCLUDING LOANS) in connection with legislative interests:

Fill in every blank. If the answer to any numbered item is "None," write "None" in the spaces following the number.

Expenditures (other than loans)  1. \$Public relations and advertising services  2. \$Wages, salaries, fees, commissions (other than item  "1")	Loans Made to Others  "The term 'expenditure' includes a loan"—Sec. 302 (b).  12. \$		
3. \$Gifts or contributions made during Quarter 4. \$Printed or duplicated matter, including distribution cost 5. \$Office overhead (rent, supplies, utilities, etc.) 6. \$Telephone and telegraph	15. Recipients of Expenditures of \$10 or More  In the case of expenditures made during this Quarter by, or on behalf of the person filing: Attach plain sheets of paper approximately the size of this page and tabulate data as the expenditures under the following heading: "Amount," "Date or Dates," "Name and Address of Recipient," "Purpose." Prepare such tabulation in accordance with the following example		
7. \$Travel, food, lodging, and entertainment 8. \$All other expenditures 9. \$Total for this Quarter (Add "I" through "8")	Amount Date or Dates—Name and Address of Recipient—Purpose \$1,750.00 7-11: Roe Printing Co., \$214 Blank Ave., St. Louis Mo.—Printing and mailing circulars on the		
10. \$Expended during previous Quarters of calendar year	**Marshbanks Bill."  \$2,400.00 7-15, 8-15, 9-15: Britten & Blatten, 3127 Gremlin Bldg Washington, D. C.—Public relation service at \$800.00 per month.		
11. \$Toral from January 1 through this Quarter (Add "9" and "10")	84.150.00 TOTAL

#### REGISTRATIONS

The following registrations were submitted for the second calendar quarter 1960:

(Note.—The form used for registration is reproduced below. In the interest of economy in the Record, questions are not repeated, only the essential answers are printed, and are indicated by their respective letter and number.)

FILE TWO COPIES WITH THE SECRETARY OF THE SENATE AND FILE THEFE COPIES WITH THE CLERK OF THE HOUSE OF REPRESENTATIVES!

This page (page 1) is designed to supply identifying data; and page 2 (on the back of this page) deals with financial data.

PLACE AN "X" DELOW THE APPROPRIATE LETTER OR FIGURE IN THE BOX AT THE RIGHT OF THE "REPORT" HEADING BELOW:

"PRELIMINARY" REPORT ("Registration"): To "register," place an "X" below the letter "P" and fill out page 1 only.

"QUARTERLY" REPORT: To indicate which one of the four calendar quarters is covered by this Report, place an "X" below the appropriate figure. Fill out both page 1 and page 2 and as many additional pages as may be required. The first additional page should be numbered as page "3," and the rest of such pages should be "4," "5," "6," etc. Preparation and filing in accordance with instructions will accomplish compliance with all quarterly reporting requirements of the Act.

Year: 19\_.

#### REPORT

PURSUANT TO FEDERAL REGULATION OF LOBBYING ACT

Note on Item "A".—(a) In General. This "Report" form may be used by either an organization or an individual, as follows:

(i) "Employee".—To file as an "employee", state (in Item "B") the name, address, and nature of business of the "employer". (If the "employee" is a firm [such as a law firm or public relations firm], partners and salaried staff members of such firm may join in filing a Report as an "employee".)

(ii) "Employer".—To file as an "employee", write "None" in answer to Item "B".

(b) Separate Reports. An agent or employee should not attempt to combine his Report with the employer's Report:

(i) Employers subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their agents or employees.

(ii) Employees subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their employers.

- A. ORGANIZATION OR INDIVIDUAL FILING:

1. State name, address, and nature of business.

2. If this Report is for an Employer, list names or agents or employees who will file Reports for this Quarter.

Note on Item "B".—Reports by Agents or Employees. An employee is to file, each quarter, as many Reports as he has employers, except that: (a) If a particular undertaking is jointly financed by a group of employers, the group is to be considered as one employer, but all members of the group are to be named, and the contribution of each member is to be specified; (b) if the work is done in the interest of one person but payment therefor is made by another, a single Report—naming both persons as "employers"—is to be filed each quarter.

B. EMPLOYER. State name, address, and nature of business. If there is no employer, write "None."

Note on Item "C".—(a) The expression "in connection with legislative interests," as used in this Report, means "in connection with attempting, directly or indirectly, to influence the passage or defeat of legislation." "The term legislation" means bills, resolutions, amendments, nominations, and other matters pending or proposed in either House of Congress, and includes any other matter which may be the subject of action by either House"—§ 302 (e).

(b) Before undertaking any activities in connection with legislative interests, organizations and individuals subject to the Lobbying Act are required to file a "Preliminary" Report (Registration).

(c) After beginning such activities, they must file a "Quarterly" Report at the end of each calendar quarter in which they have either received or expended anything of value in connection with legislative interests.

- C. LEGISLATIVE INTERESTS, AND PUBLICATIONS in connection therewith:

and expenditures in connection with legislative interests have terminated,

place an "X" in the box at the left, so that this Office will no longer expect to receive Reports.

1. State approximately how long legisla2. State the general legislative interests of 3. In the case of those publications which the tive interests are to continue. If receipts the person filling and set forth the specific person filling has caused to be issued or distive interests are to continue. If receipts the person filing and set forth the specific legislative interests by reciting: (a) Short titles of statutes and bills; (b) House and Senate numbers of bills, where known; (c) citations of statutes, where known: (d) whether for or against such statutes and

person filing has caused to be issued or dis-tributed in connection with legislative in-terests, set forth: (a) Description, (b) quan-tity distributed; (c) date of distribution, (d) name of printer or publisher (if publications were paid for by person filing) or name of donor (if publications were received as a gift).

(Answer items 1, 2, and 3 in the space below. Attach additional pages if more space is needed)

Let this is a "Preliminary" Report (Registration) rather than a "Quarterly" Report, state below what the nature and amount of anticipated expenses will be; and if for an agent or employee, state also what the daily, monthly, or annual rate of compensation is to be. If this is a "Quarterly" Report, disregard this item "C4" and fill out item "D" and "E" on the back of this page. Do not attempt to combine a "Preliminary" Report (Registration) with a "Quarterly" Report.

# Congressional Record

PROCEEDINGS AND DEBATES OF THE 86th CONGRESS, SECOND SESSION

Vol. 106

WASHINGTON, FRIDAY, SEPTEMBER 16, 1960

No. 151

## Appendix

## NOTICE

The last issue of the daily Congressional Record for the second session of the Eighty-sixth Congress will be published not later than Wednesday, September 21, 1960. It is requested that copy and proofs of speeches withheld for revision, or extensions of remarks as authorized by either House, be submitted to the Government Printing Office or to the Congressional Record Clerk, Statuary Hall, Capitol, before that date.

By order of the Joint Committee on Printing.

CARL HAYDEN, Chairman.

Record of the Committee on Post Office and Civil Service During the 85th Congress

EXTENSION OF REMARKS

## HON. TOM MURRAY

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES Thursday, September 1, 1960

Mr. MURRAY. Mr. Speaker, the record of the Post Office and Civil Service Committee during the 86th Congress is a tribute to the very able, informed, and diligent performance by the committee, and by each member of the committee, of the duties and responsibilities imposed on the committee by the Legislative Reorganization Act of 1946: It is impossible to single out one or more members for outstanding work; each and every member has made a vital contribution to our committee program and may take just pride in the committee's record of accomplishment.

Improved employee benefits, personnel management, and postal operations during the 86th Congress represent major forward steps in the committee's continuing program to establish and maintain a Government civilian personnel system and a level of efficiency in the postal service which compare favorably with best modern practices in private enterprise. The record of employee legislation is particularly significant when

viewed in the light of the very fine benefits so recently approved in the 85th Congress, to which those of the 86th Congress are added.

I welcome this opportunity to express to the committee members my deep personal appreciation for their fine cooperation and conscientious devotion to duty.

The following summary of the committee's legislative and investigative activities is provided with the thought that it might be helpful to the Members during the recess:

## FEDERAL EMPLOYEE BENEFITS Salary increases

Public Law 86-568 (H. Rept. 1636) grants a general 7½-percent salary increase for those categories of Federal employees customarily included in salary legislation, except that the increases are slightly larger (averaging approximately 8.4 percent) for postal field service employees in the first six salary levels and for rural carriers. The coverage of Public Law 86-568 is as follows:

Sec- tion	Coverage	Number of em- ployees
102	Postal field service employees	535, 000
112	Classification Act employees	980,000
113	Foreign Service Act employees	8, 100
114	Employees in the Department of Medicine and Surgery in the Vet- erans' Administration.	19, 300
115	Agricultural stabilization and conservation county committee employees	15,000
116	Judicial branch employees.	5,000
117	Employees of Senate and House of	3,000
111	Representatives	7, 500
	Total	1, 570, 000

Public Law 86-568 also extends to the agricultural stabilization and conservation county committee employees coverage of the civil service retirement, Federal employees' group life insurance, and Federal employees' health benefits programs. The effect is to grant these employees pay raises and fringe benefits on the basis already accorded to their fellow workers who are agricultural county extension agents.

county extension agents.

This legislation further (1) makes certain adjustments in the salaries of top legal positions in the executive and military departments; (2) establishes the position of Administrative Assistant, Secretary of Health, Education, and Welfare; and (3) earmarks 25 existing supergrade positions for the Interstate Commerce Commission.

#### Health insurance

Public Law 86-382 (H. Rept. 957) establishes a Federal employees health benefits program—one of the most valuable employee measures approved in any recent Congress. There is no finer example of able and constructive legislative deliberations than demonstrated by the committee in taking this extremely complex and controversial legislation and working out a bill that has the unanimous support of every committee member, the wholehearted agreement of employees' organizations and of private enterprise that will provide services, and the approval of the administration.

The Covernment will share the cost under this program to protect Federal employees and their dependents against the high, unbudgetable, and financially burdensome costs of medical services. Employees will be able to purchase protection, at very low cost, from the oppressive expenses of normal medical care and often crushing expense of major or catastrophic illness or injury. The program also improves the competitive position of the Government in the recruitment and retention of competent civilian personnel.

Addition of the health program to the existing fringe benefits package for Government employees—which already includes retirement and survivor annuities, group life insurance, annual and sick leave, pay for job-connected injury or death, uniform allowances, and other benefits—places the Government on a substantially equal level with progressive private enterprise in respect to employee fringe benefits.

Basic and extended health protection is made available to 2 million employees and their dependents—some 4.500,000 individuals. There will be free choice among four separate health plans, including a service benefits plan, such as the Biue Cross-Blue Shield organizations offer; an indemnity plan, such as now offered by certain insurance companies; any one of several Federal

employees organization plans; and a comprehensive medical plan on either a grouppractice or individual-practice prepayment
basis. The plans will provide a wide range
of hospital, surgical, medical, and related
benefits. Both the service and the indemnity plan will include at least two levels
of benefits. Thus, each employee will be
able to select the plan best suited to his

The Government's contribution generally is 50 percent of the cost, but not less than \$1.25 nor more than \$1.75 biweekly for an individual employee and not less than \$3 nor more than \$4.25 biweekly for an employee and family, subject to certain special exceptions. Employees need not pass any physical examination and, in the event of separation from Government service, may convert their coverage to a private plan without physical examination. No person may be excluded because of race, sex, health status, or—at time of first opportunity to enroll—age.

This legislation enriches the Federal employees' fringe benefits package by a minimum \$222 million annual health program, with the Government and the employees sharing the cost. It is widely regarded among employees as the equivalent in value of another liberal pay increase, on top of the 10-percent raise granted a year earlier.

#### Retirees health benefits program

Public Law 86-724 (H. Rept. 1930) grants former Federal employees (who retired before the Federal Employees Health Benefits Act of 1959 became effective) a health benefits program comparable to the program established by such act for active employees and new retirees. Approximately 415,000 retired employees and survivors will be eligible for the health benefits program. The Government's contribution to premiums will be not less than \$3 nor more than \$4 monthly for a retiree who enrolls for self alone and will be twice such rate for a retiree who enrolls for self and family. The Government also will make an appropriate contribution to cover costs of administration.

Retirees will have the option of enrolling under a single health plan, for which the Civil Service Commission will enter into a contract with the carrier making the best offer, or of retaining or obtaining a different plan of his choice. Under either option the Government's contribution will be the same.

## Disposition of certain retirement contributions

The first section of Public Law 86-622 (H. Rept. 1916) provides that retirement contributions made by an individual after he has qualified for maximum annuity benefits (80 percent of high average salary) will be applied, first, in payment for any noncontributory service standing to the individual's credit and, second, as voluntary contributions to purchase added annuity benefits under the previously existing voluntary-contribution provisions of section 12 of the Civil Service Retirement Act.

Section 2 rounds out the deferred annuity provisions of the Civil Service Retirement Act applicable to Members of Congress by providing entitlement to deferred annuity benefits for Members separated from the service before reaching age 50 after having completed 20 years of service including 10 years of Member service.

Section 3 provides that any former Government employee who, after retirement, is reemployed for 5 years or more may elect to have his annuity rights redetermined on the basis of his total service (including the reemployed service) upon final separation and payment of the appropriate contributions for the reemployed service.

Section 4 extends to a very limited class of surviving widows of former Members of Congress survivorship benefits identical in principle to those provided by present law for all other surviving widows of former Members.

## Earlier commencing dates for retirement annuities

Public Law 86-713 (H. Rept. 1150) provides that civil service retirement annuitles will commence the first day after separation from the service if immediate benefits are payable or, in the case of deferred benefits payable at a certain age, the first day after the prescribed age is reached. Benefits of surviving widows and children will begin the day after the death of the employee or annuitant on whose service they are based. Previously annuities and survivor benefits commenced the first of the month following separation from the service or death, as the case might be. The new law is par-ticularly helpful for widows and children, since their survivor benefits will become payable immediately after death of the employee or annuitant, whereas under prior law the benefits were not payable for periods of as much as 30 days after death.

## Reemployment of retirees and miscellaneous retirement improvements

Public Law 86-604 (H. Rept. 832) corrects inequities in the Civil Service Retirement Act relating to reemployed annuitants and the crediting of service and makes certain other revisions of such act. Conditions with respect to (1) reemployed service of retired Members of Congress and (2) crediting of civilian service rendered by Members of Congress before their election to the Congress are placed on substantially the same basis already applicable to other retired Government employees.

The annuity computation formulas for Government employees generally—that is, 1½ percent for years of total service not exceeding 5; 1¾ percent for years of total service between 5 and 10; and 2 percent for years of total service in excess of 10—are made applicable to total service of retiring congressional employees and Members of Congress. For any of such total service not covered by the 2½ percent computation formula applicable to Member service and certain congressional employee service, the 1¾ percent formula will apply to years of total service between 5 and 10 and the 2 percent formula will apply to years of total service in excess of 10.

The age for commencement of deferred annuities of Members of Congress separated on or after October 1, 1956, is made applicable to Members separated prior to that date with deferred annuity entitlement.

A legislative technicality inadvertently contained in Public Law 85–465 is removed so that surviving widows of Canal Zone and Alaska Railroad retirees who died during March 1948 may receive surviving annuities intended for them by Public Law 85–465.

## Retirement and leave credit—Internment of employees of Japanese ancestry

Public Law 86-782 (H. Rept. 1920) corrects omissions in Public Law 545, 82d Congress, which granted Federal employees of Japanese ancestry certain seniority and compensation benefits where their grades, time in grades or rates of compensation were adversely affected because of the security policies of the Federal Government during the World War II period of evacuating people of Japanese ancestry to relocation centers. sideration was not given at that time to crediting such periods as periods of service for annual leave accrual and retirement purposes. Such annual leave accrual and retirement service credit benefits generally are associated with the benefits granted by Puble Law 545, 82d Congress, Public Law 86-782 conforms the annual leave and retirement benefits of these employees of Japanese ancestry to the other benefits granted by Public Law 545.

Oversea differentials and allowances

Public Law 86-707 (H. Rept. 902) is another important employee measure, developed by the committee through its Civil Service Subcommittee studies over the past several years. This law will improve and strengthen administration of oversea activities of the Government by establishing a coordinated and reasonably uniform system to compensate American citizens employed abroad by the Government for additional costs, hardships, and inconveniences incident to their working assignments abroad. There will be uniform treatment for all oversea employees, to the extent practicable.

The law embodies the principle that the Government should provide equal treatment for its oversea employees in respect to the additional expenses they incur because of their assignments abroad, over and above expenses of Government employees in the United States, and the hardships, inconveniences, and other differences in environment or conditions of employment which justify additional compensation or allowances.

The law consolidates a wide variety of existing provisions of law granting allowances and differentials for the several categories of , Federal employees in oversea areas. Provision is made for a temporary lodging allowance after arrival at a new overseas post and before final departure from the post; reasonable repairs to make substandard living quarters habitable; the inclusion of water as a utility covered by quarters allow-ances; advance payment of quarters allowances; allowances for maintenance of dependents where a separate establishment is necessary for them away from the post of duty; a post allowance to compensate for living costs higher than in Washington, D.C.; a transfer allowance upon assignment to a foreign post or at a post in the United States between foreign assignments; transportation of children-one round trip to the United States and back-for secondary or college education; a hardship post differential not exceeding 25 percent of basic pay for foreign conditions of environment warranting additional compensation; payment for packing and unpacking, transporting to and from storage, and storing furniture and household and personal effects of employees assigned to foreign posts; payment of un-usual expenses incident to the operation of official residences suitable for chief representatives of the United States, and other senior officials designated by the President, at foreign posts; and transportation of the motor vehicle of an employee to his oversea post subject to a general limitation that only one such vehicle may be shipped during each 4 years of overseas service.

Home leave, such as now provided for the Foreign Service, is authorized for other employees who complete 24 months of continuous service abroad, in addition to the usual annual leave. Authority to accumulate up to 45 days of annual leave, now available to classified civilian employees abroad, is extended to employees of agencies operating under the Foreign Service Act or related law. Existing income tax exemptions for foreign areas allowances—but not post differentials—are continued in effect for the foreign areas allowances contained in the bill

The value of the additional employee benefits provided by this legislation is estimated at \$3 million annually.

#### Oversea teachers

Public Law 86-91 (H. Rept. 357) provides an up-to-date system of personnel administration, for teachers in schools conducted by the Department of Defense for dependents of the Department's personnel in oversea areas, which is comparable to the school systems in most public primary and secondary school jurisdictions in the United States. This legislation was developed through the Civil Service Subcommittee studies in cooperation with the Department of Defense and places in effect an Executive recommendation. It is also a direct implementation of a unanimous committee recommendation contained in House Report 2109, 84th Congress.

This act eliminates serious problems in the compensation and employment conditions of oversea teachers which stem primarily from the fact that they have been employed under civil service laws and rules designed for fulltime classified employees—not for the teaching profession. For example, although the school year lasts only 9 or 10 months, oversea teachers' salaries have been on an annual basis, as in the case of the usual classified employees, so that they were being paid only nine-twelfths or ten-twelfths of annual salary. They have been subject to the Annual and Sick Leave Act, which is entirely unsuitable in view of the school recess periods at Christmas and Easter and in the summer months. They have been receiving no pay or any of the usual oversea differentials and allowances during these recess periods.

Public Law 86-91 removes these teachers from the Classification Act of 1849, the Federal Employees Pay Act of 1945, the Annual and Sick Leave Act of 1951, and other unsuitable laws and regulations. They will have a separate salary and allowance system adapted to the requirements of the school program and consistent with that followed in the school system in the District of Columbia. No oversea teacher's salary will be higher than the salary for a comparable position in the District of Columbia school system.

This new law will contribute greatly to maintaining instructional and scholastic levels in schools for dependents of oversea personnel comparable to the levels which would be available were such personnel on duty in the United States.

#### Rotation of oversea employecs

Public Law 86-585 (H. Rept. 1469), based on an official recommendation of the Department of Defense, will contribute to a strengthened defense effort by improving the administration of oversea defense activities. To accomplish such purpose, this legislation establishes a strong policy of facilitating the interchange of civilian employees of the Defense Establishment between posts of duty in the United States and posts of duty outside the United States. Qualified employees will be encouraged (but not forced) to accept Oversea assignments by being given every reasonable guarantee of return rights, after completing their oversea assignments, to positions in the United States at least equal in pay and tenure to the positions they held prior to accepting the oversea assignments.

## Executive, administrative, and scientific research positions

Public Law 86-370 (H. Rept. 1138) thorizes pay adjustments for Patent Office Examiner in Chief and designated Examiners in Chief from the present \$12,770-\$13,970 level to maximums of \$17,500 and \$15,150, respectively; an increase from 146 to 260 in the number of supergrade positions-\$15,255 to \$18,500-in the Treasury Department; and a net increase of 94 in supergrade positions available to the Civil Service Commission for allocation to other departments and agencies against a considerable backlog of requests—of which 20 are earmarked for the Department of Health, Education, and Welfare, 4 for the Bureau of Prisons, 3 for the Immigration and Naturalization Service, 1 for the Department of Labor, 15 for the Small Business Administration, and 1 for the U.S. Court of Military Appeals, upon justification by

these departments and agencies. Pay of executive positions is adjusted as follows: Commissioner of Social Security from \$17,-500 to \$20,000; and Deputy Commissioner and Chief Counsel of the Internal Revenue Service, Administrative Assistant Attorney General, and Administrative Assistant Secretaries of Agriculture, Labor, and Treasury from \$17,500 to \$19,000. The Administrator, Agricultural Research Service, previously paid \$17,500 under the Federal Executive Pay Act, is transferred to one of the scientific research positions provided by the bill. The Departments of Agriculture, and Health, Education, and Welfare, respectively, are granted 10 and 5 additional scientific research positions in the salary range \$12,500 to \$19,000.

#### Administrative authorities for the National Security Agency

Public Law 86-36 (H. Rept. 231) removes National Security Agency personnel from the Classification Act since the Agency security functions make it impossible to give the Civil Service Commission normal position classification and duty data; reestablishes the 50 existing Agency scientific research positions under the new act; and authorizes the Agency Director to fix salaries of other employees, as justified by levels of responsibilities, in relation to Classification Act salary rates, with not more than 50 supergrade positions in the \$15,255 to \$18,500 range.

#### Additional civilian positions for the Department of Defense

Public Law 86-377 (H. Rept. 597) increases from 303 to 372 the number of supergrade positions—salary range \$15,255 to \$18,500—and from 292 to 450 the number of scientific research positions—salary range \$12,500-\$19,000—in the Defense Establishment to perform necessary duties resulting from the greatly increased complexity and tempo of our defense effort. This legislation also includes a liberalizing amendment to the Federal Employees' Group Life Insurance Act.

#### Crediting service of U.S. commissioners

Public Law 86-306 (H. Rept. 687) credits service, for retirement purposes, of U.S. commissioners who are compensated by fees on the same basis used to credit such service of other Government employees who are compensated by fees.

#### Training of postmasters

Public Law 86-33 (H. Rept. 230) facilitates the training of postmasters by specifically authorizing such training under the Government Employees Training Act, Public Law 85-507.

#### Observance of legal holidays

Public Law 86-362 (H. Rept. 362) corrects inequities in existing laws which deprive certain Federal employees of the right to a workday off when a holiday falls on Saturday or an employee's day off in lieu of Saturday. This law requires that every employee receive a workday off for each one of the 8 legal holidays every year, regardless of the day of the week on which any holiday may fall. Temporary promotions, Bureau of the Census

Public Law 86-769 (H. Rept. 1982) removes certain obsolete provisions of the Census laws and restores a statutory exception from the Classification Act of 1949 relating to temporary promotions of Census employees and enumerator positions. Employees temporarily promoted during peak work periods (such as the decennial census) will have the right to return to their former positions, once their temporary work is completed, without being subject to reduction-in-force procedures.

#### Qualification for appointment to certain Library of Congress positions

Public Law 86-768 (H. Rept. 1926) excepts the Library of Congress from section 505(i) of the Classification Act of 1949, which (sub-

ject to certain exceptions) requires prior Civil Service Commission approval of the qualifications of appointees to positions in grades GS-16, 17, and 18 of the general schedule of such act.

#### POSTAL FRAUD AND OBSCENITY PROCEDURE

The 86th Congress marked still further progress in preventing use of the mails for fraudulent purposes and the transmission of obscenity and pornography. The measures summarized below were developed by the Postal Operations Subcommittee, in cooperation with the Post Office Department.

#### Post Office Department judicial officer

Public Law 86-676 (H. Rept. 1493) strengthens administrative procedures in postal fraud and obscenity cases by providing a judicial officer in the Post Office Department to perform such quasi-judicial duties as the Postmaster General assigns to him. This authority overcomes the effect of a judicial decision (169 Fed. Supp. 746) which enjoined enforcement of a postal fraud order on the ground that the Post Office Department's judicial officer has no authority to receive evidence under the Administrative Procedure Act. Public Law 86-676 vests in the judicial officer authority to receive evidence, along with existing authority to render decisions, consistent with the Postmaster General's delegation of authority. This legislation is a valuable aid to the prompt action always necessary to protect the public in fraud and obscenity cases.

## Temporary detention of mail in fraud and obscenity cases

Public Law 86-673 (H. Rept. 945) represents one of the finest public interest actions completed by a legislative subcommittee in one Congress. This law provides for timely and effective action to terminate the business of purveyors of filth through the U.S. mails. Properly enforced, it will help sound the death knell to mail-order pornography for profit. The Postmaster General is authorized to apply directly to the appropriate U.S. district court, and the court is authorized, upon a showing of probable cause to believe that the postal fraud and obscenity statutes are being violated, to enter a temporary restraining order against the defendant and a preliminary injunction, directing detention of the defendant's incoming mail pending conclusion of the statutory proceedings and any appeal therefrom. This will insure court supervision of the power to detain mail, remove any need for time limit on the period of detention, simplify and expedite proceedings, and helps to terminate dealings in obscene matter by any guilty party.

#### GENERAL POSTAL MATTERS

Use of certified mail by Government agencies
Public Law 86-507 (H. Rept. 1492) will ef-

Public Law 86-507 (H. Rept. 1492) will effect material savings in postage costs for the transmission of official Government mail. number of statutes heretofore have required that certain official Government mailings be registered, with accompanying charges generally representing the costs involved in providing this special postal service. Public Law 86-507 authorizes each department and agency in its discretion to utilize, in lieu of registry, the far less expensive certified mail procedure established several years ago and widely used by the general public. Since certifled mail will serve the purposes of the Government fully as well as registered mail in many instances, the use of certified mail under this new law will result in economies in postal handling costs which will be passed on to the departments and agencies con-

#### Postage rates for books and library books

Public Law 86-644 (H. Rept. 252) revises and clarifies postage rate provisions under which books, library books, and related materials are mailed at special low rates. Either the third- or fourth-class rate or the book rate, whichever is cheaper, will apply to meilings of books and certain other educational matter. The book rates are extended to "sound recordings" in lieu of the existing application to "phonograph recordings," to printed educational charts of a permanent nature, to scientific or mathematical kits, instruments, and devices, and to mallings between cooperative processing centers. Periodicals may be mailed at the book rates in either bound or unbound form. Guides or scripts may be mailed with films and filmstrips at the book rates. Certain meaningless language is removed from the book and the library book postal rate provisions.

Minimum charge on third-class mailings of odd sizes and shapes

Public Law 86-56 (H. Rept. 331) revises the minimum per piece charge for third-class mail of odd size or shape from 6 cents to 3½ cents. This revision eliminates serious hardship imposed by the 6-cent rate on churches, church organizations, nurserymen, and other small businesses and also removes difficult operating problems arising in the postal establishment because of the 6-cent charge.

Statement of number of magazine copies sold

Public Law 86-513 (H. Rept. 573) clarifies the law relating to sworn statements by publishers having second-class mail permits and extends to magazines the requirement—now applied to most newspapers—that the sworn statements show average number of copies of each issue sold or distributed to paid subscribers. The publishers supported this legislation, which will facilitate postal operations.

#### Credit to postal revenues

Public Law 86-169 (H. Rept. 296) authorizes credit to postal revenues of commissions on toll telephones in post offices; amounts received by employees for witness fees, travel expenses, and subsistence when subpenaed to appear officially in private litigation; and collections for loss of first class registered matter not restored to the original owner.

#### MISCELLANEOUS

## Clarification of salary appropriation provisions

Public Law 86-122 (H. Rept. 386) eliminates from Government salary laws an obselve provision which is contradictory to existing budget and appropriation procedures. The provision eliminated purported to authorize salary costs, incurred in part in one fiscal year and in part in the following fiscal year, to be charged to the following year appropriations.

#### BILLS PASSED BY THE HOUSE

#### Forfeiture of Federal retirement benefits

H.R. 4601 (H. Rept. 258), developed in a special committee study after adjournment of the 85th Congress and passed by the House, April 14, 1959, would correct certain harsh inequities caused by Public Law 769, 83d Congress, which prohibits Federal retirement benefits based on service of an individual who has committed any one of a great many types of minor as well as serious offenses. The bill would continue and strengthen the existing prohibition against any Federal annuity or retired pay in the case of an offense involving the national security of the United States but would restore other annuities—including survivor benefits-previously denied because of comparatively minor offenses having no to the national relationship whatever security. In many instances the offenses were so trivial there was no penalty and the individual continued in, or returned to, work and rendered long and faithful service until retirement. In these cases, there is no doubt of the individuals' complete loyalty or any semblance of an offense against the national security.

Veterans' prejerence—Define mothers

H.R. 1907 (H. Rept. 1489) would amend the Veterans' Preference Act of 1944 to redefine the terms "mother" and "mothers" as including a natural mother, a mother through adoption, or a female who stands in loco parentis to a deceased or service-connected permanently or totally disabled exservice man or ex-service woman for at least 1 year before the ex-service man or ex-service woman attained the age of 21 and not less than 1 year before the entry of the exservice man or ex-service woman into active military service. This same policy is now contained in the definition of the term "parent" in title 38 of the United States Code, relating to veterans' benefits.

Exemptions from residence requirements, postal employees

H.R. 5571 (H. Rept. 937) would make career postal employees with 3 years of service eligible for postmasterships at their offices, if otherwise qualified, even though they reside outside the town or the office delivery limits.

Saved salaries for postal employees whose salary levels are reduced

H.R. 12663 (H. Rept. 1984) would protect postal field service employees from loss of salary when their salary levels are reduced for any reason except (1) demotion for personal cause, (2) the employee's request, or (3) reduction in force due to lack of funds or curtaliment of work. Similar salary protection is provided for classified Federal employees by Public Law 85-737.

Saved salaries of employees whose positions are downgraded—Exception

H.R. 12336 (H. Rept. 1979) would provide a necessary exception from Public Law 85-737, which protects salaries of classified employees whose positions are reduced in grade through no fault of their own. The Comptroller General has ruled that such salary saving provision applies even in the cases of employees given temporary promotions with their agreement to return to their regular salary grades when the temporary work is completed. H.R. 12336 would except such temporary promotions from Public Law 85-737.

Transportation of 4-cent letter mail by air

H.R. 12595 (H. Rept. 1929) would prohibit the transportation by air of mail matter upon which the lawful domestic airmail postage is not paid. The prohibition would not apply to first-class 4-cent letter mail transmitted (1) between the 48 contiguous States (including the District of Columbia) and Alaska, Hawaii, the Canal Zone, the Commonwealth of Puerto Rico, or any territory, possession, or protectorate of the United States; (2) within or between any of such places which are outside the 48 contiguous States; and (3) military mail moving between ports of embarkation or debarkation in any of such places and any military post office outside of such places or such other places as the Secretary of De-fense may prescribe. The bill would not alter existing statutory authority for air star routes where surface transportation is inadequate or for emergency mail service necessitated because of flood, fire, or other calamity.

Waiver of collections on certain raised money orders

H.R. 9507 (H. Rept. 1490) would authorize the Postmaster General to waive collection on raised money orders cashed by banks, business concerns, and individuals where (1) the overpayment resulted from alteration not apparent from visual inspection, and (2) payment was made in good faith and for value with no notice of any defect in the money order. The liability of the person altering any such money order would not be affected, nor would the Postmaster Gen-

eral's responsibility to pursue collection action against such person.

Penalty charges on short-paid mail

H.R. 9889 (H. Rept. 1491) would provide desirable flexibility in the regulation by the Postmaster General of mail on which required postage has not been paid. The Postmaster General would be authorized to establish a penalty charge for delivery of such mail whenever he finds it necessary to protect the postal revenue. This provision would replace the existing requirement for the assessment of a penalty charge, on any such mail, which is equal, as nearly as is practicable, to the approximate cost incurred by the postal service for delivery of the mail and collection of postage and other lawful charges thereon.

#### Adjustment of postal claims

H.R. 11531 (H. Rept. 1934) would (1) restore authority of the Postmaster General to handle "remission" cases involving funds sent by the postmasters directly to banks rather than through a designated depositary postmaster and (2) authorize the Postmaster General to relieve accountable postal employees from liability for losses resulting from certain illegal, improper, or incorrect payments. The authority for such relief now is vested in the General Accounting Office except in cases of loss by burglary, fire, or other unavoidable casualties which are considered by the Postmaster General. In each of the 717 cases sent to the General Accounting Office in the calendar year 1959, with re-lief recommended by the Postmaster General, the General Accounting Office granted the relief. The total amount involved was This legislation would not affect the audit authority of the General Accounting Office, and any relief granted by the Postmaster General thereunder would be subject to review by the General Accounting Office. There would be no additional cost to the Government under this legislation, which is officially recommended by the Postmaster General.

#### BILLS REPORTED

Civil service retirement survivor benefits

H.R. 6743 (H. Rept. 1974) would grant certain former Federal employees who were separated before October 1, 1956, after having qualified for deferred annuity benefits, the right to elect reduced annuities and thereby provide survivorship benefits. Former employees similarly separated on or after October 1, 1956, now have such right. Temporary postal salary increase of 1958 to be made permanent

H.R. 9890 (H. Rept. 1601) was reported, as a precautionary measure, to make certain that postal field service employees would not lose the 2½-percent temporary salary increase granted by Public Law 85–426, regardless of action on new salary increase legislation pending when the bill was reported. The purpose of H.R. 9890 later was effected by enactment of Public Law 86–568, which also granted an additional 7½-percent general salary increase for postal, classified, and many other groups of Federal employees.

Minimum pay raise for classified employees upon promotion

H.R. 543 (H. Rept. 1981) would provide a formula for guaranteeing a minimum salary increase for any classified employee who is promoted from one grade to another. The salary increase would be not less than the aggregate amount of two step increases of the grade from which promoted.

#### Mail powerboat service in Alaska

S. 1849 (H. Rept. 1921) would amend existing law which authorizes a subsidy to the low bidding carrier of mail, passengers, and freight operating on a prescribed intra-Alaska route so as to require that any steamboat or other powerboat used in performing

such a contract for mail service shall be operated exclusively on the prescribed route.

#### SPECIAL ACTIVITIES OF THE COMMITTEE

#### Pay study

A special study, directed toward identifying problems with respect to Federal civilian salary policies, and developing solutions thereto, was conducted under the supervision of the committee chairman. The first step in this study was the preparation and publication, in a committee print dated December 8, 1959, of the Classification Act of 1949, as amended, and related provisions of law, with pertinent annotations. This publication provides for the first time, in a single document, a convenient and upto-date means of authoritative reference to statutes governing the compensation of over 1 million Federal civilian employees.

Personnel management in transition to new administration

A committee print of September 12, 1960, entitled "Maintaining the Integrity of the Career Civil Service," sets forth Federal civil laws, orders, regulations, and related information with respect to advance planning for an orderly transition from the present to the new administration in January 1961. It is essential, in fairness to career employees and to provide an efficient work force for a new administration, that personnel adjustments resulting changes in policies, objectives, and programs under the new administration, be effected without impeding important programs and in accordance with sound principles of personnel management. The in-formation contained in the committee print is designed to facilitate accomplishment of these objectives by providing guidelines for executives and reassurance to employees that the merit system will be protected.

#### Placement of separated career employees

In reponse to inquiry made by the chairman on behalf of the committee, asurances were received that all possible efforts would be made to find other suitable Federal positions for career employees who may be separated from the military departments because of current appropriation personnel ceilings. The Secretary of Defense has appointed a coordinator to work with the Civil Service Commission and the Interdepartmental Placement Committee for this purpose. Exchanges of correspondence relating to this program were released September 11, 1960.

#### Codification of Federal personnel laws

A review is being made of the official administration proposal (H.R. 8748) to enact into positive law the provisions of title 5, United States Code, and appropriate related provisions. This legislation was not enacted during the 86th Congress but is expected to be considered early in the 87th Congress by the House Committee on the Judiciary, which has invited comments and recommendations from the Post Office and Civil Service Committee.

## SPECIAL SUBCOMMITTEE STUDIES AND INVESTIGATIONS

The Committee on Post Office and Civil Service, pursuant to authority contained in House Resolution 78, 86th Congress, established a new special Subcommittee on Census and Government Statistics, and reconstituted three other special subcommittees which were activated in earlier Congresses, to carry out the committee's responsibilities under this resolution. A summary of the special subcommitee activities follows:

#### Postal Operations Subcommittee

This subcommittee devoted primary attention to the serious and growing problem of obscenity and pornography moving through the U.S. mails and other avenues of commerce. The subcommittee conducted an intensive program of study and investigation

directed toward corrective measures and held a number of hearings and conferences throughout the country to obtain information and recommendations from recognized authorities at all governmental levels and in private life.

The subcommittee made excellent progress toward its chief objectives—that is, stronger laws and vigorous enforcement thereof and the inducement of full public awarness of the problem—which are essential to combat the growing menace of filthy writings, pictures, and the like in America.

Two major legislative measures developed through the subcommittee studies and enacted into law as Public Laws 86-673 and 86-676 will have a valuable deterrent effect on the filth merchants. The provisions of these laws are explained in the above summary of postal legislation approved by the committee.

Thousands of mothers, fathers, teachers, ministers, priests, and laymen have petitioned for intervention by the subcommittee and the Congress to stop unbridled dealing in obscenity and pornography. The subcommittee has established a strong program of cooperation with organized governmental, community, civic, fraternal, and religious groups all over the country toward this end. The subcommittee reports and recommendations have gained wide and enthusiastic support and are credited with triggering a very effective campaign to protect the public from this vicious commerce.

#### Civil Service Subcommittee

The 86th Congress marked the virtual completion of the program of this subcommittee, undertaken in the 84th Congress, to strengthen civilian personnel policies in the oversea activities of the Government. House Report 2109, 64th Congress, contains a broad range of major recommendations with respect to such oversea activities, based on the subcommittee investigations during that Congress. These recommendations deal with four primary areas wherein corrective measures were found desirable as a result of a number of hearings and conferences held by the subcommittee in eight foreign nations in which the majority of Americans employed abroad are assigned to duty.

The first such primary area of recommendation—that the competitive civil service be extended to American citizens employed abroad—was placed in effect by executive action in the 84th Congress in accordance with the subcommittee recommendation.

The second, for the establishment of an effective and suitable compensation and employment system for teachers and other personnel in schools conducted by the Department of Defense for dependents of the Department's oversea personnel, was placed in effect by Public Law 86-91, discussed earlier. This act provides an up-to-date school system for these oversea teachers and other school personnel, along the lines of the District of Columbia primary and secondary school system, and is expected to greatly facilitate and improve oversea school activities while at the same time reducing personnel turnover and recruitment problems to a minimum.

The third—for clarification and coordination of the then widely varied policies with respect to allowances and differentials for the several categories of oversea civilian employees of the Government—is effected by Public Law 86-707, as noted earlier. This bill will improve the operation of critical defense and other oversea activities of the Government through the establishment of a coordinated and reasonably uniform system of compensating American citizens for extra expenses and for hardships and inconveniences incident to their oversea assignments.

The fourth primary area of recommendation, for the establishment of a badly needed medical and health program for American citizens employed by the Government abroad, is embodied in H.R. 5178 and several companion bills on which final hearings were completed during the 1st session of the 86th Congress. Since this bill, like the other committee recommendations, is approved by the administration, early action is expected in the 87th Congress to place the proposed medical and health program for oversea employees in effect so that these employees will have appropriate health services and facilities on a reasonably uniform basis.

The subcommittee report and recommendations were highly commended in a letter from the White House, in these words:

"I would like to say first that this was an excellent report, carefully prepared and reflecting a comprehensive review of the facts, both in the oversea hearings and in the staff research. I believe that the liaison between your office and both my White House office and the Civil Service Commission has been a fine example of cooperative effort between legislative and executive branches of Government in developing sound legislation in this field of personnel administration."

#### Census and Government Statistics Subcommittee

The Subcommittee on Census and Government Statistics, newly established early in the 86th Congress, has undertaken a broad continuing study of all Government activities pertaining to the collection of information from the public, the processing and use of such information, and the impact on the public. A brief description of specific projects follows:

#### Census

The subcommittee held hearings on April 8, 1959, and March 18, 1960, on plans for the 1960 census, covering both the statistical content of the census and personnel aspects. A report on the role of the census in the reapportionment of the House of Representatives is contained in House Report No. 2223, 86th Congress. Materials have been assembled and plans made for hearings on the question of holding future censuses of population and housing more frequently than decennially. Preparation for the hearings includes the collection of opinions and recommendations from the Governors of all States, the mayors of a representative list of cities, and various municipal leagues and other groups.

#### Electronic Data Processing

Hearings were held on June 5, 1959, and March 2 and 4, 1960, on the use of electronic data-processing equipment in the Government. The latter hearings concentrated on problems of employee job security occasioned by the introduction of automation in office procedures. A report on this study is contained in a committee print dated August 31, 1960, now on sale for 35 cents by the Superintendent of Documents at the Government Printing Office.

Reporting Requirements of the Government

A detailed report on "Business Reporting Requirements of the Federal Government" was issued as a committee print on December 6, 1959. The report includes recommendations for controlling and reducing reporting burdens on the public, some of which have already resulted in specific corrective actions by executive agencies. As part of this continuing study, the subcommittee investigations of particular problem areas have led to reductions or elimination of reporting burdens which would have cost the Government and the public millions of dollars. Special attention has been devoted to the reporting burden on small business.

#### Government Data Compilation Work

The subcommittee surveyed all executive departments and major independent agencies to ascertain personnel and payroll figures for data collection and compilation.

The results are summarized in House Report No. 1357, 86th Congress, entitled "Data Compilation Activities of the Federal Government: Personnel and Contract Costs." ernment costs for collecting and compiling data from the public are estimated as \$79 million a year. The report shows the relative activities of the various departments and bureaus and serves as a benchmark for measuring future increases and decreases. As part of the study, information was obtained on each contract for statistical services let during the past 5 years by a Government agency to any outside organization. Details of many of these contracts, made public for the first time, have led to questions concerning the public need for the information and the desirability of Federal sponsorship.

#### Transportation Statistics

The subcommittee selected transportation statistics—one of the most poorly organized of the Federal statistical fields—for its first major study in a specific subject field. The study to date has included an intensive examination of the Interstate Commerce Commission, which has led to a number of improvements in the Commission's statistical work, and exploratory surveys of the Civil Aeronautics Board and other agencies. Plans have been drawn up for a series of hearings to be conducted early in the 87th Congress.

#### Manpower Utilization Subcommittee

The Subcommittee on Manpower Utilization made valuable further progress, during the 86th Congress, in the studies of manpower and related problems which it has conducted during earlier Congresses. The objective of these studies is to achieve maximum efficiency in the utilization of Federal civilian personnel and thereby strengthen the defense effort and other essential services, reduce costs to the taxpayers, and advance the Federal career civil service.

The subcommittee has continued to work in close cooperation with responsible executive and administrative officials in the conduct of this study program. Quarterly manpower utilization progress reports are received by the subcommittee from 24 departments and agencies, setting forth employment changes, reasons for the changes, plans and programs for better manpower utilization, and related civilian personnel matters. During the 86th Congress the subcommittee held 16 days of public hearings, in which representatives of 24 departments and agencies participated.

A summary of major specific projects of the subcommittee follows:

#### Manpower Utilization in the Missile Program

The subcommittee was one of the first legislative groups to initiate inquiries with respect to the use of scientists and engineers in the design, testing, and production of missiles. The Department of Defense has adopted, or is in the process of implementing, many subcommittee recommendations in this highly important management field. For example, the rotation time of engineers and scientists in the military services who are assigned to missile programs has been extended, duplication of effort in the naval missile program has been reduced, and the Department's policy on bonus payments to contractor personnel is being strengthened in several areas. The subcommittee's "Preliminary Report on the Aspects of the Missile Program in the Departments of the Navy and the Air Force" (committee print, April 1959) contains subcommittee findings up to that time. A second report is planned for the fall of 1960, with further findings based on a study made by the General Accounting Office at the request of the subcommittee.

Contracting Out Work Normally Performed by the Government

A number of public hearings and field investigations were conducted during the 86th Congress, supplementing and extending the scope of the manpower study program. The subcommittee report based on these hearings and investigations, printed as House Report No. 688, 86th Congress, points up a growing habit of responsible Government officials to contract out functions which have been successfully performed in the past by career Government employees within the Government itself. The subcommittee unanimously agrees that continuance of such a departure from the fundamental policy of holding Government officials responsible for the performance of their assigned duties well may lead to waste and extravagance and have a serious adverse effect on the morale of Federal career employees.

#### Conference With Departmental Management Officials

The subcommittee during February 1960 conferred with top management officials of the departments and major agencies of the Government as part of the cooperative program to develop and activate still better and more effective utilization of Federal civilian personnel. Valuable contributions were made in the form of suggestions, plans, and projects by representatives of several of the departments and agencies.

#### Functional Studies

The Secretary of Defense early in 1960 officially reported that a functional study of the financial management programs in the military departments, based on subcommittee recommendations, will result in payroll savings in excess of \$25 million a year. Management officials in other departments and major agencies currently are engaged in functional analyses of one or more of their work areas, pursuant to agreement reached in the February conference, and expect to complete the analyses by the end of 1960. Preliminary reports of progress are most encouraging. Three of the departments report that savings aggregating over \$14 million a year will be achieved as a result of their functional analyses.

#### Manpower Questionnaire

Working with representatives of the executive branch and the General Accounting Office, the subcommittee developed a new procedure, in the form of a manpower questionnaire, for determining employment trends and for evaluating manpower programs and policies at local field activities of Federal departments and agencies. The General Accounting Office has been asked to use the questionnaire in the course of its regular audit of activities. To date the questionnaire has been used in some 15 field activities (both military and civilian) to point up basic manpower information that previously has often been lost through editorial processes in the chain of command.

#### Hiring of Retired Military Personnel

The subcommittee has initiated a study of the hiring by departments and agencies of recently retired military personnel. Numerous instances of this practice have been brought to the attention of the subcommittee. Currently the study is aimed at determining both the magnitude of the practice and the administrative techniques used.

#### Costs of Recruiting Engineers and Scientists by Defense Contractors

The subcommittee during the 85th Congress became concerned at the heavy turnover of scientific and engineering talent in our defense effort and instituted a study of recruitment practices and the moneys spent by defense contractors to obtain these talents. As a result of the study, Department of Defense officials have indicated that tighter control is being exercised over this item of contractor cost. The subcommittee has made a followup study this year to determine the present situation and later in the fall will issue a report covering defense contractor personnel which will show reduced turnover but also will reveal several problem areas for the contractors in the recruitment and utilization of highly skilled personnel.

#### Wage Board Pay Procedures

The procedures used in the executive branch to set wage-board employee pay rates were studied by the subcommittee in 1960. Due to a low turnover of Government employees in most of the wage board jobs, review of the current procedures reveals areas requiring further study and possibly action by the subcommittee. There are indications that recommended payroll changes, affecting many thousands of Federal career workers, well may result from this study.

#### Federal-Aid Highway Program

SPEECH

OF

#### HON. FRED SCHWENGEL

OF IOWA

IN THE HOUSE OF REPRESENTATIVES
Wednesday, August 31, 1960

Mr. SCHWENGEL. Mr. Speaker, the Special Subcommittee of the Federal-Aid Highway Program, of which I am a member, has been in existence for almost 1 year now. During this time, the staff of a dozen or so counsel and investigators, under the direction of the Chairman, the gentleman from Minnesota, has been combing the country for scandals in the multi-billion-dollar Interstate Highway System. While getting the crooks is important and I am in favor of it, this is not the only thing this committee ought to be doing. Then, too, it should be noted that what our subcommittee has done to date would convince even a man from Mars that it has not borne out the charges yet, made in some of the press and some of the Democratic colleagues' press releases, that our exposes would make Teapot Dome seem like a child's game of marbles and would dwarf in comparison the sordid Dave Beck-Jimmy Hoffa episodes uncovered by the McClellan Labor Rackets Committee of the Senate.

Thus, far, we have held two hearings: one of them involving vertical bridge clearance and another dealing with fraud in Oklahoma, which case admittedly was not completely investigated. Also, it should be noted that, just when it appeared that the subcommittee could get its teeth into a real meaty scandal involving alleged millions of dollars of right-of-way irregularities in the State of Massachusetts, the Chairman has unilaterally decided that there will be no more hearings until after the November election in order to keep any "political considerations" out of the probe.

Now this decision represented a complete reversal of the Chair's earlier position, for we Republican members of the subcommittee had been informed that there would be further hearings after the conventions of the two political parties but before the November elections.

What occurred between early May and June 20 that would account for this press release indicating a complete change from earlier positive assurance to the committee? I suggest a clue can be found in the Boston Traveler, dated May 13, 1960, which first broke the news that the Bureau of Public Roads had "uncovered evidence of hundreds of thousands of dollars in our appraisals in Massachusetts' Federal-aid highway program." Carried under the headline "U.S. Probes Appraisals For Massachusetts Roads," this story was front-page stuff in the Boston Traveler. I include at this point in the RECORD, the article referred to above:

[From the Boston Traveler of May 13, 1960] U.S. PROBES APPRAISALS FOR MASSACHUSETTS ROADS

#### (By Tom W. Gerber)

WASHINGTON .- The U.S. Bureau of Public Roads has uncovered evidence of hundreds of thousands of dollars in overappraisals in Massachusetts' Federal-aid highway program.

And the Bureau has launched a twopronged investigation of the Massachusetts Department of Public Works' land value estimates for rights-of-way for Federal-aid highways.

BUREAU CUT OFF PAYMENTS FOR LAND TAKINGS HERE

Atop this, the Traveler learned today the Bureau in January cut off payments to the State for right-of-way land takings based on DPW appraisals.

This action was taken pending exhaustive audit of each suspected overappraised land

parcel in highway rights-of-way.

A top source said the Bureau has made no payments to the State for acquiring rightsof-way since Federal funds were shut off 4 months ago.

And it was learned Massachusetts is the only State in the Nation currently under this restriction

Under normal practice, the Bureau makes progress payments for acquiring needed highway rights-of-way without audit.

This helps speed construction of the Nation's \$37 billion, 41,000-mile highway pro-Audits normally are conducted later.

Engineer-appraiser-accountant teams from the Bureau's project examination division have been investigating the Massachusetts DPW's right-of-way land appraisals for several months.

More than 100 suspected swollen appraisals are under scrutiny.

And only last week, the Bureau hired the Washington, D.C., valuation engineering firm of Beasley & Beasley, to doublecheck the Bureau's findings.

This professional appraising firm often has worked under Government contract. It has been hired in the past by the Navy and the Army Corps of Engineers in addition to the Bureau of Public Roads.

Three years ago, some of the evidence uncovered by this concern led to Federal indictments in the Indiana highway scandals.

The Traveler learned three land parcels in eastern Massachusetts, valued by Statehired appraisers at about \$100,000 each, only were worth between \$30,000 and \$40,000 in the opinion of Government appraisers.

The Department of Justice here has been informed of these preliminary findings, the Traveler learned. It was reported "watching" the investigation.

#### OVERAPPRAISALS IN TWO CATEGORIES

Bureau agents discovered what they considered to be overappraisals both in the costly Interstate Highway System and in the so-called primary, secondary and urban program in Massachusetts.

The Federal Government pays 90 percent of the costs under the interstate program and splits the costs 50-50 with the State for primary, secondary and urban projects.

The Traveler learned the Bureau's systematic analysis of the State's right-of-way land appraisals done on a sample basis.

Bureau agents, including former FBI men, are examining more than 10 percent of roughly 1,000 right-of-way land appraisals accomplished by the State last year.

However, one source said the sampling included the three in the \$100,000 bracket. He said the State's questionable appraisals generally appear to be between 25 to 50 percent too high according to Federal standards.

Two separate sources told the Traveler many of the State's appraisals were reasonable, unsupported and erroneous." Both sources used the same words.

The investigation was touched off late last ear when the State failed to provide satisfactory documentation for land appraisals required for highway rights-of-way.

A Traveler source said it soon was "obvious" much of the data in the State ap-

praisals was erroneous.

However, this source refused to rule out the possibility the bloated appraisals represented merely errors of judgment.

But he pointed to the fact some estimated

land values in the DPW appraisals failed to coincide with appraisals of similar nearby

PROFESSIONAL PROBERS COSTLY TO GOVERNMENT

He also pointed to the fact the Bureau had hired the firm of professional appraisers "at considerable cost to the Government.

He said this wouldn't be done unless "substantial sums" were involved.

It was reported the investigation had not yet reached the point where appraisers, property owners and DPW employees were being questioned, with a view toward more drastic action by the Government.

The Massachusetts DPW usually hires private appraisers to make land value estimates. They are paid from \$500 to \$1,000, depending

on the scope of the appraisal job. If the land is believed to be worth more than \$25,000, two appraisers are hired. the most part, these appraisers are local real estate operators.

PROBE REPORTED PLANNED IN TWO STAGES

The investigation was reported to be

planned in two stages.

Now under way is the first stage to determine the basis for the suspected high appraisals.

The second stage would be to make certain that none of the appraisals was set before right-of-way land was examined.

While the Bureau has shut off payments to the State for acquiring right-of-way land, construction progress payments still are being made.

It was reported this part of the highway program in Massachusetts was not under unusual examination.

In previous years, all Federal payments under the cooperative highway construction program were cut off in Indiana and Arizona when scandals racked their State highway departments.

#### DI NATALE AWARE OF FEDERAL PROBE

State Public Works Commissioner Anthony N. Di Natale issued a statement Sunday sug-

gesting he was aware of the Bureau doublebarrelled inquiry.

He announced he would "cull out and fire incompetents" hired by the DPW as property negotiators and appraisers on highway projects.

This subcommittee, authorized by the House to investigate irregularities in the Interstate System has proved to be a most reluctant dragon when Massachusetts is concerned. This alarming situation has been known by the subcommittee since January of 1960, when the Bureau of Public Roads first learned of it, cut off all payment on all Massachusetts Federal-aid projects, and began a vigorous investigation on its own initiative. And as noted above, it has been noted in the Boston press since May 13, 1960. Yet, even though the staff independently determined that there was substance to these allegations of a conspiracy to defraud the Government, this subcommittee had made no move to have the staff, assisted by the Bureau of Public Roads, prepare this case for hearing.

This inaction should be contrasted with the alacrity with which this subcommittee pounced upon some newspaper clippings exposing alleged irregularities in Tulsa, Okla., and which resulted in a series of hearings during the first week of May of this year. So eagerly was the Oklahoma matter pushed, that the grand jury evidence was presented in open hearings shortly after several contractors were indicted and even before they could be given a fair trial in a court of law. It is also interesting to note that the present Governor of Oklahoma, whose presence as a witness was demanded by me to explain why he had rewarded unfaithful State highway officials with increased pay and job security, was not called as a witness.

May came and went and still there was little interest in Massachusetts. So did June and July. But, in the words of a familiar song, "The days grow short as we reach September." On August 16, 1960, the Bureau of Public Roads, in a letter from Mr. Ellis L. Armstrong, Commissioner, referred the results of their investigations to the subcommittee and to the Department of Justice for "its review and any action it may deem to be appropriate." This letter has been released to the press and reported in the Boston Traveler on August 17, 1960. I therefore include it in the RECORD at this point in my remarks: [From the Boston Traveler, August 17, 1960] LETTER TO HOUSE UNIT DETAILS ROAD PROBE

(Traveler Washington Bureau)

Washington,-Following is the text of a letter transmitting reports on the Massachusetts Federal-aid highway program from the Bureau of Public Roads to the House Subcommittee on the Federal-Aid Highway Program:

Hon. JOHN A. BLATNIK.

Chairman, Special Subcommittee on the Fed-eral-Aid Highway Program, House of Representatives, Washington, D.C.

DEAR MR. BLATNIK: Reference is made to the review by this Bureau of certain appraisal practices in the State of Massachusetts which has been continuing since the beginning of this year and with certain aspects of which members of your staff are familiar. As a result of information that fee appraisers retained by the State of Massachusetts, in connection with Federal aid projects, were submitting inadequate or misleading information in appraisal reports to justify appraisals far in excess of true market value, the Project Examination Division of this Bureau in cooperation with your field offices undertook a special review in January of this year. In addition, at that time the Bureau required that no payments be made to Massachusetts reimbursing it for the cost of the acquisition of right-ofway on Federal-aid projects, except after final audit of such property involved.

#### BUREAU CONTINUES SPECIAL REVIEW

After several months of review, the Bureau retained the firm of Beasley & Beasley of Washington, D.C., to make new appraisals of certain selected projects in Massachusetts, including a primary Federal-aid project in Wakefield and an interstate project in Attleboro. At the same time the Bureau continued its own special review. The firm of Beasley & Beasley has now submitted its first reports containing its appraisals in Wakefield and the southerly part of the interstate project at Attleboro. Copies of these reports are forwarded herewith. An analytical and comparative review of

these Beasley appraisals and those of independent fee appraisers retained by the State is now under way. This analysis to date reveals that certain fee appraisers retained by the State, by using misleading information and ignoring available data, placed values on selected properties far in excess of values that could be supported by available true market data. For example, sales of improved properties were reported as unimproved and were used to support prices in land far in excess of the true land value. At the same time, the appraisers ignored pertinent sales of unimproved property in the immediate vicinity of the subject properties which, if used, would have justified the assignment of much lower values.

#### CASES INVOLVE LARGE SUMS

For the most part these selected cases involved extensive properties and large sums of money. The Bureau has made no pay-ments in reimbursement to Massachusetts

on any of these properties.

A preliminary detailed analysis of these selected cases is now in our files and available to your committee. This analysis, together with other independent information which has come to the attention of this Bureau, support a conclusion that certain fee appraisers employed by the State have been subjected to pressures which comprised their independence. Such analysis and such other information have been and are being submitted to the Department of Justice for its review and any action it may deem to be appropriate.

If there is any further information on this subject which you desire, please do not hesitate to call us.

Sincerely yours,
(Signed) Ellis L. Armstrong, Commissioner of Public Roads.

On August 17, 1960, the Boston Traveler carried an article written by its correspondent Tom W. Gerber, under such headlines as "Land Appraisals Boosted 300 P.C.," "Excesses Run Into Millions of Dollars," and "High State Official Is Under Suspicion," I ask that this article dated August 17, 1960, also be printed at this point in the RECORD, as well as similar articles appearing in the Boston Herald, dated August 18, 1960, entitled "U.S. Pledges Complete Probe of Massachusetts Highway Land Cost"; in the Boston Traveler on August 18.

1960, entitled, "Massachusetts Highway Scandals Worst Yet"; in the Boston Her-ald dated August 19, 1960, entitled, "FBI to Probe State Scandal in Land Taking"; and in the Boston Traveler, dated August 19, 1960, entitled "GOP Demands Action in Massachusetts Roads Probe.' [From the Boston Traveler, August 17, 1960]

MASSACHUSETTS HIGHWAY SCANDAL

#### (By Tom W. Gerber)

WASHINGTON.-Excessive land appraisals in the Massachusetts Federal-aid highway program run into the millions of dollars, the Traveler learned today.

A high State official is under suspicion in the racket, believed the largest yet in the Nation's \$50 billion highway construction

program.

These facts came to light as the U.S. Bureau of Public Roads filed a preliminary report to Congress on a 3-month investigation of highway land takings in Massachu-

The results of this inquiry and other data already have been turned over to the U.S. Justice Department for "any action \* \* \* it may deem appropriate."

The preliminary investigation report was prepared by Beasley & Beasley, an inde-pendent Washington valuation engineering firm retained by the Bureau of Public Roads to look into the Massachusetts situation.

Its inquiry is continuing.

Three years ago, evidence uncovered by this firm in another BPR investigation led to Federal indictments in the Indiana highway

scandals.

The current report does not name the Massachusetts official under suspicion in the land appraisal racket.

However, the Traveler learned the official and certain accomplices subjected highway right-of-way land appraisers employed by the State to "pressures which compromised their independence."

These appraisers were hired by the State, mostly last year, to set values on land the State would take for construction of Federal-

aid highways.

In some cases, their appraisals were up to 300 percent higher than detailed valuations determined by Beasley & Beasley. These cases involved extensive land tracts.

#### THREATS GO WITH BLOATED APPRAISALS

The Traveler learned the bloated appraisals were submitted in some cases under threat of losing the State's business if the fee appraisers failed to comply.

However, the Federal Government will not have to pay for these excessive land-taking

The BPR in January cut off payments to Massachusetts for highway right-of-way takings based on State department of public works appraisals.

The Federal Government usually reimburses the State for 90 percent of the costs of land-taking and construction of the vast Interstate Highway System within the State.

It also pays the State half the cost of landtaking and construction under the so-called primary, secondary, and urban highway construction program.

Most of these facts were contained in a Beasley & Beasley report forwarded by the BPR to the House Special Subcommittee on the Federal-Aid Highway Program.

Two thick volumes of investigation results and an accompanying letter were sent to the subcommittee that has been investigating reported abuses in the interstate highway program nationwide.

The report dealt with alleged land appraisal excesses in Wakefield and part of an Interstate Highway 95 project in Attleboro and North Attleboro.

Two additional volumes were expected to

be sent to the subcommittee within a few days with additional details on the Attleboro-North Attleboro project.

The valuation engineering firm, which previously has worked under contracts with the Army, the Navy, and the BPR, is expected to complete a study of the Gardner area next month.

In addition to this study, the Bureau's project examination division has been investigating suspected land valuation excesses in Massachusetts since January, when Federal payments were halted.

The Bureau's agents still are operating

within the State.

The letter transmitting the reports to Rep. John A. Blatnik (D-Minn.), subcommittee chairman, told how some excess appraisals were devised.

The letter said "certain fee appraisers retained by the State" used misleading inforand ignored available data that would have supported lower valuations.

Thus, the letter said, sales of improved properties were reported as unimproved and were used to support prices for unimproved nearby land far in excess of true value.

The letter continued:

'At the same time the appraisers ignored pertinent sales of unimproved property in the immediate vicinity of the subject properties which, if used, would have justified the assignment of much lower values."

Thus, if there was a \$30,000 house on a lot worth \$10,000, the land alone would be appraised for \$40,000 to justify an excessive valuation for a property to be taken in the

The Traveler learned the puffed valuations were on only a small percentage of the properties involved in land-takings in the Wakefield and Attleboro-North Attleboro areas.

The investigation showed land appraisals were reasonably accurate on smaller

Yet, the Traveler's sources said the excessive valuations would run into "millions of dollars"—considerably more than originally suspected when the investigation first was undertaken.

And the State already has paid for some land-takings based on these overvaluations, the Traveler learned.

But no Federal money has reached the hands either of the State official or the appraisers involved. The appraisers are paid fees based on their work.

Normally, the Federal Government would reimburse the State half of the highway improvement cost under the primary, secondary, and urban Federal highway program.

The project in Wakefield, now in the construction stage, involved a widening of Route 128.

It is a 3.3-mile stretch skirting Wakefield's northern boundary from North Avenue to the Saugus River, including the Lowell Street interchange.

It originally was planned in 1956, designed in 1957 and authorized for acquisition in 1958 and 1959. The State filed its required declaration of land-taking in August 1959.

The Attleboro project on which the investigation still was incomplete, involved two stretches of interstate highway totaling 6.6

The first part extended 4.5 miles from the Rhode Island line in South Attleboro through industrial-commercial property to a point north of Thacher Street.

The second stretch was 2.1 miles from just north of the proposed Commonwealth Avenue interchange to a point north of Kelley Boulevard.

Hundreds of land tracts are involved in the land-taking process that will clear the way for the new highways. The exact number still is undetermined as the investigation continues.

The precise number of fee appraisers involved in the overvaluations also was undetermined. It was believed to be a comparatively small number.

A Traveler source said some of the appraisers apparently worked actively with the State official while others were "coerced."

Since Federal money didn't change hands, any official charges against these persons, based on Justice Department investigation, probably would be something like conspiracy.

Under State procedure, appraisals approved by the State department of public works are sent to a five-member real estate review board for review.

However, this group meets only once weekly and lacks facilities for investigating the basis on which the submitted appraisals were determined.

[From the Boston Herald, August 18, 1960] U.S. PLEDGES COMPLETE PROBE OF MASSACHU-SETTS HIGHWAY LAND COST

#### (By Tom W. Gerber)

Washington.—The chairman of a Federal highway investigating subcommittee Wednesday pledged a "complete rundown" on excessive appraisals in Massachusetts' Federal aid highway program.

Representative John A. Blatnik (Democrat of Minnesota) told the Herald his group was "going to find out" about U.S. Bureau of Public Roads' evidence that overvaluations totaled "millions of dollars."

#### GOP MEMBER WANTS FASTER ACTION

BLATNIK, whose subcommittee was formed to watchdog the biggest construction undertaking in world history, said he hoped to send investigators to Massachusetts "within a month."

But the ranking minority member of the subcommittee, Representative GORDON H. SCHERER (Republican of Ohio), told the Herald the investigation should be started immediately.

"There's no reason why the subcommittee staff should not conduct a complete investigation at this time," SCHERER said.

SCHERER, reached Wednesday night soon after his return from Cincinnati said the Massachusetts highway scandals were "far worse than in Oklahoma."

SCHERER said he expected to have a further statement on the Massachusetts highway scandals after he had studied BPR reports sent to the subcommittee.

The subcommittee in May held hearings on the Oklahoma highway scandal. Evidence was developed on falsified reports, payments for work not done, death threats and juggled claims.

#### MEETING AUGUST 24

BLATNIK said the subcommittee would discuss the evidence of bloated appraisals for right-of-way land in the Massachusetts highway program at an executive session August 24.

The Minnesota Congressman said subcommittee experts would evaluate data obtained by the independent valuation engineering firm of Beasley and Beasley and other material in BPR files before investigators were sent to the Bay State.

"I want to make this perfectly clear," BLATNIK said. "The situation in Massachusetts will be given a complete rundown."

However, he said hearings on highway right-of-way appraisals in Massachusetts certainly would not be held before Thanksgiving.

BLATNIK said no hearings would be held until after the November elections.

#### POLITICS CHARGE FEARED

"We could be accused of playing politics," he said.

But SCHERER disagreed. He noted the Beasley and Beasley reports and BPR-devel-

oped information already had been turned over to the U.S. Justice Department for "appropriate action."

"The committee would be more justified going into Massachusetts before any possible indictments are returned than afterward," he said.

The BPR reports to the subcommittee and other information obtained by the Herald implicated a high Massachusetts official in the excessive appraisals racket.

However, the official was not named in the reports.

But it was learned he exerted "pressures" on State-hired fee appraisers to "compromise their independence," in making true market value appraisals.

#### UP 300 PERCENT

Some of these appraisers actively cooperated in the puffed-appraisal racket while others were coerced by the threat of losing State business if they failed to cooperate, the Herald learned.

Some appraisals for large land tracts were as much as 300 percent over subsequent appraisals by Beasley and Beasley, it was learned.

The valuation engineering firm from Washington, D.C., was hired by the BPR in May to investigate and double check information developed by the BPR's project examination division since January.

That was when the Federal Government shut off land-taking reimbursements to the State under the Interstate Highway program and the so-called primary, secondary, and urban program pending a full audit.

The Federal Government pays the State 90 percent of the land-taking and construction costs under the \$50 billion Interstate program and half the land-taking and construction costs under the primary, secondary, and urban system in the State.

#### TWO AREAS COVERED

However, despite this eight-month holdback of Federal funds, the Herald learned the State already has paid for some of the land that was excessively appraised.

The BPR report to the subcommittee, prepared by Beasley and Beasley, covered Federal aid highway projects in two Massachusetts areas—Wakefield and Attleboro-North Attleboro.

The Wakefield project was a widening of Route 128 along a 3.3 mile stretch around the community's northern bulge. This is under the primary road program.

The Attleboro-North Attleboro project was in two parts of proposed Interstate Route 95.

#### NO COMPARISON

The first stretched for 4.5 miles from the Rhode Island line in South Attleboro through costly industrial and commercial property to a point near Thacher Street.

The second was a 2.1 mile segment from north of the proposed Commonwealth Avenue interchange to a point just north of Kelley Boulevard.

However, the Beasley and Beasley reports on these projects contained only painstaking appraisal of each land parcel involved in the highway construction.

There was no comparison with State appraisals.

This was contained in other BPR data not sent to the subcommittee, but to which the subcommittee was given access.

A Herald source said two additional volumes covering other land appraisals in the Attleboro area would be sent to the subcommittee of a later date.

#### MANY VALUES UPHELD

In addition, the Herald learned another Federal-highway project in the Gardner area also was under BPR and Beasley and Beasley review.

Study and analysis of this area was expected to be ready next month.

The Herald's source said hundreds of land tracts were involved in the two 4-inch thick reports sent to the subcommittee. However, he said only "a small percentage" of the appraisals received by Beasley and Beasley had been found to be valued excessively.

Generally, he said, the larger tracts were overvalued while smaller plots taken under eminent domain were appraised with reasonable accuracy. Nevertheless, the Herald was told authori-

Nevertheless, the Herald was told authoritatively the total overvaluation in Massachusetts would run into "millions of dollars."

At the outset of the investigation this spring, it was believed the overvaluations would range only in the hundreds of thousands of dollars.

#### HOW WAS IT DONE

In a letter transmitting the report to the subcommittee, Public Roads Commissioner Ellis L. Armstrong told how fee appraisers justified excessive valuations.

The letter to BLATNIK said State-hired appraisers used "misleading information" and ignored "available data" that might support a true valuation.

"For example, sales of improved properties were reported as unimproved and were used to support prices in land far in excess of the true value," the letter said.

And the Herald learned these appraisers sometimes ranged as far as several miles from the property they were supposed to be appraising to find more costly land they could cite to support an inflated appraisal.

#### UP TO LAWYERS

The Herald's source emphasized the suspected appraisers and the State official involved never collected Federal funds. This money was shut off in January.

However, intentional overappraisals submitted in expectation the State would be reimbursed with Federal funds possibly could be considered conspiracy.

But this was up to the Justice Department to determine.

Meanwhile, both the BPR and the Beasley and Beasley investigations continued.

[From the Boston Traveler, August 18, 1960] Massachusetts Highway Scandal Worst Yet

#### (By Tom Gerber)

Washington.—Preliminary evidence indicates the Massachusetts highway scandal is bigger than all six under congressional investigation in other States put together, an informed sources said today.

The source, which is close to the inves-

The source, which is close to the investigating subcommittee, would not name the other six States currently under probe.

However, he said the Massachusetts situation also involved more money than scandals previously uncovered in Arizona, Indiana, and Oklahoma.

The Executive Council today rejected a proposal to halt State land-damage payments during the Federal investigation of the Massachusetts highway scandal.

sachusetts highway scandal.

Councilor Augustus Means, sole Republican member, proposed the freeze and cast the only vote recorded in favor.

He called attention to the Federal Bureau of Public Roads investigation of Massachusetts land appraisals in the Federal-aid highway program.

"Something is apparently brewing in the Department of Public Works and the U.S. Government," he said. "This body should not continue to approve any more land damages until the matter is cleared up."

Councilor Joseph R. Crimins, one of seven Democrats voting against the motion, said a halt in payments would hurt small property owners whose homes had been taken for new highways.

Democratic Councilor Patrick J. McDonough bitterly attacked Senator LEVERETT

SALTONSTALL (R., Mass.) and the Herald and Traveler.

He said the newspaper's stories about the Federal investigation were "phony and padded" for the benefit of Saltonstall.

"SALTONSTALL will have all kinds of Federal men here to produce phony headlines," he said.

He told the council that similar Federal investigations are going on in every State of the union. No single State is being singled out, he said.

Representative John A. Blatnik (Democrat, Minnesota), chairman of the highway investigating subcommittee, said his group will make a complete rundown on evidence that excessive land appraisals in the Massachusetts Federal-aid highway program totaled millions of dollars.

BLATNIK said he hoped to send subcommittee investigators to Massachusetts within a

#### ASKS PROBE RIGHT NOW

But the ranking subcommittee's minority member, Representative Gordon H. Scherer (Republican, Ohio), suggested the investigation should begin immediately.

In an exclusive story in yesterday's Traveler, the U.S. Bureau of Public Roads reported it had evidence of bloated appraisals for right-of-way land in the Massachusetts highway program.

The BPR report to the subcommittee covered Federal-aid highway projects in Wakefield and Attleboro-North Attleboro. The report was prepared by Beasley and Beasley, a valuation firm from Washington, D.C.

The report and other information obtained by the Traveler implicated a high Massachusetts official in the excessive appraisals racket. The official, however, was not identified by name.

#### PRESSURES EXERTED

But it was learned he exerted pressures on State-hired fee appraisers to compromise their independence in making true market value appraisals.

Some of these appraisers actively cooperated in the puffed up appraisals, while others, it was learned, were coerced with threats of losing State business if they didn't cooperate.

Some appraisals for large land tracts were as much as 300 percent higher than appraisals subsequently made by Beasley and Beasley, it was learned.

The firm was hired by the BPR in May to probe into information developed by the bureau's project examination division since January.

During January, the Federal Government suspended land-taking reimbursements to the State under the interstate highway program and the so-called primary, secondary and urban program pending a complete audit.

The Federal Government pays the State 90 percent of the land-taking and construction costs under the \$50 billion interstate program. It pays half the land-taking and construction costs under the primary, secondary and urban system in the State.

BLATNIK told the Traveler his subcommittee will discuss the evidence of bloated appraisals in Massachusetts at an executive session August 24.

Subcommittee experts will evaluate it before investigators are sent into the State, he added:

"I want to make this perfectly clear," he said, "the situation in Massachusetts will be given a complete rundown."

But he surmised that hearings on the evidence would not be held before the November elections. Otherwise, he added, "we could be accused of playing politics."

SCHERER disagreed, noting that the Beasley and Beasley reports already have been turned over to the U.S. Department of Justice for appropriate action. He said:

"The subcommittee would be more justified going into Massachusetts before any pos-

sible indictments are returned than after-

In addition to the Wakefield and Attleboro-North Attleboro projects, the BFR also is reviewing another Federal-highway project in the Gardner area, it was learned.

Study and analysis of this area is expected to be ready next month.

Hundreds of land tracts were involved in the two 4-inch thick reports sent to the subcommittee. But only a small percentage of the appraisals received by Beasley and Beasley had been found to be valued excessively, a source said.

In general, he explained that the larger tracts were overvalued while smaller plots taken under eminent domain were appraised with reasonable accuracy.

with reasonable accuracy.

Nevertheless, the total overvaluation in
Massachusetts would run into "millions of
dollars." it was reported.

[From the Boston Herald, Aug. 19, 1960]

## FBI TO PROBE STATE SCANDAL IN LAND TAKING (By Paul Costello)

The FBI will be called in within one week to investigate the alleged millions of dollars in excessive appraisals for rights-of-way in the Massachusetts Federal-aid highway program.

The Herald learned Thursday night that the U.S. Justice Department has been kept informed of the preliminary investigation of large-scale land damage frauds by the U.S. Bureau of Public Roads and it has decided to call the FBI into the case.

#### THREE INVESTIGATIONS

The FBI inquiry will be conducted separately from the Bureau of Public Roads investigation and from the investigation being conducted by the independent valuation engineering firm of Beasley & Beasley.

All that remains to be completed before the FBI steps in is the filing of a formal request by the Justice Department and the completion by the Bureau of Public Roads of its final draft of the preliminary report based on its 7-month Massachusetts study.

The BPR broke the scandal Wednesday in a letter to a special House subcommittee set up as a watchdog on the billion dollar Federal-ald highway program throughout the Nation.

The FBI entrance into the scandals comes on the heels of announcement Wednesday by subcommittee Chairman Representative John A. BLATNIK (Democrat, Minnesota), that preliminary reports of BPR and Beasley & Beasley warranted a "complete rundown" on excessive appraisals in Massachusetts' Federal-aid highway program.

BLATNIK said then that he hoped to send committee investigators into Massachusetts within a month.

#### TURNS OVER FILES

However, the ranking minority member of the subcommittee, Representative Gordon H. Scherer (Republican, Ohio), told the Herald that there was no reason why staff investigators shouldn't start on the case at

The Bureau of Public Roads turned over its files in the case to the Justice Department Wednesday. The Justice Department, on the basis of BPR information, decided to call in the FBI.

The evidence presented by the BPR showed that at least one high State official has been implicated in the right-of-way scandal.

This official has not been identified pending submission of evidence to a Federal grand jury, but the Herald learned he exerted "pressures" on State-hired fee appraisers to "compromise their independence," in making true market value appraisals.

Beasley & Beasley, which was hired by the BPR in May to double check and develop evidence uncovered by BPR investigators

since January, has reported some appraisals were inflated by as much as 300 percent.

#### STARTED IN JANUARY

The BPR launched its review of the Massachusetts phase of the Federal highway program in January after shutting off land-taking reimbursements to the State as the result of reports of widespread abuses here.

The Federal Government reimburses the States for 90 percent of the cost of land taking and construction under the \$50 billion interstate program and pays 50 percent under the primary, secondary, and urban road construction program.

The preliminary BPR report, which is the basis for the FBI being called in, covered Federal-aid projects in Wakefield along Route 128 and in the Attleboro-North Attleboro area on Interstate Route 95.

The investigation by the FBI will be a brand new study. The BPR material will be used only to supply leads for FBI agents to follow.

Under usual procedures the FBI would turn over the results of its investigation to the Justice Department, which then must decide whether to seek indictments before a Federal grand jury.

#### STORMY SESSION

In a stormy session of the executive council on Beacon Hill yesterday as Democratic councilors defended the department of public works and the Furcolo administration in the right-of-way scandal.

The storm broke when the lone Republican on the council, Augustus G. Means of Essex, introduced a mild motion requesting that the council refrain from acting on pending land-taking cases until the Federal investigation has been completed.

The council defeated the motion 7 to 1 and then approved 39 land-taking damage awards.

Means, who reminded the councilors that "it is this honorable body" that must in the last analysis pass on all land takings, said "something is brewing in the department of public works \* \* \* and I urgently request that we suspend action until it is apparent these land takings are in order."

Councilor Joseph Ray Crimmins (Democrat, Somerville) seconded Means' motion "just to get this out in the open," and then challenged Means to produce evidence of wrongdoing in the DPW.

The strongest comments came from Councilor Patrick J. McDonough (Democrat, Boston), who charged the published stories out of Washington on the Massachusetts investigation are "phony, padded stories for the benefit of one Leverett Saltonstall."

[From the Boston Traveler, Aug. 19, 1960] GOP DEMANDS ACTION IN MASSACHUSETTS ROADS PROBE

#### (By Tom W. Gerber)

Washington.—Republican Members will seek a showdown Wednesday on their demand that a congressional subcommittee begin an immediate investigation of the Massachusetts highway scandal.

They will press their demand in an executive session of the House Highway Investigating Subcommittee headed by Representative John A. BLATNIK (Democrat, Minnesota).

#### WANT TO DEFER PROBE UNTIL AFTER ELECTION

BLATNIK and the other 12 Democratic members of the 19-man group want to put off any inquiry until after the November election. They don't want to embarrass the Massachusetts Democratic administration and thus indirectly Democratic presidential nominee Senator JOHN F. KENNEDY.

nominee Senator John F. Kennedy.
Representative Gordon H. Scherer (Republican, Ohio) is expected to lead the minority fight for an immediate inquiry.

Senator Leverert Saltonstall (Republican, Massachusetts) said the BPR's "shock-

ing charges \* \* \* must be investigated to the fullest."

"This, I am confident responsible Federal

authorities will do," he said.

"Personally, I know nothing more of this matter than what I have read in the newspapers. But to pass this matter off merely as election-year politics demonstrates careless disregard for the taxpayers' interest and public trust."

Although the subcommittee has not yet sent its investigators to Massachusetts, the Federal Bureau of Public Roads is pressing ahead with its inquiry. Moreover, the FBI is expected to launch an independent investigation next week.

The BPR investigation already has turned up evidence that Massachusetts appraisers inflated right-of-way land appraisals for Federal-aid highways by millions of dollars.

The BPR turned over its preliminary files in the case to the Justice Department on Wednesday for "appropriate action." The Justice Department, in turn, decided to call in the FBI.

#### HIGH STATE OFFICIAL UNDER SUSPICION

A high State official is under suspicion, it was learned, of pressuring State-hired appraisers to "compromise their independence" by inflating their estimates of land values.

The independent appraisal firm of Beasley and Beasley, hired by the BPR to check the right-of-way properties, has indicated some values were ballooned by as much as 300 percent.

The Federal Government reimburses States for 90 percent of the cost of land taking and construction under the \$50 billion Interstate Highway program, and 50 percent under the primary, secondary and urban road construction program.

Since the BPR shut off reimbursements to Massachusetts last January, however, no Federal money has been paid out for the inflated appraisals.

Federal courts nevertheless could prosecute participants in the inflated scheme for conspiracy to defraud.

And while the subcommittee is investigating these alleged right-of-way irregularities in the Bay State, I commend to its attention the possibility that there may be some liberties taken with the Federal purse in the awarding of contracts for consulting engineering work by the Massachusetts Public Works Department. I especially would like the subcommittee to investigate the possibility that these contracts may have been awarded on a political patronage basis to J. L. Hayden Associates and to Thomas Worcester, Inc., both Massachusetts firms. Of prime concern should be: Are any of these moneys and large funds being returned to the campaign coffers of the party faithful? The basis for my information and concern are some recent newspaper clippings from the crusading Boston Herald, which some good public-spirited citizen of the State of Massachusetts recently sent to me. Because some Members of the House do not read the Boston papers and because I want to be helpful to the chairman of my subcommittee, I request that the newspaper articles just mentioned also be printed at this point in my remarks. They are articles entitled: "Parkway Brochure Cost \$46 Each," in the Boston Herald dated August 23, 1960; "'No Comment,' Says Ricciardi", in the Boston Herald on August 23, 1960; "Thomas Worcester Charged With \$180,784 Tax Evasion" in the Bos-

ton Herald on August 23, 1960; "Company Made Payments on Bogus Bills, Trial Told" in the Boston Herald on August 25, 1960; "\$23,000 Brochure Job Sublet for About \$5,000," in Boston Herald on August 25, 1960.

[From the Boston Herald, Aug. 23, 1960]

PARKWAY BROCHURES COST \$46 EACH

(By David Farrell and Wayne Hanley)

The Furcolo administration paid \$46 per copy for 500 "Commemorative Brochures" on the proposed President Adams Parkway, the Herald learned last night.

#### STUDY STILL GOING ON

Some \$23,000 of the taxpayers' money was shelled out to J. L. Hayden Associates, Inc., one of the administration's pet consulting engineering firms, for preparing the 44-page, 9-inch by 12-inch brochure.

The money was spent by the Massachusetts Department of Public Works at the suggestion of Governor Furcolo despite the fact that the Federal Government is spending \$25,000 for a study of the feasibility of establishing such a parkway.

Furcolo and his newly appointed commissioner of public works, Jack Ricciardi, announced last week that a parkway from Faneuil Hall, Boston, to Plymouth was being considered. The existing portions of the Southeast Expressway from Boston to Quincy as well as the Plymouth Bypass would be incorporated in the new roadway that calls for construction between Quincy and Kingston, according to the Governor.

Just why the souvenir booklet which is largely a collection of pictures and facts researched from various historical books and societies, was not put together by the DPW's regular staff of public relations consultants has not been explained.

Ostensibly the brochure was prepared to help influence the Federal Government on the necessity of constructing another parkway through the South Shore to Plymouth in addition to the expensive Southeast Expressway and Route 3A.

More likely, according to one leading Democrat, the huge outlay was made to supply Governor Furcolo with some publicity aimed at garnering votes for him along the South Shore in his bid to unseat Senator Saltonstall. The timing of the announcement during the current political campaign would seem to bear this out, especially since the brochure was prepared last winter.

Most State House and Capitol Hill observers see little or no chance of an additional highway—which by the DPW's own conservative estimate would cost a staggering \$76 million—being built by the State or Federal Government along the South Shore in the foreseeable future.

#### "IF APPROVED" CLAUSE

That the State has no intention of spending a dime of its own for construction of the parkway is manifest from the tenor of the statements by Furcolo and Ricciardi when they launched the trial balloon about the road last week. Both officials qualified their statements about the proposed parkway with a handy "if approved by the Federal Government" escape clause.

The Federal officials who are studying the feasibility of establishing (not necessarily constructing) a President Adams Parkway were in Boston the last week of July conferring with representatives of the Boston office of the Federal Bureau of Public Roads and the State public works department.

One official at the Bureau of Public Roads told the Herald he was sure the Federal Government would balk at constructing any great amount of new roadway for the parkway and would insist on using existing roads like Route 3A or the entire length of the

Southeast Expressway when it is completed through Hingham, Norwell, Hanover, Pembroke, and Kingston to the Plymouth Bypass.

He pointed out that a freeway to the western suburbs, as recommended in the 1948 master highway plan, would have to be built before the South Shore gets another new highway, especially if the Massachusetts Turnpike Authority is unable to finance extension of the turnpike from Weston to Boston.

#### STARTED IN 1959

The firm which authored the expensive brochure is one of the up and coming professional engineering firms in Massachusetts. J. L. Hayden Associates, Inc., doing business at 1340 Soldier's Field Road, Brighton, was incorporated on April 9, 1959.

The firm's incorporation papers, on file at Secretary of State Joseph Ward's office, show that John L. Hayden of 14 Richland Road, Wellesley, is president and treasurer. Clerk is Philip A. Brancucci, lawyer, of 10 Arlington Street, Cambridge. The corporation's three directors are listed as Hayden, Brancucci and Alice P. Kavanaugh of 54 Kenmore Road, Medford.

J. L. Hayden Associates is only one of four related firms whose president is Hayden and whose offices are at 1340 Soldier's Field Road. Other corporate papers on file at the State House reveal that Hayden is also president of Hayden, Harding & Buchanan, Inc.; Hayden, Harding & Buchanan Engineers, Inc.; and Polytechnical Engineering, Research & Sales Co., Inc. This latter firm is known as Persco.

All of these firms, with the exception of Persco, have been the recipients of several lucrative consulting engineering contracts from the Furcolo administration in recent years.

#### MANY CONTRACTS

There are many consulting engineering firms doing business with the Department of Public Works which lets the vast majority of its engineering work out on contract to private firms on the grounds that the department does not have enough qualified engineers to handle the tremendous work load occasioned by the State's huge road program.

A check of the DPW's contracts with these firms shows that the Hayden companies have been unusually successful in convincing State officials not only of the value of their work but also of the diversity of their capabilities.

Following is a rundown of some of the Hayden firms' contracts with the DPW and its division of waterways:

- 1. A \$921,000 lump sum contract to Hayden, Harding & Buchanan, Inc., and Charles A. Maguire & Associates for consulting engineering work on the Inner Belt. The two firms presumably are splitting the work.
- 2. An \$878,000 contract to Hayden, Harding & Buchanan Engineers, Inc., for consulting engineering on a portion of Interstate Route 195 which runs between the Rhode Island border at East Providence and New Bedford.

#### EIGHTEEN-MILLION-DOLLAR COST

The firm's slice of this roadway is a segment between Fall River and Westport. Estimated construction cost of this piece of roadway is \$18 million and the engineering fee granted H., H. & B. Engineers, Inc., amounts to 4.88 percent of this or \$878,000. Through last May the firm had received a half million dollars for the work it had done to date. Although consulting engineering fees for highway construction jobs generally run about 4½ percent, the 4.88 percent fee to the Hayden concern is not unusual.

3. A \$225,000 consulting engineering fee for work on a \$6 million construction segment of the same road, Interstate Route 195, between Seekonk and Swansea. This contract also involved H., H. & B. Engineers, Inc.

4. A \$148,000 contract for J. L. Hayden Associates for an extensive study of the State's highway needs as well as recommendations for a detailed program of future construction in Massachusetts. This presumably was the study that resulted in the billion-dollar-highway program that Furcolo unsuccessfully recommended to the legislature this year.

5. An \$84,000 contract for J. L. Hayden

5. An \$84,000 contract for J. L. Hayden Associates to review and study for possible revision and rewriting the DPW's manuals, guides, and specifications.

#### WATERWAYS PROJECTS

6. A contract between the division of waterways and J. L. Hayden Associates for consultant services on certain waterways projects. As of last January the Hayden firm was paid \$8,811 for its work, principally survey work, on Quequechan River in the Fall River area where the river's channel was being relocated.

Hayden, Harding & Buchanan, Inc., and Polytechnical Engineering, Research & Sales Co. were incorporated on April 7, 1955. Hayden, Harding & Buchanan Engineers, Inc., was incorporated April 30, 1957, while J. L. Hayden Associates was formed on April 9, 1959.

[From the Boston Herald, Aug. 23, 1960] No Comment, Says Ricciardi

State Public Works Commissioner Jack Ricciardi of Wellesley late yesterday gave a "no comment" answer to State Auditor Thomas J. Buckley's 154-page report sharply criticizing the DPW.

Ricciardi, a former deputy commissioner, said he had just received the bulky document and asked for time to study it.

#### CONTRACTS CITED

Buckley's report made mention of a deputy commissioner who received an average of \$14,000 annually as a consultant for more than 2 years.

It also singled out for criticism the granting by the DPW of 44 separate under-\$1,000 contracts to a single painting contractor as a "device to circumvent the laws."

It was pointed out that under State law only contracts of \$1,000 or more require competitive bidding. The 44 contracts referred to in the audit of the highway division of the DPW were "each for \$125 less than the statutory limit of \$1,000."

Buckley reported they went to one painting contractor for work confined to a single section of the East Boston Expressway.

The report also criticized payment of \$775.812 for corrective construction at the Roy C. Smith Bridge on the Southeast Expressway near the Neponset Interchange in Dorchester. The payment was made, the report said, despite a ruling from the attorney general that the contractor was at fault.

Buckley also questioned the award of a lump sum contract for \$84,000 for professional engineering services which should have been performed on a cost-plus basis; "overruns" on construction projects due to consistent failure of preliminary plans to show either the terrain or the makeup of the area with any degree of accuracy; changes in a connecting roadway contract on a road in Philipston at a cost of \$83,000 despite the attorney general's disapproval, and failure of leases for gas stations and restaurants to spell out responsibility for local real estate taxes.

#### PAYMENTS HELD UP

The Buckley report did not identify the deputy commissioner involved as a consultant, but Ricciardi readily admitted the State auditor had him in mind.

The audit also charged the Federal Bureau of Public Roads has held up payments of \$6,721,817 on land damage cases, pending the

outcome of its probe into claims of overpayment for land taken for federally-aided roads.

The same Federal agency, the report said, has withheld approval of a bridge at Fall River due to a question concerning the safety of steel girders. The report says welding problems have arisen and that as a result the Bureau has not been billed for \$655,396 for this project.

Buckley's report contends that specifications for highway construction failed to properly identify the type of terrain. It said many examples were shown of ledge being found instead of earth and other variances.

Because of the varying charges for removal of peat, earth or rock, Buckley said the overrun charges on one contract in Methuen amounted to \$76,000.

The report also cited a Middleboro contract where overrun charges of \$222,778 were made on one contract for gravel borrow alone. In the same contract, Buckley said the overrun for digging out peat came to \$44,500.

#### REVIEW AUDIT CITED

The State auditor also took issue with payment of \$9,894.48 to a consultant for a review audit of one of Buckley's own audit reports on the department.

Buckley pointed out that his previous criticism of leasing of parking lots without bids resulted in the DPW's cancellation of contracts and the advertising for bids.

A comparison of the bids, he said, showed the high bids will amount to \$70,578.60 annually, whereas the negotiated leases on the same lots amounted to \$7,020 per year.

[From the Boston Herald, Aug. 23, 1960] THOMAS WORCESTER CHARGED WITH \$180,784 TAX EVASION

Thomas Worcester, 63, president of Thomas Worcester, Inc., Boston engineering and construction firm, went on trial before Judge Charles E. Wyzanski, Jr., and a jury in U.S. district court yesterday charged with evading income taxes totaling \$180,784.

Worcester, of Putnam Street, Waltham, is charged with evading personal taxes totaling \$74,582 for 1950, 1951 and 1952, also taxes of \$106,202 allegedly owed by his firm for the fiscal years 1950 and 1951. The Government alleges he filed false returns understating his own and the corporation's income.

It is charged that his personal net income during the 3 years involved totaled \$263,156 but that he reported only \$112,162 in his returns.

Also, that the company's net income for the years 1950 and 1951 amounted to \$209,114, but that only \$48,457 was listed in the returns.

Assistant U.S. Attorney Norman A. Hubley, in his opening to the jury, said the Government would show that Worcester channeled large sums out of the firm and into his own hands. He said the funds were diverted to two other concerns through fictitious expense charges.

[From the Boston Herald, Aug. 25, 1960] COMPANY MADE PAYMENTS ON BOGUS BILLS, TRIAL TOLD

Philip W. Murphy, former comptroller of Thomas Worcester, Inc., Boston engineering and construction firm, testified in U.S. district court yesterday that the company made large payments to another firm on the basis of "fictitious" bills and vouchers.

Asked by Lewald the purpose of the Ross Turner concern, Murphy said, "Mr. Worcester needed to have a considerable sum of money and the partnership was formed in order to bill the Worcester company for services, and the Worcester company in turn would make checks payable to Ross Turner & Co."

Murphy, a resident of East Bridgewater, was called as a Government witness at the

trial of Thomas Worcester, head of the engineering and construction firm, on income tax evasion charges.

#### SAY \$180.784 EVADED

Worcester, 63, is charged with evading taxes to totaling \$180,784 by filing false returns for himself and his firm. Included are personal taxes of \$74,582 allegedly owed for 1950, 1951 and 1952, and \$106,202 allegedly owed by Thomas Worcester, Inc., for 1950 and 1951. Judge Charles E. Wyzanski, Jr., is presiding at the jury trial.

Murphy, under questioning by Assistant

Murphy, under questioning by Assistant U.S. Attorney George H. Lewald, testified that payments totaling \$105,240 were made by the Worcester company in 1949 to a newly organized firm called Ross Turner & Co., which had been set up in an office on State Street.

The firm was a partnership whose members comprised Worcester, Murphy and two other employes of the Worcester firm. Murphy, who worked as comptroller directly under Worcester, said the payments were made purportedly for "engineering services" rendered to the Worcester company by Ross Turner & Co., but that actually no services were made. The checks covering the payments, said Murphy, were signed by Worcester and himself.

[From the Boston Herald, Aug. 25, 1960] \$23,000 BROCHURE JOB SUBLET FOR ABOUT \$5,000

#### (By David Farrell and Wayne Hanley)

The consulting engineering firm which was handed a \$23,000 contract for preparing 500 commemorative brochures on the proposed President Adams Parkway sublet the job to a Boston advertising agency, the Herald learned last night.

#### JOB TURNED OVER TO AD AGENCY

J. L. Hayden Associates, which was paid \$46 a copy for each of the brochures, turned the job over to Parsons, Friedmann & Central Advertising Agency of 69 Newbury Street almost immediately after signing the contract with former State Public Works Commissioner Anthony DiNatale.

DiNatale quit his post as head of the DPW recently but was commissioner on December 8, 1959, when the agreement between the State and the Hayden firm was set up.

Although mystery continued to shroud some aspects of the brochure, several developments were uncovered by the Herald.

Here are the known facts in the strange case:

Commissioner DiNatale and John L. Hayden of Wellesley who is president of J. L. Hayden Associates and two other firms which have been paid hundreds of thousands of dollars in the past year for consulting engineering work in a variety of DPW projects, including the updating of DPW manuals and publications, signed a contract December 8 providing for the parkway brochure.

Shortly thereafter Hayden or one of his representatives called Robert Friedmann, treasurer and account executive of the advertising agency, and requested the agency to go to work immediately on the project.

It is not clear whether Hayden made the call because his secretary reported that he had "gone on vacation" and she "didn't know when he would be back" when the Herald attempted to question him about the brochure.

At any rate, the agency contacted Winthrop Printing & Offset Co. of 141 West 2nd Street, South Boston, and asked the firm to quote a price on the job.

It was explained the job had to be done as fast as possible even if it involved over-time.

The firm submitted a price somewhere in the vicinity of \$2,000 and was given the job.

Roy E. Orrall, an executive of the printing firm, said his company printed the brochure

but referred all questions about it to Friedmann.

Raymond E. Parsons of South Weymouth, president of the advertising agency, said he was not familiar with all of the details of the brochure.

#### ABOUT \$5,000

He did say the total value of the job was "about \$5,000" and this included the printing of the brochures as well as the creative work the agency put into the preparation of the original copy.

Parsons indicated he thought his agency was given the job because the firm had considerable experience in producing historical material. The famous folder on Boston's "Freedom Trail," was considered an out-The famous folder on Boston's standing guide on the city's historic sites, was prepared by his agency.

"I can say that we were entirely ethical," Parsons said. "We prepared the brochure at a price customary for such work. It was within the normal price range that any agency would have charged."

Parsons indicated that the total cost for the agency and printing company's efforts did not exceed \$5,000.

#### SEVERAL MYSTERIES

Several mysteries still remain in the strange case of the parkway brochure:

1. Why did the Furcolo administration pay

Hayden Associates \$23,000 for a job that apparently was worth considerably less?

2. Why the tremendous Christmas rush to complete the job "as fast as possible," even if it meant overtime? The brochure was not released to the press until last Friday, August

19—some 8 months after it was completed.3. Why do DPW records show that the work on the brochure was done between January 11, 1960, and February 3, 1960, when it now has been established that the work was jammed through in December 1959?

4. Why was a professional engineering firm that was busy with a multitude of other Department of Public Works contracts chosen to do a brochure that was primarily a historic and scenic guide that was more properly the work of an advertising agency?

[From the Washington News, Aug. 23, 1960] HIGHWAY CHARGES FLY ON HILL

Representative Gordon H. SCHERER (Republican, Ohio) today charged a Democraticcontrolled investigation committee is deliberately covering up a Massachusetts road-building scandal which is "the granddaddy of them all."

Representative SCHERER, ranking minority member of the House Highway Investigating Committee, said the road building skullduggery being investigated by the committee "looks like peanuts" compared with the Massachusetts situation.

He flatly accused Committee Chairman JOHN A. BLATNIK (Democrat, Minnesota) of arbitrarily deciding to stop "all further hearings because the Massachusetts scandals had to be kept under cover until after the election.'

"He's a liar," Representative BLATNIK retorted. "We've been in touch with the Massachusetts situation all the time. There's no change in tune."

I do not know if the "political considerations," referred to by the Chair, means that to expose this Massachusetts matter prior to election would be embarrassing to some Democratic politicians in the Bay State who are offering their credentials to the voters this fall. Nor do I know if exposure would prove to be a Teapot Dome or another Hoffa-Beck episode. But I find this forbearance is a remarkalbe thing under the circumstances and, I fear, it will serve no worthy cause other than to obscure the true facts which the public ought to know and to undermine public confidence in the objective of an important committee of Congress. Accordingly, I urge our subcommittee to move into Massachusetts forthwith and prepare this hearing as soon as possible, letting the chips fall where they may. This alleged scandal has been known since January and further delay cannot be justified on any ground other than narrow political expediency.

#### OTHER UNFINISHED BUSINESS

There are also other areas of our highway program which I have long urged in vain that our subcommittee investigate and inform the Congress. These areas raise the questions of whether congressional policies are sound and are being administered properly by both Federal and State officials. It may be that these matters are not as "glamorous" as exposing corruption and laying hold of some scandals whose perfidy is rightly aired before the bar of public scrutiny, but they are nonetheless important. Without being exhaustive, the following list of objectives ought to engage the attention of our forum:

1. The reevaluation of the provisions for extending the Interstate System beyond 40,000 miles; and, if this policy is sound, establishment of a standard to determine when and where such exten-

sions shall be made.

2. A reevaluation of the decision that the system shall serve both local needs and through traffic as well, together with some clarification of the policy vis-a-vis the location of interchanges.

3. A review and clarification of the policy regarding design standards relating to the use of multiple-lane highways as opposed to two-lane highways and design standards of interchanges.

4. Review and clarification of the policy regarding construction of the Interstate System between population centers, and connecting links into population centers.

5. Review and clarification of the policies regarding route locations as such decisions are related to the economic impact of the highways on the affected community.

6. Review and clarification of the policies relating to promotion of an integrated highway system and their implementation in the system's projects to date.

7. Reevaluation of the present policies relating to highway bridges over navigable waters with the view to developing different but adequate standards for bridge construction under the Federal Bridge Act.

8. Reevaluation of the policy providing for payment of the costs of relocation of utilities on highway right-of-way on to highway construction.

9. Clarification of reasons for the wide variation between the cost estimate of 1955, upon which the 1956 act was based, and the revised cost-estimate submitted to Congress in 1958.

10. Investigation of the extent to which defense needs become the determining factor in route location and mileage.

Mr. Speaker, this entire highway program will be up for reappraisal by the Congress in early in the next year. Unless some of these areas indicated above are explored, there simply will not be any record of facts and evidence which can form a solid foundation for the Congress to legislate upon or to base an informed examination of the present laws. If the new Congress is to raise some \$13 billion in new revenue to help this Interstate System out of its financial dilemma, such inquiries as I have suggested must be answered. would feel that I have failed to protect the best interests of all Americans, including my own constituents in the First District of Iowa, if I did not take this last opportunity in the waning days of this Congress to renew my demands, voiced on the floor of the House on May 26. 1960 (see Congressional Record, pages 10509-10512) and often in committee hearings, that these areas be timely explored. I sincerely hope that this can and will be done and that when the new Congress returns in January, we can have the benefit of such investigations.

#### River Association Fights Floods

EXTENSION OF REMARKS

## HON. VANCE HARTKE

OF INDIANA

IN THE SENATE OF THE UNITED STATES Thursday, September 1, 1960

Mr. HARTKE, Mr. President, the September Indiana edition of the Prairie Farmer had an excellent article on the fine work which the people of the Wabash River Valley are doing to coordinate flood control. I ask unanimous consent that the article be reprinted in the Appendix of the Congressional Record.

There being no objection, the article was ordered to be printed in the RECORD. as follows:

RIVER ASSOCIATION FIGHTS FLOODS-WABASH VALLEY PEOPLE BAND TOGETHER IN AN EF-FORT TO COORDINATE FLOOD CONTROL

Major floods of the Wabash River at Terre Haute, Ind., are those recorded as above 17.5 feet. Since 1913, the U.S. Army Corps of Engineers has listed 26 separate major floods at Terre Haute. Flooding hasn't been so frequent in the upper reaches of the Wabash above Vigo County, but much damage has also occurred there.

Crop damage in the Wabash Valley was particularly bad in the floods of 1957 and 1958. Since most industries were located above the flood plain, they suffered relatively small losses. As protective levees crumbled, however, extensive personal property losses were experienced.

#### RESULT OF 1957 FLOOD

Mainly as a result of the 1957 flood, a laygroup of people were bound together in an organization concerning itself with the entire water resources of the Wabash watershed. The group chose a simple name for itself. It is known as the Wabash Valley Association.

At present, the organization claims some 3,000 members. These are organized through county chapters. Although the association could claim only 9 chapters last January, it now has 27, according to George D. Gettinger, executive vice president. A number of these chapters have been formed in Illinois, as well as Indiana, since Illinois people are part of

the organization.

The Wabash Valley, like nearly every other valley in the Midwest, considers itself the heartland of the Nation. Their claim to this title is based on being close to the Nation's center of population, their proximity to various natural resources, and their having both the Great Lakes and the Ohio

River for transportation.

The watershed of the Wabash Valley influences approximately one-seventh of the State of Illinois and about 80 percent of Indiana. It covers a total of 33,100 square miles and includes over 2½ million people within its borders. It is easily the largest unde-

veloped valley in the Nation.

One of the early accomplishments of the Wabash Valley Association was the successful sponsorship of legislation in both States that led to the establishment of the Wabash Valley Interstate Compact, more properly called the Wabash Valley Interstate Commission. Dr. B. K. Barton, its executive director, recently opened an office at Terre Haute.

The Wabash Valley Association, although organized at first along the lines of a flood-control organization, has since become a voluntary regional association of commerce, industry, and agriculture. Its goals now go well beyond the initial efforts to control floods. It hopes to better utilize all the natural resources of the Wabash.

In response to an appeal from the association, an interuniversity research planning committee submitted a plan for research early in 1958. The participating schools were the University of Illinois, Indiana University, and Purdue University.

#### YEAR-ROUND WATER SUPPLY

Included in their recommendations were flood-control measures to decrease crop losses and soil erosion, and to increase water storage capacity. They advocated water supply storage installations to provide year-round water supply and flow for industrial, power, irrigation, recreational uses, and stream-pollution abatement.

The committee said transportation de-

The committee said transportation developments should be planned, including highway, rail, air, and water navigation to make possible increased use of water resources. Electric power installations could make economical power available for increased industrialization of the valley.

Stream pollution abatement should be developed to increase the effective uses to which abundant water resources may be put for recreational and industrial purposes. And land use planning and zoning could protect the areas best suited for agricultural, recreational, residential, and industrial uses.

The association has enlisted the aid of its Senators and Congressmen to help further their aims. These legislators have worked as teams in Washington, D.C., in pushing for appropriations. While Members of the House of Representatives have been unable to get favorable action, Senators have been more successful.

Ten major reservoirs are included in the plans of the association. The Cagles Mill Reservoir on the White River is now several years old. The Mansfield Reservoir in Parke and Putnam Counties, Ind., is scheduled to start collecting water this fall. In the upper reaches of the Wabash Valley, the Huntington, Salamonie, and Mississinewa Reservoirs have been authorized by Congress and so has the Monroe Reservoir between Bloomington and Bedford.

Four more are being planned. They include the Wolf Creek Reservoir in Illinois and the Pine Creek, Wildcat Creek, and Sugar Creek Reservoirs in Indiana.

ANOTHER MOVEMENT

There is also another movement taking place in Indiana that is of extreme interest to the association. It has to do with the flood control measures and conservation practices that might be effected in the watersheds above these large reservoirs.

When the Cagles Mill Reservoir was being built in Owen and Putnam Counties, Ind., several years ago, landowners living above the pool could not get a coordinated program of flood protection, stream clearance, and conservation practices started. In the years since, there is strong indication that the reservoir is silting up badly, making the lake unattractive for best recreational use and changing the fish to the less desirable species.

While the people living below the dam benefited greatly, and while the recreational advantages contributed many thousands of dollars to the area, the upstream landowners had no program. Since they weren't receiving any benefits from the reservoir, they could hardly be expected to support these measures for those people living downstream. Now, with the Mansfield Reservoir shortly to go into operation, the residents of the

Now, with the Mansfield Reservoir shortly to go into operation, the residents of the area have a similar problem. How can existing Government programs be coordinated to provide flood protection to landowners living above the reservoir and keep the soil on the farms?

#### HAVE APPEALED

The Indiana people who are involved have appealed to their Senators and Congressmen, their farm organizations, and to any Government agency they think might be able to help them.

In the case of the Mansfield Reservoir, the Soil Conservation Service cannot act under Public Law 566 because the reservoir is located right in the middle of the watershed. Other Government agencies say their appropriations are either too small to do any good

or won't apply.

What the Indiana people want is an appropriation to take care of this problem. While there is some indication that money for upstream control measures might be written into all future reservoir appropriations, some special legislation is being sought for these already built reservoirs. There is some hope that a pilot project might be set up for the Mansfield Reservoir, a development that could get fast action.

#### The Ukrainian Congress Committee

EXTENSION OF REMARKS

#### HON. MARGUERITE STITT CHURCH

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES Thursday, September 1, 1960

Mrs. CHURCH. Mr. Speaker, this fall, branch and member organizations of the Ukrainian Congress Committee of America, Inc., will commemorate the 20th anniversary of the founding of the committee.

The work and the objectives of the committee, in informing not only the  $2\frac{1}{2}$  million Americans of Ukrainian ancestry but all Americans of the continuing struggle in the Ukraine and in other captive nations against Soviet domination and of the perils of communism, are contributing greatly to the cause of freedom throughout the world. In speaking for the captive Ukrainian people, who have struggled for centuries to break the

bonds of tyranny and proclaim their independence, and in affirming their right to freedom and justice, the committee continues to expose the fallacy that communism insures liberty.

It is most urgent today to know and realize fully the true meaning of communism and its danger to the rights and freedom of men and nations. The Ukrainian Congress Committee of America is to be commended for its unceasing efforts to stem the advance of communism, which seeks to extend its tryanny over the world.

Statement by Senator Harry F. Byrd, Democrat, of Virginia, Relative to Tax Foundation's Review of Budgetary Actions in Congress

EXTENSION OF REMARKS

## HON. HARRY FLOOD BYRD

OF VIRGINIA

IN THE SENATE OF THE UNITED STATES
Thursday, September 1, 1960

Mr. BYRD of Virginia. Mr. President, I ask unanimous consent to have printed in the Appendix of the Record a statement by me relative to the Tax Foundation review of budgetary actions in Congress.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

When the President submitted his 1961 budget in January he requested new spending authority totaling \$79.4 billion. I am advised that new spending authority finally enacted through the end of this session of Congress totaled \$80.7 billion, an increase of \$1.3 billion as compared with the January requests.

These figures are revealed in a review by Tax Foundation, Inc.

The review strictly follows budget presentations and it covers spending authority—appropriations, authority to spend from debt receipts, etc.—enacted through this session of Congress to become available in fiscal year 1961.

It must be kept in mind that these are not expenditure estimates for fiscal year 1961. Expenditures in the current fiscal year will be made not only from these new spending authorizations but also from the unexpended balances remaining in other spending authority enacted in prior years. By the same token, some expenditures from the new 1961 authority will not be made until later years.

The Tax Foundation figures also reflects the failure of Congress to enact postal rate increases. The President's January requests contemplated \$554 million in additional postal revenue from proposed increases in these rates to eliminate the estimated postal deficit. Appropriations to the Post Office Department allow for meeting the postal deficit in an indefinite amount.

The Tax Foundation is an independent research organization which I regard as the best in the field of government at all levels.

As a matter of routine, the Tax Foundation for years has been keeping a running box score on bills authorizing expenditures during their passage through the legislative procedure. This review shows final action by Congress on spending legislation during the session just ended.

The Tax Foundation's review follows:

TAX FOUNDATION TABULATION SHOWING FINAL ACTION ON NEW SPENDING (OBLIGATIONAL) AUTHORITY FOR FISCAL YEAR 1961 BY THE 86TH CONGRESS, 2D SESSION

The budgetary record of the 2d session of the 86th Congress offers hope of a moderate surplus in the fiscal 1961 Federal budget. Depending upon certain economic and other factors, the surplus may be somewhat less than the January estimate of \$4.2 billion. Last-minute approval of backdoor financing items in a stopgap housing measure may have little effect upon actual fiscal 1961 expenditures. Despite increases over budget requests, the session was noteworthy for successful resistance to strongly backed big spending proposals.

Spending authority increase: An unofficial tabulation conforming to Budget Bureau accounting practices shows an increase of \$1,406 million in new obligational authority for fiscal 1961 over amended budget requests (\$1,274 million over the original January estimate). The total does not include upwards of \$1 billion for unbudgeted programs (including the pay increase and medical care) for which supplemental funds probably must be provided in the next session.

Appropriation bills: Appropriations providing new obligational authority exceed amended budget requests by \$539 million and original estimates by \$576 million. Authority in appropriation bills to borrow from the Treasury is greater by \$50 million than amended budget requests but less by \$120 million than original proposals. The latter decrease is due to the unwillingness of Congress to shift from backdoor financing in two programs.

Backdoor financing: Unbudgeted spending authorizations bypassing the appropriation process in legislative bills were held sharply in check throughout the session. A total of only \$818 million applicable to fiscal 1961 was enacted into law, including \$550 million in the stopgap housing measure

Tentative totals: Totals in the unofficial tabulation are subject to revision in official figures in the midyear review of the Budg-Bureau. A tentative grand total of \$80,689 million in new obligational authority is expected to be reduced by nearly \$500 million (with accompanying reductions in budget requests and expenditure estimates) by omission of a temporary advance to the highway trust fund and a shifting of programs financed by the Federal Unemploy-ment Tax Act to the unemployment trust fund under a provision of the Social Security Amendments of 1960. New estimates for indefinite appropriations for interest on the debt and the postal deficit also may show differences.

Fiscal 1961 surplus: An increase in the January estimate of \$79.8 billion in fiscal 1961 expenditures is forecast by action on new spending authority, but offsets may be provided by reductions in farm price sup-port and other programs. Revenues may fall short of estimates, but a surplus seems assured.

Nature of tabulation: The tabulation which follows provides a comparison of new spending authority with both amended budget requests and the original January

The grouping is designed to show the area of spending authority within the jurisdiction of the Appropriations Committee, as distinguished from backdoor financing under control of legislative committees. grouping under appropriation bills includes appropriations and reappropriations from the general fund of the Treasury, authority in appropriation bills to borrow from the Treasury (or in technical terms "to expend from public debt receipts"), and a separate January budget item of borrowing authority in appropriation bills marking an unsuccessful effort of the administration

to shift from backdoor financing in replenishment of mortgage purchase and public facility loan funds.

Inasmuch as the tabulation covers only budget estimates and final spending authority, it fails to show the extent to which backdoor financing figured in uncompleted actions by committees and by the House and

The totals for permanent authorizations are necessarily based on estimates in the January budget, the latest available until revisions are provided in the Budget Bureau's midyear review.

The fact that appropriation totals in the tabulation are considerably lower than those issued by congressional committees is accounted for by exclusion of (1) an estimated \$3,450 million in appropriations from postal receipts, and (2) \$417.5 million for liquidation of prior contract authority. The latter includes amounts for grants in the urban renewal program, airports, airmail subsidies, public domain highways, and minor construction items. The appropriation totals in the tabulation, in accordance with Budget Bureau practice, are limited to those which authorize new obligations from the Treasury. Actual postal costs from the Treasury are included.

Upward trend in spending authorizations: The tentative total of \$80.7 billion in new obligational authority for fiscal 1961 is larger than in any other year since the Korean war, except fiscal 1959, which reflected antidepression expenditures. Supplemental appropriations in the new session may boost the fiscal 1961 total up to or above the fiscal 1959 total of \$81.4 billion.

Each year since fiscal 1955, when new obligational authority totaled \$57.1 billion, final totals have exceeded original estimates. An increase over the previous year occurred each year for 4 successive years.

In the 16 appropriation bills enacted for fiscal 1961, there were net increases over amended budget estimates in 5 bills aggregating \$1,689 million and net decreases in 11 bills aggregating \$1,111 million, a total net increase of \$578 million, which becomes \$588 million; when funds for liquidation of prior

contract authority are eliminated.

During the progress of the appropriation bills, the House made reductions from budget estimates, including borrowing authority within these bills, amounting to \$975.5 mil lion. The Senate increased the total over the House by a little more than \$3 billion. The compromises in conference brought the final total down to the \$588 million over amended requests.

Fiscal 1961 data comparable to original and amended budget requests

In millionel

	Original January budget	Amended budget estimates	Total spending authority	Plus or minus January budget	Plus or minus amended budget

Permanent authorizations (as estimated in January): Appropriations (including interest on the debt) Contract authority (airport grants, airmail subsidies and urban renewal) Borrowing authority	10, 196 437 8	10,196 437 8	10, 196 437 8		
Total permanent authorizations	10, 641	10,641	10,641		
Total new obligational authority	79, 415	79, 283	80, 689	+1,274	+1,400

<sup>1</sup> Appropriation totals follow Budget Bureau practice of exclusion of those from postal receipts (\$3,450,000,000) and for liquidation of prior contract authority (\$417,800,000), neither of which provides new authority to obligate from the Treasury. Failure of Congress to approve budgeted increases in postal rates to yield \$554,000,000 in effected in an estimated \$508,500,000 indefinite appropriation for the deficit (after reduction of \$45,500,000 in authorized obligations), which is in addition to a specific appropriation of \$49,000,000 for public service costs. Details in table may not always add because of rounding.

#### Thank You, Mr. Congressman

EXTENSION OF REMARKS OF

#### HON. DANIEL J. FLOOD

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES Thursday, September 1, 1960

Mr. FLOOD. Mr. Speaker, one of my constituents, Mr. Louis F. Betley, of Hazleton, Pa., recently wrote me one of the nicest letters that I have ever received during my many years in Congress. Mr. Betley, who was a master sergeant in the U.S. Marine Corps, expresses his sincere thanks and appreciation to Members of Congress and the American people for the educational benefits which he has obtained under the GI bill of rights which has provided him with the foundation for a most worthwhile career. Because of the fine sentiments expressed by Mr. Betley, I submit his letter as part of my remarks:

HAZLETON, PA.,

The Honorable Daniel J. Flood. The House of Representatives,

Washington, D.C.

DEAR MR. FLOOD: I do not know if it is the policy of the millions of GI's that took advantage of the GI bill of rights to habitually thank their Government and Congressmen for the most advantageous rights that were showered upon us veterans.

I wish to take this opportunity and thank the people of our Nation, its lawmakers, and Congressmen for providing us veterans of World War II and Korean conflict with in-

ducing rehabilitation incentive.

A married and a family man at the age of 46, I personally took advantage of a 2year college level, 11-month business administration and accounting course at the McCann School of Business in Hazleton. A school that has been doing more than its share to coach and educate us elderly students. The course, of nine subjects, could sometimes get very discouraging. However, the helpful and obstinate Miss Ruth M. Mc-Guire, director; Mrs. James L. Malatak, English teacher and secretarial science instruc-tor, and that of Mrs. Raymond J. Schuck, Gregg shorthand instructor, have guided us through many ingenious after-hour study clinics.

Upon graduation and through this course, I successfully gained employment at our region's most exclusive hotel-motel of distinction, Gus Genetti's, Hazleton, Pa. am most grateful to Mr. Genetti, a World War I veteran, who has come to the aid of a World War II and Korean veteran. Mr. Genetti is a kindly, understanding, beloved benefactor of approximately 83 employees in our employment-hungry, distressed re-

Mr. FLOOD, please convey my sincere ap-preciation and thanks to the citizens of the United States, the lawmakers, Senate and Congress for their generosity and benefits to us, the "not forgotten" veterans.

May God shower His choicest blessings upon our Nation, its Presidents, Cabinet, and

its people.

Very truly yours,

LOUIS F. BETLEY. Master Sergeant, U.S. Marine Corps, Temporary Retired.

Lincoln: 1863 and 1960

EXTENSION OF REMARKS OF

## HON. BARRY GOLDWATER

OF ARIZONA

IN THE SENATE OF THE UNITED STATES Thursday, September 1, 1960

Mr. GOLDWATER. Mr. President, I ask unanimous consent to have printed in the Appendix of the Congressional RECORD an essay written by Murray Harris, a 16-year-old student, which won him a trip to the Nation's Capital.

There being no objection, the essay was ordered to be printed in the RECORD. as follows:

[From the Portales News-Tribune, Jan. 31, 1960]

LINCOLN: 1863 AND 1960

In today's world of political complexities, it is hard to comprehend principles as simple as those of Abraham Lincoln—basically, the principles of honesty and liberty. To ask if these principles apply today is folly; the only answer would have to be, "Of course,"

To find the intricacies of Lincoln's principles, we must look to his writings. haps the greatest of these is the speech that every American student knows by heart; the speech that embodies the principles of these United States. That would be, of course, the Gettysburg Address. To begin with, we must understand that this address is made greater by the fact that it was con-ceived in the midst of a great civil war. The weight of the war was upon Lincoln. It would have been so easy to stoop to the bitter hatred that lesser men showed; yet it

was in this time that the President wrote a few words of tribute to the men of both sides who had died for what they believed. And in these words of tribute, posterity was given a work which ranks with the democratic conceptions of the Constitution and the Declaration of Independence.

"That all men are created equal." We today take this thought for granted; it seems impossible that things were ever any other way. Yet we forget that men were lenging this idea when it was spoken at Gettysburg. And the simplicity of the words might make us forget that Americans have sacrificed for, dreamed of, and built toward this idea for over 180 years, and still do

"It is for us \* \* \* to be dedicated here almost a hundred years since the end of the Civil War, but in those years we have had to pick up arms again to stave off those who would destroy what we believe. And the work is still unfinished. What of the Communists? What of those who seek to wreck what America has built up? Can we turn our backs on the persecution of Little Rock? This, in Lincoln's own words, is the "unfinished work" that is left to us.

"That from these honored dead we take increased devotion \* \* \*." At that time increased devotion \* \* \*." At that time, Lincoln spoke of the dead of the War Between the States; today the list has lengthened. Now it includes the men of the Maine, the dead of Chateau-Thierry, the casualties of Iwo Jima and Normandy, and the stricken of Korea. Today we look to these for the courage we need to defend this

stronghold of freedom.

"That this Nation, under God, shall have a new birth of freedom \* \* \*." The slaves of the 1860's had to be freed; in this, our time, we must uphold freedom by looking again at the internal status of the country. Some seek to exploit labor, and common mobsters prey on those who have to turn in an honest day's work for their living. Only lately there has been a rise in anti-Semitism; the Jewish class is being slandered by those who would censure freedom. It would be well to give freedom a chance to thrive in our own time.

"That government of the people, by the people, for the people shall not perish from the earth." Liberty in America is insured by the people's ability to select the government officials they know will guard their freedom. So it was in 1863; so it must be today. Lincoln realized this, and we would imagine that a few of the Communist oppressed realize it, too. We should be thankful that men of Lincoln's stature knew this without finding it out the hard way, and heed their warning.

The Gettysburg Address shows only a small part of the wisdom of the tall, awkward man who guided the Nation in years of civil strife, but by this isolated example we see clearly that his words carry a message today. The principles of the man who issued the Emancipation Proclamation were liberty and freedom, and these principles must apply today to insure that "government of the people, by the people, for the people shall not perish from the earth."

#### International Trade

EXTENSION OF REMARKS

OF

#### HON. PHILIP A. HART

OF MICHIGAN

IN THE SENATE OF THE UNITED STATES Thursday, September 1, 1960

Mr. HART. Mr. President, early this month I had the opportunity to review

speech which Mr. William vanden Heuvel, of New York, prepared for presentation to representatives of the Foreign Press Association in New York City.

Mr. vanden Heuvel is one of the promising young men of our Nation, deeply concerned with devoting his energies to public service through public office. He has worked with Gen. William J. Donovan, with then Gov. Averill Harriman in New York, and was special assistant to the U.S. Ambassador to Thailand. His service with the International Rescue Committee has given him an opportunity to know firsthand the complex and potentially explosive problems of working along the frontiers of the Iron Curtain.

In his remarks concerning a program for our Nation's international trade policies, Mr. vanden Heuvel has shown insight into factors which must be considered in bringing about an imaginative and enlightened trade program for the United States

I ask unanimous consent that these remarks by Mr. William vanden Heuvel on international trade be printed in the Appendix of the RECORD.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

#### INTERNATIONAL TRADE

Throughout this presidential election year, communications media have continually bombarded us with words like "crucial," "important," and "vital." Much as I dislike to recall these hackneyed terms, I think you will agree that U.S. international trade policies merit the most urgent consideration.

For too long international trade has been treated as an isolated subject. A prime shortcoming of the Republican administration is its failure to act on the reality that international trade is but one thread of the complex fabric that makes up our foreign policy. This fabric is composed of State Department representation, of trade, of military aid, of defense supports, of the Development Loan Fund, of the Inter-American

Bank, and of cultural exchanges.

Our topic today is trade, and its ramifications are of the greatest breadth and im-

Raising or lowering tariffs involves more than merely making it harder or easier for a nation to sell its products to us; more than creating or reducing competition for U.S. producers; more than bettering or worsening the employment structure of a particular industry. It involves improving the economic health of the entire free world and insuring that the uncommitted nations of the globe become committed-to our cause.

Foolish and wise trade policies have an immediate effect on America's hopes for a

free and peaceful world.

Nothing can do more than foolish trade policies to drive the uncommitted or newly emerged nations into the Soviet bloc. ing can do more to weaken the friendship felt for us and the reliance placed on us by those nations whose trade and economic survival depend on our leadership.

A wise American trade policy, on the other hand, permits the nations of the world to each other's needs, to raise living standards, and to maintain domestic stability. A nation without markets cannot buy from other countries; and a nation unable to market its products in the free world will turn to the Communists, as the distressing example of Cuba has so recently demonstrated.

Despite the wishful thinking of our conservative friends, the world continues to change. A new set of challenges and opportunities confront us in the 1960's. Senator Kennedy has referred to these as the "New Frontier." International trade is no exception. New frontiers must be explored and conquered.

A primary economic challenge we must meet in the 1960's is the rise of the free trading groups of Europe and, potentially, Latin America. As you know, these groups are working to reduce tariffs and, eventually, to eliminate them altogether within the trade area. Tariff reduction will soon give the six-nation European Common Market more international transactions than we have ourselves and the period of undisputed American leadership in world trade will have passed. However, the added strength and prosperity of these new groupings can be all to our advantage provided they act in the free world as a constructive force and not as a source of division. Wise American policies can help set the path that they follow.

An even greater challenge is provided by the emergence of the newly free yet underdeveloped nations of the world. Each of them desires to move from primitive existence into our bustling, exciting, and creative world. These nations know now that life need not be Hobbesian—poor, nasty, brutish, and short. Their people will not tolerate for their children what they have themselves endured. They need help. But they need more than grants and loans. They need the freedom to sell us the produce of their farms, their mines, and, increasingly, their factories. They want the self-respect of earning their way into the family of nations. And they must have it.

The Soviet Union, as one would expect, has heard and heeded these new challenges. Its state-controlled trading system enables it to integrate its trade and foreign policy into a cohesive program. Soviet bloc trade with the free world is rising at a rate of more than 20 percent a year. Since 1955, Russia and Red China have launched a trade offensive aimed toward the nations of Asia and Africa, beguiling them with offers of markets for their products and imports at prices they can afford.

The free world cannot afford to ignore this threat. Trade gives power, and Soviet power is concentrated in the hands of a state dedicated to our destruction. We must bear these hard facts in mind as we plan our new steps on the world.

In 1947 a great economic challenge was met by a Democratic administration when General Marshall launched the plan that bears his name. We dare not be less imaginative and courageous.

The European nations must be encouraged to assume their share of the responsibility. I agree with the London Economist when it says "everything suggests that a new tide is racing which could determine whether the decade and a half from 1960 to 1975 will repeat the last 15 years of success—but this time, with Europe allied to America as intelligent benefactors, and with the poorer countries outside of Europe as the immediate recipients." Europe must join us now in a bold program of spreading the opportunity of economic growth to the poorer nations of the world. By so doing we shall insure the continued blessings of freedom and prosperity for recipients and benefactors alike.

Typically, the Republican administration has seen but dimly the outlines of the new issues. And it has thoroughly lacked the imagination, the skill and the willpower to devise the new policies which our welfare demands. Halfhearted compromise will not suffice. Eight years in office have taught the Republicans—belatedly, it is true—some of the merits of the Reciprocal Trade Agreements Act. But this act was drafted by Democrats to solve problems of another era. New problems demand new solutions. History once again has passed the Republicans by.

The Trade Agreements Act comes up for renewal again in the 87th Congress. Let us start to plan now for the improvements that are required.

The statement of purpose written into the act in 1934 still stands; To expand markets for U.S. exports and to permit greater imports. The time is now at hand to add to the purpose of this legislation.

A new statement of purpose should be enacted to instruct the President to take account of all the different American interests affected by international trade. Consumers want freedom to buy. Producers want freedom to sell. Taxpayers want trade to replace aid. All of us are interested in peaceful and profitable trade serving the interests of world peace and prosperity.

interests of world peace and prosperity.

A new statement of purpose should direct
the President to use the power of U.S. trade
policy to advance our strategic interests in
strengthening the free world and meeting
the challenge of Soviet trade.

We are in the absurd position of entrusting the President with the power to risk the destruction of countless lives in war over Quemoy, yet denying him the authority to stimulate mutually profitable world trade.

Beyond this, the single most important step we can take to advance our foreign trade policy is to reduce tariffs and quota restrictions. We cannot continue to insulate American producers from foreign competition by subsidizing inefficiency. Low productivity in the long run means low wages for working people and low profits. We should ease the path of adjustment, but adjust we must.

I favor lower tariffs and lower quotas. But because I view this as a national policy, I oppose requiring any one economic group to pay for it.

I, therefore, favor assistance to groups adversely affected by tariff reductions. I mean aid to men put out of jobs, to companies forced to go out of business, and to communities economically choked.

This help should go to those who demonstrate a willingness to help themselves. Working people should be given aid to train for new jobs and to relocate. Employers should be granted special income tax considerations as they seek new lines of production. Special efforts should be made to direct defense and public works projects to hard-hit communities, to give them an opportunity to recover.

portunity to recover.

The "escape clause" in the Trade Agreements Act must be strengthened to give such protection to American workers and businessmen. Right now the "escape clause" is drafted in terms of preventing economic hardship to industry. It does not mention hardship to working people. It does not speak of community hardships. The "escape clause" must be redrafted to enable the President to act in all these circumstances.

The Tariff Commission administers the Reciprocal Trade Act. It is an open secret in Washington that the Commission is seriously understaffed. \* \* \*

Just as U.S. foreign trade policy is only one thread of our total foreign policy, so too must our international trade policy be woven in with that of our friends and allies around the world.

Between the two World Wars we experimented disastrously with a go-it-alone policy on trade. The result was chaos, and our trade declined along with that of other nations. Since the last war, through the General Agreement on Tariffs and Trade (GATT), we have learned some of the benefits of reasonable cooperation. We have learned that everyone gains if mutually agreeable ground rules for trade are set. Disputes can be resolved amicably and the volume of trade promoted.

But GATT must be strengthened. It needs a full-time secretariat to iron out day-

to-day routine disputes. In addition, it should be expanded. For example, although agricultural export nations face serious marketing difficulties, through an expanded GATT, we can urge our trade partners to remove currency controls and import rastrictions discriminations against U.S. imports. Removal of such discrimination would immediately stimulate American exports and ease the pressure on our balance of payments.

I have spoken of the great new forces in world trade—the drive of underdeveloped nations; new trade blocs; the competition of Soviet state traders; the American balance-of-payments difficulty. I have tried to show that none of these problems can be solved unless international cooperation replaces economic nationalism.

The President must have new and adequate authority to negotiate new arrangements to cope with new situations. The economy must be permitted to adjust to foreign competition, mindful of the burden that this represents to specific sectors of our economy. The General Agreement on Tariffs and Trade must be strengthened and expanded.

A policy based on these principles will release the full latent vitality of the American economy. It will wipe out the current annual balance-of-payments deficit. It will encourage and unite the free nations of the world. It will help lead the new trade blocs into fruitful international cooperation. And, perhaps most important, it will help underdeveloped countries to economic maturity and stability in freedom.

and stability in freedom.

If elected to Congress, I shall work with all my heart to promote such a policy.

#### Crisis on the Commuter Railroads— No. 11

EXTENSION OF REMARKS

## HON. DONALD J. IRWIN

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES Thursday, September 1, 1960

Mr. IRWIN. Mr. Speaker, during the course of the 86th Congress I have introduced into the RECORD, from time to time, articles on the general topic "Crisis on the Commuter Railroads."

The New York Times for September 1 published an editorial headed "A Tristate Rail Approach," which falls into this category.

With permission previously granted, I would like to place this editorial in the RECORD.

The editorial:

#### A TRISTATE RAIL APPROACH

Railroad presidents are seldom guilty of understating their gloomy financial outlook, but the decline in passenger service that has already occurred in the New York metropolitan area justifies corporate and public pessimism. George Alpert, president of the New York, New Haven & Hartford Railroad, told an Interstate Commerce Commission hearing that his company's present financial position was precarious. He added: there is no upturn in freight, and we don't get help in fare increases, and we don't get tax relief, in my opinion the disintegration, the cessation of operations as a private concern by the New Haven is not far off." He said the New Haven needed \$24,500,000 annually to rehabilitate its passenger fleet and provide comfortable and efficient service.

Mr. Alpert is repeating his own dire warnings of the past. He is confronted by the fact that if he is to get really effective help he must persuade not merely the ICC, but also several States from which tax relief or actual subsidy must most likely come. When the Long Island Rallroad had to be saved, because of its vitally important commuter service, New York State alone was affected and made, by agreement with the parent Pennsylvania road, a legislative solution that proved successful. For commuter purposes salvation for the New Haven must come from at least two States, Connecticut and New York, and cooperation between those States on rail problems has been virtually nonexistent.

So we come once more to the question whether a really comprehensive approach to the rail commuter problem, involving New York, New Jersey, and Connecticut, is too difficult for the statesmen of these States to arrange. No one in a position of official leadership offers initiative. Is the problem too big, or the chance of success too small?

#### Resolutions Adopted by the New York State Sheriffs' Association

EXTENSION OF REMARKS

OF

## HON. JACOB K. JAVITS

OF NEW YORK

IN THE SENATE OF THE UNITED STATES Thursday, September 1, 1960

Mr. JAVITS. Mr. President, I am pleased to call to the attention of my colleagues in the Senate two resolutions adopted at the 26th annual conference of the New York State Sheriffs' Association, which was recently held at Scaroon Manor in Warren County, N.Y.

I ask unanimous consent that these two resolutions may be printed in the Appendix of the RECORD at this point.

There being no objection, the resolutions were ordered to be printed in the RECORD, as follows:

FBI NATIONAL ACADEMY

Whereas July 29, 1960, marked the 25th anniversary of the founding of the FBI National Academy; and

Whereas the Academy has rightly been characterized as "The West Point of Law Enforcement"; and

Whereas professional law enforcement officers are selected to be trained at the Academy as executives and instructors so that they, in turn, may teach other officers; and

Whereas with the graduation of the 65th session of the Academy, on June 8, 1960, 3,878 officers from all of our 50 States; the District of Columbia; Puerto Rico; and many foreign countries, have completed training at the Academy; and

Whereas several members of this association are graduates of the Academy; and

Whereas the Academy is the brain child of Director J. Edgar Hoover, who has consistently opposed a Federal police agency and has as consistently held that in a democracy law enforcement is first and foremost the responsibility of local officers: Now, therefore be it

Resolved, That this association congratulate Director Hoover not only for his farsightedness in setting up the Academy, but, as well, for the excellance of instruction there afforded, which is kept flexible to meet current challenges to law enforcement officers; and be it further

Resolved, That we commend Director Hoover for his consistent opposition to a Federal police agency, with which this association heartily agrees, and for his oftrepeated pronouncement that law enforcement is first and foremost the responsibility of local officers, with which we also heartily agree; and be it further

Resolved, That copies of this resolution be sent to Mr. J. Edgar Hoover; the Attorney General of the United States; Gov. Nelson A. Rockefeller; and to U.S. Senators Jacob K. Javits and Kenneth B. Keating, as a record of the action taken here today.

RESOLUTION FAVORING AMENDMENT TO SECTION 605 OF THE FEDERAL COMMUNICATIONS ACT

Whereas the U.S. Supreme Court has interpreted section 605 of the Federal Communication Act to mean that evidence obtained by wiretapping is inadmissible in the courts of this State, even though such type evidence was obtained after the issuance of a court order permitting same and in compliance with the statutes of this State; and

Whereas this seriously impedes those charged with the duty of enforcing the law in this State, and, at times, nullifies their efforts in attempting to do so: Now, therefore, be it

Resolved, That this association go on record as favoring an amendment to the Federal Communications Act so that evidence legally obtained by wiretapping in any State may be admissible in the trial of a criminal case; and be it further

Resolved, That copies of this resolution be sent to U.S. Senators Kenneth B. Keating and Jacob K. Javirs, as a record of the action taken here today.

#### Reducing the Budget

EXTENSION OF REMARKS

#### HON. LAWRENCE BROCK

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES Thursday, September 1, 1960

Mr. BROCK. Mr. Speaker, under the privilege granted me to revise and extend my remarks in the Record, I am submitting the following statement regarding appropriations.

During the 2 years of this Congress we have considered appropriation bills representing many billions of dollars of the taxpayers' money. Coming from the conservative State of Nebraska, it was necessary for me to evaluate these appropriation bills on the basis of their merit to my State and the needs of the Nation.

At various times it became necessary for me to cast a negative vote in instances where, in my judgment, the requested appropriations were not in the best interests of the taxpayers of Nebraska and the rest of the Nation.

Accordingly, my votes on amendments and final passage of various appropriation bills during the past 2 years have accounted for reductions of over \$12 billion less than the amounts that were requested in the President's original budgets.

An analysis of the record for the first session of 1959 indicates my voting to the extent of reducing the President's budget requests by almost \$6 billion, for approximately 7.2 percent of the total budget.

In the final 2d session of the 86th Congress, this reduced figure amounted to over \$6 billion, a total of approximately 8.6 percent below the requested appropriations by the executive departments.

Following is a compilation of my votes on appropriation bills for fiscal years 1960-61:

	President's budget request	BROCK votes to reduce		President's budget request	BROCK votes to reduce
Fiscal year 1960 (1st sess., 86th Cong.)	\$77, 200, 000, 000	1 \$5, 659, 000, 000	Fiscal year 1961 (2d sess., 86th Cong.)—Con. Includes following reductions—Con.		***************************************
Fiscal year 1961 (2d sess., 86th Cong.): Includes following reductions:			Public works Mutual security Special items:	\$4,001,016,180 4,181,704,000	-\$86, 217, 19 -3, 589, 750, 00

Public Finance

SPEECH

OF

#### HON. FRED SCHWENGEL

OF IOWA

IN THE HOUSE OF REPRESENTATIVES Wednesday, August 31, 1960

Mr. SCHWENGEL. Mr. Speaker, the gross public debt of the United States now stands at \$2881/2 billion. The manner in which this huge public debt is managed means a great deal to the American people. If it is managed wisely, the prospects for healthy and sustained economic growth will be enhanced; if it is managed improperly, all of us will suffer.

Because debt management is so important to the American people, it is indeed unfortunate that some of the Members of this body have seen fit to strike out, irresponsibly and emotionally, at the efforts of the Treasury to handle our \$2381/2 billion debt in a sound and sensible manner. On August 25, the gentleman from Wisconsin [Mr. REUSS]. assisted by some of his associates on the other side of the aisle, presented a lengthy discourse on recent and prospective debt management actions. The statements made by these gentlemen cannot be allowed to go unanswered.

My sole purpose today is to separate fact from fancy, truth from fiction. Several volumes would be required to give full treatment to all the erroneous points made by the gentleman from Wisconsin. Thus I shall have to content myself with a brief discussion of some of the more flagrant errors and misrepresentations.

But before I do that, it is important to point out that, as usual, the gentleman from Wisconsin and his associates continue to play the old tune of their Party—they are unhappy with the higher earnings that peoples' savings naturally earn in a prosperous economy. To hear these gentlemen talk, we would have to conclude that the millions of Americans who own some \$42 billion of Savings Bonds should not be receiving 3% percent on their savings, as contrasted with less than 3 percent a few years ago. We would have to conclude that the American citizens who hold 22 million accounts in mutual savings banks, 25 million accounts in savings and loan associations, and over 37 million accounts in savings accounts at commercial banks should not receive the higher earnings on their savings that they have been receiving in recent years. We would have to con-clude that the 112 million people with savings in the form of life insurance should not benefit from the higher interest rates that reduce the premiums on their policies. And we would have to conclude that the many millions who have savings in private pension plans and in Social Security should not benefit from the higher interest earnings that will add to their comfort in their years of retirement.

The fact is, of course, that interest rates rise in a prosperous economy simply because the demand for credit rises at such times. We might for a time be able to keep rates from rising by creating new money-by forcing the Federal Reserve to pump new bank reserves into the system-but the ultimate cost would be disastrous inflation and a precipitate rise in the cost of living. And when the gentleman from Wisconsin refers to the rapid rate of economic growth in Western Europe, he conveniently fails to point out that the most rapid growth has been experienced by precisely those countries which have permitted interest rates to respond to the forces of demand and supply and the impact of appropriate monetary policies. West Germany, which effectively stabilized her currency in 1948, is the prime example, but many others could be listed.

The first major point the gentleman from Wisconsin makes about debt management (CONGRESSIONAL RECORD, August 25, pages 16481-16490) is that the Eisenhower administration has failed to take advantage of "golden opportunities" to lengthen the maturity of the public debt, which he admits is too short. The debt is indeed too short in maturity, and to postpone effective actions to lengthen it can only lead to severe difficulties later on, as more and more of the Government's outstanding securities get closer

and closer to maturity.

But the gentleman fails to point out that most of the dangerous shortening of the public debt occurred between 1946 and 1952, when an earlier administration took almost no advantage of the artificially low interest rates then prevailing to put the debt in better shape. In that period, only \$5 billion of marketable securities maturing in over 5 years were sold. From 1953 to the present, the Treasury has sold \$51 billion of such securities, or 10 times the amount under the previous administration. The facts speak for themselves.

The gentleman strikes out at the administration's request for removal of the harmful and capricious 41/4 percent interest rate ceiling, which prevented the Treasury from engaging in any debt lengthening at all for almost a year. He states that "committees of the Congress, including the Joint Economic Committee, reviewed the merits of the administration's plea for a free hand and came out confirmed in the conclusion that there was no persuasive need for the elimination of the 41/4 percent statutory ceiling \* \*

What are the facts? The responsible legislative committee, the Ways and Means Committee of this body, did indeed review the need for removal of the ceiling, and on February 29, 1960, favorably reported a bill (H.R. 10590) which, for all practical purposes, would permit the ceiling to be exceeded. The gentleman knows very well why this bill never received consideration on the floor of the House; it was blocked by the militant liberal group of which he is a member. But it is a flat misrepresentation to state that committees of the Congress turned down the administration. The only responsible legislative committee in fact saw clearly the need for action and reported out a bill to this end.

The most surprising of the statements of the gentleman from Wisconsin are those directed at the new and promising debt management technique referred to as "advance refunding," in which investors holding Government securities with some time to maturity are induced to exchange for new long-term securities. Observers who have genuine interest in sound restructuring of our huge public debt, and who are not motivated by partisan considerations, agree that this technique provides the best method for achieving some meaningful debt exten-

Indeed, one would think that the gentleman himself thought so, if his past actions are indicative of his beliefs. Just short of a year ago, on September 4, 1959, the House was considering H.R. 9035, which included an amendment to the Internal Revenue Code for the express and declared purpose of facilitating advance refunding. What were the gentleman's remarks concerning this legislation? His precise words were: \* \* \* this is a good bill." (Congres-SIONAL RECORD, vol. 105, pt. 14, p. 18169.)

What are the gentleman's objections to advance refunding? He stoutly maintains that it would be far preferable to achieve needed debt extension by selling new long-term bonds for cash, and he roundly criticizes the Under Secretary of the Treasury for pointing out, in a recent speech, the elementary fact that long-term bond sales for cash absorb funds that would otherwise be available for other types of long-term securities. He refers to the Under Secretary's remarks as a "kind of midsummer madness."

I suggest that the shoe is on the other foot: if there is any "midsummer madness" involved, it is not on the part of the able Under Secretary of the Treasury, but the gentleman who so rashly and immaturely criticizes him. What the Under Secretary said, in essence, is that heavy cash sales of long-term bonds should not be used to achieve all of the debt extension that is clearly desirable. While some debt extension should surely be achieved in this way, the massive job to be done requires use of new and less disruptive techniques. When a new long-term bond is sold for cash, new savings are absorbed; if large amounts are sold, the effect is to deprive homebuilding, State and local governments, and other borrowers of the long-term savings they need-and which the economy needs.

An advance refunding would not, however, absorb long-term savings, because the technique would involve the exchange of one Government security for another. A long-term investor would simply replace one security which he now owns, and which has 5 to 10 years to run, with a new security with 20 to 30 years to run. The debt would indeed be extended, but without robbing residential construction, State and local governments, and other long-term borrowers of the funds needed for their important projects.

But the gentleman is not content to stop with his unreasoned condemnation of the Under Secretary's remarks-he goes further, and recommends strongly that the Treasury sell large amounts of long-term bonds for cash in periods of recession. This would indeed be a foolish and dangerous thing to do. It is precisely at such times that, although interest rates are of course low, the construction industry and State and local governments should be receiving a maximum amount of long-term savings, to promote their own activities and thus to stimulate economic recovery.

The fact is that nothing worse could be done, to stunt recovery from a recession, than for the Treasury to flood the long-term capital market with bonds at such times. It is indeed very surprising to hear a member of the opposition party advocate such a course of action; in so doing, he is acting directly contrary to the advice of the party's leading economic advisers. For example, Professor Seymour E. Harris, of Harvard, who is reported to be one of Senator Kennedy's closest advisers, has said:

Selling long-term Government securities in the midst of a recession is foolish and costly. \* These securities compete with private enterprise and keep rates up.

This statement was in testimony before the Senate Finance Committee in mid-April 1958.

Mr. Speaker, much more could be said about the economic fallacies, misrepresentations, and distortions in the remarks of the gentleman from Wisconsin before this body on August 25. But these few points which I have discussed today make it perfectly clear that partisan considerations have been permitted. to cloud the discussion of a very important issue. If we are to achieve a high and sustained rate of economic growth, provide abundant employment opportunities, and prevent further rises in the cost of living, we shall certainly not be able to do so by engaging in shallow and misguided attacks on the very policies which are necessary to achieve these vital goals. Sound debt management is only one of these policies, but it is an important one. It is toward clarifying this important issue that my remarks have been directed today.

## Ukrainian Congress Committee of America Celebrates 20th Anniversary

EXTENSION OF REMARKS

#### HON. CARL ALBERT

OF ORLAHOMA

IN THE HOUSE OF REPRESENTATIVES Thursday, September 1, 1960

Mr. ALBERT. Mr. Speaker, this fall marks the celebration of the 20th anniversary of the creation of the Ukrainian Congress Committee of America, an organization of some 2½ million Americans of Ukrainian descent.

The purpose of this unique organization is to make the American public aware of the situation existing in the U.S.S.R. This "prison of nations" encompasses 15 supposedly independent nations of which the free governments of three—Estonia, Latvia, and Lithuania—still are recognized by this country

Joining together, Americans, bound to these captive nations by ancestral and traditional ties, are devoting their efforts to dispelling the widespread misapprehension of peace and harmony within the Soviet Union. Many of these nations still actively seek their freedom. While we cannot afford to underestimate the power of the U.S.S.R., we need not be absorbed nor overwhelmed by a national purpose and unity which does not exist under Soviet domination.

Mr. Speaker, I join in the salute to these loyal Americans on this 20th anniversary of the formation of the Ukrainian Congress Committee of America. Their dedication to the peace and security of our Nation should be an inspiration to us all.

#### There Ought To Be a Law on Strike Votes

EXTENSION OF REMARKS

## HON. BARRY GOLDWATER

OF ARIZONA

IN THE SENATE OF THE UNITED STATES
Thursday, September 1, 1960

Mr. GOLDWATER. Mr. President, I ask unanimous consent to have printed in the Appendix of the Congressional. Record an article authored by Mr. Maurice Franks, president of the National Labor-Management Foundation, which emphasizes the necessity for a Federal law requiring that economic strikes be authorized by a secret ballot of the affected employees. This article entitled "There Ought To Be a Law on Strike Votes," recently appeared in Spotlight, a periodic publication of the Committee for Constitutional Government, Inc.

Mr. Franks, a former national business agent of the Railroad Brotherhoods and a man very knowledgeable in the day-to-day operations of a large labor organization, sets forth in his article certain criteria and standards which he feels should be followed in strike authorizations to assure that the final decision is made in a truly democratic manner by those who will suffer the economic consequences of a strike. He advocates that these standards of democratic procedure be guaranteed by Federal law.

A bill, S. 3598, introduced by Senator Karl E. Mundt late in this session of Congress embodies many if not all of Mr. Franks' recommendations. Sufficient time did not remain in the 86th Congress to make a thorough study of the Mundt bill; but I sincerely hope that it will be reintroduced in the 87th Congress, for I agree with Mr. Franks that this is an area of labor-management relations which needs the urgent attention of the Congress.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THERE OUGHT TO BE A LAW ON STRIKE VOTES

(By Maurice R. Franks)

One of the most vicious afflictions the economic life of this country continues to be burdened with is the number of unnecessary strikes that each year deprive workers of sustained employment and of the productivity rewards they deserve. Equally brutal is the retarding effect these strikes have on industrial efficiency and planning for future development. The public is also a victimalways to the extent of inconvenience, sometimes to the point of downright abuse. Finally, the loss of badly needed Government revenue is another staggering cost of the industrial stagnation modern strikes engender.

The application of the term "strike" to these modern work stoppages is, of course, nothing short of charitable; for the simple truth is they are frequently nothing but rank counterfeits of a genuine strike's meaning and purpose. Few, if any, of them represent the will and determination and sacrificial last resort of workers to wring what justice they can from a solid front of hard-boiled employers. Our state of social progress is presently too far advanced for any such grim necessity. What all too many of our modern work stoppages in bleakest fact amount to is the ruthless slaughter of every other consideration in abject service to the special interests of union leadership.

#### GROWTH OF UNION BOSSISM

Three strictly modern forces have given organized labor an entirely new face—the face, no longer of the American worker, but of the big labor boss who rules his union. Those three forces are compulsory unionism, industrywide bargaining, and the principle of "no contract, no work."

By harnessing these three powerful forces, the head of an international labor union is in a position to wield majestic power—over his membership, over the industry he bargains with, over the public that is served by it, over the sales of suppliers and dealers, over local trade and commerce, and even over the governments of State and Nation which, to function, must tax all wages and profits.

And wield such power the labor leader does, with high-handed arrogance and boisterous self-acclaim—whether he be a McDonald, a Reuther, a Hoffa, or almost any other international union officer whose name today makes headlines.

It is he and he alone who can pull the "strike" that shuts down an industry—all at once, as McDonald for 116 days last year shut down our steel industry; or enterprise by enterprise until the full pattern has been realized, as has been Reuther's studied technique with our auto industry.

#### COERCION AT THE BARGAINING TABLE

Here's how the thing works: A union-management contract has 60 days more to run. The union-meaning the union's bossmanlays before a management or a group of managements a schedule of demands. What now takes place is, in theory at least, collective bargaining-2 months of supposedly equitable contract negotiations between labor and management. The term, however, needs some editing-in the light of what these extended meetings today really amount to. Collective bludgeoning" would be a lot more descriptive. For, as both parties sit there, discussing the pros and cons of the union's demands, with little or no time to devote to management's expressed needs, both see the weapon the union leader already has with him. It's there in plain view on the table. It's a cudgel, the heavy end of which is embossed with the slogan, "No contract, no work." That cudgel is the shutdownthe so-called strike-the union leader singlehandedly can order at the end of the

present contract if he doesn't get everything he wants in the new contract.

#### LABOR REGARDED AS A COMMODITY

Both parties know that no strike vote has to be taken to shut down the employer's operations. Not a single member of the union need ever be consulted as to whether he'd prefer to accept the employer's last offer as the basis for a new contract or whether he'd prefer to "hit the bricks" and march up and down outside for a month, 3 months, or maybe a year. There's the cudgel for one and all to stare at.

Given this circumstance, the union's members are obviously no longer freemen—no more free than are their employers. Today they are treated as the very thing labor always insisted it wasn't—a commodity. Voiceless if not witless, workers are condemned to stand apart like so many slaves while their services are priced and tagged, not today by the employer, but by the very union leader who claims to represent them. They aren't citizens of their union; they are as a drove of sheep, whose shepherd may be a messiah but who as likely may be a Judas.

The saddest part of this existing situation is what it does to the dignity of our workers. But there are other impacts that connect with far more than sentiment. There's the hard, cold fact that employers in the end can be bludgeoned into coming along. And even the strongest willed among them eventually yield, soothed perhaps by the knowledge that, when all else fails, the consumer can be made to pay the freight in the form of increased prices. But the effect of this, as all of us have seen, is more inflation-and inflation is hurting us all at home and will hurt us more and more abroad as high prices for American production undermine and soon may destroy our foreign markets. Already, even as our export trade comes closer and closer to falling behind our international needs, locally competitive foreign goods-from steel and autos on down to the smallest items of trade-are pouring into the country, tariff or no tariff, to win a goodly share of our consumer dollars. Our gold supply is flowing to foreign treasuries, one reason for which is easy to surmise.

Let's not forget for one instant that the survival of our country is being seriously challenged today, not by armed rivals but by efficient foreign enterprise working full time with labor costs geared realistically to production. In the larger sense, we aren't being challenged by an arsenal of Soviet nuclear weapons but by Soviet technology and the economic war the Kremlin's masters of slave labor have openly declared on America. The Russians are working to direct incentives, not to the reverse, as exemplified by our long work stoppages that gain for our labor less in the end than the total cost of having been so long out of work.

The way to meet such competition is to pull ourselves together, get things straight and see who should be who in the industrial picture. Our workers have a vital stake in the American economy and should therefore be the sole ones to decide what strikes are warranted. No labor leader should have a right to push them into economic suicide.

#### THE LOSSES DUE TO STRIKES

We have listed the direct losses inflicted by extensive work stoppages—losses in wages, profits, sales, local business, public convenlence, taxes. But there are indirect losses as well, and these are—or should be—just as obvious:

There's the added cost of public welfare in States which entitle strikers to such relief. There's the cost of preparing expensive plant equipment for shutdown, plus the later cost of restoring it to operation. There are layoffs of other workers whose jobs are indirectly dependent on the struck enterprise. The

list continues indefinitely as we note the interlocking effect of all business and industry. But there are also other losses that may not at first be so obvious.

By tolerating irresponsible strikes-which, as we have pointed out, are less strikes than the spoiled-child tantrums of labor leaderswe encourage the departure of American industry to foreign soil, where such goings-on are by no means tolerated and where, as a result, conditions are far more favorable to enterprise. Millions—yes, billions—of American industrial dollars are presently being invested in foreign-soil production facilities. Already American manufacturers are producing goods in foreign lands with foreign labor-not only for foreign markets but for the American market as well, in competition with American-made products. If this trend continues to the point where American manufacturers cannot afford to employ American labor to meet such com-petition, the time will surely come when millions of American workers will be walking the streets, out of work and wishing to heaven they'd cut their union leaders down to size while yet there was time. Here's a

#### LOSS OF PRESTIGE

loss that should wake us up, but pronto.

Such strikes as we are discussing likewise cost our Nation plenty in the way of international prestige, make no mistake about that. What kind of leadership can America offer the world, people abroad are already asking each other, when it can't keep its own house in order?

This is another important loss—one that ties in with the competition the Soviet Union is already strenuously offering us in the all-out war for men's minds, and wherein, as in a shooting war, it is to our best interest to "Praise the Lord and pass the ammunition."

#### UNIONS LOSING FACE

Finally-and this, if not checked, can even spell curtains for organized labor-there is the observable loss of popular faith in the very institution of collective bargaining. Workers who are unionized and those who are not are rapidly losing such faith. Even though endowed by the institution of compulsory union membership, the unions of this country are not growing in numerical strength. They are standing still, with a total membership no greater than it was 10 years ago; notwithstanding the fact that in that same decade we have added 10 million workers to the national payroll. This in a day of rising employment means actual retrogression. Workers, except when compelled by union-shop contracts to join the union or lose their jobs, just aren't signing up. They don't take kindly to modern union bossism, and the public is of no mind to encourage them to organize.

The labor leaders themselves are aware of this downgrading, and no less a figure than the Machinist's International Union President Al Hayes has openly declared that unionism today is near the bottom of the barrel in public esteem.

The situation, I agree with Hayes, is pitiful; but the labor leaders have only themselves to blame for it. The public is reacting not only to all the crime and corruption shown by the McClellan Rackets Committee to exist in the labor movement, but also to a like degree to the strike history of organized labor in this modern day and age when, paradoxically, industrywide work stoppages are no longer necessary to gain economic justice for the American worker.

#### MORE UNION DEMOCRACY NEEDED

The time has, therefore, come to move in on the problem and settle it in the interest of one and all. Our need today is to reduce as far as possible the number of strikes, industrywide or otherwise, that each year

assault our economy without in any way discrediting unionism as an institution.

The best approach to this problem certainly isn't to give the labor leaders everything they want—and on a silver platter at that—it is to divest them of their present arbitrary power to pull strikes and to deposit with the workers themselves the right, by majority referendum vote and a dependable secret ballot, to decide whether they will accept the employer's last offer or go on strike.

Full union democracy is the answer to this baffling problem. The American worker knows which side his bread is buttered on, and if given the proper legal mechanism will bring justice back into collective bargaining for the good of all concerned.

Much progress in the direction of union democracy has been made via the recent Landrum-Griffin Act. Here, indeed, if properly interpreted and enforced, is a sound basis for an all-out bill of rights for labor. Union officers must now be honestly and democratically elected, and this is an important first step to be taken in the direction most of us desire. But another step now waits to be taken by the lawmakers of these United States—one that will guarantee full democratic rights to union members in a matter as vital to them as possible strike action.

#### PROVISIONS OF STRIKE LAW

No strike should be given legal sanction until a majority of the affected union's membership shall have approved it by a dependably supervised secret ballot, conducted only after the existing contract has terminated and only after the employer's final offer has been communicated to the employees, so that they themselves may compare it with their union's final demand.

Such procedure would give the union no cudgel to wave at the management negotiators and would insure bargaining in good faith by both sides throughout the 60-day negotiating period already required by section 9 of the Taft-Hartley law. It would place the union and the employer on an absolutely even footing, as they should be, throughout their formal negotiations. It leaves the final decision as to whether or not there'll be a strike fairly and squarely up to the employees of the affected enterprise or industry. Finally, it puts this all-important question to them only after the prevailing contract has expired.

"1. The referendum strike vote must be by secret ballot, dependably supervised by a special election committee. Such committee to be composed of a duly authorized representative of the union, a duly authorized representative of the employer, and a jointly agreed upon representative of the public.

"2. This election committee to be selected in the course of negotiations and on the 40th day thereof, if on that day negotiations are deadlocked, the committee will have the authority to go into action and set the stage for a possible referendum strike vote, such strike vote to be taken 20 or more days later if, on the existing contract's expiration, no new settlement has been reached.

"3. The committee will have the power to set the time of the election convenient to all work shifts. It will also designate the voting place—union hall, company premises or, preferably, neutral ground. The election committee will also settle on the method of balloting to be used—whether by machine, paper ballot, or secret postal ballot.

"4. The committee—acting always and only

"4. The committee—acting always and only as a body—will supervise and safeguard all voting, will count the ballots, and will certify the result.

"In the event of an affirmative vote, the complete walkout shall be delayed by as many days as may be required for the needed number of workers to prepare all production facilities for an extended shutdown as recommended by this committee.

"5. The election committee should have the authority that in the event of a back-towork movement this committee would arrange for another vote to be taken under the same conditions as the strike ballot.

"The majority vote of this committee would constitute the authority for the taking of such vote.

"6. In the event of a no-strike vote, the employer's last offer will be put in the form of a contract and signed by the recognized representative of the union. All covered by the old contract which did not come up for renegotiation shall be automatically written into the new.

"7. The penalty for any failure on the union's part to live up to the full letter of such law as might embody the foregoing proposals would be immediate decertification. The offending union would cease to be regarded by the National Labor Relations Board and by both the employer and his labor force as the bargaining agent for employees af-fected. In addition, a tax status penalty would be put into effect at this point."

#### SUMMARY OF AIMS

This proposal, if enacted into the labor law of our country, would, in my considered opinion, guarantee to union members the highest offices of union representation and would at the same time protect them and the American public against the undemocratic and dangerous practices of selfish union leaders. Through the system of the secret ballot, protected by an election com-mittee as outlined herein, the hazard of unnecessary strikes would be greatly reduced, if not totally eliminated.

This would not be union busting in effect; on the contrary, it would be union building in unionism's own highest democratic sense.

Finally, it would, I suggest, bring commonsense back into the labor-management picture, would spread new confidence throughout the American economy and, by putting a stop to one of the most powerful of today's inflationary forces, would establish our national prosperity on a sounder footing than it rests on today. It would enable American business and industry to develop the pro-duction efficiencies needed to meet foreign competition on these shores and abroad.

Finally, it would create greater respect for the unions that is so much needed if the institution of American unionism is to long endure.

The kind of strikes engineered by labor bosses, which plant seeds of disaster in the American economy, run counter to the desires of our workers, who will reduce them if enabled to express their will.

#### The Need for Action

EXTENSION OF REMARKS

#### HON. DONALD J. IRWIN

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES Thursday, September 1, 1960

Mr. IRWIN. Mr. Speaker, it is re-assuring that the administration has finally recognized the need for an urgent reexamination of our Latin American policies. I hope that the program adopted by the Congress before its adjournment proves to be neither too little nor

too late Unquestionably, the need for urgent action has been obvious for some time. It is unfortunate that so much precious time was lost in recognizing the need and doing something about it.

Vision magazine's Latin American letter was one place where the need was recognized and I would like to introduce into the RECORD at this time this publication's July 7 editorial on "The Need for Action."

The editorial:

#### THE NEED FOR ACTION

If there ever were a time to speak out on the need for an urgent reexamination of our Latin American policy, the time is now. mounting crisis in Cuba, the growing unrest in Venezuela, the recent bloody clashes between Peruvian police, Chimbote port workers and peasants from Chepén, the openly anti-American tone of the elections in Ecuador, and, finally, Castro's secret plans to follow up the July 26 Youth Congress in Havana with Tokyo-type student riots throughout Latin America, have dealt a shattering blow to Washington's policy of complacency in this hemisphere.

At stake today are more than oil refinerles and sugar quotas. Our whole position of leadership and partnership in this hemisphere, and possibly in the entire Western World, is imperiled. We believe that if the United States is not successful in preserving and developing a strong and vital asso-ciation of free peoples in the Western Hemisphere, serious doubts will be cast on its ability to lead the free world.

those who reject this reasoning as alarmist we say this: Remember that exactly 20 years ago, while Hitler was taking over most of Europe, he was also well on the way to winning over much of Latin America. The Nazis controlled many of the airlines, had a powerful radio propaganda network, were supported by many leading newspapers, and were indoctrinating major armies in Fascist ideology. They had built the best foreign school system and developed an extremely strong business position.

It took a multi-million-dollar crash pro-

gram by the Office of the Coordinator of Inter-American Affairs, especially created to combat this Nazi influence, to reestablish hemisphere unity. This effort, coupled with the emotional appeal of the good-neighbor policy and our large-scale buying of Latin American products, bore fruit.

By the end of World War II we had many friends and few enemies in Latin America. There was little evidence of anti-Yankeeism. Our people, our capital, and our products were welcome.

It took less than 15 years to dissipate this immense reservoir of good will. Neglect, lack of an imaginative policy, and an often overbearing attitude on our part contributed to the paradox in which we find ourselves to-While our investment and commercial activity in Latin America is steadily expanding, our human and political relations are deteriorating at an even faster rate.

Diplomatic rhetoric about the urgent need for paying greater attention to Latin America has not been lacking. Back in 1953, the late John Foster Dulles said: "I have a feeling that conditions in Latin America are somewhat comparable to China in the mid-1930's when the Communist movement was getting started. They were beginning to develop hatred of the American and the Britisher, but we didn't do anything about it.

\* \* \* The time to deal with this same rising menace in South America is now."

And in 1958, Milton Eisenhower, who has been the central figure among those advising President Eisenhower, reported to his broth-"Economic improvement is the greatest single desire of the people of Latin Americaand economic cooperation is without ques-tion the key to better relations between the United States and the nations to the south." But deeds have not matched words in our relations with Latin America.

Today the list of Latin American grievances is a long one and it does not always come from Communists or ultranationalists. It often comes from statesmen and leaders basically friendly to the United States. What they say is that, too often, we have asked for their support of our policies only to turn deaf ears to their needs.

There is considerable truth in this. Latin America has gone along with us on most of our requests. In January 1942, at the Inter-American Conference in Rio, we asked them to sever relations with the Axis Powers They did. In October 1945, they were among the original 50 signers of the Charter of the United Nations and gave us their wholehearted support in this venture. In September 1947, the agreed to the Rio Treaty of Reciprocal Assistance which we had sponsored to consolidate the defense of the Western Hemisphere. In March 1954, at the 10th Inter-American Conference held in Caracas, they adopted the U.S.-sponsored anti-Communist resolution.

But what, in turn, except in the realm of private investment, have we done for them? From the Latin American point of view, not much. While our diplomats talked about the importance of this hemisphere. they directed most of our political and economic efforts to other areas. For the sake of expediency, Washington was often overly friendly to unpopular dictators or strongmen. We gave moral and financial support to the European Common Market, but exceedingly cool toward two of Latin America's most popular economic projects: the common market and the Inter-American Bank. To the former, we have now at last given nominal blessing, and to the latter, we agreed abruptly only after our Vice President was stoned in Caracas.

While we asked them to develop production of their basic commodities to help us in the war effort, both during World War II and during the Korean conflict, only a few years later we slapped a series of import quotas on the same commodities. They understand our domestic problems on the subject, but they cannot understand how the major free world power can let small pressure groups at home influence so strongly its hemispheric economic policy or why it cannot find some way to solve this situation either through subsidies to affected industries or by stockpiling or some other comparable domestic measure.

The disregard of these and other issues, which have been poisoning our relations with Latin America for years, and the State Department's reluctance to acknowledge the seriousness of the situation in Latin America have made it difficult for many Latin Americans-formerly friends of the United Statesto resist Castro's brand of Marxist nationalism. It has also encouraged the Kremlin to put Latin America on its priority list for political and economic penetration.

Today there is no longer any time to To recover our position of leadership and to reestablish the rapidly crumbling unity of the hemisphere, we urge that a scries of long-range measures be considered immediately:

A plan of economic development along the lines and of the magnitude of the Marshall plan we so effectively conceived for Europe should be devised for Latin America. After the war, we expended vast sums in foreign aid to prevent Europe and several Asian countries from falling behind the Iron Curtain. With all its faults, this policy proved successful. A similar effort is now imperative for our own neighbors.

The effectiveness of our Government's dealings with Latin America should be increased by creating a new post-one similar in function to that of the Coordinator of Inter-American Affairs during the war—to deal exclusively with hemisphere problems. The person who holds this position should have cabinet rank and direct access to the President. Today, responsibility for Latin American policy rests with one man, the Assistant Secretary of State in charge of Latin American Affairs. He is 1 of 11 Assistant Secretaries. Over him are two deputy undersecretaries, and the Secretary of State. The result has been the downgrading of an area which should instead be of prime concern, as recent events have clearly shown.

Concrete action should be taken to support Latin America's struggle for a common market and to help stabilize the prices of their exports. The appointment of an individual well known throughout the hemisphere as our roving ambassador to the various regional market planning groups may be advisable. As the regional markets progress, the possibility of an overall Pan American Economic Union, recently proposed by Governor Rockefeller, should be seriously considered.

Our future actions will carry more weight if at the same time we show a greater understanding of some of Latin America's recent political, economic, and intellectual developments. We must not fear the word "reform," as if it automatically smacked of communism. We must learn to accept certain forms of nationalism and establish closer contact with the students, intellectuals, and politicians now rising into positions of power even when their ideals include agrarian reform or a mildly socialistic concept of economics and public welfare.

It is now clear to most Americans that something is wrong with our approach to Latin America and that something must be done about it immediately. But something is a vague word. It is up to those of us who work in and with Latin America to supply the facts and the ideas to transform this public awareness into a demand for action.

## An Open Letter to Members of Congress: Subject, Fair Trade

EXTENSION OF REMARKS

## HON. WILLIAM PROXMIRE

OF WISCONSIN

IN THE SENATE OF THE UNITED STATES
Thursday, September 1, 1960

Mr. PROXMIRE. Mr. President, one of the great fighters for fair trade laws in the United States over the years has been Mr. Edward Wimmer, vice president of the National Federation of Independent Business. I am an enthusiastic supporter of the principle of fair trade because I know that whenever the people or representatives of the people have had a free and open opportunity to express their position they have emphatically and overwhelmingly supported it. I want to go on record here as announcing that I intend to fight hard for a new fair trade law in the next session of Congress.

On August 29, 1960, an article by Ed Wimmer on fair trade appeared in the Cincinnati Enquirer under the title "An Open Letter to Members of Congress: Subject, Fair Trade." I ask unanimous consent that this article be included in the Appendix of the Record together with my remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

An Open Letter to Members of Congress: Subject, Fair Trade

(By Ed Wimmer)

Congressional talk and actions have been building up behind new tax bills, higher minimum wages, bigger defense spending, and vast expenditures of tax money in Latin America. Also, there has been no sign of reduced spending in Europe and Asia.

Where, Mr. Congressman, will all this money come from if our family farmers, and both large and small businesses continue to report rising overhead and diminishing profits? In fact what will happen to our whole economy, and to our ambitious plans at home and abroad, if Congress not only falls to halt this trend, but continues to increase taxes to a point where risk capital is already fleeing to foreign nations?

Americans have always been told that profits are the motivating power of the capitalistic, free, private enterprise system. That profits are the force that generated the unlimited self-reliance and individual enterprise that made our country the envy of the

world.

Today, however, profit has become a nasty word, spoken in hushed tones by the business community. Consumers shy away from it. Legislators eye it continuously as a source of more taxes. We know it has its abuses, but so has marriage, Christmas, and Mother's Day.

Mother's Day.

Primary reason for this open letter, Mr. Congressman, is to inquire if you know of any other source from which to draw needed taxes, if not from fair returns on an orderly production and distribution of goods and services. And, if fair returns are not maintained, and if instead, cutthroat competition is allowed to run its course, what happens to the whole country?

Since the turn of the century, various merchandising schemes and methods of doing business have been promoted on the theory that if you can deceive the buyer into thinking he is getting something for nothing, something from which the profit has been removed, success is assured. The known brand, the trademarked article of merchandise, became the heart of the something-for-less-than-it-cost approach to the consumer, and from this false doctrine came the growth of the giant chains, discount houses, trading stamp plans, and other developments, inimical to the establishment and growth of an ethical society.

Fair trade laws were first introduced in 1931, in an effort to slow down this process of economic decay, and the Congress and 45 State legislative bodies overwhelmingly approved the purpose of fair trade legislation—that of halting the use of known brands as loss-leaders to attract customers into buying hidden profit merchandise.

These laws were upheld by the Supreme Court, but have been so weakened by the attacks of price cutters and uninformed public opinion, that they ceased to offer protection to legitimate manufacturers, distributors, retailers, and their employees.

This past year, a new fair trade law has been reposing in committees of the House and Senate, and despite herculean efforts of its friends (in and out of Congress) it has failed to come to a vote. In desperation, passage has been sought by petition (objectionable as it may be to sponsors and legislators alike) and the petition now lacks only a few signatures to bring it to the floor.

We respectfully state, Mr. Congressman,

We respectfully state, Mr. Congressman, that if it is just and necessary to legislate fair returns to the farmer and worker, and to consider risk coverage of corporate investment in foreign lands, that it is equally just to insure legitimate, small, and large

business interests against a type of unfair competition that destroys the ability to pay fair wages, meet rising tax demands, expand facilities, and create necessary reserves.

Passage of a strong Fair Trade Act would do more to slow down monopoly power and perpetuate freedom of opportunity, than present wage legislation, socialized medicine, civil rights bills, foreign giveaways, and all the speeches made between now and election day.

### Fourth Annual Report to the People of the 18th District of Michigan

EXTENSION OF REMARKS

## HON. WILLIAM S. BROOMFIELD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES
Thursday, September 1, 1960

Mr. BROOMFIELD. Mr. Speaker, despite the deadlocks, the disappointments and the bitterness which prevailed during the short session of Congress following the political conventions, there were some solid accomplishments made by the House of Representatives and the Senate during the 2 years of the 86th Congress which has now concluded.

In this, my fourth annual report to the people of the 18th District, I would like to outline some of the successes, and the failures.

Certainly, all of us have learned a lesson in the folly of calling Congress back to work following the political conventions during a Presidential election year. A great deal of heat was demonstrated by members of both political parties during the short session, but light on the important subjects under discussion failed to shine through the haze of political fog.

NO COMPROMISE

We have found that there is no room for compromise in the heat of a partisan campaign, that issues are drawn and lines of verbal battle so firmly set that logic and cool thinking simply cannot exist under such conditions.

Rather than constructive legislation on issues such as minimum wage, aid to education, housing, agriculture, the American people got nothing.

The upstaging, the playing to the galleries, the passionate pleas which took place in the Senate during this short session are better suited to the theater than to the Senate, which takes pride in calling itself the greatest deliberative body on earth.

Despite the charges and denials, the verbal fencing and the thundering prose which erupted in both Houses of Congress during the short session of Congress, there were some accomplishments. They were difficult to discover, to be sure, but they were there.

These were:

Adoption by both Houses of a modified plan of Federal financial aid to States to provide medical and hospital insurance for our senior citizens. Neither political party was satisfied with the results of this bill, but the act approved by Congress and now Federal law, lays the

groundwork for more effective programs in the future.

#### BASED UPON FREEDOM

The plan adopted by Congress is based upon need rather than compulsion, upon covering as many of our senior citizens who need help as possible, rather than limiting such aid to those covered by social security. Its benefits can accrue to the 4 million who are over 65 but who never were eligible to receive the same benefits as those who held steady jobs prior to retirement.

In addition, administration of this new program of aid to the aged will be partially a State responsibility. I am happy to note that the Michigan Legislature soon will reconvene to consider establishment of a State program of aid under the new Federal law.

Such rapid action by States undoubtedly will mean that a great many of our senior citizens who will be faced with large hospital and medical bills in the near future will be aided by their States and the Federal Government in meeting high medical costs.

Congress also approved a number of changes in our Nation's social security system in the closing days of the short session. These changes were mostly technical in nature, although there are one or two which will prove of definite advantage to many of our senior citizens.

RAISE EARNINGS LIMIT

The first is a change in the retirement test which in effect raises the present \$1,200 limit on outside earnings to about \$1,500 under a complicated formula. For the past 3 years, I have introduced legislation to raise the limit to \$3,000, as I was convinced that the \$1,200 limit was totally unrealistic in view of today's living costs. A great many retired persons eligible for social security were suffering financial loss because of this provision. I will continue to seek drastic upward revision of this retirement test as a means of helping those who want to contribute part-time work past the retirement age.

Benefits payable to the children of deceased workers also were increased to include about 400,000 children, while disability insurance provisions were made more comprehensive. Maternal and child welfare funds were increased and unemployment compensation funds were raised

At President Eisenhower's request, the House and Senate approved a \$500 million authorization to provide more funds for Latin American nations to aid them in economic development. Another \$100 million was authorized to help the victims of the Chilean earthquake to pick up their lives where they left off after the devastation which destroyed so much of that nation.

In addition, the Congress restored some \$65 million of the \$215 million it had previously cut from the mutual security program. This raised our total appropriation in economic and military aid to our allies abroad to \$3,700 million for the current fiscal year.

### PROGRAM COMPLETE

This increase in funds also heralds a change in emphasis in our mutual security program. Following the end of World War II, much of our self-help funds went to those nations which experienced the almost complete devastation of total war. Out of necessity, most of our mutual assistance went to help Europe get back on its feet.

Now, this part of our program has been completed, and our friends in Europe are enjoying economic prosperity as never before. Recovery has been complete, and the standard of living has risen far above that before the Second World War. Resistance to communism in Europe has stiffened to a point where we are stronger militarily, economically and politically than at any point in previous history. The nations of Europe are working together toward a common goal for the first time.

Because of this prosperity in Europe, we now can look forward to a greater participation by the United States in helping other areas of the world, areas such as Latin America and Africa, where in many cases economic progress has lagged far behind that of other areas of the Western World.

There is one sure answer to communish, and that is a high standard of living. We will continue to do what we can to see that this valuable weapon is used to the utmost to stop the spread of communism.

Almost lost in the political debates being waged on the floors of the House and the Senate was another important step forward. That was the ratification of a treaty banning the use of nuclear weapons in Antarctica and demilitarization of this area. This is the first major treaty signed between the free world and the Iron Curtain countries to demilitarize any large area of the earth.

### IMPORTANT STEP

This treaty might well prove to be an important step in our goal toward world peace and a model upon which our future hopes for an end to the nuclear arms race can be realized.

One of the most important products considered by Congress during the last year was sugar. Besides its function as a coffee sweetener and its use on breakfast cereal, this product played a large part in our troubles with Cuba and the Dominican Republic.

Like many others in our Nation, I had hoped that Fidel Castro would have turned out to be a force for good in the Western Hemisphere. His overthrow of the dreaded Batista regime, his pronouncements of providing a better life for the people of Cuba certainly seemed to indicate that there was hope that a greater share of Cuba's wealth would get into the hands of its citizens.

Instead, Castro turned Cuba into another dictatorship. He turned his back on the friends of his people in the United States and started a campaign of vilification and hatred against our Government.

He turned more and more toward Russia and Red China and praised the Communists at every opportunity. He took away the basic freedoms of the people of Cuba until his nation has been turned into an army camp, a military

dictatorship twice as evil as the one which preceded it.

CUT SUGAR QUOTA

Early this year I introduced a bill—referred to the House Agriculture Committee—to cut off Cuba's sugar quota. For a number of years our Nation had been pyaing a top price for sugar, even when the world market sagged. Castro made the statement that Cuba was the economic slave of the United States. Since Castro resented taking our money in the form of sugar subsidies, I thought we ought to oblige him.

A few days after introduction of my bill to cut off Cuban sugar subsidies, President Eisenhower made a request to Congress to give him the same power.

However, it was months before Congress was permitted to take action on this emergency measure, simply because of opposition by the chairman of the House Agriculture Committee and some of his friends. Because of this hesitation on the part of the committee, millions of American dollars poured into Cuba which would not otherwise have been available to Castro.

Again, President Eisenhower asked for the power to cut off the sugar quota of the Dominican Republic after the Organization of American States censured the government of Dictator Trujillo for his highhanded tactics.

NO ACTION

But again Congress balked, and no action was taken on this important matter despite the repeated urging of the President.

It is still possible that President Eisenhower will call Congress back into special session to deal with this important matter of backing up the Organization of American States, one of the great bulwarks of freedom in the Western Hemisphere.

Some of the failures of this session of Congress were total, and the list is unfortunately long.

Federal aid to education was hopelessly stalemated on the question of whether Federal funds should be used to help pay teacher salaries. Both political parties agreed that Federal help was necessary for school construction in those areas in which the tax base was not adequate to provide decent facilities.

But rather than compromise on a bill which would provide relief for those school districts most in need of funds, any hope for Federal school aid was delayed for another year. So schoolchildren will suffer from inadequate facilities in some school districts simply so that a political issue could be made.

The same condition existed in raising the minimum wage. The House-approved bill would have raised the minimum wage to \$1.15 an hour in 1 year. The Senate version would have raised the minimum wage to \$1.25 an hour over a 3-year period. No compromise was attempted and another political issue was created, much to the despair of those workers who would have received higher wages now, rather than having to wait for another year.

The farm program also stalled in its tracks. After years of wrangling with

Congress in an effort to win approval of a sensible program, President Eisenhower finally told Congress that he would approve any farm program passed as long as it came under certain broad guidelines.

ATTEMPTS BLOCKED

Instead of action, Congress simply sat on its hands. All attempts to pass effective farm legislation were blocked. The present program, which all admitted was a failure and a waste of billions of Federal dollars annually, was permitted to continue. Meanwhile, our farmers find their hands tied by the mounting bureaucracy that Congress has ordered to regulate their every action. Consumers are penalized by paying more than they should for food and clothing and taxpayers are saddled with the stupendous expense of more than \$7 billion annually to keep in existence a program which nobody-not even the Secretary of Agriculture-wants.

Because some Members of Congress would settle for nothing less than their own particular fancies, still another problem was permitted to go over another year. That is the problem of providing help for areas which suffer from chronic economic depression. The President often recommended the passage of such legislation, but Congress refused to give him what he asked for.

#### AREAS SUFFER

As a consequence, those areas of our Nation which suffer from chronic unemployment are only able to find what help is available to the President under previous authorizations by Congress by Executive order. This help has been considerable, but it is not enough to meet this problem.

Even in taking care of this traditional "perennial," Congress experienced a great deal of difficulty. A stopgap housing bill was passed at the last moment to continue certain existing programs and to authorize funds for such purposes as community facilities and college housing, but that was all. The sound approach to our housing problems sought by the President were simply ignored in the rush to home to campaign.

In all, President Eisenhower proposed that 21 bills be passed during the short session of Congress. Only four of them were passed into law. The rest were ignored

Prior to the conventions, Congress found itself at loggerheads over one of the most stirring issues facing our Nation, that of civil rights. Finally, after a prolonged 2-month Senate filibuster, the first effective civil rights bill guaranteeing the right to vote to all of our citizens was enacted by Congress and signed into law by the President.

### EFFECTIVE LAW

This new civil rights law will be an effective tool in seeing to it that none of our citizens are treated as second class, that the Bill of Rights in our Constitution means what it says.

Because of judicious use of his veto power and the responsible actions by Congressmen from both political parties, the fight against inflation has been all but won.

During the current fiscal year which ended last June 30, our Federal Govern-

ment turned up a surplus of better than \$1 billion and there is hope of even a greater surplus when the next fiscal year ends.

Our national debt is still at the staggering total of \$288 billion, but at least we are moving in the right direction, toward sound fiscal responsibility rather than through further deficit spending.

We have accomplished this goal without any reduction in our military power. In fact, our potential to resist attack has been increased considerably in the past year through new weapons, new develop-

ments, and closer cooperation with our allies throughout the world.

Last year, Congress took action on a number of important subjects which was effective and far-reaching.

Passage of the Landrum-Griffin bill has turned the crooks, the blackmailers, the extortionists out of office in many of our labor unions. Labor union members now have the Federal Government behind them in winning the right to speak, to vote and to nominate candidates for office in their locals. One year's operation of this new law has demonstrated repeatedly the wisdom of its provisions and has led to better unions, more honest unions and a virtual end to corruption and misuse of union funds by high-handed officials.

#### DISCLOSE FUNDS

The 86th Congress also approved a bill which I cosponsored to aid in the fight against the distribution of obscene literature through the mails. Postmaster General Summerfield has said that this bill has been one of the most effective weapons in the hands of postal inspectors in bringing these dealers in filth to justice, and I was happy to have played a part in seeing that effective legislation to curb the distribution of this obscene literature to our children, become law.

Also, a bill similar to one I introduced which requires full disclosure by Congressmen of Federal and counterpart funds spent on trips was enacted into law. This bill, along with orders issued by the House Administration Committee, should result in further savings to our taxpayers and the assurance that trips taken by Congressmen are in the public interest and are not simply pleasure jaunts.

In addition, I sponsored a number of other bills including those to place the full faith and credit of the Federal Government behind municipal water and sewer bonds, provide health insurance coverage for retired Federal employees, permit self-employed persons to participate in retirement plans, allow teachers to deduct continuing education expenses for tax purposes, establish a Capitol page residence and provide for selection of pages on a competitive basis.

It was my pleasure to back home rule for the District of Columbia. With the acceptance of Hawaii as our 50th State, the District of Columbia became the last area in our Nation without the right to vote and to select its own governing officials. Important steps toward providing full home rule for the District were made during the past session of Congress, but further steps should be taken as rapidly as possible.

HIGHWAY FUNDS

As a member of the House Committee on Public Works, I had a hand in seeing to it that our Federal Interstate Highway program proceeded on a pay-as-yougo basis and that funds were used for new highway construction rather than reimbursing States for existing toll roads. I also continued the fight against "pork barrel" projects designed to deliver votes rather than benefit the general public of our Nation, battled efforts to expand the scope of tax-free public power projects in competition with private power and urged that Federal projects make payments in lieu of taxes to local communities to make up for loss of local revenue.

During the past years, I have used two methods of finding out the views of those I represent. The first is a questionnaire which I send to a number of my constituents selected on the basis of voting area and in an effort to obtain a fair

sampling of their views.

The second is a program of visiting as many communities in my mobile congressional office as possible during the recess period so that I can discuss the operation of the Federal Government face to face with those I represent.

Both of these programs have been enthusiastically received by my constituents, and I feel that they have made me a more effective Representative of the citizens of Oakland County in Washington.

AIDED MANY

The tendency has been for our Federal Government to become increasingly remote from those it is supposed to represent because of the rapid growth of our Nation and our increasing concentration in problems of the world as well as those at home.

These programs have helped to bring Washington a little closer to Oakland County and I feel that they have aided many in fighting their way through the entangling redtape which sometimes gets in the way of effective action at the Federal level.

May I urge my constituents to feel free to call on me when I visit their community in my house trailer turned office.

In addition, I would urge them to write or call me at my regular district office at 2300 North Woodward, Royal Oak, Mich., while Congress is in recess or in room 1422, New House Office Building, Washington, D.C., while Congress is at work.

While Congress is in session, I feel that it is my duty to remain in Washington to vote on the many issues which come before the House.

### Who Is "Poor"?

EXTENSION OF REMARKS

### HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. DERWINSKI. Mr. Speaker, a recent editorial in the Desplaines Valley News, an outstanding community newspaper in my district, should be of particular interest to us at this time, and

I hereby insert it into the Congressional.
RECORD without further comment:

WHO IS "POOR"?

While Congress has approved a medical care plan for the aged by a majority of 368 to 17, providing that the Federal Government pay at least 50 percent of the cost of State medical care programs, insuring payment of medical bills for the "medically needy" citizens over 65 in case of hospitalization or long illness, the bill leaves it up to the States to determine how much assistance to give and to decide just what "medically needy" means.

The approved bill was weaker in its wording than either the Democratic or Republican election year platform on the issue, or the previous Forand bill which wanted medical insurance to be financed with social security taxes. That heavy vote rounded up both the Democratic and Republican

Members of the Senate.

This discussion is an examination of the issue as approved and current surveys of the problem.

In the handling of the same issue at a far more effective level, the recent agreement of the Corn Products firm and the Oil-Chemical & Atomic Workers Union local is far superior to all three legislative proposals.

In the Corn Products-Union handling of the hospital-surgical coverage, the pensioners will get benefits that had been paid for through their years of service at the firm.

No one goes about deciding if the case merits eligibility due to standards of economic standing. All workers can benefit

alike, whether rich or poor.

This indicates that private planning is far ahead of governmental bureaucracy on the issue or that both industry and labor are hesitant to wait patiently before or if the legislators ever decide to debate the merits of the medical care for the aged proposals.

Our criticism of the approved health care for the aged bill is that the standards of determining just what the term "needy" means will vary from State to State and open up a new avenue to political candidates in campaigning for votes.

It may become common to hear political candidates offer coverage to persons on the borderline between "needy" and those not by trading eligibility determination for a vote at the polls.

Our depression years' bureaucracy in handling of relief claims should be convincing evidence that the "needy" person cannot be set aside and placed in a special category just because of his economic means.

If all are to pay by some means of taxation, then all should be covered; both the rich as well as the poor, as in social security.

Possibly, if one were to take in consideration the appeal that the individual handle their own hospitalization problems over 65, you would find that, first, there are few insurance firms which offer hospital and surgical benefits to the aged at a cost which the aged can afford, also that few hospital and surgical policies offer noncancelable benefits.

### Alfred Kohlberg

EXTENSION OF REMARKS

### HON. FRANCIS E. WALTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES Thursday, September 1, 1960

Mr. WALTER. Mr. Speaker, under leave to extend my remarks in the Record, I include the following editorial

from the New Bedford (Mass.) Standard Times, April 9, 1960:

ALFRED KOHLBERG

With the death of Alfred Kohlberg, a New York businessman who for nearly two decades has waged a one-man campaign against Communist influence on U.S. policy in the Far East, a unique chapter in Americana is ended.

Kohlberg, as the New York World Telegram and Sun commented editorially a few year ago, "has shown what one citizen can do to set things right when a majority of his associates are deaf, dumb, and blind, and when even the Government itself has been deluded." The specific reference was to Mr. Kohlberg's successful effort to purge the Institute of Pacific Relations of Red influences.

The comment, however, is typical of Kohlberg's life for at least the last 20 years. He revealed consistently what one citizen can do. He made himself known internationally, without ever holding public office or having access to a publishing empire. His impact was principally through thousands of letters, documented by fact and experience, and mailed worldwide to everyone, from heads of government on down. The fact that hundreds of dignitaries of national and world importance paid him homage in New York only 2 months ago is evidence that his patient efforts went neither unnoticed nor unrewarded.

One of the most memorable of Mr. Kohlberg's statements concluded, "When we somehow find leadership equally inspired by love of freedom, faith in man, and belief in God, our ideology will be irresistible. The evil dictatorships of Moscow, Peiping, and the other satellites will vanish. A new world will arise from the wreckage. \* \* Then, more than ever, we will need courage, and wisdom to enforce that international law and order which alone can clear the way for reconstruction, and permit us and the world to live without the constant alarms of war."

If there were such things as medals for good citizenship, Mr. Kohlberg deserved one long ago, for he did what he could to bring about the "new world" from the "wreckage" and his constant striving in that direction will be greatly missed.

## Resolutions Adopted by the American Legion

EXTENSION OF REMARKS

## HON. ARCH A. MOORE, JR.

OF WEST VIRGINIA

IN THE HOUSE OF REPRESENTATIVES Thursday, September 1, 1960

Mr. MOORE. Mr. Speaker, I respectfully submit for inclusion in the Record two resolutions recently adopted by the American Legion, Department of West Virginia, for the consideration of my colleagues on the subjects of the loyalty oath under section 1001(F) of the National Defense Act of 1958, and national service life insurance coverage:

RESOLUTIONS ADOPTED AT THE 42D ANNUAL DEPARTMENT CONVENTION OF THE AMERICAN LEGION, DEPARTMENT OF WEST VIRGINIA, HELD JULY 22-24, 1960, IN HUNTINGTON, W VA

LOYALTY OATH UNDER SECTION 1001(F) OF THE NATIONAL DEFENSE ACT OF 1958

Whereas it being brought to the attention of the membership that a bill has been introduced in Congress to remove the oath and affidavit now required of students seeking

aid from the U.S. Government to pay college expenses in conformity with section 1001(f) of the National Defense Act of 1958; therefore be it

Resolved, That the American Legion Department of West Virginia, in regular convention, this 22d day of July 1960, in Huntington, W. Va., goes on record unanimously opposing any bill that would tend to remove this requirement from the application for Federal aid loans and strongly urges its defeat; be it further

Resolved, That copies of this resolution be forwarded to the U.S. Senators and Congressmen from West Virginia for appropriate

action

NATIONAL SERVICE LIFE INSURANCE

Whereas, H.R. 11045, providing a new plan of insurance for national service life insurance (NSLI) policyholders has been before both the Senate and the House of Representatives; and

Whereas this amended resolution is now in the hands of the House committee awaiting further action: Now, therefore, be it

Resolved by the Department of West Virginia, the American Legion (now assembled in convention at Huntington, W. Va., this 22d day of July 1960), That this convention convey to the six West Virginia Congressmen and our two Senators, Hon. Jennings Randolph and Hon. Robert C. Byrd, our desire to bring said H.R. 11045 out of committee and place same on the floor for passage; and be it further

Resolved, That copies of this resolution be mailed to aforesaid Members of Congress with a request for their respective confirmation.

## Operation Veracity

EXTENSION OF REMARKS

### HON. NEWELL A. GEORGE

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES Wednesday, August 31, 1960

Mr. GEORGE. Mr. Speaker, in the closing days of the Congress, a number of my friends on the other side of the aisle undertook an operation they termed "veracity."

Subsequently, experts in various fields were assigned homework in order that they could come prepared with statements to be read into the Record. Seldom were Democratic Members given an opportunity to reply to the baseless and untrue charges with respect to the Democratic platform.

Considering platforms, Mr. Speaker, there is a great difference between the Democratic and the Republican. History establishes the fact that the Democratic platform lists objectives which members of our party conventionally strive to at-

On the other hand, any close observer of the administration during the past 7 years and 8 months most certainly knows that the Republican platform is nothing more than windowdressing and that promises made by the Old Guard of the GOP are completely disregarded after the votes are counted.

In my newsletter of August 25 I gave a few concrete examples of the insincerity of the Republican leaders now in charge of the administration. Mr. Speaker, under unanimous consent, I include this letter as part of my remarks: An impressive legislative program faced the House as it reconvened following the party conventions. The countdown is slow, however, as the House awaits action by the Those who are striving to enact needed legislation are forced to deal with pseudo-statesmen who sponsored a civil rights bill containing no major advances knowing full well that it could not receive serious consideration before Congress ad-They will not succeed in fooling iourns. the people-especially those of their home States of Pennsylvania and New York. It is cheap and cruel to use the civil rights issue as a legislative blockade in an attempt to stifle needed legislation.

To date, this Congress has passed 676 measures which are now public law. An additional 38 bills scheduled for the law books failed of enactment because of a Presidential yeto.

Area redevelopment: Yesterday—less than 2 months ago—a second veto of a redevelopment bill to assist depressed areas took place. Today special emphasis is placed on such a measure by the administration and it is one of 21 recommended for congressional action at this abbreviated recess session.

Agriculture: Yesterday bills passed by the Congress were vetoed which would have raised farm income, curtailed production, and reduced the existing surplus. Today the administration criticizes the farmers for growing more surpluses and urges congressional action. While farm income has been dizzily dropping, the taxpayers' investment in surplus commodities has risen to \$8,700 million.

Water: Yesterday a public works appropriation bill which would have stepped up the Nation's flood control and water conservation programs was vetoed. Yesterday, also, the water pollution control act met a veto. Today the administration, through the Surgeon General, states flatly that the construction of water supply and pollution control facilities has lagged far behind national needs and that the United States is headed for a water crisis unless we do a much better job with our water resources.

Education: Yesterday threats of a veto confused the issue and different approaches were taken in aid to education measures by the House and Senate. Today the Department of Health, Education, and Welfare estimates that in Kansas, alone, there will be an increase of nearly 50,000 children in school by 1963. Two thousand more teachers and as many classrooms will be needed solely for the additional number of students. With almost a 9 percent increase in students, the cost cannot be absorbed from current State and local tax revenue.

Politics in reserve: Yesterday the bank discount rate was 4 percent. Today—since last July—it has been lowered by the Federal Reserve Board to 3 percent. Recently lending power has been increased by pumping reserves into commercial banks through the purchase of Government securities by the Federal Reserve Board and by a reduction in reserve requirements. All this action in an election year—and in the interest of our economy it should have taken place long ago.

# Our Tribute to an Honored and Worthy Citizen

EXTENSION OF REMARKS

## HON. FRANK E. SMITH

OF MISSISSIPPI

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. SMITH of Mississippi. Mr. Speaker, on September 1 the people of Stone-

ville, Miss., and the entire Mississippi Delta observed the 50th anniversary of the leadership in progressive delta farming of George B. Walker of Stoneville. Few have contributed more to the Mississippi Delta and the State of Mississippi, but George Walker will always best be remembered for his pioneer work in teaching progressive farming methods to the people of our area.

Under unanimous consent, I include the following article from the Leland Progress by my good friend Leroy Allen. Mr. Allen is himself a prominent planter in Washington County who writes a serious weekly column for the Progress:

OUR TRIBUTE TO AN HONORED AND WORTHY

### (By Leroy B. Allen)

Horatio Alger in his many fascinating stories of the rise to fame and fortune of the underprivileged boys of his era, never wrote a story more thrilling than the true life's story of one who has lived and labored among us for more than half a century.

On September 1, 1910, George Berkely Walker came by train to Stoneville as the newly appointed superintendent of the struggling 250-acre branch experiment station. The following day the 27-year-old bachelor took over his official duties without benefit of office facilities or living quarters. His immediate predecessor, Jesse W. Fox. better known as Professor Fox, had lived in Greenville while serving as superintendent, thereby accounting for lack of office or residence on the station property. A former teacher at A. & M. College, Professor Fox was returning there to become director of experiment stations.

When George Walker began his work at the station there was but one other white er ployee, a labor foreman who occupied a small house on the grounds where Mr. Walker boarded while constructing the two-ro-m building that was to serve as office and sleeping quarters until his marriage the following year.

George Walker had nothing to say concerning the place of his nativity—a hill farm east of McComb in Pike County—nor the fact that he was born in February of But he did know that since early life he had been so intent on securing an education and trying to make a secure place for himself in life's affairs, that he had not given sufficient thought to marriage. He wasn't altogether unfamiliar with the Mississippi Delta and its unpredictable ways, but he did harbor all of the distrust innate to every worthy hillbilly. A man just couldn't live in the delta alone; a land of vast expanse where wild creatures roamed and but lately removed from days and ways of the pioneer. Like Jacob and his long wait for Rachel, George knew that now or never was the time to claim the hand of his childhood sweetheart, Bessie Rea. The year be-fore, in the ladies' parlor of the Raleigh Hotel in Washington, D.C., she had accepted his proposal of marriage delayed until now because his previous employment that required him to be away from home a great deal, wasn't altogether conducive to home life. And in this connection we are reminded of an event years later that has a direct bearing on George's proposal and ought not to go unrecorded.

When the two sons born to this union were sizable lads, Mr. Walker took them to visit the Raleigh Hotel during a trip to Washington. In the ladies' parlor he pointed out to the boys the cushion encircling one of the supporting columns on which he and their mother had sat when he proposed to her. So impressed was the younger son, age 11, that he wrote his mother: "Papa took us to the hotel today and showed us the seat where you promised to be my mother."

Married in April of 1911, the young superintendent and his bride soon had a commodious home on the station grounds and the work advanced under his competent management. But before following him through a most successful career, let us see a little of the trials and tribulations leading to the remarkable success of a remarkable man.

When the ambitious boy from Pike County had completed the seven grades offered in the public schools there, he found it necessary to go to some town or community having a high school if he would continue his studies. An older brother, a graduate of Mississippi College, headed the school system in Wesson, Miss., and there went young George in 1898 to room with this bachelor brother while attending school. And it was there that this eighth-grade student first met and fell in love with a classmate, Bessie Rea, whose family resided there.

The teenage courtship of George and Bessie went as smoothly as such affairs usually do, until one of Bessie's daily letters to George had the misfortune to reach alien hands, due chiefly to George's negligence. The one into whose hands the letter came, lost no time in chiding Bessie to the extent that she severed all relations with George for 12 years, refusing to talk with him or to answer his letters.

The next year George was unable to attend school but the following year he did complete the ninth-grade work at Brookhaven, which was the last of his public school studies. But determined to obtain higher education, he began to examine every possible chance of securing a college education.

His father, a stanch Baptist, wanted him to attend Mississippi College by way of preparation for the ministry, but George had set his sights toward an education in agriculture and so informed his father. His father's reply was that if he wanted to farm all he had to do was to roll up his sleeves and pitch in, for he wouldn't need education to farm.

At that time Jack Hardy was president of A. & M. College at Starkville, and to him George appealed for the opportunity of taking the entrance examination. This privilege was granted, but George falled every subject except mathematics. He requested and was granted a second opportunity which brought no greater degree of success. But undaunted in his indomitable determination to get the education he sought, he appealed to President Hardy directly to let him enter the freshman class in the autumn of 1902. Impressed with the lad's determination, President Hardy granted provisional entrance. And not only was George able to carry his studies along with those having more preparation, but he distinguished himself during that and succeeding years, graduating in 1907 with the outstanding rank of lieutenant adjutant of the senior military unit of which he was a member. And all this despite the fact that it was necessary for him to work several hours daily to help defray expenses, at the exorbitant rate of 8 cents per hour.

Following graduation, the boy from Pike County tried his hand at several jobs before reaching Stoneville. For 3 years he served as public relations director for the German Kali Works of Strasbourg, Germany. He then became fertilizer and grain inspector for his alma mater in Mississippi. And it was while engaged in this work that he renewed his former relations with Bessie Rea, of Wesson, who in the 12-year interim since high school days, had finished Mississippi Synodical College of Holly Springs, Miss.

He was offered and accepted the position of assistant director of test farms in the State Department of Agriculture of North Carolina. Three months later he was offered but declined, the position of assistant director of experiment stations at Mississippi A. & M. College. But in July of 1910, when President Hardy of A. & M. College personally offered him the position of superintendent of the branch experiment station at Stoneville, George Walker accepted and remained there until his resignation in 1922, to enter business for himself.

Having acquired a partnership interest in 300 acres of Deer Creek land that now forms a part of his present holdings, Mr. Walker left the Station work to engage in farming and to organize the Stoneville Pedigreed Seed Co. Needless to say, his every major business venture has proven highly successful, but not without such reverses as might well have stopped a man of less self-reliance, tenacity and honesty.

His pedigreed cotton and small grain seed are sold throughout the Nation and into many foreign countries. And added to sales of dairy products, gross sales annually will reach into multiple millions.

Additional to the milk produced by his registered Guernsey herd—a herd that is likely the best in the South and one of the Nation's top herds—Walker Farms Dairy buys the entire output of 50 other Guernsey herds to supply the needs of customers from Clarksdale to Brookhaven and Greenwood to the east. More than 30,000 bottles of milk are delivered daily. And all of this is due chiefly to the organizational genius of George Berkely Walker, hill boy, who never learned the meaning of the word "quit." But additional to this spark of genius, success is almost equally shared by his lifetime sweetheart, Bessie, two highly competent sons whose training was thoughtfully and thoroughly directed toward the work they now so competently fulfill; a loyal staff of technical experts, untiring in ability and devotion to duty, and the confidence of all business associates and friends.

His comfortable home on the banks of the fabulous Deer Creek is just across the stream from the experiment station to which he came a half century ago. His sons reside nearby, each blessed with children whose frequent visits bring joy into two worthy lives as they watch with keen interest and love the development of their hope for the future. For 12 years Mr. Walker served his county and State as the able representative in the State senate, a place he was forced by failing health to resign a year ago. He has been accorded many local, State and National honors, far too numerous to recount here. His devotion to his church has marked him as a man of faith, and his love for his fellow man proves a heart of devotion.

George Walker is deeply esteemed by those privileged to know him, for he is clothed with the stature of the great—a man beloved of those who honor worthiness of character.

### Future Needs for Navigation

EXTENSION OF REMARKS

## HON. JOHN P. SAYLOR

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. SAYLOR. Mr. Speaker, on May 10, 1960, the Select Committee on National Water Resources of the U.S. Senate, pursuant to Senate Resolution 48 of the 86th Congress, published Committee Print No. 11, entitled "Water Resources Activities in the United States—Future Needs for Navigation."

This report shows the responsibility for improving our inland navigation is under the jurisdiction of the U.S. Army Engineers. The report has received wide circulation, and one would hope that such a report would be factual and authentic. Page 5 of the report contains the following excerpts:

#### USE OF THE WATERWAYS

During the calendar year 1957 a total of 115 billion ton-miles of commercial traffic moved on the active inland waterway system. This includes some deep-draft traffic. rapid rates of increase in the commercial use seven major waterways are graphically depicted on figure II. Also shown is the growth of traffic for the entire system. It will be seen that the total waterway traffic in 1957 was four times the 1946 figure. The annual increase in this 11-year period averaged 7.8 billion ton-miles. This is equivalent to adding to the national transportation system about 2,600 miles of railroad carrying million ton-miles of freight per mile of road annually. This means that the increase in the use of the waterways is comparable to the addition of a transcontinental railroad to the Nation's transportation system each year. During the period in which this in-crease has taken place some existing channels have been improved but no new waterways have been added to the system. To a large extent, therefore, the increases in traffic since World War II represent an additional return upon investments which the Nation had previously made in its inland waterways.

During this same 11-year period the annual increase in traffic on the lower Mississippi waterway averaged about 1.2 billion ton-miles per year and the corresponding increase for the Ohio waterway from Cairo to Pittsburgh averaged about 1.1 billion tonmiles per year. The annual rate of increase on the entire 1,717 miles of waterway between New Orleans and Pittsburgh amounted, therefore, to 2.3 billion ton-miles. If this annual increase had to be absorbed by railroads carrying 3 million ton-miles of freight per mile of railroad annually, it would be necessary to construct 765 miles of new railroad every year. This is equivalent to pro-viding a new railroad between New Orleans and Pittsburgh every 18 months. Railroads especially designed and operated to carry only the freight now moving by water might handle more than 3 million tons per mile, but the mileage of new railroad each year could hardly be reduced below 400 miles in any event. The important point here is that the railroads could not absorb the annual increase in water traffic-much less the entire traffic—without very large in-creases in their physical plants. This de-molishes the argument frequently advanced that the railroads could absorb waterway traffic at out-of-pocket costs.

I am in receipt of a letter from a retired railroad friend who is interested not only in the country, but all the railroads. The letter follows:

FREEPORT, PA., August 29, 1960. Hon. John P. Saylor, House Office Building,

Washington, D.C.

DEAR CONGRESSMAN: As one of your constituents and a retired railroad trainman with 52 years service with one of the Nation's busiest railroads, and one who has had an avid interest in the inroads that the waterways, endowed with taxpayers' money, has made on traffic which would have normally been serviced by the railroads, I feel impelled to bring to your attention what is definitely a false yardstick used as a

measurement of traffic movement in a report known as Committee Print No. 11 which has recently been prepared by the Corps of Engineers for the Select Committee on National Water Resources, U.S. Senate, pursuant to Senate Resolution 48, 86th Congress.

The measurement, "3 million ton-miles of freight per mile of road," used as a capacity measurement is entirely false. This amounts to approximately 8,000 tons per day. In my experience, this amount of freight would have been carried in a single train. Considering dispatchment of trains at the rate of four an hour, it would appear that about 100 times as much, or 300 million ton-miles of freight per mile of road would be more nearly a measurement of capacity for a main line railroad. Possibly, the Army Engineers put their decimal point in the wrong place. During my railroad lifetime I have seen

During my railroad lifetime I have seen railroad employment cut by more than one-half. Obviously some of the reduction in railroad workers may be traced to advanced technology. I feel, however, that a great deal of this reduction is due to diversion of traffic from overland haulers to subsidized waterways. It seems apparent to me that the railroads could absorb the entire traffic presently hauled by the subsidized waterways, with no increase in the physical plant but only in railroad employment, and at no additional cost to the taxpayers.

It would be a big mistake for the Government to spend \$8 billion on such a false foundation as has been laid by the Corps of Engineers in this committee report.

Very truly yours,

A. R. HIBBS.

Having checked Mr. Hibbs' figures with other persons in the railroad business and found them to be correct, in view of this very serious error in such a simple figure as the tonnage hauled by a railroad, I am wondering just how reliable the rest of the report is? How much faith the public can place in the figures of the Corps of Engineers, U.S. Army?

## Report of Hon. Gerald R. Ford to Fifth District of Michigan

EXTENSION OF REMARKS

## HON. GERALD R. FORD, JR.

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. FORD. Mr. Speaker, under leave to extend my remarks, I include a report of my voting and attendance record during the 2d session of the 86th Congress.

The record includes all rollcall votes and all quorum calls. The description of bills is for the purpose of identification only; no attempt has been made to describe the bills completely or to elaborate upon the issues involved.

The purpose of this report is to collect in one place information which is scattered through thousands of pages of the Congressional Record. I want to be able to provide any interested constituent with a simple compilation of my voting and attendance record.

It will be noted that there were 206 rollcalls and my attendance record was 93.2 percent.

## CONGRESSIONAL RECORD — APPENDIX

Voting record, Representative Gerald R. Ford, Jr., Fifth District, Michigan

lum- ber	Date Measure, question, and result		
1	Jan. 6	Call of the House	Prese
3	Feb. 2 Feb. 2	H.R. 1217, amend the Tariff Act of 1930 to provide for the free importation of amorphous graphite, amended. (Passed 278 to 116)	Yes. Yes.
4	Feb. 2	of Panama shall be made only pursuant to treaty, amended. (Passed 380 to 121.)  H. Con. Res. 465, expressing the indignation of Congress at the recent descriptions of house of worship and other sacred sites, without amendment.	Yes.

## We Need a Sound National Food and Farm Policy

EXTENSION OF REMARKS OF

### HON, MORGAN M. MOULDER

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES Thursday, September 1, 1960

Mr. MOULDER. Mr. Speaker, the Congress, the President, the political parties, the administrative branches of the Government, and every individual in the Nation cannot afford to disregard and turn aside from what is happening to farmers and the rural communities of the United States.

Congress has tried to correct the present farm situation by enactment of new farm programs to hold up sagging farm income, but the administration now in Power either vetoed such legislation passed by Congress or used every possible influence to prevent the adoption of legislation proposed and necessary to

4 Speaking engagement.
5 If present, would have voted "yes."

help the farmers of America.

I now am advised that it takes 41.7 bushels of corn today to buy the same suit of clothes that 26 bushels would buy in 1952, that it takes 9.2 bushels to get a pair of men's shoes that required only 5.3 bushels 8 years ago, and 6 bushels to buy a woman's dress as compared with 3.6 bushels in 1952. Among other items. a chair for the farmer's house that cost 17.1 bushels of corn 8 years ago now costs 38.6 bushels, and it takes 216.7 bushels to buy an electric stove that could be had for 153 bushels in 1952.

It would seem to me, in all seriousness, that it should have been obvious to Mr. Benson from the start-even in his youth-that if it takes twice as much corn to buy a pair of pants, then the farmer, to keep himself in pants-as certainly he must-will do his utmost to produce twice as much corn.

Farmers are impelled to increase their output as prices fall. Surplus thus builds upon surplus, further depressing

The fallacy, and the tragedy, of the Benson program is as simple as that.

Because of the outdated pricing system under which farm products are marketed, the abundance resulting from the farmers' efficiency and hard work has aggravated the farm problem.

Farm income continues to decline. USDA figures for the first 6 months of 1960 show net farm income down 9 percent from the same period a year ago. During the past 8 years, net farm income has fallen more than 26 percent. During the same period, business corporation profits have risen 45 percent after taxes. Farm purchasing power is at a 20-year low with a prospect of further declines. The farm share of the food dollar is lower than at any time since the depression of the early 1930's.

Out of Washington on speaking engagement.
Paired. If present, would have voted "yes."
Against.

Today the Government inventory of surplus farm commodities is over \$9 billion-and will increase this year.

These facts clearly demonstrate the failure of the present farm program as administered by the administration in power. Of course, overproduction has built up huge surpluses, but the surplus production has not been used to any advantage, either at home or abroad.

The administration's farm program has cost more than \$30 billion during the past 6 years, but the farmer realized very little benefit from this huge expenditure.

Mr. Speaker, there is definitely a farm crisis in farm income and purchasing power which must be faced by the Nation. Farmers have been substituting credit for purchasing power at an alarming rate. In the past year, total farm debt has increased \$400 million to a new all time high of \$23.8 billion-more than 50 percent higher than in 1952.

I do not want to be an alarmist, but in all sincerity, I must say that too few people realize the deep economic inroads which have been made into the family farm system because of the 71/2 years of lowering of farm prices and 71/2 years of deliberate tightening of credit and rais-

ing of interest rates.

The processors and speculators who want to obtain a monopoly of the farm and food business know that they have to obstruct and wreck farm programs before they can roll the family farmers off the land. And in this they have made great progress under the administration's Benson farm policy.

Mr. Speaker, a farm program to help the Nation must help the farmer first. You cannot cure the national farm economic problem without solving the economic problem of the individual farmer. Farmers are entitled to such farm prices as will earn a rate of return for their investment, labor, and management which is comparable to that earned by others for their capital, labor, and management.

Mr. Speaker, agriculture needs bold and vigorous action. The first order of business at the next session of Congress should and must be the adoption of legislation that will-

First. Provide full parity prices for all farm products:

Second. Establish marketing quotas in bushels and pounds-under the direction of a farmer elected board—on those products for which it is necessary to protect each farmer's full share of the market.

Third. Provide that the prices and quotas as established be subject to approval or disapproval by farmers in referendums:

Fourth. Establish an accurate formula or method of parity, taking into consideration the farmer's cost of produc-

Fifth. Limit farming activity of business corporations, eliminate farm program benefits which might be received by producers who are not bona fide farmers, and strengthen the family farm to prevent the threat of monopolistic forces seeking to control production of food:

Sixth. Establish a food use policy by and through the food stamp plan and a food for peace program-whereby existing surpluses and future production will provide more of our citizens with an adequate and nutritious diet, and help alleviate hunger and poverty in undeveloped nations and by so doing, promote a permanent and honorable world peace;

Seventh. Expand and intensify research by land grant colleges and universities to discover and develop new uses for farm products, especially for industrial purposes:

Eighth. Revitalize the Farmers Home Administration and provide low interest rates to effectively serve family farmers with both long-time and emergency farm credit;

Ninth. Provide a percentage depletion tax allowance for farmers, based upon the net income from the farm;

Tenth. Promote export sale of farm products on world markets with the same or comparable consideration given to industrial exports;

Eleventh. Establish a national safety reserve of food and fiber to be strategically stored and located in relation to the Nation's population; and I am reliably informed that the total balance of unused U.S. foreign aid counterpart funds in all foreign countries amounts to \$1.5 Therefore, we should compel foreign countries having surplus counterpart funds to use the funds for the purchase of our surplus farm commodities in the establishment of a safety emergency reserve of food and fiber in each of such countries.

Mr. Speaker, the farmers of America recognize that the farmer's responsibility for improving his economic condition should rest to a greater extent with his development of a better distribution and control of supply. But all of us recognize or should know that it is extremely difficult, if not impossible, for farmers to accomplish these objectives without the benefit of guidance of an organization that deals specifically with their problem or without an opportunity to develop these programs with Government assistance.

Ail these goals demand the leadership of a Secretary of Agriculture who is not only conversant with the technological and economic aspects of the farm problems, but who is sympathetic with the objectives of effective farm legislation, not only for farmers, but for the interest of the Nation, as a whole.

Agriculture is our basic industry. We are the best fed nation on earth. Our farmers have made it so. The productivity of our farms is today the greatest stabilizing force in the economy of the free world. The Communists have put satellites above the earth, but they cannot begin to match the productivity of the people tilling the soil of America.

The income crisis is the major and the basic agricultural problem. All other farm problems are secondary in nature. Any proposal which purports to deal with the farm problem without seeking to enhance the net income of farm families does not deserve to be known as farm legislation.

The farm problem is not a political problem. It is a national problem. The same serious farm crisis faces all farmers, Democrats and Republicans alike

Mr. Speaker, you well know and my record in Congress reveals that I have vigorously promoted, supported, fought for and voted for all farm legislation presented here in Congress to improve, to protect, and to serve the best interests of the farmers, Democrats and Republicans alike.

The farm families have always been and are now the solid social and economic anchor of America. If abandoned, our ship of state will surely flounder toward the ultimate loss of our American way of life.

### Activities of the House Committee on Science and Astronautics

EXTENSION OF REMARKS

## HON. OVERTON BROOKS

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES Thursday, September 1, 1960

Mr. BROOKS of Louisiana. Speaker, with the adjournment sine die of the 86th Congress, the Committee on Science and Astronautics comes to the end of its first Congress.

The committee is unique in that it is the only committee in Congress with legislative jurisdiction over science in general, as well as the space sciences. In these days of great scientific advancement, I need not stress the importance of the work being done by this committee, which has still to mark its second birthday.

However, I would like to cite a few of the committee's achievements during the course of this Congress. As a result of its activities, the committee was honored this year with the Holmes Alexander annual award of the McNaught Syndicate as the outstanding House committee of 1960.

The committee's activities during the less than 2 years of its existence make an impressive record. It conducted 57 investigations, issued 47 reports, held 265 hearings and heard 658 witnesses.

Indicative further of the broad scope of the committee's work, the committee took more than 3 million words of testimony, which have been incorporated in approximately 8,000 pages of printed hearings.

In the legislative field, the committee acted upon the annual budget of the Nation's civilian space agency, now grown to almost a billion dollars, made extensive revisions in the Space Act of 1958, and approved various other bills and resolutions

The scope of the committee's investigations was indeed impressive. They covered such varied subjects as the manin-space program-Project Mercuryspace medicine, the effect of noise on man and machine, research on mechanical translation, development of hydrofoils, oceanic research, international aspects of space law, lunar construction, weather modification and control, basic research in agriculture, saline-water research, the status of scientific education in the United States, and many

This is a record of which the committee may well be proud. As we round out our first Congress, I feel that we have accomplished much in helping to advance the Nation's scientific and space programs, but I do not feel the committee can sit back on its laurels. Much more work remains to be done. Many worthwhile projects are now in preparation or under investigation, and the committee looks forward to many active months ahead during the remainder of this Congress and the years to come.

The cooperation and hard work of the individual members of the committee and of its staff has made possible this outstanding record during the commit-

tee's first Congress.

The committee's activities during the past year have been very fruitful. A summary of the committee's activities during 1960 follows:

ACTIVITIES OF THE HOUSE COMMITTEE ON SCIENCE AND ASTRONAUTICS

#### INTRODUCTION

The Committee on Science and Astronautics is the successor to the Select Committee on Astronautics and Space Exploration of the 85th Congress which helped enact legislation establishing a civilian space agency, the National Aeronautics and Space Administration.

As a standing committee of the House, the committee excreises legislative jurisdiction over "outer space, including exploration and control thereof, science scholarships, (and) scientific research and development."

It also exercises legislative jurisdiction over "astronautical research and development, including resources, personnel, equipment and facilities," and over the following executive agencies of the Government:

The Bureau of Standards (including "standardization of weights and measures and the metric system"), the National Aeronautics and Space Administration, the National Aeronautics and Space Council, and the National Science Foundation.

### ACTIVITIES DURING 1960

During its second year the committee continued to be extremely active, both in the field of legislation and in the investigation of various activities connected with science and astronautics.

As the 2d session of the 86th Congress drew to a close, the committee had compiled this record:

- 1. Conducted 27 investigations whose scope ranged from exploration at the bottom of the sea to Army plans for construction on the
- 2. Held hearings on 17 different subjects ranging from a broad review of the Nation's space program to research on mechanical translation.
- 3. Issued or had under preparation for publication in 1960 a total of 25 reports on a variety of legislative and investigative mat-

### Reports (investigative)

During the 2d session of the 86th Congress, the committee issued or had under preparation the following nonlegislative reports:

1. "Preliminary Report on the Refusal of the National Aeronautics and Space Administration To Furnish Information to the Committee on Science and Astronautics" (staff report, Jan. 11, 1960).

2. "Project Mercury, First Interim Report" (H. Rept. 1228, Also listed as Committee

Print Serial a) .

- 3. "Outer Space, The Roard to Peace." (Observations on scientific meetings and international cooperation by Representative Victor L. Anguso, of New York, February
- 4. "Management and Operation of the Atlantic Missile Range" (Committee Print, July 5, 1960).
- 5. "Report of Representative DAVID S. KING
- on Inspection Trip of Missile Installations in Utah" (May 5, 1960).
  6. "Army Lunar Construction and Mapping Program" (H. Rept. 1931. Also listed
- as Committee Print Serial 1).
  7. "Hydrofoil Development" (H. Rept. 2006.
- Also listed as Committee Print Serial e).
  8. "Space, Missiles, and the Nation" (H. Rept. 2092. Also listed as Committee Print
- 9. "Research on Mechanical Translation" (H. Rept. 2021. Also listed as Committee Print Serial d).
- 10. "Supersonic Air Transports" (H. Rept. 2041. Also listed as Committee Print Serial
- g). 11. "The Practical Values of Space Exploration" (H. Rept. 2091. Also listed as Committee Print Serial i).
- 12.1 "Life Sciences and Space" (H. Rept.
- 13 1 "A Chronology of Space Events: 1860-
- 1960" (\_\_\_\_\_). 14. "Ocean Sciences and National Securi-ty" (H. Rept. 2078. Also listed as Committee Print Serial h)
- 15. "Report on Cape Canaveral Inspection" (Committee Print, June 27, 1960).
- 16. 1 "Noise: Its Effect on Man and Machine" (-—).

#### Reports (legislative)

The committee issued these legislative reports during the second session under the following titles:

1. "Effecting Immediate Transfer of the Development Operations Division of the Army Ballistic Missile Agency to the Nation-Aeronautics and Space Administration (H.J. Res. 567, H. Rept. 1240, Feb. 4, 1960)

2. "Authorizing Appropriations to the National Aeronautics and Space Administration" (H.R. 10809, H. Rept. 1333, Mar. 3,

- 1960).
  3. "Proposed Revisions to the Patent Section, National Aeronautics and Space Act of 1958" (report of the Subscription Patents and Scientific Inventions, Mar. 8,
- "Amending the National Science Foundation Act" (to make American Samoans eligible for Federal scholarships and fellowships) (H.R. 11985, H. Rept. 1591, May 6,
- 5. "Amending the National Aeronautics and Space Act of 1958" (H.R. 12049, H. Rept.

### Reports (miscellaneous)

1. "A Study of Scientific and Technical Manpower." (A program of collection, tabulation, and analysis of data prepared by the National Science Foundation at the committee's request and published by the com-

mittee, Jan. 4, 1960.)
2. "Panel on Science and Technology," first meeting (H. Rept. 1587. Also listed as

Committee Print Serial b).

3. 1 "Panel on Science and Technology," second meeting (H. Rept-

4. "Report on the Activities of the Committee on Science and Astronautics" (2d sess., 86th Cong.). (H. Rept. ---.)

### Printed hearings

The committee also issued the following printed hearings on legislative and investigative subjects:

"Review of the Space Program." (Jan. 20-29; Feb. 1-24; Mar. 7, 1960. Listed as Committee Publicatior No. 3, pts. 1, 2, and

3.)
2. "The Production of Documents by the tration for the Committee on Science and Astronautics." (Jan. 27-29, 1960. Listed as Committee Publication No. 1.)

3. "Transfer of the Development Opera tions Division of the Army Ballistic Missile Agency to the National Aeronautics and Space Administration." (Feb. 3, 1960. Listed as Committee Publication No. 2.)

4. "1931 NASA Authorization." (Feb. 17-26, 1960. Listed as Committee Publication

No. 4.)

- 5. "To amend the National Aeronautics and Space Act of 1958." (Mar. 8-31; Apr. 4, 1960. Listed as Committee Publication No.
- 6. "Frontiers in Oceanic Research," (Apr. 28-29, 1960. Listed as Committee Publication No. 7.)
- "Panel on Science and Technology." first session (May 4, 1960). (Transcript of remarks is included in H. Rept. 1587.)
- 8. 1"Establishment of a National Science
- Academy." (May 4-25, 1960. Listed as Committee Publication No. ---.)
- 9. "A bill To Make American Nationals Eligible for Scholarships and Fellowships Authorized by the National Science Founda-tion Act of 1950." (May 6, 1960. Listed as Committee Publication No. 6.)

10. "Lunar Mapping and Construction in Support of Space Programs." (May 10, 1960. Listed as Committee Publication

11. "Research on Mechanical Translation." (May 11-16, 1960. Listed as Committee Publication No. 9.)

12. "Supersonic Air Transports." (May 17-24, 1960. Listed as Committee Publication No. 11.)

13. "Hydrofoil Development." (May Listed as Committee Publication No. 10.)

- 14.1 "Panel on Science and Technology," second session. (June 2-3, 1960. Transcript of remarks is included in H. Rept. —...)
  15.1 "Space Medicine Research." (June —,
- 1960. Listed as Committee Publication No. 12.)
- 16.1 "Noise; Its Effect on Man and Machine." (Listed as Committee Publication No. ---.)

### Investigations

During the 2d session of the 86th Congress the committee conducted 27 investigations or studies, many of them leading to public hearings at which various facets of the Nation's space program and of the Nation's scientific and technological status were explored.

The following subjects held the commit-

tee's attention:

1. Refusal of NASA to furnish contract information to the committee and the General Accounting Office.

2. Project Mercury (man-in-space pro-

gram).
3. Management and operation of the Atlantic Missile Range.

4. Missile installations in Utah.

5. Army lunar construction and planning program.

6. Development of hydrofoils.

- 7. Review of the Nation's space program. Research on mechanical translation.
- 9. Development of supersonic air trans-
- 10. The practical and economic applica-
- tions of space developments.
  - 11. Space medicine.
- 12. A chronology of space events during the past century.

13. Boron high-energy fuels.

- 14. Project Wagmight, the development of inflatable aircraft.
  - 15. Oceanic research.
- 16. Project Slam (supersonic low-altitude missile).

In preparation for publication in 1960.

17. NASA-military management of elec- Project Mercury-the man-in-space program tronic equipment.

18. International cooperation in the peaceful uses of outer space.

19. Scientific and professional education in the United States and abroad.

20. Compilation of the air laws and treaties of the world.

21. International aspects of space law.

22. Cancellation of the Vega space rocket program by NASA.

23. NASA contract award for the second stage of the Saturn space rocket.

24. Development of a 1½-million-pound thrust single-chamber rocket engine (F-1).

25. Project Orion (space propulsion through the use of small nuclear explosions).

26. Development of a nuclear powerplant for space propulsion.

27. The effect of noise on man and ma-

#### MAJOR SUBJECTS UNDER INVESTIGATION

Review of the Nation's space program

The committee's scrutiny of the progress being made by the United States in space the most detailed of any investigation conducted by Congress in this field this year. Eighty-eight witnesses appeared before the committee at 26 open and 6 executive hearings during January, February, and March.
The committee's study covered the work

of seven Government agencies-Department of State, U.S. Information Agency, Office of the Secretary of Defense, Army, Navy, and Air Force, and the National Aeronautics and Space Administration—as well as various technical societies, related groups and industry.

During the hearings, the space agency unveiled for the first time its 10-year program of space exploration, calling for approximately 260 launchings over the next decade at a cost of possibly \$12 to \$15 billion.

Along with its review of the space program, the committee examined the related phases of missile research and development which interact to affect the national interest.

Among the major conclusions reached by the committee during its lengthy review were these:

1. The U.S. space program is "vital to

America's future."

2. The efforts of the Department of Defense to concentrate the direction of its research and development programs under a single authority will result in a tighter overall coordination of our national space

NASA's 10-year program in space is a good program, but it does not go far enough. Furthermore, the space program is not being pushed with sufficient urgency, especially in the utilization of a nuclear powerplant and the development of a 1½-million-pound thrust single-chamber rocket engine (F-1). However, this view is not shared by every member of the committee.

4. A high priority program should be undertaken to place a manned expedition on the moon this decade. NASA's 10-year program makes provision only for manned flight to the moon "beyond 1970."

5. The Air Force presented a strong case for its having a military mission in space, but not an exclusive one.

6. The Navy opposes a single, national space organization. This opposition apparently stems from a strong concern that the Navy remain free to pursue the naval applications of the space science.

7. The Army should not be removed from the space program because of the transfer of the Development Operations Division of the Army Ballistic Missile Agency, better known as the Von Braun team, to NASA. Failure of other Government agencies to use the inhouse facilities of the Army to their full capability would be "an unwarranted waste of a unique organizational setup."

From time immemorial man has dreamed of extending his range of operation above the surface of the Earth. With the development of the airplane, he took his first big leap and flew with the birds.

Now, he dreams of extending his range into limitless space. First will come a flight around the Earth at a height of 100 to 150 miles; then out to the Moon and beyond in the years to come.

Project Mercury has as its objective the placing of a man in orbit around the Earth. The primary objective of the Mercury mission is to determine man's capabilities and reactions in a space environment.

In yiew of the importance of the program, which the National Aeronautics and Space Administration ranks first and most urgent on its list of space projects, a study of the progress made by the space agency was conducted by the committee staff.

The study, approved by the committee, came to the conclusion that the Mercury program is progressing satisfactorily, although there have been various delays which have postponed the date for the first attempt to place man in orbit. This epochal event is scheduled now for 1961.

The study emphasized that Mercury is our only program actually underway for putting man into orbit and questioned the desirability of putting all eggs in one basket.

The committee stated in its report on Project Mercury

'Considering the number of challenging new techniques which must be mastered to make space flight a success, there is a question whether the national interest is best cerved by a single approach to this problem."

"There are a number of very promising alternative approaches to putting man in space. By setting a limit on testing these concepts through exclusive adoption Mercury approach, the Nation is risking the loss of extremely valuable development time. The country cannot support a large number of approaches in competition with all the other demands on fiscal and personnel resources. But at the same time the failure to develop in parallel at least one other manin-space program could prove to be a costly

Overall, the committee commended the "dedication, the ingenuity, and the orderly approach being demonstrated by the many people in NASA, the armed services, the private laboratories, and industry in contributing to Project Mercury.'

### Refusal of NASA to furnish contract information to the committee

During the committee's continuing study of the space agency's contracts and contract procedures, NASA refused to furnish the committee and the General Accounting Office, which is collaborating with the committee, with four documents on the ground of executive privilege.

As a result, the committee held several public hearings at which it heard NASA Administrator T. Keith Glennan and other NASA officials and Robert Keller, General Counsel of the GAO. The hearings resulted in an airing of the issues involved, but no change in NASA's position.

Subsequently, however, when the committee requested information from the space agency on another contract under study, the space agency complied with the request by furnishing, voluntarily, documents similar to those previously refused the commit-

### Research on mechanical translation

The inquiry into research efforts to provide a means of reliable mechanical translation was an offshoot of committee hearings held in 1959 on "Dissemination of Scientific

Information." Various witnesses then expressed the view that mechanical translation could revolutionize the translation problem.

The inquiry disclosed that 11 groups in the United States are now engaged in various aspects of mechanical translation research with support from the Federal Government. These include the Central Intelligence Agency, the first to show interest in machine translation; the U.S. Air Force, Army, and Navy, and the National Bureau of Standards, and the National Science Foundation.

The world is divided by language barriers into about 4,000 linguistic communities, of which well over 50 are large and important enough to carry on extensive trade, communication, and cultural exchange with one another. All interchange between language communities must now funnel through individuals who are to some extent bilingual. The resulting bottlenecks hamper dealings between nations.

The two most important reasons for carry ing on research in this field involve national intelligence requirements and the need for the automation of languages to facilitate the dissemination of foreign scientific and other types of information.

The committee found that the most promising long-range program for mechanical translation was the Army-financed research at the National Bureau of Standards. It suggested that a national center for machine translation will be required in the near

#### Army lunar construction and mapping program

One of the most interesting inquiries conducted by the committee involved Project Lamp-the lunar analysis and mapping pro-

The Army began studying methods of mapping the moon in 1958, recognizing that lunar maps will be needed prior to unmanned as well as manner exploration of the lunar surface.

The Army program proposes to furnish necessary data for precision maps and in-formation on the structural formation of the moon. The Air Force is doing complementary work in this field. Its work is largely concerned with obtaining aerial photographs, whereas the Army utilizes the photographs to produce the final product, the map. The committee found that close coordination existed between the

In addition to the mapping program, there is also under study the development of lunar construction methods designed to withstand the peculiar environment of the moon, and training facilities to provide, in simulated form, the exacting conditions of the hostile lunar environment

The committee concluded that preliminary lunar mapping is "a prime requisite to the establishment of a base on the moon" and said Project Lamp was worthy of consideration by the National Aeronautics and Space Administration to further its program of manned and unmanned exploration of the

### Supersonic air transports

The next major advance in civil air transportation appears to be the development of a supersonic aircraft. This development may occur within the next decade and will raise numerous technological and administrative problems which are of particular interest to the committee.

There are other highly significant problems which will require understanding and solution prior to any legislative action which may be deemed appropriate by the

In addition to the technical problems created by the advanced design of this type of aircraft, and the requirement for more modern navigation, communications, and traffic control systems, the supersonic air transport will be very expensive to develop. The consensus of witnesses was that it will be impossible to finance development and production in the traditional manner. It appeared that some direct or indirect financial support by the Government will be required. In the event that some foreign nation takes the lead in this development, the effects upon American industry and national prestige could be serious.

#### LEGISLATION

Four bills were approved by the committee during the second session, while action was begun on another, but not completed. The major pieces of legislation reported out by the committee and approved by the House of Representatives were the annual authorization of funds for the space agency and revision of the Space Act of 1958.

The legislative histories of the bills fol-

H.R. 10809 (a bill to authorize appropriations to the National Aeronautics and Space Administration for salaries and expenses, research and development, construction and equipment, and for other purposes)

This bill authorized funds for NASA for the 1961 fiscal year beginning July 1, 1960. It was originally introduced January 26, 1960, by Chairman Overton Brooks, of Louislana as H.R. 9918. The committee held hearings on the measure February 17, 25, 20, March 1, and 2. Four subcommittees also held hearings on the bill February 18, 19, 22, 23, 24, and 26. Committee amendments were adopted February 29 and on March 1 the committee directed the chairman to introduce a clean bill.

The clean bill, H.R. 10809, was introduced by Mr. BROOKS March 1. The bill was reported to the House March 3, accompanied by House Report 1383, and passed by the House March 9.

The Senate Committee on Aeronautical and Space Sciences reported the bill with amendments April 29, accompanied by Senate Report 1300. It passed the Senate with amendments May 3 and on that date the Senate requested a conference. Conference Report 1629 was filed in the House May 19 and was approved May 23; it was adopted in the Senate May 24. The President signed the act June 1 as Public Law 86-481.

The act authorized funds for aeronautical and space research, scientific investigations in space, satellite applications, manned space flight, vehicle systems technology. space propulaion technology, vehicle devel-opment, and tracking and data acquisition.

The legislation also authorized funds to pay for the creation of 30 additional supergrade positions at the George C. Marshall Space Flight Center, Huntsville, Ala.

When the bill was reported to the House, it authorized \$915 million for fiscal year 1961, including \$170,760,000 for salaries and expenses, \$621,453,000, for research and development, and \$122,787,000 for construction and equipment. The Senate amendment in-creased the authorization to \$970 million. This included \$50 million of emergency authorization for "Research and development" to be available for expenditure to defray the cost of research and development activities Which the Administrator determined to be urgently required in the national interest to exploit technological or scientific breakthrough. Also included was a \$5 million emergency authorization for "Construction and equipment."

H.R. 12049 (a bill to amend the National Aeronautics and Space Act of 1958, as amended, and for other purposes)

This bill was introduced January Mr. Brooks of Louisiana as H.R. 9675 following a message of the President, dated January 14, 1960, transmitting recommendations that the Congress enact certain amendments . matical, physical, medical, biological, engito the National Aeronautics and Space Act of 1958.

The amendments were designed to (1) clarify NASA's responsibility for planning and managing a program of nonmilitary space activities and to simplify organizational arrangements relating to such activities; (2) modify the provisions of the National Aeronautics and Space Act of 1958 concerning property rights in inventions; (3) provide NASA with certain types of authority which are otherwise available to the Department of Defense or other agencies of the executive branch; and (4) make certain technical amendments to the act.

H.R. 12049 was introduced by Mr. BROOKS, May 3, as a clean bill. It incorporated the provisions of two bills, previously introduced, proposed amendments to the Space Act-embodied in H.R. 4148, authorizing NASA to indemnify its contractors, and H.R. 9484, amending section 305, entitled "Property Rights in Inventions"—thereby tabling these

On March 8 the committee received a report from the special subcommittee which had held hearings the latter part of the first session on proposed changes in the patent section of the act. Hearings were held by the committee on March 9, 10, 14, 15, 16, 17, 21, 22, 24, 28, 29, 30, 31, and April 4 on all aspects of the proposed revision.

On May 3 the committee voted final approval of the bill, and on May 19 it was reported to the House, accompanied by House Report 1633. The House passed the bill

without amendment June 9.

As approved by the House, the bill made the following major revisions in the Space Act: (1) abolished the National Aeronautics and Space Council and the Civilian-Military Lisison Committee of the National Aeronau tics and Space Administration and the Department of Defense; (2) established an Aeronautics and Astronautics Coordinating Board; (3) revised the patent provisions under which NASA operated; and (4) added an indemnification section to guard contractors against losses which might arise from unusually hazardous risks.

The Senate took no action.

House Joint Resolution 567 (a joint resolution to effect immediately the transfer of the Development Operations Division of the Army Ballistic Missile Agency to the National Aeronautics and Space Administration)

This joint resolution was introduced by Representative B. F. SISK, of California, January 21 following a message from the President to the Congress on January 14 relative to making certain transfers from the Department of Defense to provide NASA with an organization capable of and equipped for developing and operating large space vehicle boosters and conducting related research.

The committee held a hearing February 3 and agreed to report the resolution. It was reported February 4, accompanied by House Report 1240, and passed the House February

However, the Senate took no action on the resolution and the transfer became effective March 14, or 60 days after the President submitted the proposal, in accordance with the provisions of existing law.

H.R. 11985 (a bill to make American nationals eligible for scholarships and fellowships authorized by the National Science Foundation Act of 1950)

This bill was introduced by Chairman BROOKS April 28. Its purpose was to change the wording in the act to remove discrimination against American Samoans who had been excluded from eligibility for certain scholarships and graduate fellowships authorized to be granted to Americans chosen on merit for study and work in the matheneering, and other sciences at accredited nonprofit educational institutions in this country and abroad.

The committee held a hearing May 6 and on the same date reported the bill, accompanied by House Report 1591. It passed the House on May 16 and was approved by the Senate without amendment June 18, 1960. The measure was signed by the President as Public Law 86-550 on June 29, 1960.

H.R. 4986 (a bill to provide for the establishment of a National Science Academy)

This bill was introduced by Representative Victor Anguso, of New York, February 25, 1959. Subcommittee No. 3, headed by Mr. Anguso, held hearings on the bill May 4 and 25, 1960. No final action was taken by the subcommittee.

Congressman Robison's Answers to Questions Concerning Our Chief International and Domestic Problems

EXTENSION OF REMARKS

OF

## HON. HOWARD W. ROBISON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES Tuesday, August 30, 1960

Mr. ROBISON. Mr. Speaker, cently, the Binghamton Sun-Bulletin asked me to respond to three questions dealing with our major international and domestic problems and the proper role of the Federal Government in meeting them.

I was pleased to have the opportunity to set forth my views on these questions; and, under unanimous consent. I include the questions and my answers to them at this point in my remarks:

Question No. 1. What should the United States do to promote world peace and to cope with the Soviet Union?

Answer. The goal of world peace is not a partisan one. It is an ambition common to Republican and Democratic Parties alike, and to their respective presidential and vice presidential candidates. Both parties must share in the blame for mistakes of the past, and neither party nor set of candidates has a monopoly on the successful formula we must now adopt in order to cope with the challenges of the Communist conspiracy and promote world peace, meanwhile safeguarding our own independence and preserving our individual freedoms.

The road ahead, regardless of which pathway the electorate decides to take November 8, will be a rough and rocky one. During the forthcoming campaign much will be about our need for strong and wise leaders to guide us down that road. We will have urgent need of such leadership, but-while I have my own firm belief as to which set of candidates, by virtue of maturity, experience, and demonstrated abilities, is the better qualified-leadership alone is not enough.

I say this because I believe that in a society such as ours, under a government such as we have developed, the key to our survival lies with the individual citizen. deed, the individual is the core of our political, religious, and economic thought; and much of the reason for the success of our way of life, historically speaking, has been that America up to now has been blessed with an abundance of rugged individuals.

It has taken the average American citizen of today a long time, too dangerously long in

fact, to become aware of the full nature of the Communist challenge. I believe that such an awareness has now, however, broken through what has recently seemed to be a shell of national apathy. We may not like what we see, but at last we are seeing it. We have begun to realize that the time has come, to say it in slang, "to put up or shut up"—to reject the false goal of mere survival, born in an almost unreasoning fear of the horrors of nuclear warfare, in favor of firmly resolving to win the cold war on all its various battlefronts.

It is difficult, in the space permitted me, to be very specific as to what this means we However, I am sure we can all agree that it means we must remain physically strong. We must have a force at arms sufficient to deter our potential enemieswho have the advantage of striking the first blow-from launching an all-out nuclear war against us and, at the same time, sufficient to win such brush-fire wars as they are bound to set, probing for our weaknesses, and seeking to test our resolution. I believe we have such a force at the present time, but it will require constant vigilance to maintain. On this effort we dare not put a price tag of dollars and cents. Nevertheless, facing an enemy that also plots our economic ruin, there is the price tag of selfdiscipline in deciding how much should be spent and on what.

Next, we must steadfastly stand by our friends, and use every political, economic, and psychological tactic to see that the liberating spirit in the captive people of the nations conquered by communism does not perish. In the long run these people may be our best secret weapon. We must also, regardless of the unpopularity of the sacrifice it entails, continue our programs of military and economic aid to the underdeveloped nations of the world who have helped us hold the line against the spreading Communist stain. In doing so, however, we must abandon once and for all any thought that we can buy friendship, and be as realistic and hardheaded as is our enemy in his countereffort in these fields.

We have done well to contain communism so far, but we must recognize that a holding policy, under which we are the inert, defensive target for political, economic, and psychological warfare is not enough. To recapture the initiative, as we need to do, we must believe more strongly in ourselves and in our system and sell it throughout the world with the same contagious enthusiasm with which the Communists sell their false philosophy, at the same time making it unmistakably clear that we are intent on preserving our own freedoms.

Here at home, we must also seek to grow spiritually and materially. With all the more obvious moral defects in our society today that others have noted, there may be promise of spiritual growth in the fact that Americans will voluntarily spend an esti-mated billion dollars this year for new churches. Only countless similar individual decisions can end America's seeming moral decline. Promoting economic growth is an equally complex matter, but here again I do not believe it can be forced by governmental edict nor planned by all wise bureaucrats. Growth will come, as it always has, under a government that holds fast to our historic foundations and provides a climate in which individual enterprises can flourish. The roots of such growth are deep and lasting, unlike those that might ensue from the adoption of economic techniques alien to our system. To those who decry our preoccupation with private comfort, let me remind them that there are dangers in the opposite extreme for it was Hermann Goering who scorned private comfort in the name of national greatness and demanded the production of guns instead of butter. In short,

then, we can win this economic horserace with Russia, but not if we try to ride their horse.

Now, to do all of these things is a very large order. It will require the best leadership we can find, and the best that is in each of us. Such leadership must, first of all, believe not in the magic of centralized big government, but in the initiative, vitality, energy, and resourcefulness of our people. Unless the leadership we choose is of that type, it cannot help us cope with Soviet Russia nor help us find the way to world neace.

Question No. 2. What are the major problems on the domestic scene, within the United States, and what should the Federal Government do about them during the next several years

Answer. The list of major domestic problems facing the American citizen is as long as the issues involved are complex. Overshadowing our future decisions as to the Federal Government's proper role in seeking solutions to those problems is our growing awareness that our free society is engaged in a death struggle with communism. Senator Kennedy, himself, has asked whether a nation organized and governed such as ours can endure in competition with the singleminded advance of the Communist system.

I wholeheartedly believe that it can. America has the brains, the wealth, and the weapons to develop a new strategy for victory. Chief among those weapons is the dynamic force of individual freedom. Using freedom as a tool—prying loose the creative energies of free men and women—America achieved her independence, conquered her wilderness, rounded out her early, natural frontiers, preserved the Union, and successfully completed the transition of her society from an agricultural one to an industrial colossus that is the envy of the world.

Now we seek to prove once again, to ourselves and a watching world, that the forces of free capitalism can continue to build and rebuild a better way of life for its citizens without departing from its historic foundations. That task will be the more difficult because we have, for a generation, been steadily dulling the cutting edge of that tool of freedom. The seeming necessity for doing so was born in a great depression that rocked our faith in ourselves, and was carried forward under the continuing pressures or threat of armed conflict. Under such motivations, we have seen the cash expenditures of the Federal Government, during the same period, rise from a yearly average of \$4 billion to the present \$80 billion, and our national debt, including future commitments, skyrocket to an unprecedented threequarters of a trillion dollars.

The congressional justification for such expenditures and the piling of debt upon debt has been that, in the supercharged atmosphere in which we live, only a strong, omipotent, though benevolent, central government can successfully direct the economic affairs of its citizens and care for them in sickness and in health. The proponents of this philosophy, both yesterday and today, have been impatient with the slow processes of individual, community, and State initiative. Where they have thought such traditional areas of concern to be delinquent in action, they have moved in, often oblivious of constitutional limitations and of the ultimate cost of hazardous new areas of Federal interest.

A prime example of how badly this can sometimes work can be found in the so-called farm problem, an industry now so enmeshed in government planning and control, and dependent upon politically motivated votes, that it seems forever doomed to permanent domination by government. I have sponsored and urged legislation to end this continuing insanity once and for all

and to restore agriculture to the free marketplace, with Federal aid restricted to rural redevelopment and protection against radical marketing changes.

Acceptance by Congress of the false notion that Washington can give us something for nothing has also seen our share of world trade diminish as inflation has priced our products out of world markets, our gold reserves drop to a 20-year low, and certain American manufacturers move their plants—lock, stock, and barrel—to foreign lands. Only a continuing firm hand on Federal spending, making us live within our means, can halt the dangerous trends of which these examples serve as handwriting on the wall.

Economic growth is a proper national goal; I think we can and must do better here. Again. Congress has a part to play if it would only recognize the urgent need to ease restrictive taxation that has dulled business and individual initiative, liberalize unrealistic depreciation rates that have eroded needed industrial capital, and equalize the powers of big business and big labor so that they will not be pulling and hauling but pulling together in the national interest. While, like any other piece of machinery, our economy should not be forced to run at ortificially high speeds, all parts thereof should function productively. Thus, there are pockets of chronic economic distress throughout our Nation which wise Federal action could help eradicate. I have sponsored or supported legislation, during my 3 congressional years, in all these fields.

Our remaining domestic problems lie mostly in the realm not of providing but of helping our people to provide themselves with the housing, the schools, the health care, and so on, that they need and want. It is vital, I believe, for the Federal Government to approach such needs only in such fashion for, if we remove from the people the responsibility for action we may find that we have, unwittingly, also robbed them of the vigor and faith in themselves that they must have to sustain them in what portends to be a long drawn-out struggle with communism.

The challenges we face, at home and abroad, are monumental in scope. They are unprecedented in our history. They call the American people—as did Abraham Lincoln in a time of peril a century ago—to "think anew and act anew." Yet, with the boundless evidence of the success of our system all about us, it would be utter folly, I think, to so yield either to pressures from abroad or to pressures engendered by our own domestic selfishness as to abandon our institutions and our heritage in a search for the fillusory goal of what some are calling national greatness.

The ingredients for true national greatness cannot be found down some blind alley known only to the proponents of big government. They lie locked instead in millions of American hearts. All that is required for total victory is our own realization of that fact, and in the long run the stimulation of such an understanding may be our greatest domestic problem.

Question No. 3. What are the principal problems of this congressional district, with particular reference to problems about which the Federal Government might or should do something, and what should the Federal Government do?

Answer. The principal problems that face the residents of the 37th Congressional District are, in essence, the same as those faced by the other 180 million Americans. All of us—like all of them—are primarily concerned with achieving a better life for ourselves and for our children in a world of peace.

During my 3 years of congressional service I have often been asked by people unfamiliar with our district what sort of a district it is. By this they mean, do we have a predominately agricultural community, an industrial one, a rural or an urban community, or what? It has been my observation, and thus my reply to such questions, that one would have to search far and wide to find another congressional district more typical of America, a better cross-section or composite picture of America and her people in this era, than the 37th district of New York.

Of course, we are more fortunate than some of our southern neighbors in that, to us, racial intolerance is more of a personal than a community problem. We are also more fortunate, even with our spotty areas of economic distress, than the people of the coal fields of Pennsylvania or the textile towns of New England who have not had the diversification of industry and the blend of agriculture and business that have blessed us with an unusually stable economy.

Nevertheless, those of our people who have retired on fixed incomes and our housewives and their breadwinning husbands have become fully aware of the fact that during the last 5 years of the Roosevelt administration their take-home dollars lost 25 cents in purchasing power, and another 28 cents during the Truman years. By way of contrast, I believe they are also aware of the fact that, under President Eisenhower, the bite of inflation-the most insidious and cruel form of taxation ever devised-has been held to only 5 cents. This then is an area where, if it holds to the basic principles of fiscal responsibility, the Fedéral Government has a vital role to play in helping our individual citizens achieve their goal of economic security. My voting record on this issue speaks for itself.

Similarly, a fiscally responsible government will help our farmers and our small business men and women—the keystone of our national economy—to survive and prosper, and our industries, such as Endicott-Johnson, Remington Rand, and Corning Glass, to meet the growing problems posed by the import of shoes, typewriters, and glassware produced in countries where labor standards are far below our own. I also believe that, regardless of the importance of reciprocal world trade, our Federal Government must reappraise our trade policies without delay and formulate realistic safeguards to protect the jobs of those who work for local industries such as I have named. I have introduced legislation calling for such action in this Congress; if reelected, I will work for its early consideration.

Speaking of local industries, one of the most important—Ansco and its affiliate, Ozalid—has had to compete in this most competitive of worlds under the damper of Federal ownership and control. The history of this matter is as long as the issues involved are complex. But, under my sponsorship, legislation to restore Ansco and Ozalid to the American free enterprise system came closer to congressional approval this year than ever before in 8 years of trying. If reelected, I am pledged to an all-out effort to conclude that fight, the success of which could be of untold benefit to the future economy of our community.

Our people—like all Americans—want and need protection from other things than inflation and cheap imports. For years now, residents of our cities and towns along the Susquehanna have lived under the threat of disastrous floods because the comprehensive Federal plan for their flood protection has been stalled by opposing engineering viewpoints and local opposition. I successfully sponsored one of the largest authorizations ever voted by Congress for a new survey aimed at resolving these differences. Now, funds must be provided to start this work and get our flood-protection effort off dead center; if reelected, I pledge to work to that end.

Finally, of course, our people, like all

Americans, have need of such things as new homes, more and better schools, highways, and hospitals. Our citles have slum areas that need rebuilding and they need help, as do our smaller communities, in providing their citizens with an adequate supply of pure water and with modern sanitary facilities. We have a few communities, such as Hornell and, perhaps, Elmira, that have suffered long-term economic distress and need to attract new industries. We also have some people trying to farm land on which they cannot subsist, and who need to be trained for other work.

In meeting all these and comparable needs, our Federal Government has a role, and a very important local role, to play. Space does not permit of specifics, but it is my belief that that role is not to plan and do for people, taking responsibilities from them, but to leave with the people the traditional American responsibility for helping themselves and their neighbors, while at the same time encouraging and stimulating their own creative abilities.

There are clear material limits to what the Federal Government can do. There are less clear philosophical and constitutional limits to what the Federal Government should not do. This means we must seek to establish a table of priorities for our local needs. The pressures of the impatient, combined with the intensifying pressures of the cold war, will make living with those priorities a difficult task. Nevertheless, upon how well we succeed may depend the survival of the American way of life, which has only begun to achieve its promise of abundance, and the blessing of individual freedom without which that way of life has no meaning.

## The 1960 Anniversary of the Ukrainian Congress Committee of America

EXTENSION OF REMARKS

### HON. DOMINICK V. DANIELS

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES
Thursday, September 1, 1960

Mr. DANIELS. Mr. Speaker, the year 1960 marks the 20th anniversary of the Ukrainian Congress Committee of America. This organization represents more than 2½ million Americans of Ukrainian descent. But even more, it is the voice for over 40 million Ukrainians who have been silenced by the boot of totalitarian communism.

The Ukrainian people, although a part of the U.S.S.R., are by no means of either Russian origin or sympathy. They represent the largest nation of subjugated human beings in the Western World. Except for a short period after World War I, there has been no free Ukrainian state for centuries; they have no flag, no army, no national schools to remind them of their heritage. Yet in all this time the desire for freedom has never been quenched.

The year in which this committee was founded, 1940, was a time of great hope for the Ukrainian people. They believed that the victorious German armies were coming to liberate them from their tyrannical Russian masters. They met the Nazi armies with open arms, only to discover that the Germans only wished to murder and enslave them—not treat them like human beings. Only

then did they join the Russian national front—not to fight for a mother Russia, but to defeat the greater of two evils.

An oppressed people fought hard for liberty; but when the war was ended, when their struggle was ended, that people found that its bonds had been tightened even more than ever.

Those Ukrainians who have sought freedom and peace in the United States love their new homeland; yet they can never forget the sufferings of their brethren who still live in slavery. The Ukrainian Congress Committee has thus worked to insure the freedom of all Ukrainians, as well as of all peoples. They have never failed to expose the dangers of communism throughout the world. Through war and peace they have kept burning a light of hope for oppressed peoples. We congratulate the Ukrainian Congress Committee on a job well done, and hope that the near future may see the freedom of the Ukraine for which they have worked so hard.

### Money and Interest

EXTENSION OF REMARKS

### HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. DERWINSKI. Mr. Speaker, an editorial in the September 1, 1960, issue of the Chicago Daily Calumet, an outstanding community newspaper of the Nation, should be of particular interest to the Members of Congress at this time, and I hereby insert it into the Record without further comment:

### MONEY AND INTEREST

Politicians keep harping on high interest rates. They say that the sound dollar fiscal and monetary policies of the Eisenhower administration have forced Americans to pay excessive interest rates when they wish to borrow at the bank. To the uninformed this would give the impression that under Ike the American people pay the highest rates in the world.

This is not true. Our rates in the United States are the lowest interest rates in the world. In the past weeks our 5 percent interest rate has fallen to  $4\frac{1}{2}$  percent in some areas. In contrast, the rates in Great Britain are  $6\frac{1}{2}$  percent, France  $7\frac{1}{2}$  percent, Italy from 6 to  $7\frac{1}{2}$  percent, in Greece from 9 to 10 percent, in Denmark  $7\frac{1}{2}$  percent, and in Japan 9 percent.

In Sweden and Norway, two welfare states noted for their socialistic economies the rate is 6½ percent.

In South America you hear the cry for cheap money, too. In Chile the rate is 15 percent, Peru 13 percent, Brazil 12 percent, while in Argentina and Mexico the rate is 10 percent. These rates are the lowest rates available for those who have excellent credit or good security. Others have to pay more.

This is true in this country, too. You have to have good credit or security in order to get a 5-percent loan.

Money is a commodity and interest rates react naturally to the law of supply and demand. Any attempt on the part of our politicians to interfere with this law must be made with extreme caution, otherwise our entire economy can be thrown out of balance.

The Health Aspects of Industrial Air Pollution on Contemporary Society

EXTENSION OF REMARKS

OF

## HON. CHARLES A. VANIK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. VANIK. Mr. Speaker, under leave to extend my remarks I am submitting a report prepared by Mr. Casimir Bielen, of Cleveland, Ohio:

THE HEALTH ASPECTS OF INDUSTRIAL AIR POL-LUTION ON CONTEMPORARY SOCIETY

(By Casimir Bielen)

HISTORY

Undoubtedly primitive man has always been overcome periodically or killed by fumes of burning materials when living in caves or other closed spaces with inadequate ventilation. This situation, although not recorded in written history, differs little from the thousands of acute carbon monoxide deaths due to unvented or poorly vented space heaters in cheap apartments and motels of today.

The earliest written record of death from air pollution appears in the writings of Piny the Younger during the first century A.D. His uncle, Pliny the Elder, went by ship to see what was happening as a result of the eruption of Mount Vesuvius in 79 A.D. The older gentleman was the victim of chronic bronchitis or more extensive chronic pulmonary disease before the trip. Nearing the site he was overcome by sulfurous fumes and died on the third day after his collapse. The author also states that many in the Pompeii holocaust were suffocated by sulfurous fumes.

Complaints about foul air made as a re sult of man's efforts to live a communal life and develop industry seem to have begun in earnest in England following the discovery and early mining of sea coole or coal in 852 A.D. Dr. P. J. Lawther of St. Bartholomew's Hospital of London writes in Courier, the official journal of UNESCO that the menace of coal smoke was recognized in England about 700 years ago. In 1273, Parliament passed an act forbidding the burning of coal in London and in 1306 a man was hanged for this offense. In 1306 a Royal Proclamation by Edward I and again in Queen Elizabeth's day prohibited the use of sea coal in fireplaces in London. Apparently none paid much attention to these monarchs in this regard.

There is a hint of illness attributed to fumes as early as 1661. The author John Evelyn published a book under the title of "Fumifugium." He attributed certain chronic disorders of the respiratory tract, particularly the lung, to the inhalation of coal smoke. He wrote as follows, "And what is all this, but the Hellfsh and dismal cloud of Sea-Coale? [sic] which is not only perpetually imminent over her [London's] head; but so universally mixed with the otherwise wholesome and ecellent Aer, that her inhabitants breathe nothing but an impure and thick mist, accompanied with a fuliginous and filthy vapour, which renders them obnoxious to a thousand inconveniences, corrupting the lungs, and disordering the entire habit of their bodies; so that catharrs, phthisicks, coughs, and consumption, rage more in this one city, than in the whole earth besides."

It is also interesting to note that years ago the air was wrongly blamed for many scourges of man. The word malaria, which is simply the Italian word for bad air, still testifies to an accusation long since proved

false. Early accounts of epidemics of everything from cholera to influenza are full of references to "noxious vapors" and "night airs." With the advance of bacteriology in the 19th century, the possible health significance of air was all but forgotten in the great crusade for safe water, milk, and food.

There were undoubtedly other episodes of air pollution over the centuries due to volcanic eruptions, grass fires, and forest fires. These we will skip for brevity because our major concern is manmade aid pollution in an industrial society.

SIGNIFICANT URBAN AIR POLLUTION EPISODES

Meuse Vailey: During the first week in December of 1930, all of Belgium was covered by fog. This condition was very pronounced in the Valley of the Meuse. There was also a thermal inversion within this blanket of fog covering the valley. There were many factories including coke ovens, blast furnaces, steel mills, zinc mills, glass mills, powerplants, fertilizer plant and a plant making sulfuric acid. The homes in the area were heated by coal. The steamships were also powered by coal along with the freight trains. Motor vehicles were not numerous.

Beginning on the third day of this abnormal weather of static air with no up-draft, people became ill. In general, this illness was of a respiratory nature. Approximately 6,000 people became ill and somewhere around 60 people died over the next 2 days. Rain came on the fifth day and the fog disappeared. The epidemic stopped immediately. No new cases were reported.

Donora: During the last week in October of 1948, anticyclone weather and thermal inversion conditions occurred over most of the eastern part of the United States. These weather conditions were particularly marked in the upper Ohio River Valley and in the lower portions of the Allegheny and Monongahela Valleys. In Donora, Pa., which lies on the Monongahela River, an important factor should be mentioned. The city lies on a U-shaped river bend and is surrounded on all four sides by hills measuring 1,000 feet. Like the Meuse Valley, this city had steel mills, blast furnaces, zinc mills, sulfuric acid mills, and slag processing mills.

Beginning on the third day, 5,910 people became ill with 18 to 20 dying. Again there was a rain by the end of the week and the epidemic stopped immediately.

London fog: Four major fog episodes have occurred in London since 1948. Each disaster was followed by an increased number of deaths when compared to fog free years. Nearly 1,200 died after fog of 1948 and 4,000 after the much publicized fog of December 1952. During the January 1956 disaster, 1,000 deaths were reported and 800 during December of 1957.

Since the 1952 episode is most known and documented, a more thorough examination will be made. During the week of December 5-9, 1952, much of the British Isles was cov ered by dense fog caused by anticyclonic weather conditions and a thermal inversion. The Thames Valley and London were severely involved in this weather abnormality. Illness began 12 hours after the dense fog began. The illnesses were respiratory in nature as were Donora and Meuse Valley episodes. Although there are no exact figures on morbidity, mortality statistics indicate that approximately 4,000 people died in excess of the expected number during fog free years. Most of those who died were recorded as having chronic bronchitis, broncho-pneumonia, other lung diseases, or heart disease. However, most of the deaths occurred in the chronic cardiopulmonary invalids.

MEUSE VALLEY, DONORA, AND LONDON FOG FINDINGS

Analysis: The health aspects of all three episodes were similar. The symptoms were

abrupt in well people and the increase of symptoms of the chronically ill was sudden and without apparent cause. There was burning of the eyes, nose, and throat, followed by cough, shortness of breath, constriction and burning in the chest, wheezing respiration, often nausea and vomiting, and in the severely ill, collapse and cyanosis.

In all three epidemics, extensive studies were made after the fact to determine cause. In the Donora disaster, these studies were exhaustive. They were carried on over a period of 2 years and were done independently by the U.S. Public Health Service and the Kettering Laboratory of Cincinnati for the United States Steel Corp. The studies included meteorologic data available back to 1918, and a critical review of all mortality and morbidity data available from the Pennsylvania Department of Health for the same period. House to house study was made by trained epidemiological investigators and as many autopsies were obtained as possible. A critical analysis was made of all material coming into the city and all products going out. The physical and chemical nature of all waste products from mills, homes, incinerators, etc., were analyzed. All air-cleaning gadgets operating in the city during the episode were cleaned and their dust collections studied. Some of the air in Donora on the worst night of the disaster were retrieved from a large truck tire and a railroad tank car. Biologic studies of acute and chronic plant damage were made. Scale models of the community and the surrounding valley were made. All unusual episodes up and down the river such as house fires and explosions were investigated.

The official conclusions of the U.S. Public Health Service report are quoted in part as follows:

"1. During the smog of October 1948, a total of 5,910 persons or 42.7 percent of all persons in the Donora area, were affected to some degree by the smog.

"2. The affection was essentially an irritation of the respiratory tract and other exposed mucous membranes, and varied in degree from mild to severe. Cough was the predominant single symptom during the illness."

"3. Neither incidence nor severity of affection appeared to be influenced by sex, race, occupational status, length of residence in the area, or degree of physical activity at the time of onset of affection.

"4. Both incidence and severity revealed a direct relationship with increasing age. Over 60 percent of persons 65 years of age and over reported some affection from the smog and almost one-half of these were in the severely affected group.

"5. With the exception of such episodes as that of the October 1948 smog, long-term studies of mortality records and plant morbidity records indicate that the health of the people of Donora appeared essentially no different from that of nearby towns.

"6. Twenty persons died in the Donora area during or shortly after the smog of October 1948; 17 died on day No. 3."

The official conclusions in the Meuse Valley episode are as follows:

"Maximum fog caused the illness of many thousands of persons and the death of at least 60. The aged were affected more frequently and more severely than the young. The elements in the maximum fog were probably acid gases adsorbed on the surface of particulate matter which, when it got into the tracheo-bronchial tree and lung, were hydrolized to their respective acids causing chemical irritation and/or burns of the lining membranes. These materials are the result of the combustion of fuels and manufacture of metals in the valley in

which the episode occurred."
On the London fog situation of 1952, the
British Government reports as follows:

"While the available evidence does not allow of a clear indictment of any one constituent of the fog, the conclusion is inescapable that the excessive mortality and increased incidence of respiratory illness during and immediately after the fog of December 1952 were the result of irritation of the respiratory tract by contaminants of the fog. The irritants mainly responsible were probably those derived from the combustion of coal and its products and their lethal effects were wholly exercised in persons already suffering from chronic respiratory or cardiovascular disorders."

A scrutiny of the London reports of the coroner's pathologists showed that the pathological findings in people who had died during or immediately after the fog were indistinguishable from those found after death from similar causes before the fog. Mention was made in some cases of engorgement of the laryngeal or bronchial mucosa or of excessive bronchial secretion, but there was no lesion or grouping of lesions which could be said to be pathognomanic of deaths due to fog. However, a histological examination of sections from eight lungs from one of the public mortuaries during the fog period was made by Dr. Bernard Lennox of the London Postgraduate Medical School. He reported changes in the lung tissue varied greatly, with no common element, and he considered the abnormalities found representing mostly old lesions which had been present before the fog. He did, however, find consistent changes in the mucosa of the larger bronchi in all eight lungs.

Examination of the lungs for influenza virus by the Virus Reference Laboratory of the Public Health Laboratory Service showed no signs that the excessive mortality during the first half of December could have been

due to the influenza virus.

Chemical examination of the lungs from four coroners' autopsies were examined by the Government chemist in parallel with a control lung from a person who had died of an accident some time after the fog. Because of the absence of an occupational history in these cases, it was not possible to say whether any abnormal constituent might have been due to the fog. An exhaustive chemical examination including spectrographic tests for trace elements falled to show any significant difference between the mineral content of the lungs from victims of the fog and that of the control lung.

In Lewisham, Dr. E. H. R. Smithard made a careful classification of 228 deaths occurring during 2 weeks—December 7-20. In addition to pointing out age distribution, the excess of deaths in males, he noted, an abnormal geographic distribution of fatal cases. The parts of the borough with the highest mortality were in proximity to sources of excessive smoke.

### OTHER AIR POLLUTION EPISODES

Cincinnati: In 1949, a small plant that sulfonates oils, expelled hydrogen sulfides into rainy air. A great deal of this gas was collected within a slow moving cloud as it passed over the exhaust. This cloud slowly passed over Reading, Ohio. Homes painted with lead paints turned black in an area 100 feet wide and one-half mile long. The nauseating odor disturbed residents and caused nausea and vomiting in a few children. No serious illnesses resulted.

Mexico: In Poza Rica, Mexico, on November 24, 1950, an unusual exposure of hydrogen suifide caused illness in 320 persons and death in 22.

Ohio-West Virginia: In 1955 and 1956, a small chemical plant in Gallipolis Ferry, W. Va., began to emit mercaptans into the air. The prevailing northeast wind blew these exhaust wastes over the city of Gallipolis, Ohio. On foggy or thermal inversion mornings, the odor caused schoolchildren and housewives to vomit. No permanent damage was reported.

Los Angeles smog: For the past 10 years, concentrated air pollution has been very great in the Los Angeles area. Offshore anticyclonic weather conditions and thermal inversion create this situation during certain seasons. Background mountains help this situation along. Many complaints of disorders of health have been made. No one knows for certain what lasting effect this smog will have on health. However, residents with asthma, hay fever, and respiratory diseases have complained of ill effects. Extensive studies have shown that incompletely burned petroleum products are chief contaminants of air.

In 1956, the California Department of

In 1956, the California Department of Public Health sought information on the effects of smog through personal interviews. A representative sample of 3,545 adults were selected. About two-fifths of the sample reported that they were bothered by air pollution. However, two-thirds of the respondents from Los Angeles County complained of smog nuisance. Most persons complained of eye irritation and nasal symptoms.

#### AIR POLLUTION LEGAL PRECEDENT

Health damage suit: In September of 1955, industry suffered the loss of its first suit for personal or health damages because of air pollution. There have been a large number of suits by employees under workmen's compensation laws, many of them successful, but none quite like this. Paul Martin, his wife and daughter raised cattle on a 1,500 acre ranch near Reynolds Metals plant near Troutdale, Oreg. Reynolds makes aluminum and the smelting process gives off fluoride fumes. Martin claimed his first damage in 1950 when his cattle, pastured about a mile from the plant, became ill. The court decided the cattle suffered fluorosis and awarded Martin \$47,000. After winning this court case, Martin took Reynolds into court again, claiming the inhalation of fumes plus the eating of contaminated vegetables had resulted in liver damage to him, and damages to the stomach walls of his wife and daughter. A jury awarded the Martins \$38,-293. Reynolds appealed the case. Although medical testimony was conflicting, this case is significant because of its novelty as an air pollution personal damage suit.

### AIR POLLUTION AND-CANCER

Introduction: As an introductory background, an analogy should be made between a communicable disease and cancer to ll-ustrate the many factors faced by researchers in this field.

The generic terms of communicable disease and cancer resemble each other because each includes a number of disease entities and both have multiple causes. The causes of most communicable diseases have been identified. This is not, however, the case with cancer in general and even less with specific types of cancer. This is brought out because our status of knowledge concerning specific causes of cancer may be similar to the time years ago when the broad term communicable disease was first divided and redivided into specific diseases. Different agents and factors were identified one by one. In the beginning it was difficult to determine the interrelationship of agent, host, and environment to communicable diseases. These same difficulties exist in the relation of air pollution and cancer.

Another important observation can be made concerning the comparisons. In the case of communicable disease, there is a short period between exposure and the disease. This made it easier to recognize and identify bacterial agents. This is not, however, the case with cancer because it is believed that the effects of air pollution do not show up for many years. Medical researchers have a more difficult task in developing cause and effect factors over a 20- to 30-year period.

Another interesting difference occurs be-

tween communicable disease and cancer. Although viruses have been identified as causative factors in some cancers, communicable diseases deal with micro-organisms while we refer to the chemical spectrum which may link cancer with air pollution. In the case of a communicable disease, researchers were able to link a type of disease with a specific organism. This is not the case with cancer in general. The types of cancer are not identifiable by a single cause. Researchers further believe that cancer of a specific site, such as lung cancer, may be due to different causes. This is further complicated when microscopically the lung tumor may not appear to be different.

Three factors are discussed when talking about lung cancer. They are tobacco smoking, occupational exposures to substances causing cancer, and air pollution. Medical researchers are not in agreement as to the relative importance of each of these factors to lung cancer or to the multiple effect. However, statistics are available showing death variations of U.S. population by age, sex, color, country of birth, socioeconomic status and geographical areas. These variations are being used to study cancer as they relate to air pollution.

CANCER TREND BY SEX IN THE UNITED STATES

Lung cancer: Although other forms of cancer have increased, cancer of the lung has shown the greatest increase among white males.

Urban-rural differences: Studies of cancer mortality according to size of community have shown an increase in cancer of the lung with the increase in size of the city.

It should also be noted that practically no differences in smoking habits according to the size of urban communities were noted in the United States. However, marked differences in lung cancer rates have been reported.

For the United States, cancer of the respiratory system which includes lung, bronchus, and larynx is higher among urban males than rural males. This ratio is 1.71 for males and 1.16 for females in a similar comparison.

Lung cancer affects city dwellers to a much greater extent that it does residents of non-metropolitan areas. Stocks and Campbell found nine times as much lung cancer among male nonsmokers who lived in a city than occurred among male nonsmokers living in rural areas.

Not all of the excess can necessarily be attributed to air pollution since other factors, for example, climate or housing conditions, play a part, but in general it is the industrial towns liable to heavy pollution that have the highest death rates.

The death rates from pneumonia and bronchitis in 1952 show a definite and consistent difference between the large centers of population and the rural areas.

Foreign-born cancer mortality: The foreign born have been found to have a higher mortality rate for lung cancer than native white and nonwhite in the State of Ohio. It was also found in the same study that urban foreign born have a much higher death rate than urban white natives and urban nonwhites. The urban foreign-born rate is also higher than the rural foreign born. Of particular importance is the rural foreign-born rate. It exceeds the urban white native and nonwhite rates. This last fact is significant. It would appear that other factors were contributing to the high death rates among foreign born. Eastcott showed, within comparable age groups, English immigrants to New Zealand had a 30-percent higher lung cancer death rate than native New Zealanders, and the excess was 75 percent in those over 30 years of age. Since there was no difference in the average consumption of tobacco, it appears that exposure to atmosphere of British industrial cities may be responsible.

Male-female mortality: Statistics are also available concerning deaths of males and females. It has been indicated that more males die of respiratory diseases than females.

Socioeconomic variations: The association between socioeconomic status and causes of death have been established for many years, principally in England and Wales. United States a study of cancer incidence of 10 metropolitan areas showed that only certain specific forms of cancer are associated with income. Among this group was cancer of the lung and bronchus. These studies may have some significance if one assumes that the lowest rental areas are nearest to the source of pollution. Dr. Mancuso's findings concluded that a considerable excess of lung cancer deaths occurred in the lowest economic fifth within Cuyahoga County. Some of this area east of the Cuyahoga River Valley also lies in the most concentrated area of air pollution. This area also has the most reported incidence of lung cancer in Cuyahoga County. Congressman Charles A. Vanik, representing this area, reported to Congress that Dr. Clarence Mills' study of area revealed 240 more lung cancer deaths in this area per year than the cleaner sections of the city.

Experimental, tumor production: In addition to the sudden or acute effects of air pollution, a second potential danger lies in the prolonged or cumulative exposure to air pollution. Of course, the research problems associated with measuring long-term effects are more complex. However, significant information is being produced by laboratory experiments with animals. Dr. Paul Kotin has done pioneering work in this area and summarizes six laboratory accomplishments with animals. These summaries are quoted

below:

"1. Carcinogenic aromatic polycyclic hydrocarbons have been demonstrated and quantitated in polluted atmosphere of urban communities. Compounds identified included 3,4-benzpyrene and, more recently, 3.4-benzfluoranthrene. These agents have been used to produce skin cancers and subcutaneous sarcomas in C57 Black and Strain A Mice by painting and injection.

"2. Carcinogenic properties have been demonstrated in fractions of the atmosphere that are free of aromatic polycyclic hydrocarbons. Compounds belonging to the group of oxidation reaction products of allphatic hydrocarbons have been used to produce skin cancers when painted on C57

Black and Strain A Mice.

"3. Ozonized gasoline has been used in inhalation chambers for the production of lung tumors in Strain A and C57 Black Mice. These tumors, while differing structurally from human tumors, are nevertheless unequivocally new growths. Their more indolent natural history in mice may well be a reflection of host resistance factors rather than an indication of lack of carcinogenic potency in the aerosols inhaled.

"4. Carcinogenic materials have been identified in the air in a particulate state that permits their being breathed and deposited on the lining of the lung. Many of these cancer-producing agents are chemically stable and, as such, survive sufficiently

long after emission from pollution sources to be potential biological threats.

"5. Atmospheric irritants of all types as, for example, aldehydes and organic acids, though in themselves noncarcinogenic, may play a role in the development of cancer by interfering with the normal flow of the mucous stream that permanently resides on the lining cells of the lung. It is this continual flow of mucus that normally serves to prevent the accumulation of deposited material on the respiratory epithelium. Irritants can reduce the activity of cilia, the propelling whips that move the stream along,

so that stasis occurs and particle accumula-

"6. Protein materials, normally present in blood and in cells, are capable of freeing cancer-producing chemicals from the particles on which they are carried so that biological activity on their part can result."

Dr. Kotin further concludes that atmospheric pollution in and by itself, uniquely supplies the links necessary for the experi-

mental induction of lung cancer.

A number of pollutants found in the air over eight different cities are being tested for their ability to produce cancer in mice. Taken together, fragmentary evidence points unmistakably to a relationship between air pollution and lung cancer.

Certain other experimental data bear on this question. Substances found in the air over Los Angeles will produce cancer in mice as will extracts from motor vehicle exhausts. Moreover, chemical studies have demonstrated the presence of 3,4-benzpyrene which is one of the most potent known cancerogenic substances in the air over many cities in the world.

Research done at the University of Southern California has shown that the fertility of mice and the survival rate of newborn mice are reduced by long parental exposure to low concentrations of pollutants of the Los Angeles type.

Smoking and air pollution ratios: Stocks and Campbell have estimated that 50 percent of the lung cancer deaths in the Liverpool area result from smoking and about 35 percent from air pollution. Hammond estimated that 31 percent of lung cancer deaths are due to air pollution.

## Report to My Constituents on the 86th Congress

EXTENSION OF REMARKS

## HON. FRANCES P. BOLTON

OF OHIO

IN THE HOUSE OF REPRESENTATIVES
Thursday, September 1, 1960

Mrs. BOLTON. Mr. Speaker, another Congress-the 86th-is over. The second session adjourned sine die on September 1. It has been a strange Congress in many ways; largely because so much time pased without accomplishment. In the first session there were 23 Fridays when the House did not even meet. This session 3 whole months went by with practically nothing done. The Senate filibustered for weeks over doing anything for civil rights, and now boasts of the bill finally passed. We cannot filibuster that way under House rules, but we dillydallied along most of the winter. Of course the party in power-the Democrats had about a 2-to-1 major-ity—is always reluctant to put through the program of a President of the other party, especially in election year. This time the Senate held up appointments of judges and postmasters, as everyone in Ohio knows all too well. However, the 86th Congress has adjourned, and we can look at the record.

It was particularly unfortunate that in the first 3 months of this session so little legislation of importance was passed, as it gave an excuse to the majority leadership to recess for the conventions and then come back in August to complete the work. Along with my Republican colleagues I opposed the recess, believing that very little could be accomplished in such a postconvention session and that it was not in the best interests of the United States. Now that the Congress has finally adjourned, the public press and informed persons have pretty well agreed that little if anything real was accomplished, and that it was charged from the very beginning with political impulses. Most of the "musts" that were supposed to be so important to the country could have been passed before the recess if the majority party had had the will to do so. It certainly had the votes.

#### ACCOMPLISHMENTS AND FAILURES

This Congress failed to take action on many important matters recommended by President Eisenhower, such as a moderate upward adjustment of the minimum wage; constructive measures to meet existing farm problems; Federal assistance in the construction of facilities for colleges, universities, and elementary and secondary schools; authorization of 40 new Federal judgeships to expedite the rendering of justice; liberalization of our immigration laws; and proper financing to avoid delays in our interstate highway program.

SOCIAL SECURITY

One of the few important post convention session bills passed was the social security amendments bill which authorizes a new program of Federal grants to the States for medical care for the aged. The plan finally adopted provides that the Federal Government will assume one-half of the cost of providing medical care to persons over 65 who have incomes under minimums to be established by the respective States. The program is voluntary on the part of the State with respect to the establishment of such a program, and it is further voluntary on the part of the individual as to whether or not he or she seeks to be covered. The language of the bill clearly states that the recipients under the program are to be in addition to those persons now receiving old-age assistance, not merely a substitute for it.

Present social security laws restrict to \$1,200 the amount of money a person may earn without losing benefits, but do not affect the income he-or shemay receive from stocks or bonds. To me this is wholly unjust. I introduced H.R. 11029, a proposal to eliminate the earning limitation, hoping some action might result. The bill as passed sets up a rather complicated formula which amounts to an increased earning of approximately \$150 a year without penalty. In addition, the bill removes the requirement that permanently disabled persons must be 50 years of age before they or their dependents can receive disability payments, and eliminates the 6-month waiting period in the case of recurrence of a disability.

This legislation does not go far as some would like, and goes further than others think wise. But it will give the country an opportunity to look the program over and make the necessary changes.

#### HOUSING

Another necessary bill passed in the final days of the session was a modified housing bill which will keep three very important programs going. This legIslation authorized an additional \$500 million in Federal loans to build college dormitories; provided a 1-year extention of the Federal Housing Administration home improvement program; and authorized \$50 million for new loans for the community facilities program, covering such things as city water plants and sewage systems.

#### NATIONAL ECONOMY

Once again it was necessary to extend for 1 year the present 52-percent corporate tax rate and certain excise taxes on beer, wine, cigarettes, automobiles, telephone, and telegraph. Many of us were hoping that it would be possible to repeal the excise tax on telephones, believing that a telephone should be classified as a necessity, rather than a luxury. However, the bill came to the House under a closed rule which made it impossible to vote on this specific issue.

#### GOVERNMENT WORKERS

Our Federal postal and classified workers were given a 7½-percent pay increase by this Congress. I voted for this pay raise. After studying the problem carefully, I was convinced that the loyal workers on the postal and Federal payroll had not been kept abreast of the cost-of-living increase, forcing many to hold second employment, with a consequent reduction in efficiency to the Government

Retired Federal workers were also brought under coverage of the Health Benefits Act by the passage of appropriate legislation.

### DISTRICT OF COLUMBIA

Another bill on which Congress completed action was a proposed constitutional amendment giving residents of the District of Columbia the right to vote for President and Vice President. I supported this resolution when it came before the House. Thus, after 160 years of being denied this basic right of suffrage, victory is near for residents of the District of Columbia as soon as 38 State legislatures ratify the proposal.

House Joint Resolution 502—now Public Law 86–484—which I sponsored, gives authorization to the National Council of Negro Women to erect a memorial to the late Mary McLeod Bethune in Lincoln Park in the District of Columbia. It is most fitting that in this centennial year honor should be paid this outstanding woman, born the daughter of a slave, who became the counselor of Presidents, and the founder of the Bethune-Cookman College.

### VETERANS HOSPITAL

Culminating the efforts of many years, funds were voted this year to construct on property purchased by the Government for this specific purpose at least 12 years ago, a new 800-bed Veterans' Administration general medical and surgical hospital to replace the present dis-

integrating Crile Hospital. This has long been needed to provide adequate medical care for the more than 715,000 veterans who reside in Ohio's 38 northern counties which come under the jurisdiction of the Cleveland VA regional office. Architectural plans for the hospital are now being drawn and actual construction should get underway next year.

#### CLEVELAND HARBOR

Once again this year I joined my congressional colleagues and city and business interests from Cleveland in urgently requesting the House Appropriations Committee for funds for the further development of our Cleveland Harbor. The committee approved and the Congress voted an appropriation of \$200,000 for design and engineering funds for the replacement of three bridges that are a hindrance to navigation.

#### NEW FEDERAL BUILDING FOR CLEVELAND

A new \$47 million Federal building for Cleveland has reached the stage of having funds for site acquisition and planning approved by the Senate and House Committees on Public Works. Although no site has been agreed to, we are hopeful that the actual construction funds will be appropriated in the next session.

CIVIL RIGHTS

The passage of the Civil Rights Act of 1960 was a real achievement. To get this bill to the floor for action it was necessary to obtain 219 signatures on a discharge petition. Believing this was the only way to get consideration of this very important legislation, I was glad to sign the petition. When the bill reached the floor I supported every strengthening amendment and opposed those amendments which would have weakened the bill. As finally passed, the bill has five major provisions as follows: First, gives power to the courts to name special voting referees when it finds evidence that discrimination against Negroes exists—the referees, under court's jurisdiction, to take appropriate steps to insure that qualified Negroes are able to register and vote; second, provides schooling for children of servicemen whenever desegregation disputes lead to the closing of local schools; third, provides criminal penalties for interference with court desegregation orders; fourth, makes it possible for the Federal Bureau of Investigation to enter cases involving bombings of schools, churches, and synagogues. I had introduced a separate billion this subject—H.R. 2242; fifth, provides that voting records must be preserved for 22 months for possible Federal inspection.

### FOREIGN AFFAIRS

### MUTUAL SECURITY BILL

In the area of foreign affairs, our committee sat for many weeks in consideration of the mutual security bill. The legislation which finally emerged from the House-Senate conference provided for an authorization of \$4,086,300,000 for fiscal year 1961, a reduction of \$88 million from the President's recommendations. In the final days of the session the Congress appropriated a total of \$3,716,350,000 for the program—some \$458 million less than the administra-

tion had requested. This was subsequently increased by a \$65 million supplemental appropriation, passed at the urgent request of the President.

#### SPECIAL PROGRAM FOR TROPICAL AFRICA

One of the new sections added to the Mutual Security Act of 1960 provides a sum of \$20 million for a special program for tropical Africa. This sum is planned for use in assisting emerging African countries with basic educational planning and program development. It will supplement teacher training activities carried on under the existing technical cooperation program, and identify us more closely with the aspirations of the African people. With the breakdown of order in the Congo and establishment of a United Nations military force, the Congress approved an additional \$100 million of contingency funds for the President to take whatever constructive action that may be necessary.

#### LATIN AMERICAN DEVELOPMENT

At the request of the administration the Congress authorized a \$500 million social development program in Latin America. Growing unrest under conditions of extreme poverty and mounting demands for improvement require immediate attention if violent overthrow of governments and institutions is to be avoided. Specific programs will be worked out in cooperation with each of the governments concerned, and funds channeled through such agencies as the Inter-American Development Bank. An additional \$100 million was authorized for relief and rehabilitation expenditures to earthquake-stricken Chile.

### NATO COMMISSION

In a move directed toward increased cooperation among the Atlantic nations, the Congress authorized the appointment of a 20-member U.S. NATO Commission. This Commission is expected to participate in a citizens conference of NATO countries, and will explore economic and political measures designed to develop further democratic freedom.

### FOREIGN SERVICE AMENDMENTS ACT

As the United States has had to assume increasing responsibility across the world, it became more and more apparent that changes needed to be made in the legislation governing our Foreign Service. Months-ever several years-of study by the Department, in conjunction with a subcommittee of the Committee on Foreign Affairs, on which I serve, gave us S. 2633. Briefly, a reduction was effected in the number of staff personnel classes, and retirement benefits extended to include specialists in the Foreign Service retirement system. These amendments were adopted unanimously. providing some limited recognition of the very fine job that our dedicated Foreign Service officers and staff are doing all over the world.

### CONCLUSION

This is a little more than an outline of the work of the 86th Congress. Difficult as the situation is, as in the past, it has been a privilege to serve the 22d Ohio District in the many areas of national life that grow increasingly important to each individual American.

Fulbright Professor Says Japanese Riots Were Carried Out by a Relatively Small Number of People

EXTENSION OF REMARKS

OF

## HON. FRANK THOMPSON, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. THOMPSON of New Jersey. Mr. Speaker, a Fulbright exchange professor, Jack Perlmutter, arts professor at the District of Columbia Teachers College, in the Nation's Capital, was lecturing at the Tokyo University of Arts when the Japanese riots occurred.

He says:

No matter what the political reasons were underlying the demonstrations in the early months of 1960 which made big headlines in the United States, it must be remembered that they were carried out by a relatively small number of the Japanese people. Both students and colleagues as well as other Japanese friends verified this repeatedly. It is my experience that most Japanese people are anxious to cooperate with America and have only warm and friendly feelings toward Americans. They are learning much from us about ways of life, and we can learn much from them.

I include here for the information of my colleagues a letter I have just received from Professor Perlmutter as well as an interview with him which was reported in the Washington (D.C.) Post and Times Herald:

AUGUST 30, 1960.

Hon. Frank Thompson, Jr., House of Representatives,

Washington, D.C.

DEAR MR. THOMPSON: Because of your sincere concern with American culture and kind interest in my projects, I would like to relate to you some of the observations and impressions I gathered in my year in Japan as a Fulbright research professor in painting and printmaking. Needless to say, I am very grateful to Senator Fulbright and other Members of Congress for making this kind of valuable cultural exchange possible.

Through my teaching assignments at the Tokyo University of Arts, and lecturing in many parts of Japan, I met many students. I found them to be earnest, hardworking and intellectually ambitious. Art students, of course, are never overly concerned with politics. And no matter what the political reasons were underlying the demonstrations in the early months of 1960 which made big headlines in the United States, it must be remembered that they were carried out by a relatively small number of the Japanese people. Both students and colleagues as well as other Japanese friends verified this repeatedly. It is my experience that most Japanese people are anxious to cooperate with America and have only warm and friendly feelings toward Americans. They are learning much from us about ways of life, and we can learn much from them.

The Japanese people have an ancient culture that is highly sophisticated and refined, and an inherent love of beauty that shows itself everywhere in their daily lives in spite of the confusing bustle of modernism and overcrowded conditions. The many friends I made in my months of painting, teaching, lecturing, study of gallery methods, research on Japanese art, etc., were professionally busy people. However, each of them found time for frequent leisurely,

contemplative conversations with me over endless cups of green tea. They seemed to be familiar with the art of creating unuried privacy in the midst of the most rushed surroundings. There are nowhere in the world, I believe, more rushed surroundings than those found in the city of Tokyo. The timeout for meditative thought and talk is an intellectual "tea break" that taught me much in a creative way.

Not only did I learn about the art, art history and printmaking of Japan from these talks, I also feel I learned much about the people. Let me mention some of their names to you, unfamiliar as they may be, because these typify the high types of people taking

part in art and culture in Japan.

There is Mr. Yuji Abe, of the Yoseido Gallery, whose interest in contemporary Japanese printmakers has helped to further this art. He himself is a master of modern kakemono mounting. Among printmakers, there is Mr. Fumio Kitaoka, an artist who has incorporated some western techniques into his extremely personal style of printmaking; Mr. Hideo Hagiwara whose work is some of the most poetic seen in Japan today; Mr. Tetsuo Yamada who runs a contemporary print gallery in the anciently historical city of Kyoto and does fine printmaking himself; Mr. Unichi Hiratsuka who is one of the "fathers" of modern Japanese printmaking as well as the father of a young lady who owns a print gallery right here in Washington, D.C.; Mr. Gen Yamaguchi who was one of the first printmakers I met when I came to Japan and whose cordial welcome to his country I will always remember; and many more. From the Tokyo University of Arts, there is the distinguished president, Mr. Naoteru Uyeno. And my colleague, Mr. Mamoru Kubo, excellent painter in oils, and pro-fessor of oil painting. Mr. Kubo and his wonderful family helped from the very beginning to prove to me and my family what a gentle, hospitable, and cultured people the Japanese are.

There is Mr. Atsuo Imaizumi, vice president of the National Museum of Modern Art, Tokyo, in whose beautiful home I was introduced to the symbolic elegance of the Japanese New Year. There are the hardworking people of the U.S. Educational Commission in Japan (Fulbright Commission) who are dedicated to the ideal of cultural exchange: Mr. Iwao Nishimura, executive secretary, with understanding of East-West; Maki; Mr. Matsuzawa; Mr. Imai; Mr. Naka-Miss Masaki, and others. scholarly Mr. Miyazaki whose work in education kept him very busy but never too busy for discussions with me on educational and cultural matters. There is Miss Lucy Nakai whose excellent command of both Japanese and English helped me out of many language-barrier situations.

Equally important were my friendships with non-Japanese people who had lived in the country long enough to have an intelligent understanding of the Japanese people and culture. There was Ambassador Mac-Arthur. Also at the American Embassy, there was Mr. Robert J. Boylan; Mr. Paul J. Rappaport; Mr. Donald Bartlett who has a true feling for culture and refreshingly realistic views on the arts; Mr. Francis B. Tenny with a genuine knowledge of Japan. is Mrs. Elise Grilli, lecturer on Japanese art and art critic for the Japan Times, whose deep knoweldge of art history and intimate association with the contemprary art scene makes her respected by both artists and public. There is Mr. Maurice Schneps, editor of the delightfully informative magazine, Today's Japan, Orient-West. There are my dear Canadian friends, Mr. and Mrs. A. Gercik whose many years of living in Japan have given them a tender understanding of the Japanese people. There is Father Joseph

P. Love whose great store of knowledge of oriental culture was always at my disposal. And there were many, many more—all wonderful people, too numerous to mention.

Coming back to the United States, I rediscovered the beauty of America in a trip across the continent. While the beauty of America is in small intimate detail, the beauty of America is in its broad magnificent scenery. It is good to be home—but also good to look forward to future opportunities of going back to Japan for further studies of their arts. I hope that my studies will prove useful to others not only as art, but in helping to advance greater understanding between the United States and other countries. Because of your encouragement of cultural pursuits in the United States, Mr. Thompson, I feel that you understand what I mean.

Thank you again for your interest in such important matters—important to cultural people everywhere, and important to the people of the United States.

Sincerely.

JACK PERLMUTTER.

[From the Washington (D.C.) Post] Washington Artist Saw Riots in Japan

When Jack Perlmutter, a Washington artist, left for Japan on a Fulbright professorship, he counted on nothing more exciting than a quiet round of meditation in an ancient Zen garden.

Instead, the 40-year-old professor of arts at District of Columbia Teachers College found himself crouched one night on the floor of a Japanese car while Tokyo students rioted and snake danced by the light of a burning streetcar.

burning streetcar.

Perlmutter, of 3826 Halley Terrace SE., is home again, with some surprising observations about 1960 Japan, a centuries-old culture assalled by swift social change.

What impressed him about the riots was that, despite their anti-American flavor, the disturbances seemed to have little to do with Japanese feelings toward this country.

The night before Prime Minister Kishi withdrew his invitation to President Elsenhower to visit Japan, a Japanese friend told Perlmutter: "I tried to show you Japanese culture. I want you to see this, too."

He drove Perlmutter to a downtown riot scene. A group of the students spotted the American and as they approached the car the artist qualled.

But the spokesman only told him politely that they were glad to have him watch and would like to see the car moved out of harm's way.

"Very sorry," Perlmutter was told repeatedly. "This is not anti-American. This is anti-Kishi."

Perlmutter, who lectured on Western painting and studied Japanese woodcuts at the Tokyo University of Arts, learned conversational Japanese during his stay. But he decided afterward that he might not have bothered.

"At the university level," he said, "practically all students understand English if you speak slowly enough. They have to elect a language in secondary school and English is most popular."

Why?

"Partly, I believe, because they still feel the United States is an important power" and partly because they feel "it was better we were there after the war than anybody else," he said.

Throughout the island nation, Perlmutter found, people are eager to learn English. This can be a nuisance sometimes, he learned.

"On a bus, for instance, a Japanese will come up to you and say, Can I please carry on a conversation with you? I don't hear your language spoken very often."

Although he found strong evidence of friendship toward this country, the artist discovered "they do not look to the United States for culture, much to my dismay. One of my projects there was to push American art

He was encouraged when young Japanese artists came to him seeking new forms of expression to portray their nation's rude breakthrough into the atomic age.

Some throw anything-even old bicycle parts-onto their canvasses, he said. "But the thing is," he added pointedly, "nobody

is laughing at them over there."

The Washington artist, now an enthusiastic supporter of international exchange programs, is planning exhibits of some 50 paintings he did in Japan as well as a selection of representative Japanese woodcuts.

### Newsletter by Hon. E. Y. Berry

EXTENSION OF REMARKS OF

## HON. E. Y. BERRY

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES Thursday, September 1, 1960

Mr. BERRY. Mr. Speaker, under leave to extend my remarks, I wish to insert in the Congressional Record my recent newsletter summarizing congressional action in the closing days of the 2d session of the 86th Congress:

> HOUSE OF REPRESENTATIVES Washington, D.C., September 1960.

DEAR FREND: This Congress, which came here for the August session with flags flying and bands playing, is sneaking out of town. Its Democrat leadership, who will campaign for the highest office in the land on the slogan that we need leadership, has been unable to lead its own party. Crucial items in the President's program were thrown overboard. The announced program of the Democrat leaders for this session was abandoned. The Nation received a practical lesson on the inability of the majority party in Congress to work together.

On civil rights, Senator Kennesy himself ran out on the Democrat platform and voted against consideration. On medical care, he lost his principal demand—that medical care for the aged be financed through the social security payroll tax. It was this defeat that led to his proposal to go to the people. In his frustration that followed, he an-nounced, "Congress might as well pack up and go home." On minimum wage, the ses-sion came up with much less than young KENNEDY promised. On agriculture, he promised at Los Angeles immediate passage of a farm bill. Nothing was attempted; nothing accomplished.

The people were not led out of the wilderness. The program for the special session ended just about where it left off on July 3. Nothing was done which could not have been done the week prior to the conventions, and the hoped-for leadership of a Politically lopsided Congress did not de-

### MEDICAL CARE

In spite of the Kennedy forces, the Senate adopted a medical care bill very similar to the one previously passed by the House, and one which leaves the handling of the program to the States, following its adop-tion by the States, and will be administered through the State welfare division.

The Central Government proponents wanted the medical care for the aged program linked with social security payroll taxes where it could be handled out of Washing-

The objections to this approach are that it would be compulsory and limit benefits to only those already covered by social security.

Actually, the elderly in greatest need of health assistance are those without regular monthly incomes. Linking health to retirement benefits under social security would also add greatly to the cost of the program. The payroll tax for retirement, now 6 percent and costing \$10 billion annually, is already scheduled to go to 9 percent by 1969, and employers and employees would be required to pay even more if health were added, giving the worker less and less control over his earnings.

If the Federal Government were to operate the compulsory medical care program, as proposed by Senator Kennedy, rather than the States, it would mean Federal control of funds, including rates of compensation for hospitals, nursing homes, dentists, and physicians, with reports, audits, etc., to justify an additional army of Federal employees to administer. Again, responsibility would be shifted to Washington, curbing community incentive to build hospitals and handle

health problems locally.

In the debate, Senator Kennedy called the State program most unwise because as he said, "They will operate with all the difsaid, "They will operate with all the dif-ferent standards which are going to be set up in the different States, with some States participating and many not participating." It is difficult to understand just what wrong with that. The people of South Daacting through their locally elected legislators, may wish to set up standards which differ from those preferred by the people of Massachusetts and their delegation. If so, what is wrong with this? should the Federal Government seek to impose its standards, regardless of local wishes, local costs, and local facilities? Is it too old fashioned to believe that there are those other than politicians and Government employees who can operate and handle their own affairs and who can spend their own tax money?

### MINIMUM WAGE

Eight votes in the House are all that saved almost every industry in the country from being covered by the minimum-wage law.

As the bill was reported to the House floor, the bill would have increased from \$1 to \$1.25 the minimum wage of all employees presently covered and would have extended coverage to restaurants, hotels, and nearly all retail and wholesale businesses.

By a vote of 211 to 203, the House adopted the Kitchin-Ayres substitute, which reduced the wage floor to \$1.15 and limited coverage to approximately 1.4 million additional workers in retail chains with five or more stores in two or more States. I voted for this substitute.

The central government enthusiasts in the Senate raised the minimum to \$1.25 and extended coverage to about 4 million workers now excluded. Covered under the Senate bill were businesses with gross annual sales of \$1 million a year or more, even if they operate within one State, disregarding entirely the constitutional limits of Federal legislation of interstate commerce only.

Fortunately for the American public, the House conferees refused to budge from the position established by the eight-vote margin in the House. They refused to knuckle down to the labor bosses and insisted on the House version or none at all. As a result, the conferees were deadlocked and unable to agree on a compromise, with the measure dying in conference as the session

Had it not been for the eight-vote victory the Kitchin-Ayres amendment in the

House, in all probability we would now have on the statute books a \$1.25 minimum wage bill affecting almost every business in South Dakota and throughout the Nation, and preventing thousands of unskilled and untrained workers from securing employment.

This, too, will be a major campaign issue this fall. The voters who will decide how they want their vote cast in Congress (keeping in mind the small margin that decided the issue in this session) must consider these questions: Can the Federal Government, by enacting a law, set wage and hour levels without harm to the worker and the economy which supports him? Would the increase be justified if, as is estimated, a half-million people, mainly teenagers, elderly and relatively inefficient workers, would be forced out of work as employers tried to absorb the added cost? Can the Federal Government fairly set wage standards when income levels vary so greatly throughout the Nation? Would such an increase add to inflationary pressures so that pay increases would soon disappear because the worker would have to pay higher prices for goods and services?

#### MISCELLANEOUS

Because of fire danger in the Black Hills areas, and other public land areas of the West, where mining claims have been filed and annual assessment work is required to be completed prior to September 1, the Bureau of Land Management has granted a temporary deferment of annual assessment work. This is only a temporary deferment, how-ever, and miners seeking such deferment should contact the Billings office without delay. When deferment is granted, it should be filed in the office of the Register of Deeds of the county in which the mining claim is located to protect the claim. In these cases 2 years of assessment work must be completed prior to September 1, 1961.

The Atomic Energy Commission will probably accept a contract for the establishment of a lignite-uranium plant at Bowman, N. Dak., which would serve northwestern South Dakota and southwestern North Da-The contract would be with the International Resources Corp. but the city of Bowman will be constructing the plant. It will be operated by Susquehanna Western, who operate the Edgemont mill. There will be the large mill location in Bowman with two field roasting units preparing the ash for the central mill. AEC will probably approve the contract providing the people Bowman fully understand the problems involved and are willing to take the necessary risks. Decisions should be firmed up before too long.

Schools in federally impacted areas which were "short changed" some \$7.3 million in 1958-59 by congressional appropriation will be relieved of their warrant liability with an appropriation of that amount by this session. Schools with limited tax base, such as the Douglas School District at Ellsworth Air Force Base, were especially affected, but there are some 28 school systems in western South Dakota who will benefit by this delayed appropriation. This is an alarming example of what could well happen if the budget of every school district in the Nation were dependent upon the whims of Congress to appropriate for school construction and for teachers' salaries. Twenty-eight districts in western South Dakota have learned by bitter experience what Federal aid without Federal appropriations can actually mean.

With my kindest regards and best wishes, I am.

Sincerely yours,

E. Y. PERRY.

## Report to the People of the Fifth Congressional District of Indiana

EXTENSION OF REMARKS

## HON. J. EDWARD ROUSH

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. ROUSH. Mr. Speaker, now that the 86th Congress has come to a close and become a part of the history of these United States of America, I want to report to my people of the Fifth District of Indiana the activities of this Congress and my actions during its sessions. This was a hard-working, constructive Congress and I am proud and grateful to the people of the Fifth District for the opportunity to have shared in its deliberations.

Mr. Speaker, I have attended practically every session of the 86th Congress and have answered 372 rollcalls out of 382. Each day as I have approached the Capitol I have voiced a quiet prayer that in the deliberations and votes of the day I should represent to the full extent of my ability the thinking and aspirations of all the people in my district. I have felt that any day would be a lost day unless it marked some progress, small or large, toward the goals for which we are reaching.

During my first term in office I have done my best to keep the people of my district informed of the developments in Government that affect their lives. I have made special reports to groups on legislation affecting them and requested their reactions. During the sessions I have sent out reports to the newspapers on important issues and once, and sometimes twice a month, forwarded a newshelter to those people in the district who had requested to be informed on current events of Congress.

In this report I will first deal with those projects and action that have a purely local impact.

FLOOD CONTROL

Mr. Speaker, although Indiana has not always welcomed Federal flood control programs, it now recognizes that flood control is not something that can be appropriately planned and carried through by State action alone. It must have Federal assistance. When I was a candidate for election I made the pledge that, if elected, I would do everything within my power to secure funds for the construction of an adequate flood control program for the Wabash River Valley.

One month after arriving in Washington I introduced legislation which would have provided funds for the construction of the Huntington, Salamonie, and Mississinewa Dams; and at that time I made a speech on the floor of the House of Representatives, pleading with the Members of Congress for the necessary appropriations. This was later followed by more speeches and committee appearances.

Securing funds from Congress is always a difficult enterprise and this one

was further complicated by a resolution—House Concurrent Resolution 2, passed by the Indiana 85th General Assembly in 1947—which in effect disapproved of any new Federal projects for Indiana. This has now been repudiated and the State of Indiana has appropriated the money to pay for the State's share of the costs of a number of specific projects, including those in the Fifth District.

I am happy to report that with the assistance of dedicated, energetic, public-spirited individuals and groups from the Fifth District and the rest of Indiana, Congress was persuaded to appropriate funds for the advance engineering and design of these projects. This, of course, is only the beginning, and I intend to continue this fight for funds until the dams are finished.

These dams will not completely solve the flood control problems of our district. Smaller dams and watersheds will have to be built in several areas. A watershed is in the process of being authorized in the Portland area, which will protect and conserve water in that community. Also, an engineering survey is now being conducted by the Corps of Engineers and the Indiana Flood Control and Water Resources Commission in the Marion area. This is an essential step toward a realistic solution of these problems.

#### INDUSTRIAL DEVELOPMENT

Another of my ambitions is to attract new industry to provide increased job opportunities and to stimulate and improve economic-conditions throughout the 10 counties of the Fifth District. As the first step, last year I launched a vigorous drive to draw new industry by sending a letter to over 500 major Government defense contractors apprising them of the advantages of locating or subcontracting in Indiana and particularly the Fifth District.

The response to this letter was extremely encouraging and this year I continued this effort by directing another letter to over 5,000 industrial leaders. The replies that indicated an immediate interest were forwarded to the mayors, chambers of commerce, and other interested parties of all Fifth District cities for their information and action.

The economic and social climate of Indiana as well as its potential has been brought to the attention of every major industrial concern and executive in the country. Although we cannot expect results overnight, there is no doubt that this undertaking will eventually bear fruit. I intend to continue in this endeavor next year.

### PERSONAL SERVICES

In the field of personal service I have processed hundreds of cases involving servicemen, veterans, social security claims, immigration, tax and postal problems and other difficulties between the citizens of the Fifth Congressional District and the Federal Government. What this means is that, in addition to the normal legislative process, my office handled each year between 300 and 400 detailed and complicated personal problems affecting the lives of many people.

ACADEMY APPOINTMENTS

My service academy appointments achieved heights beyond all expectations. Each district is allowed one admission, or cadet, to each of the 3 Academies—Army, Navy, and Air Force—a year.

My appointments were made on a competitive basis and more than enough boys qualified to fill each vacancy. In addition to filling the vacancies, 2 additional boys—3 in all—were admitted to the Air Force Academy because of their outstanding scores. Five admissions in 1 year is a record of which our district can be proud.

#### COMMITTEE ASSIGNMENT

It is a distinct privilege for your Congressman to serve on the Committee on Science and Astronautics. Although the committee is the newest standing committee of the House of Representatives, it was honored this year by being selected as the "Committee of the Year."

The committee's role in this scientific age has been, and will continue to be, an important one. Although it is concerned with all types of scientific endeavors, its major work consists of dealing with legislation affecting the National Aeronautics and Space Administration, a new agency created to expand and coordinate our national effort to advance space technology and space travel.

#### HAWAIIAN STATEHOOD

March 12, 1959, was a proud day for our Nation for on that date the House of Representatives passed the Hawaiian statehood bill. It was also a proud moment for me when I cast my aye vote on this bill. Mark Twain described Hawaii as, "The most beautiful fleet of islands ever anchored in the sea."

The admitting of Hawaii as a State was, as one colleague put it, a positive and affirmative act to spread the glory of the American dream 2,000 miles west and to say to a great people, we admit you to full partnership in this Union.

### LEGISLATION

According to the Clerk over 20,906 measures were introduced in the 86th Congress and over 1,645 bills were considered in the House. It is clearly impossible in the time and space allowed to report on all of these. I shall mention only the most important and highly publicized legislative issues. Upon request, I shall be pleased to furnish more complete information concerning any particular bill, as well as a summary of the issues involved.

### NATIONAL BUDGET

Despite the constant talk that this Congress was bent on spending, its record proves it has been an economy Congress. Both the first and second sessions slashed by substantial amounts most of the appropriation bills. It succeeded in reducing the budget requests of the President in the first session by \$1,882 million, and it wound up the second session with a surplus of \$1.1 billion—five times as big as last January's forecast. The biggest cutbacks in spending from the January forecast were made in four areas: Agriculture, \$277 million; Export-Import Bank, \$267 million; interest on national debt, \$118 million-lower interest rates reduced the Treasury's borrowing costs; Veterans' Administration, \$117 million.

In view of the fact that the major portion of our national budget is spent on military matters, it has always seemed to me that substantial savings in Federal spending could be made in that area. Since coming to Washington I have seen considerable evidence of waste, extravagance, and duplication in the military service. In the first session, \$19,961,000 less than budgetary requests was approved for defense appropriations. Substantial sums were saved, in that fiscal year and other future years, by compelling the administration to conduct a thorough review of the entire concept of defense against air attack.

No matter how much is spent for defense, it will be adequate only if its services are integrated. A central purchasing agency for all the defense forces, I believe, could save many millions of dollars in eliminating duplications and mismanagement in purchasing. There is much progress to be made in the field of greater efficiency and economy in our sprawling Defense Department. Let me emphasize, however, that I am not advocating any weakening of our defenses for, if anything, they are inadequate to meet the threat of Communist aggression.

In fact, I believe that in order to reduce expenditures and promote efficiency the entire Government structure needs reorganization. I voted to extend the authority of the President under the Reorganization Act of 1959 to propose plans to Congress for changes in the structure of governmental departments and agencies

### INTERNATIONAL AFFAIRS

Under the Mutual Security Act of 1959 the Congress appropriated \$3.5 billion in the first session, and \$3.7 billion in the second session. I voted against the bill in both sessions. I offered one amendment to the 1959 bill and two amendments to the 1960 bill, which, had they been adopted would have resulted in more effective administration of the program and allocation of funds. It would also have resulted in a saving to the tax-payer, since each request for funds for a particular project would have had to be justified to Congress.

While I am in agreement with the objective of the program, I do not feel that the vast appropriations being made year after year can go on indefinitely. It does not seem consistent to preach economy in our domestic appropriations and appropriate indiscriminately for a foreign aid program that is obviously not accomplishing its purpose. The entire program must be overhauled and streamlined so it will help underprivileged people to help themselves. Every effort should be made to draw into the program the more prosperous countries of the free world that they might share the burden of helping the weak nations.

### POREIGN POLICY

On the 17th day of June 1960, I introduced a concurrent resolution calling for a bipartisan foreign policy.

At few moments in our history as a nation, have we faced a crisis of such intensity and extent as that which now has begun to surround us. The fiasco of the recent summit meeting is but the most evident of the symptoms. Khrushchev's insults and mockery of the United States through the person of our President marks a low point in our diplomatic fortunes. It provides a sudden and painful illumination of how very far indeed we are from any possible agreement with the Russians on the major issues of the cold war. The last decade marks a shift which could prove the most important in the world's history. The rapid growth of the Soviet Union's economic, military, and political power as a threat to the United States.

Nor have events elsewhere in the world stood still. We are faced with the emergence of the first really pro-Communist government in the Western Hemisphere in the Castro government of Cuba. Syngman Rhee in Korea and Adnan Menderes in Turkey, both closely identified with the United States, have been overthrown. In Japan we met opposition—to the signature of a Mutual Security Pact—so strong as to threaten the Kishi government and to make President Eisenhower's visit there impossible.

We can ill afford to allow this crisis in our foreign policy to continue unchecked. These tragic experiences emphasize the need of bipartisan cooperation in the field of foreign policy.

#### TAXES

The President asked that the national debt limit be raised by \$2 billion to \$285 billion and a further temporary increase of \$10 billion to \$295 billion to June 20, 1960. During this session he asked for an extension of the temporary debt limit. I voted against both proposals. At the end of the Korean war the national debt was \$285.5 billion. Today, having risen more than \$31 billion since that time, it stands at the highest peacetime figure in history. Do you not think it is about time to call a halt?

The transportation tax was reduced by half—from 10 to 5 percent—and the tax on local telephone calls repealed, both effective July 1, 1960. I supported this legislation; however, during the second session, at the recommendation of the President, this repeal was not allowed to go into effect and the taxes will continue.

The President recommended an increase of 1½ cents in the Federal tax on gasoline and diesel fuels. The Congress enacted a temporary 1-cent-pergallon increase, which went into effect October 1, 1959. I voted against this increase.

The rates of income tax on the earnings of life insurance companies was established on a permanent basis for the first time in 10 years. I voted for this tax, in justice to other corporations and individuals who pay their taxes on a permanent basis.

Legislation clarifying the States' rights to tax net income derived from interstate commerce was enacted. The passage of this bill is not intended as a comprehensive solution, but as an emergency measure. A study will be carried on to determine if any further legislation is necessary.

Also passed by the House was a bill allowing tax deductions for the professionally self-employed who set aside income for voluntary plans. This is meritorious legislation and should be enacted into law next year.

#### SMALL BUSINESS

Because of the gaps in the provisions of the Robinson-Patman amendment to the Clayton Act, the efforts of small business to compete against their larger competitors suffered. A company could grant illegal price discriminations three times before effective penalties could be applied. This Congress amended the law to close these gaps.

The lending authority of the Small Business Administration was increased from \$500 million to \$575 million and then again by another \$150 million because of mounting demands.

A bill was passed that permits small business wholesalers of gasoline to pay the tax on the quantities of gasoline sold and thereby remedy the situation prevailing whereby these wholesalers paid an excise tax on gasoline that had been lost due to shrinkage and evaporation.

Legislation was enacted to facilitate extension of credit to small business enterprises by amendments to the Small Business Investment Act. The 85th Congress authorized the agency to set up private corporations to furnish long-term equity capital to small business; however, the administration has done very little to accomplish this.

One of the most powerful elements in building this country to its present greatness is small business. Therefore, to a great extent, our economic growth depends on our keeping this element alive and active. I have supported every piece of legislation which I believe would assist the small businessman to survive and prosper.

### AGRICULTURE

One of the most serious domestic problems faced by the 86th Congress was the farm problem. Farmers caught in the squeeze between falling farm prices and rising costs in production have not shared in the general prosperity of other industries. This decline in net income occurred in spite of the fact that the administration has spent millions to bolster the basic commodity prices.

This costly farm policy has not only been ineffectual but has held back national growth. Secretary Benson has been adamant in his conviction that lower prices would increase sales and reduce surpluses. With the help of a series of Presidential vetoes, Benson forced Congress to lower the prices at which surplus crops were supported. This did not work. The increased amounts bought were small and the price cuts were large. In order to offset the decline in prices of farm products, farm operators increased the quanity of production. They broke all known production records on less land and piled up bigger surpluses. In 1960 the Government had \$9 billion worth of surpluses stored away with storage charges running \$2 million a day.

In an effort to bring farm prices back in line with operating costs and reduce surpluses, Congress considered a farm surplus program—family farm bill of 1960—which would have fixed wheat price supports at 85 percent of parity, reduced acreage allotment by 25 percent, and provided payment in kind for retired cropland or alternatively, price support at grain level and no production control. It would have given the various groups of producers of different farm produce, who cannot agree on what kind of help would be best for all, the opportunity to democratically choose the form they prefer.

The disagreement as to what is best for the farmer does not prevail among the farmers alone, nor between the administration and Congress, but among the Congressmen. It is a regional issue and as a result the foregoing legislation was not enacted.

Agricultural bills were enacted to permit extension of the Crop Insurance Board, authorize leasing of cotton acreage allotments during crop years 1959 through 1961, and extend the provisions of Bankhead-Jones Farm Tenant Act authorizing refinancing of loans on family size farms, stabilize price support for tobacco, and create an Agricultural Research Development Commission to find and promote new industrial uses for farm products.

#### SOCIAL SECURITY

No group in America is more entitled to special consideration than our elderly citizens who are retired or no longer able to work. After months of hearings and consideration, an omnibus social security bill was passed which liberalizes the requirements of the disability program: it liberalizes the insured status requirement, making about 600,000 additional persons eligible for benefits; eliminates the 6-month waiting period for disabled workers and removes certain inequities in the law pertaining to widows and children. It also extends coverage to 300,000 additional persons, and, in the vital field of medical care, provides grants to States to encourage them to make improvements in their medical payment programs for old-age asistance recipients. The medicare provisions are inadequate and it is my hope that legislation will be enacted next year to remedy this problem.

### VETERANS

I am deeply grateful, as is our entire Nation, for the sacrifice and loyalty of the men and women who have served in the Armed Forces.

Twenty-eight pieces of veterans legislation were signed into law during this Congress. Among the major bills enacted was a law revising the pensions for veterans with non-service-connected disabilities and for widows and dependent survivors. The scale of payments was readjusted to eliminate present inequities in pensions of veterans. It also equalizes the status of World War II and Korean war widows with those of World War I.

The direct-housing-loan program was bolstered by an increase of \$100 million in authorization. This program is especially designed to assist veterans in smaller communities and rural areas.

Legislation was enacted which waives

payment of premiums on national life insurance policies for certain totally disabled veterans, provides additional compensation for disabled veterans with more than three children, permits conversion or exchange of national life insurance policies to a new modified plan and provides for a program of educational, home purchase and rehabilitation benefits for veterans with more than 120 days of active duty between January 21, 1955, and July 1, 1963.

#### FEDERAL EMPLOYEES

It is a well known fact that Government employees have been underpaid. Most Federal employees are paid less than those in private industry for comparable work. Congress has recognized this and been disposed to raise the wages of Federal employees for some time but the President has opposed pay-increase bills. This meant that Government workers were denied increases to which they were entitled by higher living costs and by comparative pay standards in other fields.

This Congress finally passed a bill raising the salaries of classified Government employees by 7½ percent. In voting for this bill, I felt I was voting for a vital need, for this group of people is most deserving.

The health insurance act passed by this Congress will provide extensive lowcost coverage on a voluntary basis for employees of the Federal Government and their dependents. Half of the cost of this program will be borne by the Government.

### LABOR

One of the outstanding pieces of legislation enacted by the 86th Congress was a labor bill requiring full disclosure and accounting of funds invested by unions or management groups in pension and welfare funds. This is not an ideal bill but it contains portions of three bills brought before Congress and represents the best that could be achieved to correct the undemocratic and racketeering practices revealed by the McClellan committee while protecting the interests of honest labor leaders and members, management, and the general public.

I voted to raise the minimum wage and extend coverage because it will help establish levels of living adequate for health and help raise purchasing power among the poorest workers. It will increase spending which will raise the level of employment and facilitate more rapid economic growth and reduce unfair competition between covered industries and uncovered industries.

It was my firm conviction that an exemption for these small businesses grossing less than a million dollars a year was essential and I supported this proposal.

### CIVIL RIGHTS

I was happy to vote for a civil rights bill which guarantees and protects the rights of every American citizen to vote. The bill authorizes Federal courts to fix penalties for obstruction of court orders and requires preservation of Federal election records for 2 years.

### EDUCATION

Mr. Speaker, I have always believed that no nation is stronger than the in-

telligence and character of its citizenry. The Father of our Country spoke of the necessity for having an enlightened citizenry and we all, regardless of our party, realize the necessity for higher education, especially in view of the Soviet agricultural, scientific, and medical achievements.

Because of our exploding population, States and municipalities do not have the funds nor the borrowing capacity to keep up school buildings or afford more and better qualified teachers. Manipulation of statistics currently being employed by some groups fighting Federal aid to education cannot hide the very obvious fact that we are facing a serious crises in learning. Education is one of the most essential programs in our society. Notwithstanding this realization, the school construction bill-the President's own bill offered in 1957-bogged down because certain racial and religious considerations were injected into the measure. There are many of us who fear the possibility of Federal interference or thought control of our State and local school systems should any improper type of Federal aid to education be adopted. This issue was given grave consideration and debate and every effort was made to dispel and prevent this possibility.

### RAILROAD RETIREMENT

Since I come from a town where the railroad industry is one of major importance, I have personally known many, many railroad employees and am sympathetic to their problems. It was a pleasure therefore to vote for a measure of significant consequence to the several hundred thousands of railroad employees and their families. This bill provides them with increased benefits under the Railroad Retirement and Unemployment Act.

### CONCLUSION

In closing, may I say that there will undoubtedly be differences of opinions; however, I considered every issue on its merits and every position I have taken was determined by what I believe to be in the best interest of the people and particularly my district.

I want Indiana, the crossroads of America, to become the hub of industrial and cultural activity. Its economic climate should be such that our people will prosper. I believe in a strong America. An America which can proudly lead the world into the dawning of this new era because of its economic, moral, and spiritual strength.

### Hon. Leo E. Allen

SPEECH

OF

## HON. EDWARD H. REES

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Monday, August 29, 1960

Mr. REES of Kansas. Mr. Speaker, before leaving Congress I would like to pay a word of tribute to Leo E. Allen, who is retiring from service in the House of Representatives this year.

Leo Allen has established a great record. He has, for a number of years, held the responsible assignment of membership on the Rules Committee. He has discharged his duty with credit to himself and to the House, as well as to his country. We trust that his dreams for the future may be fully realized. We wish for Leo Allen the best that life can hold.

## Hon. Melvin Price Reviews Achievements of the 86th Congress

EXTENSION OF REMARKS

### HON. MELVIN PRICE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. PRICE. Mr. Speaker, each year at the end of the session of Congress, it has been my policy to review the work of the session.

The 2d session of the 86th Congress met in a period when the country gradually became conscious that we were nearing the end of the Eisenhower era. It was the period when we began to recover some of the lost ground in the space race but when the Soviet Union showed no lack of scientific achievements. It was the period in which President Eisenhower's journey to the Soviet Union was canceled as Khrushchev withdrew the invitation; when Red instigated and disciplined student rioters forced the cancellation of a visit to Japan. It was the period when the American democracy prepared for a new national election. when the two major parties chose their presidential and vice-presidential nominees and the campaign began.

Historically an election year is not a time when legislation is easily passed—and particularly this is natural when there are legitimate differences of opinion between a Congress controlled by one party and a White House controlled by the other. In the case of the 86th Congress, there have been unavoidable

differences.

Moreover, we have come to a time—after 8 years of the Eisenhower administration—when an accumulation of piled-up needs has demanded attention. We have great social needs in shortages in schools, hospitals, college and university facilities; in our social security programs; in housing and farm programs; in the urgency for revisions of our tax systems. The administration, which has sought to hold the line against programs to meet these needs, has a vested interest in continuing its opposition.

The 86th Congress in both its 1st and 2d sessions has been able to cooperate with President Eisenhower in a way to advance the deepest national interests without abandoning its own majority

principles.

I can report for the sixth time—each year since the 1954 elections—that President Eisenhower was dead wrong in predicting a political cold war if the Democrats should be trusted by the people with the control of Congress.

Democrats have been in control of the Legislature ever since the President indulged in this bit of campaign oratory, and there has been no political cold war. We have not used our majority to interfere with the President's role as Commander in Chief of the Armed Forces or his constitutional position as director of our foreign policy. Politics has ended at the water's edge.

When the Soviet Premier abused Mr. Eisenhower at Paris, when the Soviet Union wrecked the summit conference, we did not exploit the situation.

Khrushchev may have thought he could provoke partisan dissension in the United States, but it never occurred to the responsible Democartic leadership that the unhappy occasions of the U-2 so-called espionage flight or Khrushchev's bad-mannered conduct should modify our own support of America's objectives.

Many of us have had doubts about the wisdom of the personal diplomacy that subordinates the experienced Foreign Service to whirlwind Presidential public appearances before cheering multitudes

in foreign lands.

Many would have preferred such energy expended on creative thought on ways and means of meeting the Soviet economic challenge in neutralist and underdeveloped countries. Mr. Eisenhower has still not been subjected to sniping and carping criticisms no matter what the private doubts.

On the contrary, the Democratic majorities in Congress—this year as in the past—have supported the President's

major steps.

We passed a bill to authorize American membership in the International Development Association—a lending agency for long-term, low-interest loans to underdeveloped areas under management of the World Bank.

We gave the President support in the mutual security authorizations and appropriations—despite the feeling of many Democratic leaders that Mr. Eisenhower was shortsighted in turning down Senator Fulbright's plan for foreign aid on a 5-year-loan basis, to begin the process of changing asistance from gifts to dependable and repayable loans.

We renewed and extended the Defense Production Act.

The heavily Democratic Senate sustained the President when it ratified the Antarctic Treaty guaranteeing multinational development of the vast Antarctic Continent with guarantees against any nation attempting to plant a military or missile base there.

In the field of appropriations, we again gave careful scrutiny to the President's recommendations on Federal expenditures.

Mr. Eisenhower's record in the area of so-called spending is not one that can stand the test of history. He has talked a great deal about economy, but there is little evidence that he has ever understood the basic issue of public finance.

I have pointed out previously that in 1952, just before the election, the general promised the late Senator Taft to cut spending to \$60 billion a year. He has never been able to cut spending at all. Our population has gone up, the cold war has continued, our needs for national defense and social purposes have increased; we are spending \$20 billion more than \$60 billion. The record for the 7 Eisenhower years is a deficit record—topped in 1959 by a huge \$12 billion deficit.

Mr. Eisenhower has never made himself the master of the figures in the huge and complex Federal budget. For 7 years, former President Truman personally conducted annual briefings on the proposed budget, setting forth the main facts and submitting himself to any question asked by experienced and well-informed reporters dealing with the field. Mr. Eisenhower delegates this task to subordinates. When he is asked at a news conference about some expenditure, he is likely to reply that he cannot keep all the figures in mind.

This year, as in the past, the Democratic Congress has cut many of the President's proposed expenditures. In the first 10 regular appropriation bills and supplementals for fiscal 1960 and 1961, for example, the President asked nearly \$61 billion, and we gave him about \$300 million less. And we did this while voting to increase defense spending by \$650 million

As many readers know, much of the major work of Congress is done in committees. I have been privileged to continue my work on two major committees—the House Committee on Armed Services and the Joint Congressional Committee on Atomic Energy.

In the Armed Services Committee, it is our business to examine the state of the Nation's defenses and the adequacy of the President's proposals. It was from this committee that we were able to initiate some urgent increases in our

preparation.

In the Armed Services Committee, also, I was able to initiate a measure that extended urgently justified economic assistance to the citizens of Okinawa, an island critically important to the American defense position in the Pacific. Our Military Establishment has had an impact on the economy of Okinawa that causes natural concern to the people, because of the diversion of arable land, and there have been efforts by the Communists to foment disorder and distrust.

My interest in Okinawa was stirred by a 1955 inspection trip to the island and other Far Eastern positions conducted by a subcommittee of which I was chairman. It seemed to me then, and has continued to seem, that it ill became the United States to disregard the needs of the people where our bases are located. We have at last begun the process of recognizing these needs and seeking to meet them.

I successfully sponsored legislation which resulted in surplus acreage at the Kankakee Ordnance Work in Will County, Ill., being transferred to the State of Illinois for conservation and recreational use.

In the Atomic Energy Committee, we have continued pressure on the administration to expand programs for development of peaceful uses of nuclear power. We have reviewed programs for

our defense and reviewed the efforts to reach an enforceable agreement with the Soviet Union for inspection systems that will liberate the world from the fear of nuclear conflict. I was successful in obtaining authorization for a \$5 million metallurgical laboratory at the University of Illinois for our atomic energy research program. At my request the Commission will use \$750.000 for design study on this building next year.

I have naturally been vitally concerned with advancement of the interests of our own communities. This year again we have been able to obtain approval of appropriations to continue the Army Engineers survey of hillside drainage in St. Clair and Madison Counties, so that projects can be developed to put an end to the flash floods that caused so much death, injury and property damage in 1946 and again in 1957.

I feel certain that the 87th Congress next year will appropriate the relatively small amount of money that will complete the surveys, and that thereafter we can move to actual flood control and conservation projects that will end this waste and devastation.

In discussing local interests, I must emphasize that in many cases the needs of our people are the needs of those in other congressional districts—for schools, housing, slum clearance, purification of our rivers and streams, a fair farm law. Here we have faced an 8-year problem: the philosophy of the Eisenhower administration is hostile to Federal leadership in these fields. This year, as in the past, we have been able to make progress only against the actuality or threat of Presidential yetoes.

The House of Representatives for the first time in history this year passed a general school-aid bill, but only against vehement administration opposition to anything not tied wholly to State-participation provisions that would have made the program meaningless.

The President for the second time vetoed a bill to extend loans and Government guarantees of loans, plus technical assistance, to areas of chronic heavy unemployment.

We were unable to work out a new farm program, although such a program is urgently needed, because the administration has remained wedded to the policies of Secretary of Agriculture Benson and has consistently vetoed congressional attempts to develop solutions.

In 1959 Congress passed a bill, of which I was the House sponsor, to authorize a food-stamp plan by which surplus foods would be taken out of storehouses and distributed to schoolchildren and others who actually lack proper nourishment. Some of the people in our own district would have benefited, and the food-stamp plan was proved workable during World War II. The President and Secretary Benson refused to put the plan into effect after having threatened a veto if Congress should try to make the plan mandatory.

All our river communities, here in our district, would have been greatly benefited by a bill to increase to \$90 million a year, in a 10-year program, Federal expenditures on the nationally critical problem of polluted, poisonous river sys-

tems. Both the House and Senate passed the bill—but the President vetoed it, and in the House we fell 22 votes short of the required two-thirds vote to override the veto. The great majority of Members recognize the importance of the program, and they refused to allow the President to kill the existing water-pollution program enacted over his opposition.

The stalemate that existed gave Congress power to prevent certain other administration actions that we considered unwise

Congress declined to lift the ceiling on long-term Government bonds that would have burdened the future with high interest charges. The President repeatedly asked for an increase in the 4.25-percent ceiling, claiming that it was needed to fight inflation, but Congress refused—and a few months later interest rates began to fall in the market.

Congress declined to grant heavy boosts in postal rates because of a doubt that the administration has a proper concept of the Post Office Department as a service institution and has not installed available economies.

Congress declined to impose an increase in gasoline tax levies pending an inquiry into the vast interstate highway program and a chance to examine other tax methods.

There is no doubt that Eisenhower vetoes and veto threats played a major part in checking affirmative legislation or watering it down.

In the social security field, the administration vehemently opposed health care for retired workers financed through the tested social security system, in which citizens would be able to pay for benefits during their working years and obtain these benefits when needed as a matter of right.

On housing, the administration insisted that no general new housing legislation was needed, although the rate of residential construction has fallen far behind the expansion of our population.

On city slum clearance and redevelopment, the administration idea was that the Federal share of expenses should be reduced, although such operations are utterly beyond the fiscal resources of local communities alone.

On the minimum-wage bill, the administration opposed any increase in the minimum above \$1.15. It opposed any broad increase of coverage to protect the 10 million in interstate commerce previously unprotected.

In the light of the circumstances, the 2d session of the 86th Congress wrote a creditable record. It added achievement to the record of the first session.

In the first session, it will be remembered, the administration gave some of us our first real lessons in frustration. In 1959, just as in 1960, the President tried to reverse the election results.

I was personally involved in one of his 1959 vetoes. I sponsored, with Senator Humphrey in the Senate, a bill to protect the Rural Electrification Administration from what we consider Secretary Benson's hostility. The President slew the bill with a veto, and the House failed by a few votes to override the veto.

We saw the same pattern of obstruction this year on many domestic issues.

Congress, nevertheless, has moved forward on a sound, responsible, progressive course. I think we have built a record that clarifies the clashes of philosophy between the administration and its appointees and the majorities in Congress chosen by the people.

This year we were able to pass the second civil rights bill since the close of the Reconstruction era—and the bill was passed under Democratic leadership that frustrated delays in the House and beat down an actual filibuster in the Senate.

We passed a Sugar Act that gave the President the authority he asked to deal with the problems created by the Castro regime in Cuba.

We granted the President another temporary increase in the ceiling on the national debt—a debt that never has fallen under his administration but has risen despite his charge that only Democrats are "wastrels."

We were able to push through a longdeserved pay raise for Federal civil service and postal employees—and we did this by overriding a veto. The veto was reversed by a vote of 349 to 69 in the House and 74 to 24 in the Senate.

In addition, in the closing weeks of the session after the political conventions, Congress was able to pass these bills:

Amendments to the Social Security Act which eleminates age requirements on totally and permanently disabled persons and a medical care program in cooperation with the States; a public works appropriation bill which provides funds for several flood control projects in this area; a communications—payola—bill; extension of the FHA loans for home repairs and extension of the college housing program.

## Twentieth Anniversary of the Ukrainian Congress Committee of America

EXTENSION OF REMARKS

## HON. FRANK T. BOW

OF OHIO

IN THE HOUSE OF REPRESENTATIVES
Thursday, September 1, 1960

Mr. BOW. Mr. Speaker, it is a pleasure to salute 2½ million Americans of Ukrainian ancestry on the 20th anniversary of the Ukrainian Congress Committee of America.

Members of this organization, under the able and inspired leadership of Dr. Lev E. Dobriansky, are performing an invaluable service to the United States of America in keeping us aware of the real nature of Communist imperialism.

We need to be reminded that the Ukraine is not Russian. It is not a willing member of the U.S.S.R. Its people still yearn for and would be willing to fight for the independence that was theirs for a few short years four decades ago.

We need to be reminded that all of the captive nations look to the free world and to the United States of America to keep alive their hopes of liberty from the Kremlin.

This is only a part of the valuable work of the Ukrainian Congress, for which all Americans salute it on its 20th anniversary. As in the past, it will always be my pleasure and privilege to consult and work with the Ukrainian Congress.

A Few Huge Enterprises Are Getting a Ride on the Greatest Gravy Train Yet Devised, Says C. W. Harder, President, National Federation of Independent Business, of the Federal Government's \$8 Billion Patent Policy

EXTENSION OF REMARKS

## HON. FRANK THOMPSON, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. THOMPSON of New Jersey. Mr. Speaker, the able president of the Nation's one great association of small businessmen recently declared that the patent policy of the Defense Department was giving a few huge enterprises a ride on the "greatest gravy train yet devised."

C. W. Harder, president of the National Federation of Independent Business, writing in his column "Washington and

Small Business," says:

The Federal Government's patent policy is a particularly grave problem because the Defense Department, and others in a position to hand out these research grants, give 95 percent of them to a few huge combines. If it were not for the Senate and House Small Business Committees, it is unlikely that even 5 percent of these huge sums would trickle down to small business.

This situation, then, has opened the road to monopolies undreamed of in the past.

Taxpayers are spending billions of dollars to finance a few big firms to develop new products on which these firms then take out a patent and force the public to pay additional millions or billions in the form of patent royalties. In other words, until corrected by Congress, a method has been at last found to have your cake and eat it too.

Senator Joseph O'Mahoney; our able colleague, the gentleman from Delaware, Representative Harris B. McDowell, Jr., and I have introduced legislation to establish a Government-wide patent Policy. It is high time the Senate and House Judiciary Committees held hearings on these bills which big business has kept bottled up for so long. For it is a certainty that the small businessmen of the Nation will never be treated fairly until this legislation is enacted into law.

Senator Russell B. Long, chairman of the Subcommittee on Monopoly of the Senate Select Committee on Small Business has contributed importantly to the understanding of the dangers inherent in the Defense Department's harmful and obsolete patent policy.

It is significant, I think, that the Democratic Party, acting on the good advice of the National Federation of Independent Business, and its fine representatives, C. Wilson Harder, president, and George J. Burger, vice president, included the following strong plank in its platform at Los Angeles:

We favor permitting all firms to have access at reasonable rates to patented inventions resulting from Government-financed research and development contracts.

In introducing his bill to establish a Government-wide modern patent policy Senator O'Mahoney told his Senate collegues that:

The Government's basic research should be promoted and protected because it is growing clearer every day that the comparable positions of Soviet Russia and this country will depend upon the success and proper conduct of this program and the successful establishment of a uniform and sound Government policy.

The important fact to keep in mind is that the Government has been studying the subject of a Government-wide patent policy for years. In 1947 Justice Tom C. Clark, former Attorney General, recommended that the Government should take title to all inventions produced in the performance of research contracts with the Federal Government except in special cases approved by the Government Patents Administrator, an office which he also recommended should be established, and the heads of the agencies involved in the contract. This is still a splendid proposal and would be a tremendous advance over the present giveaway-to-big-business patent policy.

On November 9, 1956, former Attorney General Herbert Brownell submitted a report to Congress as required by the Defense Production Act of 1950 in which he found that present patent policy "may be one of the major factors tending to concentrate economic power."

I include as part of my remarks the splendid article by C. Wilson Harder, president of the National Federation of Independent Business. I include, in addition, articles from the Washington (D.C.) Star, and from Labor, a national weekly newspaper which is published by 18 recognized standard railroad labor organizations, which has long been interested in this subject.

The material follows:

WASHINGTON AND SMALL BUSINESS

(By C. Wilson Harder)

Because it is understood by so few people, a few huge enterprises are getting from Government a ride on the greatest gravy train yet devised.

Representative Frank Thompson, Jr., Senator Joseph O'Mahoney, Senator Russell Long, and many others in the Congress are seeking to plug the loophole which enables huge firms with Government research work from continuing to capture this biggest of all bonanzas.

In 1959, for example, almost \$8 billion, or over 60 percent of all research expenditure spent by all industry, was Federal money, put up by the taxpayers. Of these huge grants, small business received only 5 per-

Now these grants were made primarily to develop new developments for use in the Nation's defense complex. But the matter of defense has become so entwined with the

civilian economy, that out of this research comes a host of nondefense applications.

For example, advances in metallurgy, drugs, plywoods, processed foods, electronics, and in many other fields which are now found in consumer goods and services originated in research for defense.

There is perhaps no doubt that the Govern expenditure of billions for research for new products and methods to meet defense needs in an age of technological warfare is needed. But that is not where the problem

A huge firm, receiving millions or billions from Government to carry on research to solve a defense problem, decides that there is also a commercial application to the material or method developed with the taxpayers' money.

The firm then seeks and receives a patent on the commercial application of the material, or process, thus acquiring an asset of incalculable value, all paid for by Uncle Sam.

This is nub of problem.

And it is a particularly grave problem because the Defense Department, others in a position to hand out these research grants, give 95 percent of them to a few huge combines. If it were not for the Senate and House Small Business Committees, it is unlikely that even 5 percent of these huge sums would trickle down to small business.

This situation, then, has opened the road to monopolies undreamed of in the past.

Senator O'Mahoney has a bill which

would correct this situation.

Unfortunately, due to highly technical nature of the matter, the issue will be fogged in a lot of obscure language.

Taxpayers are spending billions of dollars to finance a few big firms to develop new products on which these firms then take out a patent and force the public to pay additional millions or billions in the form of patent royalties. In other words, until corrected by Congress, a method has been at last found to have your cake and eat it, too.

[From the Washington Star, Jan. 10, 1960] Firms Balk Space Contracts, Won't Give Up Patent Rights

(By William Hines)

Faced by the threat of a sitdown strike by industry, the Government is moving to ease space age patent restrictions which have been criticized as "unfair, unreasonable and unnecessary for any proper governmental purpose."

Chairman Brooks of the House Space Committee will introduce a bill tomorrow embodying changes in the space law suggested by the National Aeronautics and Space Administration. The revisions go part—but not all—of the way toward meeting objections of concerns active in the burgeoning space business.

A number of companies, large and small, have adopted specific or general rules against doing business with NASA even at the risk of being branded unpatriotic. Some contend that the law as now written violates the American free-enterprise spirit and may even run counter to the due-process clause of the Constitution.

Some of the rejected contracts were concerned with the Mercury man-in-space program.

GE REJECTS CONTRACT

General Electric Co., one of the largest manufacturing concerns in the world, has turned down at least one contract to do crucial work for NASA. Its reason: Reluctance to turn over patent rights to the Government on gadgets which give promise of commercial application outside the space business.

At present the space law provides that NASA contracts contain a clause normally vesting title to any patents in the Government rather than in the contractor. The law contains a waiver provision which, under Space Administrator T. Keith Glennan, is being interpreted liberally, but some industrialists fear a tougher policy might be adopted by future Space Agency chiefs.

Effect of Representative Brooks' proposal, it is understood, will be to bring NASA contract procedures regarding patents more closely into line with those of the Defense Department. That agency's many procurement offices normally write contracts that reserve patent rights for the company making an invention, but provide for royalty free licenses to be granted to the Government.

#### SIMILAR TO AEC PROCEDURE

The present NASA patent provision, which industry complains is stultifying invention and hampering the space effort, is more akin to the Atomic Energy Commission's patent procedure. AEC owns inventions developed under its contracts.

In hearings last year on patent-law revisions, NASA General Counsel John Johnson observed:

"We are not really like the Atomic Energy Commission, which had to embark on an en-tirely new field of technology and where the major work was done within the Government-at least at the beginning. Here we are right in midstream as far as the whole aeronautics and space industry is concerned."

#### FIVE FIRMS REJECT CONTRACTS

Speaking for the American Patent Law Association, Richard Whiting, of New York. named five companies which have turned down contracts containing provisions for assignment of patents to the Government. listed last month in a letter to the House Space Committee, the companies and their positions were:

Electric Storage Battery Co., of Pennsylvania-Contract for batteries for the Project

Mercury vehicle rejected.

National Research Corp., of Cambridge, Mass.—A general policy on NASA contracts in certain fields of technology where complete denial of title to our inventions would place us in an unfavorable commercial position."

Corning Glass Works, of Corning, N.Y .-Contract for glass parts for the Mercury proj-

ect rejected.

AMP, Inc., of Harrisburg—A general ban

on NASA contracts.

Bowmar Instruments Corp., of Fort Wayne, Ind.—Advised by counsel to shun contracts with the NASA patent provision.

### PATENT CLAUSE RESTRICTIVE

Robert R. Lent, chairman of the patents and proprietary rights committee of the Strategic Industries Association, told of two other concerns with similar policies: the Airborne Research & Development Corp., of Burbank, Calif., and Statham Instruments, of Los Angeles. One of them, he said, has turned to manufacturing women's compacts with builtin flashlights rather than vital electronic equipment.

Mr. Lent said the patent provision in the Space Act is so restrictive that in certain cases the act could be construed to give the Government patent rights even where the inventor had no contractual or subcontractual relationship with the Space Administra-

"We think that (the provision has) the effect of strangling the very existence of small business because big business does not need patent protection."

### GYROSCOPE WORK CITED

That big business does not feel this way was brought out in a letter to Representative Mitchell, Democrat, of Georgia, from a General Electric official. Mr. Mitchell heads the Patent Subcommittee of the House Space unit.

Dr. George L. Haller, vice president of G.E., and general manager of its defense electronics division, told how his company had turned down a NASA contract because of concern over patent rights.

For about 10 years, Dr. Haller related, G.E. had been working on superaccurate gyroscopes designed to work at temperatures hundreds of degrees below zero.

"In the course of this research and development work, several inventions had been conceived and either actually reduced to practice, or constructively reduced to practice by the filing of patent applications in the U.S. Patent Office," Dr. Haller said.

#### GENERAL ELECTRIC BOWS OUT

Last March the Boston Ordnance District of the Army gave G.E. a contract to do fur-ther work on the gyros, excluding "the above prior General Electric inventions \* \* \* from the license grant," he went on.

In October the contract came up for renewal, and "we were advised that approximately half the financing for this further work was to be supplied by NASA, and that as a consequence, the NASA 'property rights in inventions' clause must be included in the contract." At that point, Dr. Haller related, G.E. bowed out.

The G.E. official summed up his company's position thus:

"The future of such gyros is not known with certainty at this time. They appear to have applications of interest to the commercial business of the General Electric Co., as well as potential applications for Government purposes.

"The patent rights represented by the inventions in question represent means by which General Electric may hope partially to recover the sums expended by it in this and related developments, not all of which have been successful, and to develop additional capital to continue research which will lead to future developments."

### CALLS PROVISIONS "STRINGENT"

Dr. Haller complained of "the danger that good-faith willingness to accept contract terms which the prospective contractor considers unfair or overreaching may, in a political forum, be charged to lack of proper concern for the national security."

The NASA Act, however, "unnecessarily places the contractors' interest in the national safety in conflict with his concern for the growth of his business by attempting to compel the acceptance of Government contracts containing unduly stringent patent provisions," Dr. Haller added.

Emphasizing the inequality between NASA's law and that of agencies, Dr. Haller said G.E.'s cryogenic gyro is now being developed under "a contract with a non-NASA agency \* \* \* which contains non-oppressive patent provisions."

J. Anthony Moran, general counsel of the newly formed Space and Astronautics Foundation here, indorsed the proposed change in the law, but he minimized the number of concerns that would shun NASA contracts because of existing provisions.

A more extreme view was taken by Mr. Lent, who branded Government ownership of patents "unworkable."

Those of us who accept Government research and development contracts do so for only one reason: The expectancy that a product may result that can be produced

and marketed at a profit," he said.
"I submit \* \* \* that persistence of Government patent ownership philosophy will ultimately make it necessary for the armed services to perform all of their research and development in their own laboratories, thereby freeing private industry for its private commercial purposes."

### [From Labor, May 21, 1960] SOLONS LOSE BATTLES TO CUT COSTS AND PROTECT PUBLIC

Few newspapers reported it, but a series of significant amendments to the \$39 billion U.S. national defense appropriation bill, designed to protect taxpayers and reduce costs, lost out in the House recently. Among them were the following:

1. An amendment by Congressman Harris B. McDowell, Democrat, of Delaware, which, he said, "provides that funds appropriated under this act may not be used to make payments on any research or development contract, unless all resulting inventions and discoveries, and all patents on them, become the property of the United States."

McDowell explained that his amendment would stop the present practice, under which the Defense Department is giving corporations about \$5 billion a year to finance discoveries and inventions which become their private patented property.

#### PRIVATE MONOPOLIES AIDED

Thus, the Congressman said, huge sums of the taxpayers' money are being used to help create private monopolies. Many actual examples of this were pointed out by McDowell

Under his amendment, Uncle Sam would own the patents, so anyone could use the Government-subsidized inventions and discoveries. Several other Congressmen spoke strongly for the amendment but it was defeated by a vote of 104 to 37.

2. Congressman Alfred E. Santangelo, Democrat, of New York, offered an amendment which would forbid corporations to hire Army, Navy, or Air Force officers for jobs in which they would sell the corpora-tion's products to the Defense Department, until after the officer has been out of military service for 2 years.

#### INFLUENCE PEDDLING

Santangelo reminded the House that an investigation by one of its committees, headed by Congressman F. Edward Hébert, Democrat, of Louisiana, had revealed scandalous examples of how generals, admirals and other high-ranking officers are getting fat corporation salaries for using their influence with their old friends among the purchasing officers in the Defense Department.

He pointed to the HÉBERT committee finding that, of the 1,401 high officers who retired in a recent period, 893 did so to obtain a lucrative job with a defense contractor.

Santangelo's amendment was supported by HÉBERT and several other Congressmen, but it was defeated by a vote of 89 to 53.

### [From Labor, July 23, 1960]

SOLONS KEEP UP FIGHT AGAINST GIVEAWAY OF U.S. PATENTS TO HUGE CORPORATIONS

Progressive Senators and Congressmen are continuing a battle against a gigantic grab of taxpayers' money by big corporations and their patent lobby. The main new developments follow:

1. Senator Joseph C. O'MAHONEY, Democrat, of Wyoming, chairman of the Senate Subcommittee on Patents, issued another of the subcommittee's staff reports on the patent practices of various Government agencies. Subject of the new report is the Treasury Department.

That big agency, the report says, "spends tax money to finance scientific research by private corporations, and lets them have the patents on the resulting discoveries and inventions.

### GET MONOPOLY CONTROL

O'MAHONEY pointed out, these favored corporations get "control of entire new technical areas," and are put in a position to charge high monopoly prices to the Government and anyone else who wants to use the discoveries and inventions. In effect, public money is used to create private monopolies which make fantastic profits at the expense of the public.

In earlier reports in its series. O'Mahoney committee made similar charges against some other Government agencies, particularly the Defense Department, which hands out the largest chunk of the huge total of \$8 billion a year given by the Government to corporations for scientific research.

GIVEAWAY BILL

2. Shoved through the House near the close of the recent session was a bill amending the patent provisions of the law that created the National Aeronautics and Space Administration, which is handing out more and more scientific research money to corporations in the vast and fast-growing space field.

In the House debate, Congressman CHET HOLDTELD, who led the fight against this amendment, explained that, under the present law, all discoveries and inventions made by use of this NASA money belong to Uncle Sam, anyone is free to use them, and there

can be no patent monopoly.

In contrast, under the amendment, the NASA Administrator could let corporations get private patents on inventions they make with public money. The only requirement would be that the NASA Administrator would have to tell Congress that the Government did not need to own these inventions in the interests of national security.

"GUN AT HEAD"

In short, Holiffeld warned, the NASA Administrator would be free to hand out to favored corporations both the taxpayers' money and the resulting inventions and discoveries. The corporations getting the patents could refuse to let other companies use them, so competition would be barred and monopoly profits assured.

A main argument used by supporters of the amendment was that, as proved by past experience, many corporations refuse to cooperate with Uncle Sam in scientific research, even in wartime, unless they are assured of patents on the products of the research. That was called a gun-at-head argument by one disgusted Congressman.

In his opposition to the amendment, Hour-FIELD received strong support from Democratic Congressmen McDowell, of Delaware, Wolf, of Iowa, Price, of Illinois, Doyle, of California, and Quigley, of Pennsylvania,

### AMENDMENT PUSHED THROUGH

QUIGLEY moved to knock the amendment out of the bill which came to the floor from a House committee, and leave the patent provisions of the NASA law as they were. His motion was defeated by a vote of 154 to 91. Wolf pointed out that "not a single Republican" voted for it.

Another real test came on a motion to shelve the patent giveaway bill by sending it back to the committee. This motion lost 269 to 120. Then the bill passed by a vote

of 235 to 31.

3. In the Senate, a strong speech against this patent givesway bill was made by Senstor Russell B. Long, Democrat, of Lousiana, who has worked shoulder to shoulder with O'MAHONEY on the patent investigation subcommittee. He also denounced this kind of patent giveaways in general, and voiced this warning:

"Political liberty can survive only within a competitive economic system. Yet our own Government, through its patent political policies, has been undermining the vitality of

competition."

The Senate has not passed the bill but it is expected to come up after the recess.

### Hon. Gordon Canfield

EXTENSION OF REMARKS

## HON. EDWARD H. REES

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. REES of Kansas. Mr. Speaker, GORDON CANFIELD is retiring from the

House of Representatives after many years of devoted service. He has represented his district faithfully and well. More than that, he has represented the people of this country. As a member of the House Committee on Appropriations, Mr. Canfield has worked diligently. He has been fair in his efforts to represent the taxpayers as well as those who appeared before his committee seeking appropriations for the various departments.

As above suggested, he has had the reputation of being more than fair to all parties concerned. He is respected for his honesty, his industry, and his ability. He has served the country well. We wish for him the best that life can

Summary of Congressional Action of Special Interest to the Indian People in the Second District of South Dakota

EXTENSION OF REMARKS

OF

## HON. E. Y. BERRY

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. BERRY. Mr. Speaker, under leave to extend my remarks, I wish to insert in the CONGRESSIONAL RECORD MY recent newsletter summarizing congressional action of special interest to the Indian people in my district:

DEAR FRIEND: The Democrat-controlled 86th Congress which was elected on promises of doing everything to improve the lot of the Indian people, sneaked out of town last week after having failed in most of its promises and having done little to improve the lot of the Indian people generally.

It should be remembered that it is Congress which passes the laws-it is Congress which appropriates the money—and Congress alone which is responsible for legislative suc-

cesses or failures.

When Congress is composed of 280 Democrats and 152 Republicans in the House and 66 Democrats and 34 Republicans in the Senate they can hardly blame the Republican Party or the Republican administration for their failure to pass legislation bene-

ficial to the Indian people.

In spite of 2-to-1 Democrat majorities, Republican Members of the South Dakota delegation, Senator MUNDT and Senator Case and myself, have been able to get through a number of measures helpful to South Dakota and South Dakota Indians. This we have ben able to do because of seniority in Congress, and because through the years, we have built up confidence in what we are trying to accomplish, obtaining the support of even the Democrat majority through the confidence they repose in us. It has taken time to build up this confidence and to reach positions of command on committees. For instance, because of my 9 years of service on the Interior and Insular Affairs Committee, which handles all Indian legislation, I am the third-ranking minority member on the committee and the first-ranking minority member on the Indian Affairs Subcommittee.

### COMMITTEE HEARINGS

I want to apologize to my Indian friends and particularly to those who spent a great deal of time in preparing their testimony given before the Indian Affairs Subcommittee hearings held on all of the reservations in South Dakota in October 1959. As you will recall, the hearings were held by Chairman JAMES HALEY, Democrat of Florida. He had notified all four Members of the South Dakota delegation in Congress of the time and places of the hearings scheduled. Because of their interest in the welfare of the Indians. Senator Mundr personally attended all of the hearings and Senator Case attended as many as he could, having his administrative assistant attend those where he was unable to personally be present.

McGovean was unable to attend any of the hearings or to have his assisant present. Because of the fact that Senators MUNDT and Case took part in the House hearings, he objected to the testimony being printed. The result was that Chairman Aspinall has refused to permit the testimony taken in South Dakota to be read or referred to, and the work in preparation, the time given over in taking the testimony, was completely wasted so far as Congress having opportunity to benefit

from the statements are concerned.

This is the first time in my 9 years on the Interior Committee when an objection has ever been made to Senators testifying or taking part in House committee hearings. As a matter of fact, it is customary for House Members to go over to the Senate to take part in Senate hearings, and for Senate Members to come over to the House side to take part in House hearings, but politics became involved in these hearings in spite of the fact that Chairman Haley is himself a Democrat.

#### LEGISLATION

One of the bills I got through Congress this session was a bill relieving members of the Standing Rock, Lower Brule, and Crow Creek Reservations from having delinquent seed loans and other debts deducted from payment of their land settlement where their land was taken under the Oahe Dam.

Three days of hearings were held on my bill to provide industry on Indian reserva-tions, a bill I have dubbed, "Operation Bootstrap—Reservation Style" because it follows closely the Operation Bootstrap program in Puerto Rico. No piece of Indian legislation in modern years has met with such universal approval as Operation Bootstrap. I mailed out 1,000 copies of the printed hearings. You probably have read these hearings and know that people from all over the United States not only came to Washington but presented their testimony in support of this program.

What it does is briefly this. It authorizes the tribe to contract with an individual plant to establish an industry on the reservation, and grants a 10-year exemption from all taxes to the industry, providing it locates on a reservation and employs Indian people.

Hearings on the bill will be resumed in January, and I am very hopeful that early and favorable action will be taken. If we have a Republican majority in Congress, I am certain that with the support of the Commissioner and the Secretary of the Interior, as we already have, that it will be a law within a few months.

This would mean not only jobs but a regular salary. It would mean that the Indian people would then be eligible for housing loans. It would mean that the Indian people would be eligible for water and sewage disposal plants and sanitary facilities of all kinds. It would mean building up reservation areas, and, most of all, providing opportunity for those of working age and much greater opportunity for our young people.

I hope to have an opportunity to visit with you at some of the meetings this fall. Many of you have special land and rental problems with which I have been helping you. I shall continue to keep in close contact with these problems to bring them to a successful close.

Again, thanking you, and with my kind regards, I am,

s, I am,
Sincerely yours,
E. Y. BERRY, (Mahto Cuwiyuksa).

## Paraguayan Dictator Accused of Genocide by Exiled Priest

EXTENSION OF REMARKS

### HON. CHARLES O. PORTER

OF OREGON

IN THE HOUSE OF REPRESENTATIVES
Thursday, September 1, 1960

Mr. PORTER. Mr. Speaker, it has been my pleasure to meet Father Talavera both in Venezuela and in this country. He is a fine man, a credit to his church and to his country. He has refused more than 20 invitations to go to Cuba because he does not want to be identified with either communistic or dictatorial aspects of that regime.

Under leave to extend my remarks in the Record, I include the following story which appeared in the Inter-American Labor Bulletin for August 1960:

PARAGUAYAN DICTATOR ACCUSED OF GENOCIDE BY EXILED PRIEST

A charge that the Paraguayan dictatorship of Gen. Alfredo Stroessner is guilty of the crime of genocide was made in Washington by the Reverend Ramon Talavera Golburu, leader of the Civic Christian Crusade of Paraguay, now in exile.

In an interview at AFL-CIO headquarters

In an interview at AFL-CIO headquarters Father Talavera disclosed that he had come to the United States from Montevideo, Uruguay, for the dual purpose of presenting facts about the tyranny of the Stroessner government to the Organization of the American States, as well as to seek an end to political, economic, military and technical aid to the Paraguayan dictator. He characterized the Stroessner regime as totalitarian and said that it "poses a threat to the peace in the continents."

"The Paraguayan tyranny has shown patently its intention to eradicate all opposition from the country by mass arrests, bloody persecution of entire segments of the population, inhuman torture of thousands of political prisoners—many of whom have died and most of whom come out of the tortures physically and mentally broken." Talayera said.

Born in Paraguay in 1923 and the founder and director of the Cruzada Civico-Christiana, Father Talavera was ordained in 1937 and at once entered upon the fight to win spiritual and social justice for the oppressed people of his native land. In 1949 he was elected national counselor of the Paraguayan Christian workers' movement (J. O.C.) and for 4 years edited its publication entitled "Juventud Obera."

### CRITIC OF STROESSNER

As an outspoken critic of the Stroessner government's violations of human rights, he was setzed and deported to Uruguay in November 1958. He continued his outspoken opposition in exile, and established the Cruzada Civico-Christiana, which seeks by nonviolent means to overthrow the Stroessner government. Attempting to return to his home in Asunción in August 1959, he was arrested, questioned by police and then put on a warship and deported to Argentina. He has appealed to the Inter-American Peace Committee for help in gaining readmission to his homeland.

"It is a fact known throughout the Western Hemisphere that more than 400,000 Paraguayans have been driven from their country by the ruthless persecution of the dictator who rules Paraguay," he said. "This figure can be easily verified through the statistics on Paraguayan residents in Argentina, Uruguay, and Brazil.

"Among the Paraguayan refugees in foreign lands there are a large number of women and children who have accompanied the huge exodus of workers, farmers, high school and university students, professionals, etc. This persecution of entire segments of the Paraguayan population because of their democratic beliefs constitutes an authentic case of genocide. One-fourth of the total native population of Paraguay has had to fiee the country and to seek a better life and the benefits of basic human rights in foreign lands."

Talavera charged that 70 percent of Paraguay's national budget is now going to support the armed forces and police "to defend the tyrant against his people." He said that Paraguay today has one of the lowest per capita incomes in Latin America, amounting to only \$65 in 1959.

### WAGES CUT IN HALF

Since the Colorado Party of General Stroessner took over in 1947, there has been a 50-percent reduction in real wages, while the concentration of wealth in the hands of the privileged few has been accentuated, the Paraguayan labor priest told the press. Only 1.4 percent of the population owns 93 percent of the cultivable land, and 70 percent of the farmers do not own the land they till, he pointed out.

"There is nothing resembling basic human rights or guarantees in Paraguay at the present time," Talavera said. "The dignity of man is trampled upon shamelessly. Corruption is rampant and the downtrodden majorities of the nation live in physical and moral misery."

The Paraguayan leader termed it "a tragic irony of our times" that the United States and some Latin American governments not only maintain friendly relations with the Paraguayan tyranny but are providing political, military, and economic support. He pointed out, however, that "prominent political leaders in the United States have publicly recognized that the U.S. policy in Latin America must be revised."

"In my own country the forces of freedom are organizing themselves," he continued. "The two large opposition parties, the Liberal and Febrerista Parties, have united in exile in a National Paraguayan Union. A new political party, the Christian Democratic Party, has just been founded to fight for human rights and, consequently, against Stroessner's tyranny. Moreover, important sectors of the official Colorado Party have turned against Stroessner and Colorado leaders in exile have organized the Popular Colorado Movement which has as the first plank in its platform 'to overthrow the Stroessner tyranny.' Finally, I should mention my own Christian Civic Crusade for restoration of freedom and dignity in my beloved homeland."

### WANT TO FREE PARAGUAY

All of these parties and movements coincide in their basic objectives of freeing Paraguay from Stroessner's rule and reestablishing democracy in Paraguay, he pointed out.

"In denouncing the Paraguayan tyranny to the Organization of American States, the democrats of Paraguay seek an investigation by this inter-American body of the conditions prevailing in Paraguay in the conviction that the findings cannot but be the same as those in the case of the Dominican Republic," he continued. "The Paraguayan tyranny also creates tensions and threats to the peace in the southern area of the continent as much as the Dominican Republic does in the Caribbean area.

"The condemnation of the Stroessner tyranny by the community of American States will undoubtedly hearten the Paraguayan democrats who are fighting for the dignity of man, for democratic freedoms, and for economic and social progress."

### Duty-Free Importations Into the United States

EXTENSION OF REMARKS

### HON. EUGENE J. McCARTHY

OF MINNESOTA

IN THE SENATE OF THE UNITED STATES

Thursday, September 1, 1960

Mr. McCARTHY. Mr. President, I ask unanimous consent to have printed in the Appendix of the Record a statement by me on the tendency of some companies to use the duty-free import statute for our insular possessions as a means of avoiding higher rates of duties.

There being no objection, the statement was ordered to be printed in the Record, as follows:

### STATEMENT BY SENATOR MCCARTHY

I am sorry that in the closing days of the Congress there was insufficient time to act on a matter which, it seems to me, merits prompt legislation. I refer to the fact that in recent months there has been a growing tendency for companies to establish themselves in U.S. insular possessions on a basis that results in their escaping the proper payment of duty on products they wish to import into the United States.

Section 301 of the Tariff Act of 1930, as amended, was intended to promote the development of employment opportunities in our insular possessions, in the hope that they would be able to raise their standards of living. This section permits the duty-free importation into the United States of articles produced in the islands, provided that the foreign materials utilized in these articles is less than one-half their total value.

While the objectives of this section are most worthwhile, in practice it has developed into a potentially dangerous loophole. This is because many foreign products which carry a high rate of duty can be shipped into the insular possessions in a subassembled condition; assembled in the islands with a negligible amount of effort; and then automatically qualify for duty-free importation into the United States.

The key to the situation is the method of computing the total value of such articles imported into this country. Under the present statute, the total value is computed in such a way that for articles bearing a high rate of duty, the total value is almost certain to be more than double the cost of the foreign subassemblies imported into the possession, even though there has been little or no value added there, and consequently little benefit to the economy of the U.S. insular possession.

In brief, section 301 has become an avenue for the avoidance of very substantial amounts of duty in certain industries, while failing in these cases to achieve its objective of stimulating employment and investment in the islands.

I understand that the situation has intensified in recent months as concerns producing high-duty articles, such as watches, have started operations in the Virgin Islands. The entire U.S. watch industry, domestic producers as well as legitimate importers, oppose this development as an im-

proper use of the Virgin Islands preference. While I do not favor the high rates of duty which such industries are now forced to pay, there is no doubt in my mind that it is totally improper and unfair to permit such duty avoidance by their competitors' misuse of the Virgin Islands preference. Continuation of such practices will merely serve to upset more responsible elements in

such cases as the watch industry and will, of

course, lead to very substantial revenue losses by our Government.

The Treasury Department has recognized the loophole in section 301 and has urged corrective legislation. While time did not permit congressional action in the 86th Congress, I sincerely trust that the Congress will give this matter its prompt attention in January.

### TVA Ghosts Come to Life

EXTENSION OF REMARKS OF

### HON. GORDON H. SCHERER

OF DHITO

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. SCHERER. Mr. Speaker, last year when the Congress passed H.R. 3460, giving to TVA bond issuing authority and broadening existing legislation. I said that the practical effect of the bill would be to remove all presidential and congressional control over the use of bond and power revenues. I further predicted that, as a result, the illusory fence placed around TVA's service area by the bill would shortly fall like a stack of cards.

I argued that the proponents of socialized power had no intention whatsoever of acquiescing in any territorial limitation for TVA, and that the limitations provided in the bill were only a temporary concession or sop to enable the public power boys to get their bond issuing authority through the Congress.

I pointed out that any TVA area limitations would vanish as soon as they were able to meet the power demands in the present TVA service area, which demands had become so great because TVA had pirated industry after industry from other sections of the country by using taxpayer's subsidized power as a

Mr. Speaker, no one in the Congress has a better understanding of the history and operations of the Tennessee Valley Authority and its eventual objectives than does my distinguished colleague, BEN F. JENSEN, from the Seventh District of Iowa. On August 26 I received from him a lengthy and comprehensive letter in which he carefully and with keen insight outlines what has happened and is happening in the Tennessee Valley since the passage of H.R. 3460 in July of last year.

It can be readily seen that the socialized power boys, who vigorously denied what we said during the debates on H.R. 3460, are now proceeding exactly as we had predicted. It is now apparent that the end result in a few short years will be a vast expansion of the TVA service area.

Mr. Speaker, at this point in my remarks I insert in the RECORD this excellent letter of the gentleman from Iowa, BEN JENSEN, and the excerpts from the testimony before the Appropriations Committee referred to in Mr. JENSEN'S letter:

CONGRESS OF THE UNITED STATES, HOUSE OF REPRESENTATIVES, Washington, D.C., August 26, 1960. Hon. GORDON H. SCHERER,

Member of Congress, Washington, D.C.

DEAR CONGRESSMAN SCHERER: In the keynote speech before the Democratic National Convention in Los Angeles on July 11, 1960, reference was made to the Khrushchev prophecy that our grandchildren would be living under socialism. Naturally this Democratic keynoter did not tell his audience that for years this trend toward so-cialism in the United States had been actively promoted by many of the leaders of the Democratic Party.

One of the prime examples of this socialistic trend is the promotion and expansion over the years of the Tennessee Valley Authority. That it is truly socialistic was proclaimed by none other than Norman Thomas, the perennial socialistic candidate for President of the United States.

During the 1st session of the 86th Congress, controlled by a Democratic majority, two bills—H.R. 3460 and S. 2471—to amend the TVA Act were passed. These bills provided, among other things, for the issuance of revenue bonds by the Tennessee Valley Authority to provide added funds for expanding the electric power facilities of that

Many of the opponents of these bills claimed that their passage would practically relieve TVA of any effective control by the Congress over the plans of that agency for the expansion of its electric power system. An opinion was held by many that after passage of these bills. TVA would proceed to interpret the law as permitting them to construct, at will, new generating plants or units, without prior notice to the Congress, and without specific approval by Congress.

I was among several Congressmen who protested to the White House, with no avail, about approval of these bills that would practically remove TVA from any effective congressional or presidential control. The replies from the White House took the position that there was no need to be apprehensive about the TVA Act as amended by the bills in question, and that Congress could in the future affirmatively legislate to

meet any problem that might arise.
On July 23, 1959, when House Resolution 326 was called up for the purpose of taking up and accepting the TVA revenue bond bill, H.R. 3460 as amended by the Senate, and again on August 11, 1959, when the bill S. 2471 to further amend the TVA was taken up by the House, you spoke out against the added authority being given to TVA and against the elimination of control over TVA by the Congress and the President. You stated that passage of S. 2471 would:

"Instead of giving the President and the Congress direction over the construction of new power-producing projects by TVA as the President desired, unequivocally and completely eliminate any direction and control whatsoever by either the President or the Congress over the use of either revenue bonds proceeds or power revenues by the corporation in the construction of new power-producing projects."

With further regard to S. 2471 you said: Today, if we pass this bill, we wipe out all congressional authority and control."

For many years, I, too, have been greatly concerned about the continual expansion of this autocratic socialistic TVA power empire within these United States. With this expansion there has been a progressive assumption of power by TVA with a concurrent and continuing elimination of effectual and proper control by the Congress.

In the Congressional Record of February 24, 1959, on page A1364, I pointed out in some detail why I thought the "Congress should have more, not less, control over TVA—H.R. 3460 and similar bills should not pass." On page 3504 of the Congression pass." On page 3504 of the Congressional RECORD of March 11, 1959, I inserted the statement I presented that forenoon to the Works Committee in opposition to H.R. 3460. It should be amply clear from the documentary evidence presented in these two statements that the Congress has been derelict in not asserting proper control over this autocratic socialistic agency. In addition I am enclosing a reprint of an article of mine, "Socialism or Freedom for America." from the Congressional Record of Monday, May 4, 1959. This article deals at some length with development of the autocratic socialistic empire of TVA.

As you know, I am the ranking minority member of the Public Works Subcommittee of the House Appropriation Committee. Hearings before our subcommittee, since the passage of H.R. 3460 and S. 2471 to amend the TVA Act, have clearly demonstrated that your statements and mine about the effect of such bills on the TVA power expansion program were prophetic. Of course, we were not alone in the belief that the passage of H.R. 3460 and S. 2471 would practically relieve TVA of any effective control by the Congress over the power expansion plans of

that agency.

Information obtained during the above mentioned hearings disclosed that on August 13, 1959, the day before S. 2471 was signed into law, the TVA board entered into or awarded two contracts for the purchase of two new large steam electric generators. One of these was for a 600,000 kilowatt steam electric generator for a new plant in the western part of the TVA system. The second was for a 500,000 kilowatt steam electric generator for a new plant in the eastern part of the TVA system. It appears that the awarding of the second of these two contracts was in violation of the law in force on the day the two contracts were awarded.

On October 1, 1959, the TVA Board of Directors announced the plans for the construction of a new steam-electric generating plant on the Green River near Paradise in western Kentucky. These contract awards and other actions were taken without prior notification to or prior request for authority from the Congress for such action.

It is quite apparent that TVA now considers that it can start construction of new steam electric power generating plants at will, without prior notification to the Congress, or approval by the Congress as to the size, location, cost, etc., of such plants.

In an effort to obtain an admission by the TVA officials that they do now consider that they can proceed with the expansion of the TVA electric power facilities practically at will and without any requirement for prior notification of Congress, a series of questions and requests for information was presented by Congressman Fenton during the House hearings on the public works appropriation bill for 1961. The TVA officials were requested to submit, for the record, answers to these questions which would be as complete, concise, direct, and germane as possible, leaving out all extraneous comments or verbiage. These questions and answers or verbiage. These questions and answers as reported on pages 882 to and including the first paragraph of page 888 of the House hearings on public works appropriations for 1961 are attached hereto. For easy reference each question has been numbered. An analysis of the TVA answers discloses that in many instances they were neither complete nor fully responsive. This, of course, was not surprising, as it was in keeping with the TVA record down through the years. There was, however, sufficient information furnished in the TVA answers to demonstrate that TVA now believes it has sole authority to decide when, where, and what new power generating facilities are to be constructed by TVA, all without any need to advise the Congress prior to taking action on such expansion or to obtain specific approval

The following detailed discussion of some of the questions and the TVA answers thereto are presented in order to point out the indicated freedom from congressional control now held by TVA officials. The lack of responsibilities in some instances is also noted.

Questions (1) and (2). These questions requested information on the planned additions to the TVA power system through 1964. Information furnished by TVA appeared substantially responsive for the early years. Information for 1988 and 1964 appears incom-

Question (3). Detailed information as to how the power system additions were expected to be financed was requested through 1964. The TVA answer was neither complete nor fully responsive. For instance, infor-mation was desired on what portion of the cost of the new Paradise steam electric generating plant was to be financed by power revenues and what part from the sale of revenue bonds. This information was not

Question (4). Detailed information was requested as to expected purchase or lease of additional power from others. The TVA answer was to the effect that, other than probable purchase of power from Corps of Engineers projects on the Cumberland River, TVA had no other present plans for obtaining additional power through purchase or lease. In the past TVA has often used the phrase "TVA has no plans" only to end up doing the very thing it told Congress or the courts it had no plans or intentions of doing.

can only tell. Questions (5), (7), (8), (11), and (14). All these questions were related to the primary question of whether TVA had proceeded with the planning and construction of new power projects without prior notification to and specific authorization from the Congress

Whether this will be true in this case, time

and/or the President.

It was hoped that TVA would, in line with the request, give direct and responsive answers. In most instances, the TVA answers, instead of being straightforward yes or no type answers, were rambling and circuitous. In essence, however, these TVA answers disclose that TVA now takes the position that the TVA Act as amended now contains a general authorization under which TVA can undertake the planning and construction of power projects without prior notification to or specific authorization from the Congress and/or the President.

With regard to question (14) which spe-

cifically asked:

"Does TVA now consider it can construct new powerplants when and where it secs fit, without prior notification to or specific authorization from the Congress?

The TVA reply was: "This question is fully answered in the opinion of our General Counsel supplied in response to the question which follows."

This was an evasive type answer to a direct question that could have been answered with a direct yes or no. The sub-stance of the General Counsel's response to the seven parts of question (15) discloses that a yes would be the proper answer to question (14).

Question (15). This question was directed to the General Counsel for TVA who was requested to give his opinion on the control or lack of control that Congress now has over the power operation of TVA under existing law. The following seven specific

points were listed on which the General Counsel's opinion was requested:

1. What is the geographic area within which TVA can market power from existing or proposed new electric generating plants? Or from plants whose output is to be purchased or otherwise contracted for by TVA? Relate this to area served at time of passage of H.R. 3460.

2. Can TVA initiate the construction of new generating plants without prior noti-fication to or specific authorization from the

3. Is there any limitation on the area in which TVA can now construct steam electric plants?

4. If the answer to item 3 is yes, what is

such limitation?

5. Can TVA enter into contracts to purchase all or part of the power to be available from existing or new non-Federal powerplants outside the TVA area? If so, are there any geographical limitations as to the location of such plants and the area within which the power can be utilized?

6. What are some of the more important legal restrictions or congressional controls TVA believes it is released from by the exception (in sec. 15d(a) of the TVA Act as amended) that expenditures from bond proceeds "shall not be subject to the requirements or limitations of any other law"?

7. Does TVA intend to set up a special account for bond proceeds that will not be reflected in the accounting under the requirements of the Government Corporations Will TVA power receipts and Control Act? their expenditure continue to be reported under the provisions of that act?

Question (15-1). This related to the area within which TVA and its power distributors can serve. The General Counsel's answer simply quoted section 15d(a) of the TVA Act as amended. Apparently TVA does not want to go on record as to how it interprets the area limitation.

Question (15-2). Can TVA initiate the construction of new generating plants without prior notification to or specific authorization from the Congress?

Answer by General Counsel was as follows:

'Congress has authorized TVA to construct needed generating plants within the limits of its bond-issuing authority and the power revenues which are available. No further authorization from Congress is necessary.

"TVA's budget program includes a statement of TVA's plans for the construction of new generating plants during the ensuing year, but TVA's authority to construct plants and to issue revenue bonds for that purpose rests on its basic statute. If TVA should find that additional plants were required beyond those mentioned in the President's budget, it would have authority to begin construction of such plants, and would advise Congress of such action in connection with its next annual budget presentation."

It is evident that the TVA Board of Directors and the General Counsel are in agreement that TVA can under existing law use the power revenue and the proceeds from the sale of revenue bonds to construct new electric generating facilities when and where it pleases, and without prior notification to or specific authorization from the Congress or the President. It is indicated that the TVA budget program would present a statement on the TVA plans for construction of new generating plants during the ensuing year. However, the General Counsel points out that this program could be changed later, with Congress being advised of the change in connection with the presentation of the next annual budget. The General Counsel apparently believes that TVA can, within the limit of its power revenues and bond proceeds, do as it pleases about starting new plants and tell the Congress and the President afterward. The TVA ac-

tion on the Paradise plant is ample evidence of such a policy.

Questions (15-3) and (15-4). The question here is whether, in the General Counsel's opinion, there is any limitation as to the area wherein TVA can construct new steam electric generating plants.

The answer given is a circultous one, which, in essence, seems to say that TVA can construct new plants in any area it chooses, within an implied limitation relative to the cost of power. With TVA itself making the decision as to the relative costs for power, it seems apparent that the Gen-eral Counsel is saying TVA can construct a new generating plant wherever it pleases.

Question (15-5). The question here is in the same category of questions (15-3) and (15-4), except that it relates to purchase or lease purchase of power from plants constructed by others. The answer here is similar and in keeping with the answers to questions (15-3) and (15-4) to the effect that TVA can lease or purchase power from others pretty much as it pleases.

Question (15-6). The request here was for an opinion as to what were some of the more important legal restrictions or congressional controls TVA believes it is released from "by the exception (in sec. 15d(a) of the TVA Act as amended) that expenditures from bond proceeds 'shall not be subject to the requirements or limitations of any other

No direct or responsive answer was given. Instead, the General Counsel presented his opinions as to what was the basic purpose of the quoted portion of the TVA Act. He also listed two assurances that he said resulted from the quoted language of the act.

It appears that the General Counsel, in not giving a specific answer, does not want to be put in a position of indicating any possible limitation under this freewheeling amend-

ment of the TVA Act.

Question (15-7). This relates to whether proceeds from TVA bonds are to be recorded and reported in a special account and how TVA power revenues and expenditures are to be reported.

The TVA General Counsel says there is no accounting requirement under the Government Corporation Control Act. He goes on to say the bond proceeds and expenditures, and power proceeds and expenditures, will be reflected in TVA's budget presentation under the Government Corporation Control Act. Just what all this double talk means is not clear. It is evident from the TVA presentation in the fiscal year 1961 budget that no breakdown between bond proceeds and power revenues and their expenditures is to be given. It apparently will be the old, old story of having to pry the information out of TVA piece by piece.

I shall continue to fight for the restoration of proper congressional control over the operations of the socialistic TVA power empire and to prevent its expansion beyond its presently prescribed boundary. In addition, I believe provision should be made for a payment into the Federal Treasury by TVA and its power distributors equivalent to the average unit tax payment made by power customers of the private utilities of the

As the ranking minority member of the Public Works Subcommittee of the House Appropriations Committee, I shall continue to strive for a full detailed disclosure on the record of TVA's power operations and financial operations.

Sincerely,

BEN F. JENSEN.

PUBLIC WORKS APPROPRIATIONS FOR 1961-TVA

Mr. Cannon. The gentleman from Pennsylvania, Dr. Fenton, has left some questions which he would like to be answered in

the transcript. I will recognize Mr. JENSEN for that purpose.

The clerk suggests that we reserve the right for the staff to go over them.

Mr. JENSEN. Yes; that is all right.

Mr. Cannon, Without objection.

Dr. FENTON. Mr. Chairman, I have a few observations to make and a number of questions to ask and requests to make of the TVA witnesses. A number of the items relate to extending data placed in the hearing record for fiscal year 1960. I would like for the answers to my requests to be as complete, concise, direct, and germane as possible,

leaving out all extraneous comments or verbiage.

ADDITIONS TO TVA POWER-GENERATING CAPACITY

Question. Will you furnish a tabulation for the record showing all the major additions to TVA system capacity now under construction, planned and/or scheduled for completion in fiscal year 1960 and for each of the next 4 years, the total estimated cost for each unit or plant, amount expended for each at the end of fiscal year 1959, and the expected expenditures for each in fiscal years 1960, 1961, 1962, 1963, and 1964?

(The tabulation requested follows:)

Additions to generating capacity under construction, planned and/or scheduled for operation prior to June 30, 1964

#### [In millions]

Preliminary.
 Placed in service Nov. 30, 1958, Jan. 14, 1959, June 13, 1959, and Aug. 20, 1959, respectively. Cleanup work being done in remaining part of fiscal year 1960.
 Placed in service May 22, 1959, and Aug. 9, 1959. Cleanup work being done in remaining part of fiscal year 1960 and in the early part of fiscal year 1961.

#### ESTIMATED TRANSMISSION COSTS

Question. Will you also furnish the corresponding estimated costs and expenditure data for the transmission and other related system facilities needed to market the power from the added system capacity for these same years?

(The information requested follows:) Estimates for transmission system facilities are as follows:

Fiscal year:	Million
1960	_ \$30.8
1961	_ 31.8
1962	- 131.8
1963	_ 136.8
1964	130.0
I Drolling in our	

### SOURCE OF FUNDS

Question. Will you also show what portion of the foregoing costs for generating plants and other system facilities are expected to be expended from appropriated funds, what portion from power revenues, and what portion is to be derived from the sale of bonds? Give details for each of the years noted. Also give expected unexpended balance in each category of funds as of June 30, 1960.

(The information requested follows:)

Appropriated funds available from unobligated balances of previous appropriations are being used to complete Kingston steamplant for which all units have been placed in commercial operation. Estimates for the Kingston plant, not included in the above tabulations, are as follows: Piscal year 1960, \$1.5 million; 1961, \$1.2 million.

To the extent possible other generating facilities will be financed from current power revenues. Revenue bonds will be issued as a supplementary source of financing as required. The 1961 budget estimate for revenue bond issues is \$115 million during that year. For fiscal years 1962, 1963, and 1964 it is estimated that such issues will average about \$100 million per annum. Precise de-tails are not available at this time.

The unexpended balance of power proceeds is estimated at \$23,215,289 at June 30, 1960. This estimate includes no funds derived from bond proceeds since first issues are scheduled for fiscal year 1961. Of the \$2,411,000 total of appropriated funds estimated to be carried forward into 1961, it is estimated that \$1,217,000 will be applied to the Kingston steamplant.

Question. If additional power is expected to be obtained through purchase from Federal projects, or by purchase or lease from non-Federal sources which is not now included in TVA system capacity, give details for each of the following fiscal years: 1960, 1961, 1962, 1963, and 1964.

(The information requested follows:) Power produced at Corps of Engineers projects now in operation on the Cumberland River is being marketed through the TVA system; presumably power from additional projects on that river may also be so marketed. TVA has no other present plans for obtaining additional power through purchase from Federal projects or by pur-chase or lease from non-Federal sources.

#### LACK OF SPECIFIC AUTHORIZATION FOR NEW STEAMPLANT

Question. At last year's hearings you were requested to file for the record a the invitation to bid on over 6 million kilowatts of steam turbogenerators. On October 1, 1959, the TVA Board of Directors announced plans for the construction of a new steam-electric generation plant on the west bank of the Green River near Paradise in western Kentucky. The announcement also stated that the contract for the initial 600,000 kilowatt steam turbogenerator unit was ordered August 13, 1959, from the General Electric Co. at a price of \$18,007,280. Was any specific authorization or appropriation ever made by the Congress for the construction of this Paradise steamplant?

(The information requested follows:)

Construction of the Paradise steamplant is covered by general authorization in the Tennessee Valley Authority Act, as amended. No appropriated funds will be needed in financing the cost of this project.

Question. When was the construction of this \$100 million-plus plant authorized by the TVA Board? What was the vote?

(The information requested follows:) On August 13, 1959, the TVA Board of Directors awarded a contract for a 600,000-kilowatt turbogenerator unit, with the understanding that the unit would be installed in a new steamplant in the western area of the system. On September 25, 1959, the Board selected the Paradise site for the new station. On October 19, 1959, the Board formally authorized construction of the Paradise steamplant. The vote in each instance was unanimous.

Question. Was any committee of Congress ever notified of the intention to construct a plant at Paradise and, if so, what committee and when? (If the answer is "yes," supply a copy of such notification for the record.)

(The information requested follows:) TVA's budget justification for 1960 which was set out in the record of the appropriation hearings of April 22, 1959, before the House Subcommittee on Public Works Appropriations, beginning on page 792, included statements (p. 803) that "at least another million kilowatts of capacity should be started" to be financed from bond funds, and that "early enactment of financing legislation would support efforts to hold down the Federal budget for 1960 by avoid-ing the need for appropriations for this additional power capacity." Much of the ensuing discussion was concerned with the financing of power generating facilities from bond proceeds. At that time TVA had already solicited bids for additional generating units in anticipation of enactment of the bond financing legislation and there was considerable discussion concerning the invitation to bid. A copy of the invitation is in the record on pages 918-952. The Paradise site had not been selected at the time of the hearings.

Question. Was the President or Budget Bureau advised of the pending TVA actions on the Paradise plant prior to such If not, does TVA believe it can take such actions without prior notification to or approval by the President?

### (The information requested follows:)

The information in the TVA budget justification for 1960 and the record of the hearing referred to in the answer to the preceding question were available to the Office of the President and to the Bureau of the Budget. Similar information was also included in TVA's budget submission for 1960 to the Bureau of the Budget and was the subject of hearings before the Bureau of the Budget. The necessity for the additional capacity had been common knowledge for a long time. By routine, informal discussions the Office of the President and the Budget Bureau were kept informed on TVA's plans to provide required additional capacity

### BIDS ON NEW STEAM-GENERATING UNITS

Question. An examination of the abstract of bids shows that the General Electric bid on the 600,000-kilowatt unit was the only bid for a unit of this size.

Apparently, the invitations to bid were changed almost at the last minute to provide for alternate bids on units of unspecified Only two bids were received under this schedule, one from General Electric for a 600,000-kilowatt unit at \$18,007,280 and one from Westinghouse for an 800,000-kilowatt unit at \$24 million. Each of these bids was around \$30 per kilowatt of rated capacity. Can you explain why this change in the invitation to bid was made and why the award was made on a basis of a unit price per kilowatt of almost double the unit price bid on the originally specified 500,000-kilowate units?

(The information requested follows:)

Invitation No. 31-34762 was issued April 10, 1959, for bids to be opened May 26, 1959. The invitation asked for bids on units of different capacities: 500,000 kilowatts, 400,000 kilowatts, 350,000 kilowatts, and 275,000 kilowatts. On May 6, 1959, by addendum I, bid opening date was changed to June 16, 1959.

Prior to issuing the invitation, our needs had been discussed with various manufacturers. The consensus was that a 500,000kilowatt unit was probably the largest that could be built and delivered in time for operation in the fall of 1962, the time specified for the first of the units covered by the invitation. The invitation accordingly used this as the top size. After the invitation was issued, the manufacturers said that a review of their plans and manufacturing capacity showed that units larger than 500,000 kilowatts could be delivered within the available time.

On May 22, 1959, about 4 weeks before bid opening date, by addendum III, prospective bidders were notified that alternate bids offering units of different capacities would be considered.

When the bids were opened, General Electric and Westinghouse were the only bidders offering units for operation in the fall of

After evaluation for efficiency, the bid prices on a kilowatt of capacity basis were:

General Electric \$30.51 Westinghouse \_

The foreign manufacturers offered delivery dates too late to supply our needs for a first unit. Their bids, evaluated for efficiency and for "Buy American" differential, on a kilowatt of capacity basis were:

Brown Boveri	\$23.03
Parsons	30.54
English Electric	31.00

The bids of Parsons and English Electric were unacceptable both for reasons of price and (for a first unit) of late delivery. Award was made to General Electric as low bidder meeting required delivery. The disposition of the Brown Boveri bid is discussed in the answer to the next question.

Question. It is noted that you have also ordered an additional 500,000-kilowatt unit. When was this unit ordered and where is it to be installed? Who was it ordered from and at what price?

(The information requested follows:)
Invitation No. 31-34762, discussed in the answer to the preceding question, in addition to asking for offers for units to operate in the fall of 1962, asked for offers for units for operation at a later date.

Brown Boveri offered a 500,000-kilowatt unit for operation in August 1963, when it would be required to meet the load growth in that year. Their quoted price was \$8,500,-The corresponding evaluated cost was \$11,514,600 after evaluation for efficiency and the "Buy American" differential. This is \$23.03 per kilowatt of capacity, as noted in the answer to the preceding question.

Award was made to Brown Boveri for a 500,000-kilowatt turbogenerator unit on August 13, 1959, at the price of \$8,500,000.

This unit will be installed at a location not yet selected where it can help to serve loads in the eastern part of the power system.

### LOCATION OF NEW STEAMPLANT

Question. The President's budget refers to a steamplant to be built in the eastern part of the TVA area. Where and what size plant is this? Does TVA plan to construct this plant without specific authorization of the Congress?

(The information requested follows:)

As stated in the budget message to Congress, a 500,000-kilowatt turbogenerator has been purchased for supplying loads in the eastern part of the system. Decisions regarding the location of this 500,000-kilowatt unit have not yet been made. As the budget document explains, "The specific location has not been determined and if studies now in progress do not result in a satisfactory new plant location, the unit can be put into an existing station." The installation of this unit is covered by general authorization in the TVA Act, as amended.

COAL CONTRACT FOR NEW PARADISE STEAMPLANT

Question. Was the coal contract for the Paradise plant obtained through competitive bidding?

Yes.

Question. If so, will you furnish for the record an abstract of the various bids received for supplying coal to the Paradise

(The information requested follows:)

Only one bid was received. This was the bid of Peabody Coal Co. which offered 60,000 tons of washed mine-run coal per week for a term of 12 years at \$3.80 per ton f.o.b. rail cars at loading point, said price to be subject to escalation to reflect changes in mine wages and other mine labor costs. The bid guaranteed a heat content of 11,700 B.t.u. The bid was not acceptable to per pound. TVA in the form in which it was submitted but a mutually satisfactory contract was worked out through negotiations with Peabody, the only bidder, a course which is entirely consistent with recognized principles of competitive bidding.

Question. What are the quantities, terms, and unit prices in this coal contract?

(The information requested follows:) As awarded on October 1, 1959, the contract with Peabody calls for delivery over a period of approximately 17 years (beginning in August 1962) of approximately 65 million tons of unwashed, mine-run coal with an average guaranteed heat content of 10,770 B.t.u. per pound. The rate of delivery for approximately the first 9 months is 40,000 tons per week and thereafter 80,000 tons per The price is \$2.95 per ton delivered (by truck) at the TVA plant. This price is subject to escalation to the extent of ninetenths of any percentage changes in the average mine price of all mine-run coal bought by TVA from other suppliers under contracts with terms in excess of 1 year. has an option under the contract to obtain delivery of additional tonnage during the contract term.

### CONGRESSIONAL CONTROL OVER TVA

Question. Does TVA now consider it can construct new powerplants when and where it sees fit, without prior notification to or specific authorization from the Congress?

(The information requested follows:) This question is fully answered in the opinion of our General Counsel supplied in response to the question which follows.

Question. Will you have your General Counsel prepare for the record his interpretation of the control or lack of control that Congress now has over the power operation of TVA under existing law? This opinion should, among other things, give a definitive answer to the following:

What is the geographic area within which TVA can market power from existing or proposed new electric generating plants? Or from plants whose power output is to be purchased or otherwise contracted for by TVA? Relate this to area served at time of passage of H.R. 3460.

2. Can TVA initiate the construction of new generating plants without prior notification to or specific authorization from the Congress?

3. Is there any limitation on the area in which TVA can now construct steam electric

4. If the answer to item 3 is "Yes," what is such limitation?

5. Can TVA enter into contracts to purchase all or part of the power to be available from existing or new non-Federal power-plants outside the TVA area? If so, are there any geographical limitations as to the location of such plants and the area within which the power can be utilized?

6. What are some of the more important legal restrictions or congressional controls TVA believes it is released from by the exception (in sec. 15d(a) of the TVA Act as amended) that expenditures from bond proceeds "shall not be subject to the requirements or limitations of any other law"

7. Does TVA intend to set up a special account for bond proceeds that will not be reflected in the accounting under the requirements of the Government Corporations Control Act? Will TVA power receipts and their expenditure continue to be reported under the provisions of that act?

(The requested information follows:)

TVA is a wholly owned agency and instrumentality of the United States. It was created and exists under the Tennessee Valley Authority Act of 1933, as amended, and is responsible for carrying out the policies and programs laid down by Congress in the act. Subject to the vete power of the President, Congress may amend the act at any time.

My views on the specific questions are as

1. What is the geographic area within which TVA can market power from existing or proposed new electric generating plants, or from plants whose power output is to be purchased or otherwise contracted for by TVA? Relate this to area served at time of passage of H.R. 3460.

The geographic area within which TVA can market power from existing or proposed new generating plants or from plants whose power output is to be purchased or otherwise contracted for by TVA is specifically defined in section 15d(a) of the Tennessee Valley Authority Act, as amended, as follows:

"Unless otherwise specifically authorized by Act of Congress the Corporation shall make no contracts for the sale or delivery of power which would have the effect of making the Corporation or its distributors, directly or indirectly, a source of power supply outside the area for which the Corporation or its distributors were the primary source of power supply on July 1, 1957, and such additional area extending not more than five miles around the periphery of such area as may be necessary to care for the growth of the Corporation and its distributors within said area: Provided, however, That such additional area shall not in any event increase by more than 21/2 per centum (or two thousand square miles, whichever is the lesser) the area for which the Corporation and its distributors were the primary source of power supply on July 1, 1957: And provided further, That no part of such additional area may be in a State not now served by the Corporation or its distributors or in a municipality receiving electric service from another source on or after July 1, 1957, and no more than five hundred square miles of such additional area may be in any one State now served by the Corporation or its distributors.

"Nothing in this subsection shall prevent the Corporation or its distributors from supplying electric power to any customer within any area in which the Corporation or its distributors had generally established electric service on July 1, 1957, and to which electric service was not being supplied from any other source on the effective date of this Act.

"Nothing in this subsection shall prevent the Corporation, when economically feasible, from making exchange power arrangements with other power-generating organ-izations with which the Corporation had such arrangements on July 1, 1957, nor prevent the Corporation from continuing to supply power to Dyersburg, Tennessee, and Covington, Tennessee, or from entering into contracts to supply or from supplying power to the cities of Paducah, Kentucky; Princeton, Kentucky; Glasgow, Kentucky; Fulton, Kentucky; Monticello, Kentucky; Hickman, Kentucky; Chicamauga, Georgia; Ringgold, Georgia; Oak Ridge, Tennessee; and South Fulton, Tennessee; or agencies thereof; or from entering into contracts to supply or from supplying power for the Naval Auxiliary Air Station in Lauderdale and Kemper Counties, Mississippi, through the facilities of the East Mississippi Electric Power Assocation: Provided further, That nothing herein contained shall prevent the transmission of TVA power to the Atomic Energy Commission or the Department of Defense or any agency thereof, on certification by the President of the United States that an emergency defense need for such power exists."

This provision defines the relationship of the area supplied with TVA power on July 1, 1957, to the area within which TVA can now market power. The only major difference between the area on July 1, 1957, and at the time of passage of H.B. 3460 is that on the latter date TVA was no longer the primary source of power supply for the area served by the city of Memphis.

Can TVA initiate the construction of new generating plants without prior notification to or specific authorization from the

Congress?

Congress has authorized TVA to construct needed generating plants within the limits of its bond issuing authority and the power revenues which are available. No further authorization from Congress is necessary.

TVA's budget program includes a statement of TVA's plans for the construction of new generating plants during the ensuing year, but TVA's authority to construct plants and to issue revenue bonds for that purpose rests on its basic statute. If TVA should find that additional plants were required beyond those mentioned in the President's budget, it would have authority to begin construction of such plants, and would advise Congress of such action in connection with its next annual budget presentation.

3. Is there any limitation on the area in which TVA can now construct steam electric plants?

See answer to No. 4 below.

4. If the answer to item 3 is "Yes," what is such limitation?

The TVA Board is obligated to supply Power at the lowest possible cost to the area Which relies on TVA as its primary source of Power supply and thus is obligated to construct those generating plants which will accomplish that result. Congress elected to limit the area within which TVA power could be supplied but it recognized that any arbitrary limit on the area within which generating plants could be constructed would be inconsistent with the obligation imposed on the TVA Board to produce power at the lowest possible cost. The location of a generating plant can be selected only after a careful weighing of the various factors which determine its economic feasibility. Among the more important factors are availability of coal, transmission distance to the load centers where the power is needed, the availability of adequate water for cooling pur-Poses, and the availability of rail, water, and highway transportation.

5. Can TVA enter into contracts to purchase all or part of the power to be available from existing or new non-Federal power-plants outside the TVA area? If so, are there any geographical limitations as to the location of such plants and the area within which the power can be utilized?

The TVA Board is under a duty to operate the TVA power system as efficiently, and to keep costs as low, as possible. Accordingly, the controlling consideration in a decision

whether to purchase power from a non-Federal source, as in the location of a generating plant to be constructed by TVA itself and in a choice between purchase or construction, is whether the power to be obtained will be the most economical available from the standpoint of the TVA power system as a whole. Subject to this basic limitation, there is no arbitrary geographical restriction on the location either of TVA plants or of non-Federal plants from which power may be purchased. Utilization of power from both sources is subject to the geographical limitations set out in the answer to question 1 above.

6. What are some of the more important legal restrictions or congressional controls TVA believes it is released from by the exception (in sec. 15d(a) of the TVA Act as amended) that expenditures from bond profeeds "shall not be subject to the requirements or limitations of any other lew"?

ments or limitations of any other law"?

The basic purpose of the quoted provision is to enhance the marketability of the bonds by making clear to prospective purchasers that the limitations on the issuance of bonds are those specified in the act itself. It provides additional assurance that TVA's ability to begin construction of new generating capacity as and when needed is not dependent on the appropriation process. It also provides assurance that the flexibility given to TVA in the act will not be restricted inadvertently by statutes of general application.

7. Does TVA intend to set up a special account for bond proceeds that will not be reflected in the accounting under the requirements of the Government Corporation Control Act? Will TVA power receipts and their expenditure continue to be reported under the provisions of that act?

The Government Corporation Control Act contains no accounting requirements. TVA's bond proceeds and their expenditure will be reflected in TVA's budget presentations under the Government Corporation Control Act. TVA power receipts and their expenditure will also be reflected in TVA's budget presentations.

### REDUCTION IN TVA LOAD ESTIMATES

Question. It appears that your peakload for this winter of 1959-60 is nearly three-quarter million kilowatts below the estimate you made last year; is this correct? Will you explain why you were so far off from your estimate?

(The information requested follows:)

The estimate of last year for the winter of 1959-60 was 10,300,000 kilowatts. The actual peak demand for the winter was 9,641,-000 on March 1, 1960. The difference between the actual and estimate is 659,000 kilowatts. About 300,000 kilowatts of this difference results from less deliveries to Federal agencies, principally to AEC, than had been estimated. Also, the aluminum producers in this area did not operate four aluminum potlines and associated fabricating equipment which we anticipated to be in operation. That resulted in another 150,-000 kilowatts less load. The temperature at the time of our peak on March 1 was 22°, or about 8° warmer than the normal minimum during the winter season when the peak is expected to be established. At that time, wind velocity was higher than normal offsetting some of the warmer-than-normal temperature. The net effect of the weather, however, reduced the system load by at least another 200,000 kilowatts. The sum of these factors adds to 650,000 kilowatts, which almost exactly equals the difference between the estimated and actual demands.

Question. Why have you reduced all your future load estimates by about 800,000 kilowatts below those of last years? Would it have anything to do with the lack of a need

to show such a gloomy picture on requirements for future capacity additions, now that you have obtained authority to issue bonds?

(The requested information follows:)

From year to year the load forecasts are adjusted to reflect experience of trends and new developments. In the current estimates the expected demands of AEC on the TVA system were reduced about 600,000 kilowatts. About half of that reduction reflected the information that AEC would not be likely to operate at extended load, as it had in recent years; the rest of the reduction was made on the basis of discussions with AEC of their ability to take more power during part of the year and less during TVA's peak season of the year. Most of the other 200,000-kilowatt reduction was made to reflect later knowledge of industrial trends following the recession.

#### TVA SYSTEM CAPACITY

Question. Will you bring the tabulation on page 906 of the fiscal year 1960 hearings up to date as of December 31, 1959?

(The requested information follows:)

CAPACITY IN SERVICE DECEMBER 31, 1959

The following table divides the installed capacity among the categories named. It also gives a corresponding approximate breakdown of the estimated maximum capability at time of peak demand (before deducting necessary reserves); however, the total has more validity and significance than the components because the capabilities of individual plants or groups or plants are not independent of each other and because they are more highly variable than the total.

### [Kilowatts]

	Installed capacity	Approximate maximum capability at peak demand
Hydroplants: TVA	2, 742, 500	2, 553, 000
lea	425, 960 571, 000 7, 647, 250	405,000 474,000 8,264,000
Total	11, 386, 710	11, 696, 000

Question. Will you bring the tabulation on page 907 of the fiscal year 1960 hearings forward to show comparable information as of December 31, for each of the years 1960, 1961, 1962, 1963, and 1964?

(The requested information follows:)

Capacity of presently scheduled additions

[Kilowatts]

1.5	Intionanci						
	Scheduled installed capacity	Corresponding approximate maximum capability at peak demand (before deduct- ing reserves)					
Dec. 31, 1960	11, 910, 710 12, 072, 710 13, 269, 910 1 14, 441, 910 (*)	12, 213, 000 12, 375, 000 13, 575, 000 114, 750, 000 (7)					

<sup>&</sup>lt;sup>1</sup> Tentative (includes new eastern steam unit, Paradise unit 2, and Melton Hill units 1-2).

<sup>2</sup> Program for 1964 has not yet been determined.

### PEAK LOADS ON TVA SYSTEM

Question. Will you bring the tabulation on page 909 of the fiscal year 1960 hearings up to date by adding the figures for fiscal year 1960? It is noted that the Federal Power Commission reports the maximum peak for the TVA system for fiscal year 1960 so far was 9,586,000 kilowatts for January 1960. Has this peak been exceeded since that time?

(The information requested follows:)

TVA system loads at time of system peak, in thousands of kilowatts

Piscal year	Total for TVA area	Federal loads	Non- Federal loads	Memphis loads in- cluded in (3)
	(1)	(2)	(3)	(4)
1950 1951 1952 1952 1953 1955 1956 1956 1957 1958 1959 1969	2, 590 3, 000 3, 736 4, 240 5, 295 6, 952 8, 298 9, 239 9, 418 9, 702 9, 641	285 359 717 963 1, 409 2, 753 3, 597 3, 795 3, 437 3, 254 3, 276	2, 305 2, 641 3, 019 3, 277 3, 886 4, 199 4, 701 5, 444 - 5, 981 6, 448 6, 365	141 162 178 205 227 287 327 301 291 327

Note.—The load of 9,586,000 kilowatts for January 1900 was exceeded by a load of 9,641,000 kilowatts on Mar. 1, 1960.

Question. Will you furnish for the record a tabulation showing your peak load during each month of calendar year 1959 and of 1960 to date, with a breakdown of this to show Federal load, and non-Federal loads? Also show, if any, the peak delivery to Memphis included in the non-Federal loads.

(The tabulation requested follows:)

TVA system loads at time of system peak, in thousands of kilowatts

### ELECTRICITY FOR HOUSE HEATING

Question. Will you bring the tabulation on page 911 of the fiscal year 1960 hearings up to date by only including data for calendar years 1959 and 1960 to date?

(The information requested follows:)

Approximate electricity use for house heating in TVA area

Month and year	Energy, millions of kilowatt- hours	Thousands of kilowatts demand 1
1959-January	590	1, 680
February	420	1,360
March	370	1,050
April	130	660
May	20	380
June		
August		***************************************
September	***************	************
October	120	750
November	430	1,380
December	510	1, 240
1966-January	570	1,530
February	600	1,700

<sup>&</sup>lt;sup>1</sup> The effect of the house heating loads on the monthly system peak is usually less than the numbers shown because of diversity among these loads and other loads.

### DEFICIT OPERATION OF TVA DISTRIBUTORS

Question. We have often heard about how successful the operations have been in the TVA power area and how much greater usage the TVA area has in comparison with the balance of the Nation. In examining the TVA report on the operations of the TVA power distributors, I find a number of instances where the distributors are and have been operating at a deficit and have per customer power use below the national average. Many of these particular TVA distributors have been in operation for 15 or 20 years. In this connection, will you furnish, for

In this connection, will you furnish, for the record for each of the past 5 years, the number of distributors that have either operated in the red in any such year or had a deficit in accumulated net income in any of these years?

(The information requested follows:)

The number of TVA distributors who had either a deficit in accumulated net income during the fiscal years 1955-59 or whose operation during these same years produced a negative operating margin is shown below;

1955	16
1956	14
1957	11
1958	12
1959	9

Amortization collections by distributors are available for the payment of interest on long-term debt. The inclusion of these funds in the distributors' annual operating statement would revise the above figures to those shown below:

Piscal year:	
1956	
1957	
1958	
1959	

### Senator Murray's Address to American Chemical Society

EXTENSION OF REMARKS

### HON. MIKE MANSFIELD

OF MONTANA

IN THE SENATE OF THE UNITED STATES
Thursday, September 1, 1960

Mr. MANSFIELD. Mr. President, a symposium of the American Chemical Society opened with an address by our respected colleague, the senior Senator from Montana [Mr. MURRAY]. The symposium was a highly technical one, and Senator Murray was invited to open this scientific gathering in recognition of his encouragement of methods to reduce evaporation losses from reservoirs by using a chemical film just one molecule thick. For the past 4 years, Senator MURRAY, in association with the senior Senator from Arizona [Mr. HAYDEN] repeatedly urged the executive branch to take an active part in this imaginative program for conservation of the limited water resources of the Western States. Encouraging results of preliminary tests are now reported, and these give rise to hope of saving many hundreds of thousands of acre-feet of water each year.

In addressing the symposium, in addition to pointing up the urgent need for water resource development and conservation, Senator Murray brought to focus several other important aspects of the work of scientists such as those whom he was then addressing. One of these points is that in helping the United

States to conserve our scarce water supplies, scientists can also give valuable help to our allies of the free world, many of whom have extremely critical problems of water scarcity. Senator Murray pointed out also that international collaboration within the scientific sectors of the world gives hope that international collaboration on even broader fronts may lead to effective transformation of nuclear energy from a terrible engine of destruction into a mighty tool for improving the material prosperity and happiness of mankind.

Awareness of such possibilities, Senator Murray told the scientific audience, stimulates the younger scientists in the early stages of their professional careers. This, he suggested, might have significant results in attracting men to research work, and in overcoming unfortunate limitations in some of the applied

sciences.

These points have deep significance for all of us. I ask unanimous consent, therefore, that immediately following my remarks, there be printed the text of Senator Murray's address to the symposium of the American Chemical Society.

There being no objection, the address was ordered to be printed in the RECORD,

as follows:

Address to the American Chemical Society Symposium, New York City, by Hon. James E. Murray, U.S. Senator From Montana, Chairman, Committee on Interior and Insular Affairs

Mr. Chairman, members of the American Chemical Society, and fellow guests, it is a privilege to participate in this symposium sponsored by one of the Nation's most eminent learned societies. I am sensible, too, of the honor of your invitation to make the opening remarks to the meeting.

The program for this symposium deals with matters such as monolayer, energy barrier, surface tension, and like subjects that might seem far removed from the work of the U.S. Senate. Twenty-six years ago, when I first took my seat in the Senate, such subjects actually would have been foreign to legislative considerations, but there have been profound changes in national affairs during the past quarter of a century, and now many of my colleagues share my interest in your researches.

Ever since 1807 when it made its first inquiry into the possibilities for waterways development, the U.S. Senate has been deeply concerned with resource matters. This concern is, of course, most appropriate because development of natural resources for use by the people is the foundation on which this Nation builds its strength and the well-being of its citizens. Minerals, timber, soil fertility, and water are essential ingredients of the great industrial civilization in which we live and prosper.

Recognition of this principle guides the Senate Committee on Interior and Insular Affairs, of which I am privileged to be chairman, and it has led to authorization of major resource programs. In the field of water resources, I mention only the Missouri River Basin project and the Colorado River storage project as examples of many that are important to the entire Nation.

Resource development and conservation is the clearly expressed purpose of the American people and, now more than ever previously, it is essential to maintenance of the American way of life. Yet in pursuit of that purpose, we are progressively impeded by resource scarcities, especially so in the

case of water development programs. Virtually every water project that comes before the Senate for authorization is hedged about with complications arising from scarcity of the resource, and opportunities for beneficial developments are curtailed or frustrated by water supply limitations.

In this context, in 1957 evaporation losses and the possibilities for their reduction were reviewed for my committee in a special staff study undertaken at the suggestion of Senator CARL HAYDEN, of Arizona. This review was enlightening regarding the significance of evaporation. Its importance took on real meaning to those who have lived through destructive droughts, when we learned that evaporation from a stockwater pond often dissipates as much water as is used in a year by 500 head of cattle. It was shown that in the Western States, each year evaporation losses exceed the aggregate capacity of half a dozen of our major conservation reservoirs, while for the United States as a whole, evaporation from lakes and streams exceeds the total use of water by all the cities and towns of the Nation.

The staff report summarized the initial results of the experiments with evaporation suppressants already started in the United States, Australia, and several other countries. On the basis of this information, the Senate responded generously to Senator HAYDEN's and my recommendations that funds be appropriated to the Department of the Interior for evaporation control work. Just within recent weeks, Congress provided a substantial expansion of those studies and tests. The reasons for this interest and support warrant review here because they concern you both as scientists and citizens.

The charter of the American Chemical Society issued pursuant to a special act of Congress includes among its objectives "by its meetings, professional contacts, reports, papers, discussions, and publications, to promote scientific interest and inquiry; thereby \* \* \* fostering public welfare and education, aiding the development of our terial prosperity and happiness of our people."

These are public purposes of great present significance, and this symposium furthers them in important ways. For one thing, there is its direct and very practical relation to our scarce water supplies. is a matter of increasing urgency to our en-tire economy, as I shall outline rather broadly in a moment. There is also a sec-ond significant aspect of this symposium, that is, its relation to the national and international climate of contemporary life. Although perhaps less commonly recog-nized, this aspect is also of great concern to you as scientists and as citizens,

Your studies of methods for reducing evaporation losses, along with other resource conservation research, are of prime importance to the Nation. In the field of natural resources, the United States no longer enjoys assurance of abundance-actually, for many resources we now are a have-not Nation. This has been recognized for some time with respect to mineral resources on which the past half-century's industrial development and two World Wars have made such prodigious demands. Now, it is apparent that we also face water shortages. These water shortages limit our living limit our production, curtail our living limit our health, and unstandards, jeopardize our health, and undermine national security.

As I have just indicated, awareness of this impending water crisis has come to sharp focus in connection with the congressional responsibilities for water resource development. This led my fellow Montana Senator, MICHAEL J. MANSFIELD, in association with me, to sponsor establishment of a special Senate review of the entire water resource situation, and under the chairmanship of Senator Robert S. Kerr, of Oklahoma, this inquiry has brought together highly significant facts about water supplies and requirements. Because some of these facts bear directly on this discussion, in the following remarks I shall use data from the committee reports.

The United States is entering a period of enormous growh that will require twice as much water as we now use. By 1980, we must expect at least 250 million people in this country instead of the present population of about 180 million. The gross national product by then should be in excess of trillion per year or twice its present size, and industrial production should be about three times its present level. As these levels are attained, the United States will grow in strength, prosperity, and well-being.

However, one important requirement for this future growth is adequate quantities of good quality water. Without an abundant supply of good quality water, agriculture and industry would be vastly less efficient, and without abundant good water, contemporary metropolitan life would be vastly uncomfortable. The need for water, experts in this field inform us, will grow from the present level of 250 billion gallons per day to about

600 billion gallons per day by 1980.

But we are already using all the water that is readily available and fit to use. At present, there is virtually no usable water to supply the new requirements that are essential to our growth.

Our basic supply of water is, in the main, fixed by inelastic factors of precipitation and runoff. To avoid the national deterioration that would be the consequence of water deficiencies, the United States must energize a comprehensive program to use more effectively all of the water resources that we

You scientists in this symposium have an important role in that task, and this is why Senators and other laymen await with keen interest the results of technical meetings such as this one

Let me illustrate this with an example that has immediate relevance to this symposium. One feature of the needed water development program is a great increase in storage reservoirs to conserve the river flows that now are only partially used before they discharge into the oceans. Preliminary data that we may need to more than double the present aggregate capacity of all existing reservoirs in this country-that is, to increase from the present 275 million acre-feet of reservoir capacity to almost 600 million acre-feet, possibly even more.

I need hardly point out to this group how such an increase in reservoir capacity will affect losses from evaporation. Greatly increased losses must be anticipated, particularly in view of the fact that as we proceed with construction of more reservoirs, future sites in general will be less favorable in the relation of storage capacity to the surface area exposed to evaporation. Conversely, practical methods for reducing evaporation losses can significantly reduce the requirements for storage capacity. This is true even in humid sections of the country, and it has key importance in the drier western

This relationship to regional development is of deep concern because of the national interest in a balanced economy. Where increased water use is most critical, evaporation takes a costly toll of the limited water supplies and, therefore, it has especially great impact on the growth potential of the Western States. In the next 40 years, these growth potentials are expected to result in the population of the Western States being 21/2 times its present size, and this in turn will require full development of western water resources. Let me put it in the specific terms of some of the preliminary studies.

On the Colorado River, for example, it appears that at least 14 million acre-feet of additional reservoir storage will be needed to conserve the flood flows that are now only partially used, and on the upper Missouri River the estimate is that an additional 30 million acre-feet of storage will be needed. Evaporation from existing reservoirs on each of these two rivers already exceeds 1 million acre-feet a year and this will, of course, be increased greatly by the additional storage. Although the reservoirs will be essential, the evaporation loss is a very high price to pay because present calculations show that by 1980 there will hardly be enough water in those river basins for consumptive uses and sewage dilution. These examples demonstrate with great emphasis that practical methods of evaporation control can be of great significance to the potential economic and population growth.

same considerations also have great significance in many foreign countries. In fact, a preponderance of the underdeveloped areas of the world have hydrological conditions much like those of our Western States, and water scarcity likewise limits their opportunities for improved economic and living

conditions.

Evaporation control work is notable for its international character, its progress literally circling the globe. Your work developed from the research of the great British scientist, Sir Eric Rideal, then crossed the Atlantic to advance here in America under your distinguished chairman, Prof. Victor K. LaMer, and again spanning an ocean, it now also numbers among its leaders Mr. Mansfield and his associates in Australia, and includes workers in several other countries as well.

It is encouraging to observe that evaporation control work is broadly based and that it enlists members of university faculties, the personnel of government agencies, of private research foundations, and of commercial industries. Your group includes chemists, physicists, biologists, and engi-neers. This broad spectrum of collaboration assures cross-fertilization of ideas and supplies continuing productive stimulus. The merit of wide collaboration is emphasized throughout the Senate consideration of evaporation work beginning with the 1958 report.

Here I will digress somewhat to commend to your consideration the opportunities for contributing to important purposes tangential to the immediate research in which you may be engaged. I speak first of the development of scientific personnel. We hear often of the lack of well-trained men in some research fields, and the dearth of creative and imaginative thinking in the fields of applied science. Perhaps one reason for this may be that the younger scientists in the early stages of their career are not aware of the broad implications that their work can have.

I like to hope that evaporation control and other resource conservation research will attract these younger men, open new perspectives to them, and be a means for strengthening our resources of trained scientific manpower. In furtherance of this, it is gratifying that there are a number of research contracts between the Bureau of Reclamation and various colleges and universities, and that this collaboration received express approval of the Congress this year in providing increased funds for evaporation studies. It is particularly gratifying that the cooperative program with the State college in my State of Montana is especially well suited for training research men.

Would it not be desirable to make professional training in this broad sense of the term a continuing feature of cooperative research contracts and, in connection with that, to provide collaborating scientists access to the ideas and information revealing

the significance of their field of work? Younger scientists, I am certain, are responsive to this, and I am confident also that the enhanced satisfaction in their work will fully

repay the effort.

A little earlier I touched on the international character of evaporation control work, and I wish to explore this somewhat more. The internationalism of your scientific work gives you special qualifications to focus the advances that you make in technical problems so that they also will be advances in the problems of world peace. In the formation of the United Nations Educational, Scientific, and Cultural Organization, at which I had the honor to represent the United States, science was recognized to be a major factor in achieving the purposes of the United Nations Charter from which I quote the initial words:

We, the peoples of the United Nations, determined to save succeeding generations from the scourge of war, which twice in our lifetime has brought untold sorrow to mankind, and to reaffirm faith in fundamental human rights, in the dignity and worth of

the human person." Now, when the hungry two-thirds of the

world seethes with violence that threatens the institutions of freedom, I recall to you the words of a great contemporary American who warned that "A hungry man is not a freeman."

We have a deep concern with the water supply problems of Asia, Africa, and Latin America. Water is needed there to set men free from want, and time is short. All of us are joined in the race against time to guide the force of men's aspirations from violence into constructive channels that will provide the material basis for freedom.

Perhaps your scientific work can provide methods for immediate improvement of water supplies in underdeveloped countries. In the light of our own experiences when droughts dried up the West, it seems to me control of evaporation losses from existing impoundments, even quite small ones, should be significant in bettering living conditions in arid regions.

In concluding, I will express one further hope and conviction regarding science in the modern world. In his last inaugural address, Franklin D. Roosevelt stated for us the

grave lesson of this century—he said:
"We have learned that we cannot live alone, at peace; that our well-being is dependent on the well-being of other nations,

The middle years of the 20th century are darkened by the terrifying shadow of the atomic cloud—terrifying because we have not yet learned how to work together so that its destructiveness will be transformed to beneficial and productive purposes. It is enormously encouraging to observe the wide collaboration and the spontaneous internationalism of scientists engaged in work such as yours on evaporation control. The international community of technical workers at today's meeting gives renewed confidence in men's ability to work together and in the words of your charter, "add to the material prosperity and happiness of our people." I am grateful for the opportunity to further this effort, and I wish you continuing success in all its aspects.

Hon. Henry A. Dixon

SPEECH

### HON, EDWARD H. REES

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 30, 1960

Mr. REES of Kansas. Mr. Speaker, before leaving the House of Representa-

tives, I want to join with my other colleagues in paying respects to a distinguished American who is retiring from Congress this year.

The Honorable HENRY A. DIXON is one of the finest characters I have known. He is an educator. He is a scholar. He ranks high as a legislator. Dr. Dixon has contributed much to legislation during the time he has been in Congress. His views and his influence have meant much to other Members. The Congress and the country are better because of the services of Dr. HENRY A. DIXON.

"Early Bird" Reinhardt N. Ausmus, Pioneer of Aviation History-Built His First Plane During Years 1910-12

> EXTENSION OF REMARKS OF

# HON. A. D. BAUMHART, JR.

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. BAUMHART. Mr. Speaker, under leave to extend my remarks in the RECORD, I would like to bring to the public's attention a constituent of mine, Mr. Reinhardt N. Ausmus, who at the present time is Erie County veterans' service officer, located in the courthouse, Sandusky, Ohio.

Mr. Ausmus was raised in an orphan-When he was released from the home at the age of 14, he had no home or job, and it was at this time that he decided to build an airplane. He designed and built his first plane, which took him 2 years, from 1910 to 1912. He flew it in 1912.

At the age of 19, Mr. Ausmus got a job as an instructor and designer at the old Benoist Aeroplane Co. in Sandusky, Ohio. Mr. Ausmus joined the aviation section of the Army Signal Corps, which later was to become the Air Force in the early days of World War I. Being only 20 years of age he was one of the youngest fully trained and experienced aviators in the Army. During the war he suffered injuries which made it necessary for him to give up piloting and which confined him in hospitals for various periods during the next 17 years.

Flying the plane in 1912 qualified Mr. Ausmus to become an Early Bird, an organization of men who piloted heavierthan-air planes before December 17,

While he has not been able to follow his first occupational choice, he has proceeded to collect records and other exhibits of the early days of aviation, particularly those concerning the early manufacture of planes in Sandusky, Ohio. These have in some cases been so rare that officials of the Smithsonian Institution have consulted with him on several occasions, and in at least one instance changed the official records because of information in his collection.

While in a Government hospital he resolved that if he were ever able to work he would give his time to helping other veterans as he had been helped.

With this aim he accepted a position as Erie County veterans' service officer.

Mr. Ausmus' story has been featured by articles and pictures in many of the prominent daily newspapers of my congressional district. To name a few: Sandusky Register, Sandusky, Ohio; Chronicle-Telegram, Elyria, Ohio; and the Blade, Toledo, Ohio.

In 1958 the Sandusky Chamber of Commerce presented him with a plaque for his outstanding contributions as a

pioneer of aviation history.

Stands Taken by Members of the National Federation of Independent Business on National Issues

EXTENSION OF REMARKS

OF

# HON. HARRIS B. McDOWELL, JR.

OF DELAWARE

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. McDOWELL. Mr. Speaker, the National Federation of Independent Business, the Nation's leading small business organization, regularly polls its members on important issues before the

Members of the Congress have come to rely on these polls, because of the completely fair way in which they are conducted, and know that they give a ready index of what many small business and professional men in every State of the Union are thinking. These polls reach several times as many people as Dr. Gallup does in his better-known surveys.

Recently the distinguished Senator from Tennessee, ALBERT GORE, told his colleagues in the Senate that:

Insofar as accuracy in depiction or prediction of the way the mass of our people will vote in a national election is concerned. I consider most of the political polls, including the Gallup poll, as almost meaningless and in many instances misleading. This conclusion is the result of considerable observation and study over a period of 6

It is significant, I think, that no one has questioned the honesty and accuracy of the polls made by the National Federation of Independent Business though the honesty and accuracy of polls made by other organizations has been ques-

I include here a letter I have received from George J. Burger, vice president of the National Federation of Independent Business, together with a report on the stands taken by members of this great organization in ballots sent to Members of the Congress in the course of the polls it has taken in recent months:

NATIONAL FEDERATION OF INDEPENDENT BUSINESS. Burlingame, Calif., August 29, 1960. Hon. HARRIS B. McDowell, Jr. House Office Building,

Washington, D.C. DEAR CONGRESSMAN McDowell: It was a pleasure again to renew my acquaintanceship with you during your tenure as a member of the Democratic platform committee in Los Angeles just recently.

Then again it was an exceptional pleasure the second time to note your activity coming out of the executive committee meeting of the platform committee in Los Angeles.

You recall in my appearance in behalf of the federation I requested the privilege to file with the committee my long statement covering the expressed view of the nation-wide membership of the federation comprised of approximately 160,000 independent business and professional men members—all voting members. So the action taken by me is in keeping with the expressed nationwide poll of these members, and not the opinion of any officer of the federation.

The committee extended to the writer and all other witnesses ample time to present a brief summary which I did, and I believe it would be of great interest to you and to all Members of Congress to note from the long statement: "Stand Taken by the Members of the National Federation of Independent Business on Legislative and Economic Problems." And the argument for and against the proposition is presented to the members and the federation holding to strict neutrality. Then it is up to the members to vote the ballot and send it in to the respective Members of Congress.

We are not unmindful of your consistent help to small business each and every time we have requested your cooperation and again we are making a similar request if you can find it convenient to have the attached, with the accompanying letter, inserted in the Appendix of the RECORD.

Thanking you for your cooperation and with best regards.

Sincerely,

GEORGE J. BURGER. Vice President.

STANDS TAKEN BY MEMBERS OF THE NATIONAL FEDERATION OF INDEPENDENT BUSINESS ON NATIONAL ISSUES IN BALLOTS SENT TO THEIR CONGRESSMEN IN THE COURSE OF NATIONAL MANDATE OPINION POLLS

### APPENDIX A: ANTITRUST

Provide consistent, effective enforcement of all antitrust laws.

Staff antitrust agencies with competent personnel, and grant agencies all appropriations needed for a forceful, consistent, effective enforcement program.

Grant Justice Department (or Federal Trade Commission as may be the case) with antitrust jurisdiction over both cooperativetype organizations and labor unions.

Require manufacturers who sell through factory-owned stores and independent dealers to put their independent dealers on the same buying price basis as their factoryowned stores.

Strengthen maximum antitrust penalties by permitting our courts to suspend from executive positions, for at least a year, officials of firms which repeatedly violate the antitrust laws and injure competitors.

Strengthen maximum antitrust penalties by permitting courts to fine business executives up to double their salaries for the period of antitrust violations they promote.

Provide assured tenure of office for the U.S. Assistant Attorney General in charge of Justice Department Antitrust Division, extending up to periods of 8 years.

Require large businesses which plan mergers to give Federal antitrust agencies advance notice of their planning.

Assist smaller businesses in private antitrust actions by providing that when they can go to court, show cause for complaint, and initiate damage suits, Government will pay court and attorney costs.

Require chainstore systems to absorb losses on their unprofitable outlets from net earnings after taxes have been paid on those of their outlets which have operated at a profit. Require manufacturers to publicize fully all their discounts and to offer them equally to all their retailers.

Compel tire manufacturers to stop operating factory-owned retail outlets in competition with their independently owned and operated distributors.

Further protect independent businessmen in their rights to buy whatever goods they want to handle in their places of business, without pressure from their suppliers.

Compel oil companies to lease or sell to independent operators all their companyowned retail service stations.

Permit Government to go into court to help independent businessmen collect damages when their businesses are injured by monopolistic practices.

Make it illegal for anyone to sell at unreasonably low prices which would destroy competitors.

Make it unlawful for anyone to sell goods below cost for the purpose of eliminating competitors.

Make it possible for businessmen to use the Robinson-Patman Act in private suits for damages due to unfair price competition.

Require Government retail outlets, such as PX's and ships stores, to pay the same prices for their merchandise as their independent business competitors are compelled to pay.

Prohibit retail food stores from operating food manufacturing or processing plants.

Prohibit giant meatpackers from operating retail meat, poultry, and dairy outlets.

Enact strongest possible fair trade laws.;
APPENDIX B: SMALL BUSINESS REPRESENTATION

Raise House Small Business Committee from its current temporary status to the status of a standing committee, with full power to report legislation directly to the floor.

Raise Senate Small Business Committee from its current semistanding committee status to that of a full standing committee, with power to report legislation directly to the floor.

President appoint a Secretary of Small Business as a regular member of his Cabinet. Make the Small Business Administration a completely independent executive branch agency.

Require the President to appoint a small business representative to the Federal Reserve Board, the agency that helps shape the money and lending policies of our banking system.

### APPENDIX C-1: TAXATION

Create a special independent commission (like the Hoover Commission)- to study how tax laws affect small business and promote monopoly, to report findings and recommendations for action to the Congress.

Reduce taxes on smaller corporations by imposing a 22-percent rate on the first \$25,000, and a 30-percent rate on all earnings above that figure.

Allow businessmen to take the same fast tax chargeoffs on purchases of used equipment as they are permitted to take on new

Reduce taxes on small growing corporations and raise them on giant corporations.

Permit all businessmen to deduct from taxable income the first \$1,000 of business earnings spent in any one year on expansions or improvements.

Permit businessmen to deduct up to \$30,000 in any one year from taxable income, to cover increased costs due to business expansions or improvements, expansions in accounts collectible, and expansions in inventories

Permit businessmen to take out non-taxable life insurance policies, payable to the U.S. Government, to anticipate and cover their estate taxes.

Prohibit tax collectors from including good will in figuring the value of an estate for tax purposes.

Permit business and professional people whose incomes vary widely from year to year, to use a 5-year average in figuring their taxable income.

Allow unincorporated businessmen the option, when figuring their tax returns, of either taking a flat standard deduction from gross business income for operating expenses or itemizing their deductions as at present.

Make it a criminal offense for any Federal employee to make illegal threats against any citizen for the purpose of collecting taxes. Compel Federal tax collectors to stay with-

in the latest rulings that have been handed down by the U.S. courts on tax cases.

Provide a flat 10 percent in taxes on unincorporated businesses.

Refuse to entertain any proposals to replace present excise taxes with a flat 5 percent manufacturers' sales tax, with manufacturers licensed by Federal Government as a control measure.

Allow businesses to deduct from taxable income all payments they make on behalf of employees into the social security program.

### APPENDIX C-2

### (a) Cooperatives

Compel cooperatives to pay full Federal income taxes on all their earnings before they deduct anything for patronage refunds or dividends.

Compel cooperatives to pay full Federal income taxes on all dividends and refunds allocated on their books to members, but not actually paid out in cash.

Compel cooperatives to pay patronage refunds in cash or by interest bearing notes to members each year, and to pay taxes like all other businesses on all remaining earnings.

Enact a 20 percent withholding tax on refunds or dividends declared by cooperatives.

### (b) Government competition

Grant the President power to issue rules and regulations under which his top aides may recommend elimination or curtailment of Government competition with private business.

Amend the Constitution to prohibit the Government from engaging in business in competition with its citizens.

Authorize the U.S. Comptroller General to survey military commissaries and post exchanges to determine if their operations are legal and helpful to servicemen, and how much taxes are lost because these outlets aren't privately operated.

Require military commissaries and post exchanges to charge prices which will enable them to pay their own way, figuring costs the same way business does.

Congress permit Government civilian agencies to close down all of their business-type operations they desire, as they see fit.

# (c) Reduction-control of Government spending

Enact 25 percent reduction, across-theboard, in subsidies paid to big farmers and big businessmen.

Provide that Federal spending may not exceed Federal revenues, except in time of war or grave national emergency.

Permit the President to veto particular items in general money bills without having to veto the entire measures.

Require Government to set aside the first 1 percent of tax receipts each year for payment against the national debt.

Centralize surplus property control and disposal under the General Services Administration.

Close all loopholes in laws which require Government agencies to offer surplus property to other Federal agencies before selling it to the public at cut prices.

Hoover Commission recommendation to create a single Federal agency to do all the buying, storing, and distribution of goods for all three military services.

### (d) Paperwork burdens

Reduce the number of employee wage reports which employers must furnish Government yearly on social security and tax withholdings.

Protect businessmen from threat of penaltles for refusing to answer Federal census questionnaires about their business operations.

### (e) Foreign aid

Enact no further increases in foreign aid spending, in fact taper it off.

Limit foreign aid to military assistance

Prohibit our Government from extending further foreign aid to countries which have incurred debts with us but who have stopped payment on those debts.

Limit foreign aid to only those countries which are lined up with us in the cold war against Communist dominated countries.

Prohibit extension of further foreign aid to countries which reduce their internal taxes.

### APPENDIX D-1: LABOR

Repeal exemptions labor unions have from the antitrust laws.

Require employees of a struck business to do their own picketing.

Prohibit labor unions from conspiring to force uniform national wage rates on employers regardless of their location.

Require labor unions to bargain with businesses on an individual store by store, plant by plant, local basis.

Prohibit unions from requiring businessmen to hire more employees than are needed actually to do a job.

Permit the U.S. courts to prohibit strikes which threaten the national interest and public welfare.

Maintain the current ban against secondary boycotts in the construction industry.

Do not permit the U.S. Labor Department to initiate, on its own and without consulting with affected employees, suits for back wages due employees under the Federal wage-hour law.

Maintain present exemptions for small businesses from Federal wage-and-hour law controls; do not further increase mandatory Federal minimium wages; do not further reduce the maximum workweek (before overtime) from the present 40 hours to any lower figure.

Require a Government-supervised secret strike vote before unions can call a strike against any business.

Prohibit the picketing of any firm unless authorized by at least one-third of the group being organized.

Put teeth in the National Labor Relations Act provisions which permit businesses to sue unions for breach of contract in labor agreements.

Enact no changes in current National Labor Relations Act provisions which permit the States to decide for themselves whether to permit closed-shop agreements between management and unions within their borders.

Prohibit labor unions from engaging in nationwide boycotts of the merchandise of firms which refuse to comply with their demands.

### APPENDIX D-2: SOCIAL WELFARE

Avoid any program that will involve any increase in taxes to pay for hospitalization of persons drawing down social security benefits.

Permit social security pensioners to earn \$1,800 a year and still receive their Govern-

ment benefits, instead of the \$1,200 presently allowed.

Avoid any program which will involve furnishing tax-supported medical care programs for our people (outside the social security system).

Do not further expand on the wage base for social security tax payments.

### APPENDIX E: POREIGN COMPETITION

Avoid any increase in executive branch powers to reduce tariff walls.

Permit Government to put a limit on the amount of foreign produced goods which can be brought into the United States, when their sales are injuring American industry and workers.

Adjust tariffs to protect American businesses from the price advantages foreign producers may gain over them from low wage costs.

# APPENDIX F: GASOLINE (HIGHWAY) -- POSTAL RATE ISSUES

Avoid all further increases in first-class mail rates and airmail rates,

Require all large national magazines (second-class mail users) to pay their full share of post office mailing costs, the same as users of first-class mail are required to do.

Require Government to look to other sources than the gasoline excise tax in securing funds needed for roadbuilding programs.

Permit Government to make 3-percent, 10year loans to businessmen who are forced to move to new locations by Federal-State highway construction programs and urban redevelopment programs.

### APPENDIX G: FEDERAL-STATE RELATIONS

Prohibit Federal courts from permitting Federal laws to override State laws unless Congress specifically directs this in its underlying legislation

derlying legislation.

Prohibit the States from taxing the interstate commerce income of out-of-State firms (foregoing is now law).

Maintain the authority of the States to permit or deny union shop agreements between labor and management, within their borders.

Permit the States to write and enforce their own regulations on strikes, picketing, boycotts and lockouts, provided they do not permit anything forbidden by Federal labor law.

Permit the States to maintain their unemployment compensation systems as they are now able, without any further interference from the Federal Government.

# The Forgotten Men: Veterans of World War I

EXTENSION OF REMARKS

### HON. MORGAN M. MOULDER

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES
Thursday, September 1, 1960

Mr. MOULDER. Mr. Speaker, several months ago I introduced H.R. 7405, to amend chapter 15 of title 38, United States Code, to provide a pension of \$100 per month to World War I veterans.

The veterans of World War I are, indeed, a special and unique group. They have not been treated on a par, in terms of veterans' benefits, with the veterans of other wars. There is a debt owing to the veterans of World War I based on the fact that this Government has shown greater and wiser concern for the veter-

ans of World War II and of the Korean war. There was no GI bill of rights for the veterans of World War I as there was for the veterans of the other two recent wars.

Mr. Speaker, the veterans who went soldering in World War I lost a definite value out of his life and his career. This he was never permitted to retrieve, as the other and later veterans were permitted to retrieve through the GI bill of rights. World War I veterans got some benefits to be sure, but nothing in proportion to what the country gave the others. My proposed pension of \$100 a month only corrects that inequality. Since it only corrects the inequality it does not create any dangerous precedent.

Mr. Speaker, the very justice of the World War I veterans' case should make it publicly acceptable and I believe the people of the United States generally would approve it. Moreover, the statistics from an actuarial standpoint show that such a pension is sound fiscally and far from a burden to the Federal budget in relation to the results it would produce. There are approximately 2,600,000 World War I veterans. The cost of the program therefore in the first year would come to about \$1.8 billion. This would be gradually but consistently reduced since the average age of World War I veterans is now 65.7 years. For example, some 9,000 World War I veterans died last month. For the second year the program would come, according to estimates from the Veterans' Bureau, to something less than \$1.78 billion. The third year it would be less even than \$1.7 billion, and so on. The sum is formidable to be sure. But it is not by any means an unsurmountable problem in a nation with a gross national product now rapidly climbing to \$500 billion annually.

Mr. Speaker, veterans' pensions would be spent for the necessities of life. They will serve as an effective builder of morale by aiding in preserving the self-respect and pardonable pride of veterans who served their country with honor in a national emergency and who, it is understandable, have a natural reluctance against becoming objects of public charity in their declining years.

In theory, Congress has always considered the pension rate as an adjunct to income rather than as supporting income. In this connection, however, many World War I veterans because of advanced age and disability have no other income to support them.

Mr. Speaker, if our Federal Government can afford to spend and give away billions of dollars every year to foreign countries, some of which is used to pension their veterans, then why can we not pension our own soldiers of World War I? I shall continue my fight to secure action on my bill to provide a pension for these veterans.

Mr. Speaker, never must we forget the defenders of our country, of our faiths, and of our institutions. I cannot think of them without sentimentality, or without remembering the words of the poet, Carl Sandburg:

The strong men keep coming on. They go down, shot, sick, broken. They live on fighting, singing, lucky as

plungers

The strong mothers pulling them on. The strong mothers pulling them from a

dark sea, a great prairie, a long moun-

Call hallelujah, call amen, call deep thanks. The strong men keep coming on.

# Employment of the Physically Handicapped

EXTENSION OF REMARKS

# HON. FRANK J. BECKER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES Thursday, September 1, 1960

Mr. BECKER. Mr. Speaker, the long and distinguished history of help to the physically handicapped that has characterized Mr. John S. Woodbridge is well known to myself and the people in my district who work for or live with employees of Pan American World Airways.

Mr. Woodbridge is comptroller for Pan American and in that capacity he has been able to employ more than 500 physically handicapped persons. This is a remarkable achievement and it proves that, given proper encouragement and instruction, physically handicapped people can do just as good a job as their more fortunate brethren in the precise field of statistics and accounting.

Mr. Speaker, Mr. Woodbridge recently delivered a most important talk before the Governor's Committee on Employment of the Handicapped in Harrisburg, Pa. This was the eighth annual conference of this committee and Mr. Woodbridge was the principal speaker. I have read the remarks of this fine and humane individual and I strongly urge that every Member of this body do likewise. Under leave to revise and extend my remarks, I include Mr. Woodbridge's speech in the Appendix of the RECORD:

This spring, the President's Committee on Employment of the Physically Handicapped conferred upon our company its "citation for meritorious service, in appreciation for exceptional contributions in furthering the employment of the physically handicapped." Our acceptance response may well set the stage as the introduction to our basic topic here and, with your indulgence, I will repeat it:

Five hundred physically handicapped people work for Pan American, in our airline divisions throughout the world, in our division operating the guided missiles range from Cape Canaveral, and in our general

"We like these men and women. We like the way they work and their relations with their fellow workers. We like their will and their determination to minimize their physical afflictions while maximizing their mental and spiritual capabilities.

"These people do not want special favors nor do they seek sympathy. What they want is the privilege of leading normal, uncomplicated lives like those better endowed physically. They are not sorrowful people nor do they complain, but are stout and cheerful citizens of whom we are proud.

"Employers throughout the land can well afford to become better acquainted with this source of willing talent, for they will be rewarded by the results. Since continuity of employee service is one of the great aims of American industry, and since stability of employ is sought by the handicapped, joining of these desires helps to further our economy and to make for a better world.

"So on behalf of employers in general and of Pan American World Airways in particular, I accept with all humility this citation for meritorious service, a token of recognition of what the business world is doing and must continue to do at an ever-accelerating pace, of mutual benefit to the physically handicapped, to American industry, and to our noble United States of America.

Ten years ago, my very good friend and fellow officer, Jimmy McGuire, becoming desperate for lack of clerical help in his accounting department, requested authority to employ physically handicapped workers to fill the employment gap, thereby reaching into this hitherto little-used source of talent. Permission was granted, skeptically and for a minimum roster, the feeling being that office morale would become too depressed through such intimate daily contact with those less fortunate physically. Parenthetically, it was not generally known that Jimmy's little daughter, Patty, had been stricken with poliomyelitis just a few months before; happily, she is now almost restored to a normal life, and cheerful as a cricket. This may well have aided in inspiring Jimmy in his request.

These men fitted quietly into the slots, and their fellow workers, becoming accustomed to seeing handicapped people in public, soon ceased to stare and accepted them face value, thus opening the gates to further introduction of this type of worker. No other policy or procedure for placement of the handicapped has ever been promulgated by our company, they being considered by our several personnel departments as being no different from others volunteering for work, coming and going in the same fashion as other employees

We feel that much credit for this attitude goes directly to these workers, who do not rail at society or at industry for their misfortunes, but who unobtrusively demonstrate that there is no practical need to discriminate against them. In general, a disabled person makes a good employee, and frequently a superior employee. Mother Nature seems to have a way of compensating structural failure with additional mental ability. Further, these employees generally are steady workers, not prone to frequent change of job nor to chronic absenteeism

but desirous of continuity of employ.
Employment of the disabled is thus not a one-way street, beneficial only to the employee, but is also valuable to those employers who have become aware of this excellent source of talent.

We have found that dramatic and continuing stimulus to the employment of the handicapped has been the creation and activation of skilled athletic teams drawn from these people; their public and colorful presentation of interesting and newsworthy events has aided immeasurably in public acceptance of the handicapped. I want to give you Pan American's case history; its message, which I feel will be a tangible contribution to your eighth annual Governor's conference, could well be the turning-point in the posture of prospective employers and employees insofar as this employment area is concerned.

Six years ago, having casually been in the audience at the semifinal match of the National Wheelchair Basketball Association tournament, I found to my astonishment that four players of the Brooklyn Whirlaways

and four of the Queens Charloteers worked in my department. As an enthralled opportunist, I invited these eight stalwarts to form the nucleus of a company team, which we named the "Pan Am Jets" and to which we supplied racing wheelchairs and attractive uniforms. Constantly practicing, during evenings and on weekends, these and other handicapped company employees acquired such coordinated skill and national renown that the team was invited to represent the United States of America at its first participation in the Paralympics, the international Olympic games for paraplegics. True to form, they emerged victorious over teams of some 30 other nations, with tremendous enthusiasm by all concerned, coupled with wellmannered sobriety on the part of the con-

These paralympics also embrace swimming, javelin and discus throwing, archery and fencing, billiards and darts, our people performing mightly year after year and win-ning the plaudits and hearts of the tens of thousands of spectators, thus acting as ambassadors of good will for our country

Throughout the continuing fanfare, office morale has never been better, our wheelchair athletes spreading remarkably good humor. Shortly after the team had become seasoned, the Brotherhood of Railway Clerks took up the theme and, through its official publication, the Railway Clerk, broadcast the story of its members' prowess to its entire membership. The issue of May 1, 1955, going to some 400,000 subscribers, contained this message:

"Eleven agile BRC members of Global Wings Local 3003, New York, N.Y., all employed by Pan American World Airways Inc., are undefeated in the Eastern Wheelchair Basketball League and have now cinched the Eastern Wheelchair championship title.

"These fellow can loop baskets with the best of them, except that they do it from wheelchairs. They are all members of the Pan Am Jets, sponsored by Pan American World Airways.

"Wheelchair basketball began in the Veterans' Administration hospitals immediately after World War II. It quickly spread across the country and, at present, there are 24 teams in the United States and the game is played in 15 other countries. Am Jets are unique because they are the first team to be composed solely of employees of the sponsoring company."

The publication goes on to say:

"Every game convinces the spectators and officials of many companies that if these men can play wheelchair basketball so effectively, surely they can 'play' wheelchair bookkeeping, bench assembly, watch repair, machine op erating, and many other kinds of useful

"It is worth mentioning that very few changes have been made in regular basketball rules as a concession to the fact that this game is played in wheelchairs. Thrills and excitement are as high or higher than any other competitive sports.

"These men, who are members of the team, by their courage and ability to compete in strong competition, are an inspiration to all handicapped and nonhandicapped, to do a job well. Our brotherhood is proud to number such people among its members.

Good fortune continued to follow our team, enhanced by the addition to its roster of a coach of renown, Junius Kellogg, of Harlem Globetrotters fame. Junius had suffered a tragic automobile accident several years before while touring with that sensational team of Negro players; driving to an exhibition game in Arkansas, his car blew a tire and overturned. It was 5 days later before he woke up in the hospital, his 6-foot-10 body smashed apparently beyond repair. His neck was broken, his spinal cord severely injured. When he finally regained consciousness, he found himself a quadriplegic, all four limbs inert, destined to remain in a hospital bed for the rest of his life. This apathetic young casualty was wheedled into coming to a wheelchair basketball game one evening by our Tommy Ford, who has given unstintedly and generously of his own time in furthering these company athletics; Junius was electrified and enchanted with what he saw. "My heart was in the hoop all evening," he remarked, and there it has been since that time. Junius is now a full-fledged and respected employee of Pan American World Airways, drives his own car, is married. Although confined to his wheelchair, he has risen above his infirmity and is a constant inspiration to those around him.

In 1957, my very good friends Argemiro Machado and Cesar Pires de Mello, senior officials of our associated airline, Panair do Brasil, invited our squad to Brazil to help sponsor rehabilitation drives being started for the disabled in Rio de Janeiro and in Sao Paulo. No opponent teams then existing in Brazil, we broke off a separate team from our squad, naming it the "Jatos da Panair," its players wearing the yellow and green of Brazil and being christened with Brazilian sports nicknames. The trip was a huge success, the 15,000-seat stadium in Rio de Janeiro and the 25,000-seat stadium in Sao Paulo being filled to overflowing, with at least 200,000 other spectators observing the games on television. Let me illustrate the atmosphere generated on this trip by quoting from reminiscences of the team as compiled by Tommy Ford and Junius Kellogg, who took the team to Brazil:

"Among the members of the Brazilian Association of Assistance to the Crippled and Deformed was an architect whose 15-yearold son had been a polio victim for 4 years; though far better off physically than several members of our team, he had become totally helpless because his family would not let him do anything for himself. We became concerned about this boy's aged father having to lift and push a supposedly helpless 15-year-old son, and decided to do some-thing about it. This was our method: Jose became very fond of us and wanted to travel with the group. Jiacoppo, our captain, seizing this opportunity to put our idea into operation, told him he would be allowed to travel with us only if he pushed himself and transferred himself to and from the cars and buses. He accepted with reluctance, but before we left he was able to handle himself very well. We were happy to know that we were in some way responsible for relieving the father of this physical burden and for having been able to play a small part in this boy's rehabilitation.

Again hearing from these men, in an emotional vein:

"The most heart tugging of all our experiences occurred in Sao Paulo at a home for crippled children. They had prepared themselves for our arrival by memorizing 10 American songs, which they sang to us. We spent this Sunday afternoon singing, talking, and helping them eat the cookies and other goodies which they had prepared themselves. The air vibrated with so much laughter and song that anyone coming in would have thought every one was intoxicated. We so thoroughly enjoyed ourselves that upon leaving, we asked the lady in charge if they could see us off at the airport. She told us that it would be difficult, considering our flight was at night.

"However, 2 days later, as we were approaching the airfield to leave Sao Paulo, we heard very soft melodious voices emanating from the far end of the field; as we came nearer, the voices became louder. Lo and behold. There they were, the entire group of children and it was their singing we heard. The song was "Arrivederci Jatos," taken from

the music of "Arrivederci Roma," to which they had supplied their own words. As we sat waiting for our plane, two or three children adopted each of us. As we started out to the plane, they were squeezing our hands, smiling, and every cheek was teared, including our own. Can you imagine Tony Mucci, Joe Vitta, Gus Contes, Pete Acca, real toughles, crying. We were never so glad to get aboard an aircraft. We shall never forget those moments at the airport in Sao Paulo."

Tangible evidences of the success of our mission to Brazil, embracing our desire to help remove any stigma resulting from the existence of a physical handicap, have started to emerge. Wheelchair teams such as the Aces of the Rolling Wheels and the Jets of Rehabilitation have sprung up in Brazil, its industry is increasing acceptance of the handicapped, its Congress has become vocal on the subject.

A prominent councilman, speaking in Congress in support of a bill submitted shortly after our visit, which dealt with the employment of the handicapped, commented:

'We all know about that group of boys who came here to appear in exhibition games in their wheelchairs, not only basketball but also other sports activities, and who won the admiration of the public and our respect. Really this spectacle, if we had observed it under other aspects, would have been something to fill one with awe, to cause admiration, because in this country we do not always follow the route in which the invalid is equally regarded as the healthy. But in countries highly advanced, such United States and Great Britain, this is a routine matter. The Pan Am Jets, independent of their athletic skill which rivals that of their normal colleagues, work in various forms of profesisonal activities in their country. This point is very important becauseit enables the viewing of an invalid as not inferior, either physically or morally, to a normal man.

"There are office employees, typists, file clerks, telephone operators, messengers, writers, and other workers who do their jobs with pride and efficiency. They are capable people who do not wish to be included among those listed as beggars or charity seekers. In fact, they do not need our charity; they need our love and should be regarded as any other human beings. Unfortunately and lamentably, the handicapped have only too often been treated with pity, with commiseration by their fellow men.

"Affected either by poliomyelitis or by wounds suffered on the battlefields of World War II, the Pan Am Jets met with the support and understanding of the people, who granted them a fair and honest living. This was a reward from those for whom they became heroes. The initiative came from the employing sources, notwithstanding the legal support granting them the right to work

"The physically handicapped is a brave person who defeats all his mishaps, from moral and psychological traumatism to the resistance of his physical capacity. The physical adaptation, the fear of frustration and the drawbacks of his condition are some of the factors he has to defeat before horizons open before him for an opportunity of a new life.

"England and the United States were the countries which pioneered the utilization of the handicapped. In those two countries the employment of a handicapped person is an honor, a privilege for a company. A good example is set by Pan American World Airways and they have been honored with a special citation by the U.S. Congress in its Congessional Record of January 20, 1958. Also praised were industrial organizations and other business concerns for their em-

ployment of the handicapped in such a number that, besides showing humanitarianism, it is a proof of the potential possibilities of those individuals. The first prize acknowledging these activities was awarded to Pan American World Airways by the American Legion."

We take pride in paralleling to a degree that noble group of businessmen and women who form the 52 Association of the United States, whose pledge is that "the wounded shall never be forgotten." Like them, we believe that the sports-minded public, which includes so many employers, supervisors and workers, is given a new, better and more dramatic insight into the capabilities of the severely disabled, by seeing these doughty wheelchair basketball players in action.

A method occasionally used in spreading the gospel is for the Pan Am Jets to challenge the finest able-bodied basketball team available for a public match, that team being slightly handicapped by being required to play from wheelchairs. The huge Joy in the large and appreciative audiences in both uproarious and contagious, even to both teams, the able-bodied team having to return over and over again for additional point handicaps.

I sat on the dals at a recent dinner given by the 52 Association, next to its president, a successful businessman bereft of the use of his legs. On my left was the officer in command of the U.S.S. Independence, the United States newest and the world's largest and most powerful aircraft carrier. Hearing that it was to dock in Brooklyn after its shake-down cruise, I asked to borrow it for a Saturday afternoon while it was in dock. The affable captain was somewhat startled at being asked to lend such a piece of intricate machinery to a private citizen, especially since it was Government property and not particularly maneuverable on dry land.

Nevertheless, he graciously consented to the loan, and an historic international tournament took place that Saturday afternoon on the flight deck, the brilliant blues of the Pan Am Jets mixing it up with the striking yellows and greens of the Jatos da Panair. One thousand incredulous sailors from the crew, sprinkled with occasional flashes of gold braid, were spell-bound by the flashing and intricate play of these wheeled warriors. The commanding officer of the Independence stated that he could hardly believe that such dexterity could be demonstrated by persons in wheelchairs, and described the game as the greatest exhibition he had ever seen. Thus was another message lodged, within this peripatetic audience coming from every State in the Union.

Developing and broadcasting the sportsmanship area of the field of the handicapped, and thus displaying their ability, can thus be not only hugely entertaining and rewarding, but far-reaching in its ultimate consequence. I commend to you and to your associates and business contacts the furtherance of this facet of the overall picture, and wish you God speed in its consummation.

# Report to the Voters of the 10th Congressional District of New York

EXTENSION OF REMARKS

# HON. EDNA F. KELLY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES Thursday, September 1, 1960

Mrs. KELLY. Mr. Speaker, for 11 years I have had the honor of representing the people of the 10th Congressional

District of New York in the Congress of the United States. As your Representative, I have personally written an annual report, in which I related the most important laws enacted by the Congress for that year. Of necessity, it is always a brief report, but I have tried to make it factual and realistic.

At the closing of this, the 86th Congress, I find the report the most difficult one I have written. It is difficult because the events of the year 1960, both at home and abroad, are explosive and world shaking. Of necessity, they had a bearing on the policies of these United States—policies which were initiated by President Eisenhower, and which he, in turn, requested Congress to implement. It is the implementation of these policies into law which I report to the people of the 10th Congressional District.

Historians will undoubtedly record this year 1960 as the year of crises. These crises involved great risks and affected all people-all nations in all parts of the They touched our most vital They battered our resources. areas. They challenged our way of life. They transgressed our political, our civic, our social, and our religious rights. These events highlighted one fact, and that is we are now at a turning point in history, not only for the United States, but for all freemen. Our civilization is on trial, and on what we do in the next year or two will depend the future of mankind.

The sole responsibility for this dark period of history can be attributed to the leader of the Communist empire-Khrushchev incorporated. Many peoples of the free world have failed to realize that there is one, and only one. ultimate goal for communism, and that is world domination. Communist flirtations with democracies is only part of Communist strategy. It is the great illusion and must be recognized as such. Thus, the jovial smiles of Khrushchev hide his ominous objectives. Many people of the free world have been lulled into an apathetic state by these smiles. Since there is no shooting war, Khrushchev's dire threats and implications have been pushed aside as so much grandstand strategy. By playing down the grave danger of communism, President Eisenhower has caused us to forget the Russian's worldwide economic-political offensive with its central planning and clearly defined goal.

Thus, 1960 ushered in the year of the great illusion. The continuing "peace and prosperity" theme of the Eisenhower administration, coinciding with the jovial smiles of Khrushchev, rocked the free world into a state of belief that a just peace was at last within reach.

The Paris summit, the stalemate of the Camp David meeting, the cancellation of the President's visit to Japan, the Cuban situation, Khrushchev's deceptive beace maneuvers—these events added up to accomplishment for Communist aims. Military defense was made to appear as sufficient and arms reduction without controls followed as a natural entity. Seeds of disunity among the Allies were planted. To the new nations waiting on the threshold of de-

mocracy, Russia was made to appear as a benefactor of mankind—despite its hypocritical mouthings about peace and justice.

The events of the year 1960 throughout were worldshaking and produced enormous crises. For years to come, historians will trace their effects upon the course of civilization. Despite the many and great obstacles the Communists have placed in the path of democracy, there have been gains for the free world. Western European countries, having recouped their losses from World War II, have reappraised the world situation and laid foundation for unity and progress.

Today, the Europe of the six—Belgium, France, Germany, Italy, Luxembourg, and the Netherlands—has built a formidable economic machinery on its territory. The Schuman plan, aimed at European integration, has laid the groundwork for a common market. Given time and balanced statesmanship, the combination of the six—mentioned above—and the seven—Britain and her partners: Sweden, Norway, Denmark, Switzerland, Austria, and Portugal—together with the United States, can bring about a free world as an established fact and not mere wishful thinking.

This unprecedented revival of Western Europe is credited to the selfless U.S. assistance since World War II . With this unprecedented revival, European nations must now become full partners with the United States in defense of the free world. The principle of the rights of man for all persons must be defended-for all people, for all nations. This objective has led the free world into direct conflict with the Communist leaders of the Kremlin, who will use any and all methods to achieve their objectives. This has forced the free world to realize that no nation can go it alone-there must be mutual, cooperative assistance among free people and free nations. In 1948 the Democratic Party initiated the Truman doctrine, which is now agreed upon as successful, but the failure of the Republican Party to take this program from the horse and buggy age into the space age is the reason for the enormous problem facing the United States in 1960. No matter who the next President may be, his challenge is to reestablish a sound moral foreign policy and a sound U.S. economic policy.

I mention the above because the Subcommittee on Europe of the House Committee on Foreign Affairs issued a report on this subject. It is House Report No. 1226, dated January 25, 1960. I am the chairman of this subcommittee and, after a factfinding trip to Europe in the fall of 1959, we made many recommendations. In the report, I recommended a complete review and reevaluation of the U.S. foreign policy, including a review of the foreign aid program which partly implements that policy.

This will require coordinating of tariff policy, agricultural surplus programs, all bank loans and investments, business investments and Government grants. It would also require cooperation by economic groups—labor and management in particular—because without the co-

operation of these groups, Government would not be able to go it alone.

In the same report, I recommended a review of the total picture of the U.S. economic status including all facets of U.S. economy. This survey should include all industry, production, trade, and commerce. The report rendered must be a factual report. Unfortunately, for the past year our imports have exceeded our exports. The U.S. budget is about \$80.1 billion. The national debt is \$288.7 billion and the interest on this debt is near \$10 billion.

### NATIONAL ECONOMY

With the new Soviet economic offensive, the overriding issue regarding our economy is whether our rate of yearly economic growth is sufficient. While we have been creeping with a low annual growth rate, Russia has raced ahead of us. This in great part was caused by the administration's restrictive policies. If we are to lead the world, we must institute sound new policies which will permit our economy to once again be dynamic. This cannot be accomplished by increased interest rates for which the administration fought so hard. The passage of time proved the fallacy of such reasoning.

During this session of Congress, our national debt limit was extended from \$285 billion to \$293 billion; the 52 percent corporate tax rate and excise taxes on cigarettes, automobiles, transport of persons, and telephone calls were continued. The cabaret tax was reduced from 20 to 10 percent.

Public Law 470 will now permit the deduction of all medical expenses incurred by a taxpayer for the care of a dependent parent over 65 years of age.

### NATIONAL DEFENSE

Throughout the past year, distinguished experts have questioned the adequacy of our national defense effort. There were those, including the President, who insisted that the U.S. defense organization was the strongest in the world and completely adequate. There were many who felt that the President was placing budgetary consideration above our true defense needs. Suffice it to say that after the Congress appropriated more money for defense purposes than was requested, the military made use of it. The overall defense appropriation was \$39,996,608,000 in comparison to \$39,335 million requested by the President. In addition, \$211.4 million was authorized to the Atomic Energy Commission and \$970 million to the National Security Agency.

### MUTUAL SECURITY BILL

Part of the U.S. defense is the Mutual Security Act. This was extended for 1 year and authorized \$1.3 billion for economic assistance, technical cooperation and special programs; \$2.7 billion was appropriated for military assistance and the Development Loan Fund; \$600 million additional funds were appropriated for Latin America, including \$100 million for earthquake relief for Chile.

Provisions were made for U.S. participation in the International Development Association to help provide assistance to underdeveloped countries.

GOVERNMENT ORGANIZATION

One of the most important pieces of legislation was that which increased salaries for postal workers and classified Federal employees. These loyal Federal employees, who have been subjected to tremendous economic pressures by the rising cost of living, have long been deserving of increased salaries.

The legislation which increased postal workers' salaries by 8.4 percent and other Federal employees by 7.5 percent was initially vetoed by the President. The President's veto was easily overriden.

Unfortunately, the President saw fit to veto legislation which would have extended aid to depressed areas of the country. This once again showed the Republican administration's disregard for the interests of the poor and indigent.

WAGES

At the 1st session of the 86th Congress. legislation to increase the minimum wage was introduced in both Houses. Senator Kennedy spearheaded the legislation in the Senate. His bill called for an increase to \$1.25 per hour and would have extended protection to millions, while the House bill provided for \$1.15 per hour. As a result of the absence of executive leadership and the threat of a veto, this most important legislation was, after passage, stalled in conference. I was deeply disappointed.

CIVIL RIGHTS

The 86th Congress made history by passing the first civil rights bill, under the leadership of Senator Johnson in the Senate and Brooklyn's Congressman CELLER in the House. This legislation provides for the appointment of referees by the Federal courts to safeguard voting rights. The law provides penalties for the obstruction of court orders and requires the preservation of Federal election records for 2 years.

Bills were enacted of particular benefit to veterans.

Public Law 665 extends for 2 years authority for VA loans to veterans for homes, farms, or businesses.

Public Law 499 provides additional compensation for disabled veterans with more than three children.

Public Law 663 provides additional compensation to certain disabled veterans

Public Law 497 waives payment of premiums on national life insurance policies for certain totally disabled veterans.

NATIONAL RESOURCES

Water pollution is a problem which directly affects every man, woman, and child in the United States. It robs us of our health, recreational facilities, and the natural beauty of our country. Any effort we can make to reduce this hazard is for the benefit of the public. The President's veto of H.R. 3610 which would have provided \$90 million to help eliminate the problem was unconscionable.

SOCIAL SECURITY

In the past 5 years, more and more attention is being directed toward the problems of our senior citizens. The increased cost of medical care has created an urgent problem for people who are

the case of older people who require more

With these problems in mind, the Democratic Congress embarked on a legislative program which would have provided medical care to the aged through the social security system. This legislation created more public interest than any other bill in recent years.

Again, the lack of Executive leadership, and threat of the exercise of the Presidential veto, caused a less effective bill to be enacted. H.R. 12580 provides for a Federal-State program of medical care for the aged. It is not as effective as the Forand bill and is not operated within the structure of the social security system. This was one of the major disappointments of the session.

I realize the enormity of the problems of the United States Presidency, including the terrifying responsibilities of this trust. However, I feel that the Republican administration has emphasized peace and prosperity-a "don't worry. everything is all right" policy-when one has but to look around and see the whole world in turmoil. They admit a cold war. A cold war shifted from the Far East; Middle East; to the United States back door-Cuba and South America. while a hot war rages in Africa. All this instigated or ignited by the Communist leaders of the Kremlin.

It is the responsibility of the Presidency to remain ever alert and constantly remind the American people and the free world that any concession made by the Communists is a tactical maneuver or expediency, which will be repudiated without qualm when necessity has passed or they so desire.

Thanks to the Soviets, peace, mankind's deepest longing, is still a vision. However, the American dream of attainment of world peace and disarmament, based on world order and law, on the mutual respect among freemen and on a world economy, is still a noble aim, and with every American shoulder at the wheel can be brought closed to accomplishment in this, our time.

# Catholic Priest Charges Genocide in Paraguay

EXTENSION OF REMARKS OF

# HON. CHARLES O. PORTER

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. PORTER. Mr. Speaker, Father Ramon Talavera Goiburu is a leader of the civic Christian crusade of Paraguay. He has been traveling throughout the Western Hemisphere discussing the Stroessner regime in Paraguay. Father Talayera says that regime is totalitarian and believes it "poses a threat to the peace in the continents." Under leave to extend my remarks in the RECORD, I include Father Talavera's letter of October

retired on fixed incomes-especially in 9, 1959, to the Inter-American Peace Committee:

FORMOSA, ARGENTINA, October 9, 1959. Mr. JOHN D. DRETER,

Chairman of the Inter-American Peace Committee, Washington, D.C.

Sir: I acknowledge receipt of your letter dated September 25, by which you kindly advised me that the Committee under your chairmanship had given due consideration to my presentation of September 3 and had concluded that "it is not of its competence to take action in regard to its content because neither the Committee's Estuatutes nor the new power vested upon it by the recent Santiago conference give this Committee the competence to intervene in individual cases."

In view of the penultimate paragraph of your letter, I am taking the liberty of submitting to you—and through you to the Peace Committee—the following considera-

It is apparent from a careful reading of the Spanish text that the relevant resolution of the Santiago conference does not make any distinction whatsoever between individual and collective cases. Paragraph 1(B) confines itself to state: "Relationship between the violations of human rights or the absence of practice of representative democracy, on one hand, and the political tensions which affect the peace of the continent, on the other."

I have called upon the Inter-American Peace Committee with a request for an urgent mediation designed to seek redress, in my concrete case, from the Paraguayan Government's violation of principles ex-pressedly proclaimed in the United Nations chart, in the OAS chart and in the Santiago declaration, regarding basic human rights. My presentation was based on paragraph 2 of the Santiago declaration which says: "The Committee, in discharging its duties, may take action in the matters referred to in paragraph 1, by request from any government or by its own initiative, remaining its action in either case subordinated to the expressed agreement of the states for the investigations that should be made in their respective territories." My expectation was then, that the Committee, in accordance with the lofty ideals and principles that justify its existence and, fundamentally, in seeking the "consolidation of peace and security of the continent," which constitute the primary purpose of the OAS, was to concern itself with the case brought to its at-tention, on its own initiative.

It must be pointed out that the concrete case I brought to the Peace Committee's attention, though somewhat peculiar be-cause of my capacity of minister of the Catholic Church is by any means an individual case.

It is a fact known throughout the Western Hemisphere that more than 400,000 Paraguayans are estranged from their country by the ruthless persecution of the dictator who rules Paraguay. This figure can be easily and officially verified through the statistics on Paraguayan residents in Argentina, Uruguay, and Brazil.

Among the Paraguayan refugees in foreign lands there are a large number of women and children who have accompanied the huge exody of workers, farmers, high school and university students, professionals, etc. This persecution of entire segments of the Paraguayan population because of their democratic beliefs constitutes an authentic case of genocide.

To give an idea of the magnitude of the Paraguayan tragedy, it can be responsibly stated that one-fourth of the total native population of Paraguay has had to fiee the country and to seek a better life and the benefits of basic human rights in foreign lands.

I must remain in peace with my conscience by stating to you, Mr. Chairman, and through you to the Peace Committee, that I do not consider correct the conclusion at which the Committee arrived and which you were kind enough to communicate to me in your letter of September 25, 1959. As a priest, with a deep Christian faith, I have called upon the Inter-American Peace Committee with the well-founded hope that something would be done that would allow me to return to my own country from which I was estranged for trying to translate into real life the doctrines of Christ.

With modesty and in all humility I can say that I am the interpreter of the suffering of hundreds of thousands of my Christian brothers to whom the fruition and the benefits of man's rights are denied in Paraguay.

I think that it will be possible to create the better world for which the whole mankind craves, only to the extent that all men and organizations that could work together for peace, justice, and liberty, do work and help in this enormous task of fully restoring to man all its attributes today trampled under the feet of dictators. Only then shall we be worthy of our Western Christian civilization and of the spirit of its magnificent exponents.

I believe that freedom must be conquered by all and every one of us. Because of this belief I am resolved to return to my country and my people, by exercising the supreme right to live in the land where I was born, and to keep on preaching Christ's doctrine. This decision will, no doubt, bring me to face all the risks that always are taken by those who defend the supreme values of life under a regime of lawless force. thought it appropriate to inform you of my decision, thus formally recording the cas of someone who insists in defending for him and for all his cocitizens, the fundamental rights and inalienable values of the spirit of which the United Nations' and the Organization of the American States' charters are imbued.

Accept, Mr. Chairman, the assurance of my sincere esteem.

Presbitero RAMON TALAVERA.

### Social Security and Old-Age Assistance

EXTENSION OF REMARKS

# HON. MORGAN M. MOULDER

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES
Thursday, September 1, 1960

Mr. MOULDER. Mr. Speaker, everyone seriously studying our situation has concluded that providing for better health care for the aged is a serious problem.

For all too many of our elder citizens, long life has meant shrunken incomes, increased illness, loneliness, being pushed aside, and the shame, which should not be, of being an applicant for a handout from society.

On the 20th day of January of this year I introduced a bill in Congress to amend title 1 of the Social Security Act to increase the amount of Federal funds payable thereunder to States which have approved plans for old-age assistance and which maintain their expenditures for such assistance at or above the 1959 level. My home State of Missouri is one.

Mr. Speaker, my bill H.R. 9775 would, first, increase the maximum matchable payment from the present \$55 per month to \$90 per month; second, would revise the matching formula making it possible for the States to receive additional Federal funds for old-age assistance; and, third, would increase the old-age assistance payments, and relieve the heavy privations and burdens endured by our worthy and deserving elder citizens.

Estimates furnished to me by the Department of Health, Education, and Welfare show that Missouri would receive, under the provisions of my bill, an additional \$12 million in Federal money.

I propose that all welfare payments in our States be studied and increased in line with present-day living costs.

I support all necessary appropriations to make these increases possible.

Mr. Speaker, I pledge my earnest support to expansion and improvement of hospital care for our senior citizens and others in need.

I deeply believe there should be in all States a commission established for the purpose of studying the problems of elder citizens and developing programs to give them a more dignified, satisfying old age.

Mr. Speaker, I believe in more widespread employment opportunities for our senior citizens so that they may make the fullest use of the wisdom they have stored and of the maturity that long lives and experience have brought them. Our present system is guilty of great waste.

Mr. Speaker, I pledge my efforts toward a Federal program of medical care for our elder citizens under the social security programs so that 14 million Americans, including nearly 400,000 of them in my State, who receive social security can face the future confident that if disability comes to them they will receive adequate medical and hospital

Mr. Speaker, I support an expanded program of public health services for the protection of our elder people.

I have always supported, and I always will fight for, increased benefits for our elder citizens and for aid to our disabled and needy persons.

I believe that our good American citizens who have fought the battle of life, facing the ups and downs of success and failure, facing the wheel of fortune, ought not in the twilight of their lives to be left without adequate means of support; for out of the labor of their lives they are entitled to it, and it is our duty to provide for them a life they can lead in dignity and respect during their later years.

Mr. Speaker, long years they have spent laboring in the vineyard and in paying the tax collectors. Of them, I do not like to think of old age, but of the golden age they have earned and which it is our duty to guarantee.

I remember the teachings of my parents, who told me from the Bible, "Honor thy father and thy mother, that thy days may be long upon the earth which the Lord thy God hath given thee."

Cheney Division, Wichita, Kans., Project

EXTENSION OF REMARKS

OF

### HON. EDWARD H. REES

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES
Thursday, September 1, 1960

Mr. REES of Kansas. Mr. Speaker, I believe it will be helpful for the Members of Congress and others interested to have a little further information with respect to H.R. 4606 and S. 1092, being identical bills that were recently approved unanimously in the Senate and in the House.

The Cheney division, Wichita project, Kansas, is a proposed joint development between the United States and the city of Wichita in which the principal works comprising a dam and reservoir would be constructed on the North Fork of the Ninnescah River some 6 miles north of Cheney, Kans., and some 25 miles west of Wichita, Kans. The Cheney division, Wichita project, Kansas, is proposed as a multiple-purpose project to provide, first, flood protection on a regional basis; second, irrigation to limited tracts of land downstream from the reservoir site: third, recreation benefits on a regional and interstate basis in an area largely devoid of such facilities at the present time; fourth, fish and wildlife conservation benefits of national and international significance; and fifth, an urgently needed additional source of municipal water supply for the city of Wichita.

The Cheney division, Wichita project, Kansas, is a joint venture between the city of Wichita and the United States in which the city assumes its proportionate share of the risk and agrees to repay with interest the project cost allocated to municipal water supply. Construction cost of the dam, reservoir, basic recreation facilities, and fish and wildlife conservation facilities is estimated at \$18,274,000. The city of Wichita has approved a proposed repayment contract and has agreed to pay an amount not to exceed \$7,396,000 plus interest, which amount is approximately 40 percent of the construction cost and an allowance for contingencies, thus providing a margin of insurance against the necessity of contract renegotiation in the event of advancing prices.

In addition, the proposed repayment contract provides that the city will at its own cost of \$7,650,000 construct the pipeline and related transmission facilities required to transport water from the reservoir site to the city concomitantly with the construction of the Cheney Dam and Reservoir by the Federal Government. Thus, it may be seen that the total construction cost of dam, reservoir, basic recreation facilities, fish and wildlife conservation facilities, pipeline, and related transmission facilities approximates \$25,924,000, of which amount the city of Wichita will pay approximately \$15 million, or some 58 percent.

Public funds for the appropriate investigations and reports have been made available both by the city of Wichita and

by the Bureau of Reclamation. Data with respect to the geologic, engineering, financial, and economic aspects of the project have been exchanged freely and on a cooperative basis between the respective municipal, State, and Federal agencies concerned.

The reconnaissance reports, the geologic reports, and the feasibility reports issued by the Bureau of Reclamation represent the combined best judgment of the various levels of government and are concurred in by the city of Wichita and its consulting engineers.

The project has been conformed to policies and legislation of the three levels of government concerned with respect to matters of water supply, flood control, irrigation, hydroelectric power, pollution, fish and wildlife, conservation, and recreation.

The project recognizes, first, the desirability of substantial financial participation at the local level in accordance with the so-called partnership policy of the Congress and the President; second, the river basin plan as the most practical approach to the development of land and water resources on a regional basis irrespective of municipal limits or State boundaries; third, the economic factors which make it impractical for a single municipality to develop a river basin water resources program without the cooperation and participation of all levels of government involved; fourth, the importance of maximum use of scarce reservoir sites and limited water resources in accordance with an overall river basin land and water resources development plan; fifth, the interdependence of water supply and pollution abatement problems and the consequent responsibility of local government to make the best possible use of its water supply for the benefit of itself and downstream users.

The city of Wichita has complied with every request for cooperative action that it has received from the Bureau of Rec-\* lamation, and the city has taken every possible action to conform the project to existing Federal and State policies and legislation with respect to water supply, flood control, irrigation, pollution abatement, recreation, and the conservation of fish and wildlife. Concluding nearly 5 years of such cooperative effort, the city of Wichita, first, has agreed to obligate itself for repayment with interest of the project costs allocated to municipal water-supply purposes; second, has agreed to construct the connecting pipeline and related transmission facilities from its own funds, unrelated to Federal financing; third, has purchased the distribution properties of the local water utility at a cost approximating \$30 million; fourth, has obtained approval of the appropriate applications for water rights for the reservoir site from an agency of the State of Kansas: fifth, has complied with a pollutionabatement program as approved by the Kansas State Board of Health and the U.S. Public Health Service, including the construction of \$6.5 million of additional sewage facilities; sixth, has obtained the necessary enabling legislation from the Kansas State Legislature to permit a re-

payment contract for the Federal Government; seventh, has secured the overwhelming approval of the electorate of Wichita in a special election authorizing construction of the proposed reservoir; eighth, has agreed to operate and to maintain the facilities after construction; and, ninth, has agreed to place the management of the reservoir for fish and wildlife conservation and recreation purposes in an appropriate agency of the State of Kansas.

I am advised that the fish and wildlife nonreimbursable costs of \$4,598,000 as proposed in the Bureau of Reclamation report were calculated on the basis of established practices and procedures. The estimated fish and wildlife conservation benefits of approximately \$290,000 annually were not established by the city of Wichita but were calculated by an agency within the Department of the Interior-the Bureau of Sport Fisheries and Wildlife-in accordance with the same practices and procedures which have been applied in several hundred other projects throughout the country. The capitalized value of the annual benefits represents some \$10.6 million in fish and wildlife conservation benefits. Also, I am advised that the Bureau of Reclamation found in 1957 that the cost of providing similar area facilities for fish and wildlife purposes by means of constructing small reservoirs-assuming sufficient other sites are available, which assumption is questionable-would result in a greater cost than the amount allocated in the Cheney Reservoir for such purposes.

Further, I am advised that in the case of multiple-purpose reservoirs certain differences of opinion have existed historically between the Federal departments and agencies concerned with respect to the various allocations of project costs and benefits. I understand that these matters were brought into an orderly solution by the Bureau of the Budget on December 31, 1952, through the issuance of Budget Circular No. A47 providing for a uniform method of allocating project costs in multiple-purpose reservoir projects. The method is known as the separable costs-remaining benefits method. The use of this separable costs-remaining benefits method was agreed to subsequently on March 12, 1954. by the Department of the Army, the Department of the Interior, and the Federal Power Commission. It is my understanding that this formula has been applied for a good many years in the allocation of project costs in multiple-purpose reservoir projects throughout the country. The suggestion of the Budget Bureau that the flood control and municipal water supply costs be allocated on the basis of the separable costs-remaining benefits method and that the fish and wildlife conservation benefits be calculated on the basis of separable cost only is inconsistent with established procedures and the fundamental thesis that costs in all multiple-purpose reservoir projects should be allocated on a uniform basis applicable alike to all projects.

In this particular case I am informed that while an incremental amount, approximately \$540,000, as suggested by

the Bureau of the Budget, is presumed to provide the facilities desired for fish and wildlife conservation purposes, the proposition may be stated in reverse with exactly the opposite result. The proposed reservoir project provides for an inviolate conservation pool of some 10,000 acre-feet of water, to be maintained at all times insofar as other uses are concerned, and for the acquisition of some 2,500 acres of additional lands for fish and wildlife management. Using the same unit cost applied in the proposed Cheney Reservoir project, it has been estimated that the construction of a single-purpose, 10,000-acre-foot reservoir would cost \$12 million. Thus, inasmuch as the capitalized fish and wildlife benefits are \$10.6 million, it may be seen that the Federal Government is benefiting approximately \$2 for each \$1 allocated to fish and wildlife conservation purposes under the separable costs-remaining benefits procedure. Similarly, flood control and municipal water supply purposes are benefiting also from a sharing of joint cost and that is precisely what is intended in the allocation of the separable costs-remaining benefits pro-

The policy with respect to fish and wildlife conservation benefits was established by the Congress and not by the Secretary of the Interior whose report recommends the amount of project costs to be allocated of conservation benefits pursuant to the statutes as follows: First, the Fish and Wildlife Act of March 10, 1934, Public Law 121, 73d Congress, which provides the basic authority for conservation of fish and wildlife; second, the Fish and Wildlife Act of August 14, 1946, Public Law 732, 79th Congress, which amends the authority of the original act and broadens the base of conservation participation; and third, the Fish and Wildlife Coordination Act of August 12, 1958, Public Law 624, 85th Congress, which further amends the original act and provides for interagency consultation for conservation purposes and for the allocation of costs to reflect conservation benefits in water reservoir projects.

I quote from paragraph 2d of the Fish and Wildlife Coordination Act, Public Law 624, 85th Congress, dated August 12, 1958:

The Secretary of the Interior, in addition to allocations made under section 9 of the Reclamation Project Act of 1939, shall make findings on the part of the estimated costs of the project which can properly be allocated to means and measures to prevent loss of and damage to wildlife resources, which costs shall not be reimbursable, and an appropriate share of the project costs may be allocated to development and improvement of wildlife resources, with a finding as to the part of such allocated costs, if any, to be reimbursed by non-Federal fish and wildlife agencies or interests.

I quote further from Public Law 624. 85th Congress, paragraph 2f, as follows:

In addition to other requirements, there shall be included in any report submitted to Congress supporting a recommendation for authorization of any new project for the control or use of water as described herein (including any new division of such project or new supplemental works on such project) an estimation of the wildlife benefits or

losses to be derived therefrom, including benefits to be derived from measures recommended specifically for the development and improvement of wildlife resources, the cost of providing wildlife benefits (including the cost of additional facilities to be installed or lands to be acquired specifically for that particular phase of wildlife conservation relating to the development and improvement of wildlife), the part of the cost of joint-use facilities allocated to wildlife, and the part of such costs, if any, to be relimbursed by non-Federal interest.

In view of the growing water shortage that is developing throughout our country and in view of the fact there are not now being constructed or even being planned sufficient water projects to prevent severe water shortages from developing in various areas within the next decade, it is inconceivable to me that any delay would be prescribed by the Congress. Particularly is this true in the case of a water project as urgently needed as the Cheney project wherein the local interests have agreed to pay a very substantial portion of the costs and have complied with all present Federal requirements.

Congresswoman Martha W. Griffiths Reports to the People of the 17th District of Michigan

EXTENSION OF REMARKS

# HON. MARTHA W. GRIFFITHS

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES
Thursday, September 1, 1960

Mrs. GRIFFITHS. Mr. Speaker, under leave to extend my remarks in the RECORD, I take this opportunity to provide the residents of the 17th District of Michigan a brief résumé of major legislation and of my activities as their Representative in the 86th Congress.

This is the year of the census. Our district has grown from 333,498 in 1950 to 514,959 in 1960, making us the fifth largest congressional district in Michigan, and the second largest in Wayne County, which is now the third largest county in the United States, exceeded only by Cook County in Illinois and Los Angeles County in California.

This Congress will go down in history for expanding our horizons into the Pacific by admitting Hawaii to the Union and by extending our search into outer space by providing the National Space Agency with almost \$1 billion for its work.

This Congress has also witnessed the trial of democracy throughout the world. The 1st session of the 86th Congress, the longest peacetime session in 37 years, adjourned at 6:22 a.m., on September 15, 1959, as Khrushchev was about to arrive in Washington for what was to have been an exchange visit with our President. Since that day, the honeymoon between the administration and the Communists has come to an abrupt end. In an historically amazing act, the President admitted that Powers, whose plane was brought down in Russia, was our spy

and the breakdown of the Paris summit and the Geneva disarmament conferences followed. Khrushchev withdrew his invitation to our President to visit the U.S.R. Anti-American rioting in Japan forced the cancellation of a Presidential visit there. And so it goes, Cuba, the Congo, the Dominican Republic. Our country has lost so much ground in the past 8 years, so much stature and prestige in the world, that Congress and all thoughtful people must give this problem first consideration.

Our foreign policy is determined by the executive branch of our Government. However, Congress helps implement the policy by appropriations, and so forth. This Congress added over \$1 billion to the defense appropriations which already averaged \$40 billion a year. At the insistence of the President, Congress cut the Cuban sugar quota completely, allowing the President to restore it as he wishes. We also provided for U.S. participation in the International Development Association, along with 67 other countries, to help provide assistance to underdeveloped countries; approved the Antarctica Treaty and the Treaty of Mutual Cooperation and Security Between the United States and Japan; provided that economic aid may be extended to any nation, except the Soviet Union and the Communist-held areas of the Far East, if the President determines it important to U.S. security. After 716 years in office, 3 weeks before adjourn-ment, the President asked for and Congress authorized \$600 million in mutual security funds for Latin America, an area that has long been neglected Congress has responded to leadership in the field of foreign affairs but more often than not, lately it has had to lead.

Congress for the first time in 12 years reconvened for a special session this year to finish their uncompleted business that was interrupted by the business of the political conventions. Actually, compromises on many legislative proposals were impossible to obtain and the gavel brought the end of the 86th Congress, with less accomplished than I wanted but far, far more than the President desired or even was willing to accept. On February 7, 1960, the New York Times wrote:

There is something wrong with a country that has bigger and better tailfins at the same time that it has a second-best defense posture, a worsening slum problem, dirty rivers and streams, inadequate health services, and wretched underfinancing of education.

Obviously the spending of more money is not the answer to our problem. Mr. Eisenhower has produced the biggest peacetime budgets in history yet the problems are still with us. It is how we spend our money that really matters. I have long maintained that \$10 billion alone could be saved in our \$40 billion defense budget if proper procurement procedures were instigated and duplication and waste kept to a minimum. For example, this administration wanted to let the Renegotiations Act die. I appeared, along with others, before the Ways and Means Committee urging that it be extended and it was. This act provides for the recovery of excess profits on

defense contracts and annually the Government recovers millions of dollars as a result of this act.

Criticism has been directed toward Federal expenditures. Most Americans are not aware that of the total Federal expenditures of over \$77 billion in fiscal year 1960, almost \$42 billion was spent for national defense, \$31/2 billion for the foreign-aid program which related to the national security, \$21/2 billion for atomic energy development and research, \$5 1/2 billion for the cost of services to veterans, present, past, and future. In addition, \$9.2 billion was spent in fiscal 1960 to pay interest on the Federal debt which interest payment had almost doubled from \$5.8 billion in 1952 because of administration policies which favored a hard-money policy with higher interest rates to lenders.

With the addition of \$5½ billion on the farm support program, slightly over \$10 billion remained for all of the other important functions of the Federal Government including its frequently criticized welfare programs.

Obviously, a \$10 billion savings in our defense budget from better purchasing techniques would permit us to reduce our debts and to achieve a more secure domestic economy.

In spite of presidential vetoes of distressed area legislation, housing bills, flood control legislation and legislation for hard pressed postal and other government workers, this Congress has looked squarely into and has spotlighted the serious dislocations in our economy—into the fact of high unemployment in the midst of what is supposed to be record prosperity and has tried in many ways, through many measures, to put a more solid base under the economy.

SOCIAL SECURITY

Two major amendments were made to the Social Security Act by this Congress. A program of Federal grants to the States for medical care for the low-income aged was approved. Grants will be made available to the States for medical care for two categories of needy aged: First, those unable to support themselves who receive old age assistance, and second, those with sufficiently high incomes to exclude them from receiving public assistance but with incomes too low to cover major medical expenses.

Congress also increased the amount a person can earn and still receive benefits. Under the present law, if a retired person earns \$1,200 or less a year, no benefits are withheld. However, under the new law, passed this year, a retired person may earn over \$1,200 and still secure benefits, depending on how much he earns. Detailed explanation of this new plan is available in my Detroit office.

The Railroad Retirement Act was revised, increasing benefits to retired employees; and Congress extended the benefits of temporary unemployment compensation for 3 additional months to the jobless whose State payments had expired.

The program of non-service-connected pensions to veterans, their widows and children was revised to correct the many inequities in the operations of our veterans' pension program. For example, under the old law, the widows and orphans of World War II and Korean war veterans could benefit only if the veterans had a service-connected disability. The new Veterans' Pension Act of 1959 places widows and orphans of those who fought in the last two conflicts on the same footing, with the same pension rights, as those of World War I veterans.

### HIGHWAY PROGRAM

Some additional funds were provided for the highway program. The administration asked for another one-half-cent-per-gallon increase in the gasoline tax and asked that the 1-cent-per-gallon increase be continued beyond June 30, 1961, with the money going to the fund, but this tax did not pass. Highway users are now paying about \$1.6 billion more in taxes than is used for roads, but an amendment to transfer some of this to the highway fund was opposed by those backing the tax increase.

### POSTAL AND INTEREST RATES

The administration requested an increase in postage rates, but Congress refused to increase the mail rates.

The administration also requested authority to increase Government bond interest above 41/4 percent. Although Congress increased the interest rates on the E- and H-bonds individuals can own, the authority to increase the interest rates above the present legal maximum on commercial bonds was denied by Congress. The effect of such an increased interest rate would have been inflationary. It would have burdened the taxpayers with additional billions for interest payments for a generation. All of this on the safest investment in the world, U.S. bonds. Since Congress refused this increase, interest rates on these commercial bonds have been going down.

### EDUCATION

Once again Congress failed to pass legislation providing for school construction. Although this time both the House and the Senate passed school construction bills, the House Rules Committee refused to let the bills go to final conference, so they died with adjournment. The majority of the educators in our district are very much in support of this legislation.

Congress voted to extend for another 5 years the Library Services Act which provides matching funds to States for the extension and establishment of public library service in our rural communities. The State of Michigan has received \$358,346 through 1960.

Under the present programs that provide Federal funds for school construction and operating costs in areas overburdened with Federal activities, such as Army installations and defense plants, the 17th District has received \$2,393,363 to date and the State of Michigan \$43,742.512.

### LABOR

In order to strike a blow at racketeering in unions, after the exposure of many shocking abuses, this Congress passed a labor reform bill which I supported. The 17th District probably sent more mail on

this subject than any other congressional district in the United States. My district said, "Solve the problem," and I hope I voted in a way which will help solve it. However, it will remain for the courts, for union members, and for management to correct finally the evils of labor racketeering.

### THE CONSUMER

This Congress wrote basic new safeguards against cancer-producing chemical ingredients in our food products and refused to open loopholes in the Poultry Products Inspection Act.

This Congress vastly expanded Government research programs in the health fields—into the causes, control, and prevention of cancer, heart disease, arthritis, blindness, mental illness, and other crippling and killing diseases.

This Congress enacted a long-overdue law to label dangerous or poisonous or hazardous household products so parents will know to keep them out of the reach of children. Every year some 600,000 youngsters swallow dangerous preparations. Of these, more than 500 die.

This Congress discussed, but failed to pass, a "truth in lending" bill which would require money lenders and creditors to spell out the interest they are charging consumers. Anyone receiving a loan or who purchases products on the installment plan should know precisely how much he is paying in interest. Such a bill would go a long way toward wiping out interest-rate gouging, a practice which creates hardships, particularly among the low income groups.

This Congress also considered, but did not pass, a shoe labeling bill that would require the manufacturers of shoes to label the materials and dyes used in their shoes. This is another attempt to assist the consumer in knowing what he buys, as our fabric and fur labelling laws do now. I have long supported it.

The Secretary of Agriculture stopped grading service on lamb and mutton. Protests from small packers and consumers and the House Committee on Agriculture forced him to restore the grading service. Grading service is essential in order to maintain reliability of quality for the consumer.

In 1959, a new district office of the Food and Drug Administration was opened in Detroit. I had long advocated the establishment of a district office here. With our increasing population and the tremendous increase in the number of new foods and drugs it is essential that we provide adequate funds and personnel so that this agency can insure us safe foods and drugs. This district office, the 17th in the United States, services parts of Wisconsin, Indiana, and Ohio as well as all of Michigan.

### GENERAL

This Congress approved an amendment to the Constitution to give the residents of the District of Columbia the right to vote for President and Vice President. To become effective, the amendment must be ratified by the legislatures of three-fourths of the States. It will no doubt be considered by the Michigan

Legislature when they convene in January.

My longtime efforts to expand the distribution of surplus foods to the needy of our country by a stamp plan were temporarily successful. Congress passed a bill permitting the Secretary of Agriculture to establish such programs and Detroit was one of the first cities to apply. However, the Secretary has refused to put the program into effect. In the meantime, the surplus food stocks keep mounting and the welfare costs to the city of Detroit keep mounting.

Among the bills I have introduced is one to create a Department of Urban Affairs. We have a Department of Agriculture with a budget of almost \$6 billion. We have a Department of Interior concerned with millions of acres of empty land. But we have no department of Government concerned with the problems of the metropolitan areas. A hundred years ago this was primarily a country of farms and small towns, or rural acres and villages. Today 6 out of 10 Americans—over 100 million persons—live in metropolitan areas.

As a result of the many bombings or attempted bombings of churches, synagogues, and small businesses I introduced a bill which would permit the FBI to investigate these incidents immediately. This bill became a part of the civil rights bill which was enacted into law.

By a large majority, Congress approved a bill authorizing the administration to withhold American assistance from countries which wage economic warfare against other nations which receive economic assistance from us. This was an outgrowth of congressional sentiment that the administration had not done enough to insist the the United Arab Republic end its illegal blockade of the Suez Canal and its periodic seizures of cargoes to and from Israel.

I am the first member of the House to introduce a bill to provide for the humane treatment of animals used in tests and experiments.

### PERSONAL REPORT

In addition to my legislative duties, I would like to make reference to my other work and responsibilities as your spokesman in Washington. I have attempted from the outset of my congressional service to keep the residents of the 17th District as fully informed as possible. To accomplish this, I have written a newsletter each month. If you would like to be on my mailing list, call my Detroit office.

I have taught civics in all the senior high schools in our district and I speak to many social and service groups. Last year I made two speeches in Florida, one, at the request of Mrs. Grace Cogan, sister of the late Mayor Edward Jeffries; the second, at the request of Edith Carew, a former resident of the 17th District. I also spoke at a gathering of women in Tennessee at the request of Senator Estes Kefauver. Last month I was the principal speaker at the annual convention of the National Association of Women Lawyers, meeting in Washington in conjunction with the American Bar Association.

I maintain 2 full-time offices, one in Washington at 1516 New House Office Building, the other in our district at 14815 Grand River. My district office enables me to give you more prompt and efficient service.

Your letters, phone calls, and visits have been appreciated. I have attempted to assist you as promptly as possible. It has been a pleasure to assist many residents of our district and our local and State officials in their dealings with various Federal agencies such as the Defense Department, Federal Housing Administration, Veterans' Administration, Social Security, and the Internal Revenue Service.

In conclusion, let me say that I have done my best to be responsive to the needs and opinions of the residents of our district and to discharge my responsibility as your representative in Congress in a way which I hope meets with your approval.

# The Ugly Head of Politics in Potter County, Pa.

EXTENSION OF REMARKS

# HON. CHARLES O. PORTER

OF OREGON

IN THE HOUSE OF REPRESENTATIVES
Thursday, September 1, 1960

Mr. PORTER. Mr. Speaker, every Member of this House knows that the ugly head of politics is often seen in the U.S. post office.

However, a particularly glaring and offensive example has just been brought to my attention. Under unanimous consent following these remarks I am including a news item from the Wednesday, August 17, 1960, issue of the Potter Enterprise

It reports that applications are being received for three civil service jobs in the Coudersport Post Office and, please note, this is being announced jointly by the postmaster and the chairman of the Potter County Republican Committee.

This certainly exceeds the bounds of permissible political activity. We know that a political decision is made as to the appointment of certain rural carriers and we know that a political decision is made among the top three in the examinations for postmasters.

Since when, I ask, did the Republican county chairmen have anything to do with civil service jobs of this sort described in this news item? It is apparent that at least in Potter County the Republican chairman has a great deal to do with such appointments. This is an affront in the civil service system and I am bringing the matter to the attention of Roger Jones, Chairman of the Civil Service Commission, with the recommendation that he take appropriate action without delay.

I know it would do no good to bring it to the attention of the Postmaster General, because Mr. Summerfield's involvement in Republican politics has long been a burden on the postal service

and I would expect no sympathetic cooperation from him, however flagrant the violation.

It is my hope that one of these days soon we will be able to take the Post Office out of politics completely and to have its personnel operate without such influences.

The news item follows:

[From the Potter Enterprise, Aug. 17, 1960] Examining Now for Civil Service Joes in Post Office

Applications are being received for three civil service jobs in post office work at Coudersport it has been announced jointly by Francis P. Golden, postmaster here, and Earl Brecher, Galeton, chairman of the Potter County Republican Committee.

Starting salaries of \$3,670 for a custodial laborer; \$1.69 an hour for a janttor, and \$1.64 an hour for a charwoman are subject to yearly increases.

"These positions offer high job security, regular salary increases, excellent vacation, paid sick leave, low-cost life insurance, fringe benefits in the form of low-cost hospitalization plans, and liberal retirement," a notice from U.S. Civil Service examiners said.

Competition in the examination is restricted by law to persons entitled to veterans' preference, and others will not be considered.

Further information and application forms may be obtained at the Board of U.S. Civil Service Examiners, room 215, main post office, Harrisburg, Pa., or at the local post office. Applications must be received on or before August 31.

### De Gaulle Is Right

EXTENSION OF REMARKS

OF

### HON. EMANUEL CELLER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES
Thursday, September 1, 1960

Mr. CELLER. Mr. Speaker, at his recent press conference in Paris, President de Gaulle made some very constructive suggestions which show deep understanding of the many complex international problems with which the world is now confronted, and a keen desire to do something about them.

Pointing out that Khrushchev and his Red cohorts have injected themselves, with their ideology and military strength, into Africa, the Middle East, southeast Asia, and even the Western Hemisphere, President de Gaulle wants the United States, Great Britain, France, and their allies to meet this menace head on. He sees danger in our lack of unity, and urges that our differences be ironed out so that we may act as a strong, united front.

Although he does not say it in so many words, his meaning is clear. Washington must wake up to the realization that sinister forces are in motion. Russian planes and so-called technicians in the Congo, and the threat to supply Cuba with rockets are indeed cause for anguish and trepidation. And all we hear from the administration in Washington are pious words of protest. Words, words, and more words. But no action. Words

will accomplish nothing. Nor will startled reactions or verbal answers to Khrushchev's propaganda moves avail us anything.

We must take the initiative. We must force Khrushchev to dance to our music. We must take strong diplomatic action that will startle Khrushchev and make him worry about what to do next. His massive propaganda machine must be halted. I have enough faith in our American people to believe that there are plenty of ingenious minds in Washington who can conceive ways and means of silencing Khrushchev.

President de Gaulle very rightly stressed the necessity on the part of the United States, Great Britain and France to organize politically and strategically, not only on behalf of the democracies of Europe. It is vital, he emphasized, that the Western Powers broaden their horizons and concern themselves also with Africa and the other trouble spots of the world.

Fifteen new nations, all in Africa, have been recently admitted to the United Nations, and several more will gain membership before the end of the current year. We must focus our attention on these nations. We must act to prevent inroads upon them and subjugation by the Soviets.

As it is now constituted, NATO cannot cope with these problems. The first decade of NATO's existence has ended. The world situation has changed immeasurably in these last 10 years, and the organization of NATO must be changed accordingly. It must be revised to meet new conditions. In the words of General de Gaulle, it must be "reactivated." All NATO forces, he says, must revise and coordinate their policies to include not only the continent of Europe, but other parts of the world as well, particularly Africa and the Middle East.

The French President places great emphasis—and rightly so—on the importance of such revision because we cannot afford to allow the aggressive actions of Khrushchev—both overt and covert—in Africa, Cuba and the underdeveloped areas, to go unchallenged. Our course of action will require the greatest tact, courage and resourcefulness. To quote President de Gaulle once more, "Divided councils are dangerous. We cannot afford to go our separate ways, nor can we afford the luxury of rivalry among ourselves."

I do not blame De Gaulle for refusing to subordinate French sovereignty to either a united Europe or a NATO. He would like to see France as a coordinate member of a European confederation in which England is also included. I firmly believe that we should encourage this idea. Our greatest strength lies in a European entity-a continent of nations. each maintaining its own identity and sovereignty, but at the same time cooperating in mutual defense, economic welfare, diplomatic and political matters on an international basis, and in cultural affairs. Such a confederation would have a deliberative assembly made up of delegates from the national parliaments of the respective member countries

General de Gaulle is also correct, in my opinion, in brooking no interference on the matter of Algeria. That country has been an integral part of Metropolitan France for more than 130 years. France has poured her lifeblood and billions of dollars into Algeria. And, if left to her own devices, she will settle her differences with the Algerians without any help or advice from other countries or the United Nations.

We Americans should readily understand De Gaulle's testiness when France is criticized for her policy on Algeria. Suppose we were confronted with cries of independence from Hawaii and Alaska, and France, together with other nations, applauded such efforts. How would we react? What would we say? Would we be complacent or resentful?

There is no doubt that we would firmly resist such a movement for independence on the ground that both Alaska and Hawaii are integral parts of the United States. This is what France claims for Algeria—that it is part and parcel of France. And, just as France maintains, we would tell the world that we will settle our own affairs without the gratuitous counsel of the United Nations.

The carving out of new nations into geographical entities regardless of tribal groupings and affiliations, and the granting of independence without adequate preparation for the responsibilities of democratic government have created new world problems. We must revise our thinking with regard to the precipitous and indiscriminate granting of independence to countries not qualified to cope with it. This is grist for the Communist mill.

I admit that we cannot compare the Algerian Moslems with the Congolese. There is a vast difference in mores, education, background, and ability, to the advantage of the Algerians. But there is a similarity in the complex problems between the French, or Belgians, or European settlers on the one hand, and the civil servants and indigenous populations on the other.

President de Gaulle is trying every possible means of arriving at a just solution by which the Moslems and French can live side by side, safely and harmoniously, in mutual trust and respect.

The United States must refrain from criticizing or interfering with France or Algeria. Let us not become part of an Afro-Asian-Communist anti-French bloc. Let us, rather, stand resolutely behind our oldest, time-honored ally, the Republic of France.

Finally, we must treat France as a trusted ally and not hesitate to share with her our atomic secrets. To continue our policy of informing Great Britain and depriving France of our atomic knowledge causes needless irritation and bitterness and does not redound to our security. We must promptly remedy this situation.

# Ludwig Erhard Calls for Boycott Against East Germany

EXTENSION OF REMARKS

### HON. EMANUEL CELLER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES
Thursday, September 1, 1960

Mr. CELLER. Mr. Speaker, I am very happy to insert in the Record an article concerning Acting Chancellor Ludwig Erhard, of West Germany, a dedicated public servant of the West German Republic and a gentleman for whom I have the highest regard. The article appeared in the Chicago Sunday Tribune and is as follows:

ERHARD CALLS FOR BOYCOTT AGAINST EAST— NO OFFICIAL REPRISALS PLANNED, HE SAYS

BERLIN.—Acting Chancellor Ludwig Erhard called Saturday for a voluntary boycott on trade with East Germany in reprisal for Communist restrictions on travel in divided Berlin.

He said, however, the West German Government does not plan any official action despite the urging of Mayor Willy Brandt and other West Berliners for Bonn to strike back with a Government trade cut. He took his stand on a voluntary, rather than an official, basis.

"We have no intention," Erhard told the Foreign Press Association of Berlin, "to meet force with force and lawlessness with lawlessness."

NO TALK OF FIGHT

He said he had never spoken of countermeasures and had no idea where the talk came from.

On Thursday, Communist East Germany announced that West German citizens would need special permits to visit East Berlin. An average of 2,000 a day make such visits normally. Foreigners and Berliners themselves were not affected by the rule.

The Western Powers who garrison the isolated city protested on Friday to the Russian general in charge that the travel restriction violates four-power agreements. As usual in such cases, a reply was delayed.

LOOK FOR MORE

The chancellor said a whole list of German firms had promised, without being asked, that they would not use the permits even if they got them free and postpaid.

Brandt and many Berliners had been looking for more than this. They want something official done against exports to East Germany—much of it iron and steel for the Communists 7-year plan.

Erhard is acting chancellor during the vacation in Italy of Chancellor Konrad Adenauer. He belongs to Adenauer's Christian Democratic Party, which has strong business support, and hopes to succeed him. Brandt, a Socialist, expects to be fighting Adenauer for the chancellorship next year.

Erhard will preside at a special cabinet meeting on Monday on the Berlin problem. The cabinet is expected to discuss countermeasures to the Russian squeeze, but Erhard said he preferred not to dramatize the matter. His Government, he told the reporters, has no intention of asking for legal power to force businessmen into a stand against the east. MAY BLOCK SHIPS

Informed sources in Bonn said the cabinet also would consider denying East German vessels entry to the Elbe River, which flows from East to West Germany. This, like any other official action, would probably lead to counterreprisals, which Erhard apparently wants to avoid.

# Altmeyer Calls for Medical System in Social Security

EXTENSION OF REMARKS

# HON. ROBERT W. KASTENMEIER

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES
Thursday, September 1, 1960

Mr. KASTENMEIER. Mr. Speaker, this Congress has enacted new social security legislation, and it will be my pleasure on Labor Day to introduce to the working men and women of Madison, Wis., the one man who has made the greatest contribution to the success of this program since its establishment 25 years ago. This man is Dr. Arthur J. Altmeyer, who served as Commissioner for Social Security under both Presidents Roosevelt and Truman.

In his Labor Day address, Dr. Altmeyer, considered by many as the father of social security, expresses his hope that the next Congress will enact into law a genuine health insurance measure to protect at least the retired workers and, he hoped, also the disabled workers, widows and orphans. In addition, Dr. Altmeyer outlines a number of major improvements in the social security and Federal-State unemployment insurance programs which he believes are overdue.

His excellent and thought-provoking address is must reading for every Member of Congress who is genuinely interested in these two programs. Under leave to extend my remarks in the Record, I include the full text of his address:

ALTMEYER CALLS FOR MEDICAL SYSTEM IN SOCIAL SECURITY

A quarter of a century has elapsed since I stood on the cold, rainswept steps of the Capitol and heard Franklin Roosevelt say "I see one-third of a Nation ill housed, ill clad, ill nourished." If he were alive today he would tell us that a very large proportion of the Nation is still in want of the basic necessities of life. Since 1952 the cold statistics show that the number and proportion of American families trying to survive on an income of less than \$1,000 a year (measured in constant 1950 dollars) has actually increased. On this very day 7 million Americans are obliged to accept public assistance to cover their basic human needsmaking a grim mockery of boasts of universal prosperity.

During the last 25 years we have miserably failed to achieve the great goal envisioned by Franklin Roosevelt—the abolition of poverty in America, the righest Nation in

the world. We can, if we really want to, achieve this goal in far less time than another quarter of a century. And social security can be our chief tool in making certain that a portion of our ever-increasing abundance is actually dedicated to this great

social purpose.

We have succeeded during the last 25 years in proving that it is possible to establish and administer successfully a nationwide system of old-age, survivors and disability insurance. We have done this in spite of the vicious political allegations that it constituted a fraud on the workingman and a cruel hoax. We need only to take advantage of the experience gained in the development of this great social insurance system to achieve a truly adequate and comprehensive contributory social insurance system which would protect all workers against all major personal economic hazards-not only economic old age, death of the breadwinner, permanent disability and unemployment, but also temporary disability and the cost of medical care.

The great gap in our Social Security Act is that it provides no protection whatsoever against loss of wages and the cost of medical care due to nonoccupational sickness and accident. It is inevitable that eventually we shall have a general system of health insurance protecting all workers against this hazard. Fifty-nine other countries already have this form of social security in effect. How soon this will occur and what form of organization will be developed in this coun-

try is impossible to predict.

But arguments for and against a general system of health insurance should not delay our taking immediate action to provide this form of protection to the 14 million retired workers, disabled workers, widows, and orphans whose need is so great and whose financial resources are so small. Nevertheless, the sad fact is that just 2 weeks ago today the Congress of the United States killed the Kennedy-Anderson amendment to the social security bill which would have provided health insurance for retired workers as a matter of right under the Federal old-age, survivors, and disability insurance

While this particular amendment is dead, the problem remains and the issue it raises is very much alive. As a matter of fact, the Democratic presidential candidate has announced that he will make it a major issue in his campaign. Therefore, it is important that the American people, in addition to knowing what the fundamental problem is, should also know what the immediate issue is.

The American Medical Association and the commercial health insurance companies contend that there is no need for providing health insurance to retired workers, disabled workers, widows, and orphans because private health insurance already protects such a large proportion of the population. It is true that a large proportion of the population does have some form of health insurance. Unfortunately, much of this insurance is very limited in its coverage. The result is that only about 25 percent of the total private expenditures for medical care made by all the people in the Nation is actually covered by private health insurance. Still more unfortunate is the fact that more than half of the people over 65 years of age, three-fifths of those on farms and twothirds of those with income under \$2,000 a year, have no insurance whatsoever against medical care.

The 14 million retired workers and their Wives, disabled workers, widows and orphans now drawing monthly cash benefits under the Federal old-age, survivors, and disability insurance system are in particular need of protection against the cost of medical care. Not only is their need for this protection Obvious, but the impossibility of meeting this need in any other way is also clear. Surveys have established that their income is insufficient to purchase adequate health insurance protection either from commercial insurance companies or from nonprofit prepayment plans. Only through collecting a small contribution based upon the wages of insured workers during their working years can this protection be financed when they become old or disabled or when they die leaving dependents. It is then too late to collect a premium because their wage income has ceased. Moreover, in the case of the older persons the cost is greater at that time because of the greater amount of sickness which they suffer.

"The cost of administering these health insurance benefits as a part of the Federal old-age, survivors, and disability insurance system would be small. The centralized recordkeeping system and the nationwide net work of local offices would, of course, be used for determining eligibility. Likewise, nonprofit cooperative, prepayment medical care plans which provide hospital and medical services would be utilized to the fullest They would be reimbursed for the cost of the services they rendered, in accordance with rates mutually agreed upon, which would constitute full payment for such services. This would strengthen and stimulate the growth of nonprofit plans which are now confronted with the necessity of rejecting low-income, high-cost families, or charging them higher rates than they can afford to pay, or spreading the cost over all contribu-Commercial insurance companies would be little affected by such a plan since it would protect the groups that they have not found it feasible or profitable to protect adequately.

The proposal by the present national administration, which Congress fortunately rejected, pretended to be an insurance plan. However, in fact it was a thinly disguised public assistance plan, which had all of the disadvantages of public assistance without providing as much protection. Not a single elderly person would have received any protection whatsoever under the administration's plan, unless he first passed an income test and unless he happened to live in a State whose legislature was willing to appropriate sufficient funds to carry out the plan. Even then he would have had to pay an enrollment fee and a premium in addition, unless he was eligible for public assistance on the basis of proven need.

The bill that did pass Congress merely provides additional Federal funds to the States for old-age assistance which they furnish in the form of medical care. Elderly people who are in need of medical care must prove to the welfare department that they do not possess sufficient income and re sources to pay for such care. In a State like Wisconsin which already furnishes necessary medical care to such persons it is probable that the only result will be that the State of Wisconsin and the counties will receive almost \$3 million a year more from the Federal Government. But persons with low incomes who do not submit to and pass the needs test required by the welfare partment will receive no protection what-Therefore, this bill is by no means soever. a satisfactory substitute for a health insurance plan, just as old-age assistance paid on the basis of proven need is no substitute for old-age insurance paid as a matter of right. The only advantage this bill has over the administration's proposal is that it does not pretend to be something that it is not.

I believe that the next Congress will pass a genuine health insurance measure to protect at least retired workers, and I would hope, disabled workers, widows, and orphans as well. I believe this because a major argument made in the Senate against the Kennedy-Anderson bill was that it was sure to

be vetoed by President Elsenhower. Since only five more votes were needed to pass the health insurance amendment, it seems probable that when the threat of a Presidential veto is eliminated there will be sufficient votes to pass such a measure.

Besides amending the Social Security Act to provide these health insurance benefits. there are a number of other major improvements that should be made, which I can only mention:

As regards old-age, survivors, and disability insurance, four major improvements should be made:

1. The general level of benefits should be increased by 50 percent instead of benefits for a retired or disabled worker averaging only one-third of his wage loss they should average 50 percent-and wives, widows, and orphans' benefits should be increased proportionately.

2. The coverage of this system should be extended to include all workers; and other retirement systems should be superimposed to provide additional protection.

3. Benefits should be paid for disabilities lasting more than 6 months without requiring a finding of permanent total disability.

4. A worker who defers retiring when he reaches the minimum retirement age should have his eventual monthly benefit increased by 4 percent a year.

Secondly, our present Federal-State Un-employment Insurance System should be fundamentally changed to assure that it actually provides adequate protection against unemployment to all unemployed workers. Today, for the Nation as a whole, benefits average only one-third of the wage loss. This is a smaller proportion than in 1939. Only two-thirds of the workers in this country are insured. Because of this exclusion and because of the short duration for which benefits are paid, only one-half of the unemployed workers today are actually receiving any benefits. The net result is that benefits cover only 20 percent of the total wage loss of the Nation's workers due to unemployment. To cope with this deplorable situation four major changes should be made:

1. The Federal Unemployment Tax Act should be amended to include basic benefit standards as regards percentage of wage loss compensated duration of benefits, and eligibility requirements.

2. The coverage of the Federal Unemploy ment Tax Act should be extended to include all employees covered by the Federal oldage, survivors, and disability insurance sys-

3. The Federal unemployment tax should be reduced from 3 percent to 1 percent and the present offset of 2.7 percent should be eliminated.

4. The Federal Government should use the proceeds of the 1-percent unemployment tax to make grants to the States covering one-half of the cost of benefits and administrative expenses. This would furnish a positive incentive to the States to provide adequate benefits and would spread the cost of benefits over a broader base, thus offsetting to some extent the undesirable effects of socalled employer experience rating.

These proposals that I have outlined will. of course, be attacked by those who are fundamentally opposed to social security as an essential safeguard of our American way of life. They will raise the old cry of exorbitant costs and destruction of individual initiative and thrift. Twenty-five years of successful experience with social security will not deter them. Actually, social security is not a cost but a social mechanism whereby existing costs are met in a more equitable and less burdensome manner. As a matter of fact, we are using a smaller proportion of our national income for health and welfare today than we did 25 years ago. A comprehensive social security system which provided basic protection to all workers against all major personal economic hazards would still involve a relatively small proportion of our national income.

The enemies of social security will undoubtedly resurrect the specter of something terrible called the welfare state. They should consult Thomas E. Dewey, who said in a lecture at Princeton on February 9, 1950, that "Anyone who thinks that an attack on the fundamental idea of security and welfare is appealing to the people generally is living in the middle ages. The man who first used the phrase against our present Government did his cause no good, to put it mildly."

It may be that those who use the term "welfare state" as an epithet have in mind a paternalistic welfare state whereas our goal in the United States is a cooperative state of welfare for the American people achieved by them through the use of their own democratic Government.

We are indeed fortunate in the United States of America that we do not have to choose between creeping socialism and galloping individualism. We need only to establish a basic level of well-being, which enables and encourages every American to build for himself and his family his desired standard of living through the well-known devices of savings, insurance and home ownership. In so doing we shall achieve not a dead level of uniformity but genuinely equal opportunity in a free America.

# Resolutions Endorsing the Narcotics Control Act of 1956

EXTENSION OF REMARKS

# HON. JOHN MARSHALL BUTLER

OF MARYLAND

IN THE SENATE OF THE UNITED STATES

Thursday, September 1, 1960

Mr. BUTLER. Mr. President, on August 31, I spoke on the floor of the Senate regarding the effectiveness of the Narcotics Control Act of 1956 as a statute dealing with penalties to be imposed upon illegal narcotic sellers and users. Under the administration of the Bureau of Narcotics of this act it has been shown that the incidence of narcotic violations has appreciably declined. A number of organizations within the State of Maryland have, by resolution, endorsed the Narcotics Control Act of 1956 and I ask unanimous consent that copies of these resolutions be printed at this point in the RECORD, and that they be added appropriately to my speech in the bound volume as a permanent record.

There being no objection, the resolutions were ordered to be printed in the RECORD, as follows:

CARE AND REHABILITATION OF DRUG ADDICTS (Resolution adopted by the General Federation of Women's Clubs at international convention and 69th annual meeting, Washington, D.C., June 15, 1960)

Whereas the declaration of the Congress of the United States, the United Nation's Commission on Narcotic Drugs, and the National Research Council, is that narcotic drugs should not be used to gratify addiction; and that in the treatment of drug addiction methods of ambulatory treatment and open clinics are not advisable; and

Whereas it is realized that the sale and use of narcotic drugs should be strictly limited to medical needs and that experts in treatment of narcotic addiction have re-

peatedly emphasized that most addicts cannot be treated effectively and rehabilitated unless required to submit to legal restraint in closed institutions; and

Whereas the General Federation of Women's Clubs is in opposition to proposals which advocate experimentation with established facilities for legalized distribution of narcotic drugs to addicts for maintenance of their addiction; and

Whereas it is noted that signal progress has been made in the United States, particularly in those States where there is rigid enforcement of severe and mandatory laws, which has resulted in a marked reduction of drug addiction and in deterrence of unlawful sale of narcotics: Therefore

Resolved. That the General Federation of Women's Clubs strongly urges compulsory hospitalization for addicts where facilities are available in the effort to cure, to rehabilitate, and to prevent further addiction; and further

Resolved, That the General Federation of Women's Clubs urges the Congress of the United States to maintain the provisions of the National Narcotics Restriction Act of 1956.

RESOLUTION OF THE AMERICAN LEGION, DE-PARTMENT OF MARYLAND

Whereas the Congress of the United States, the United Nations Commission on Narcotic Drugs, and the National Research Council have found that methods of ambulatory treatment and open clinics for drug addicts are not advisable; and

Whereas treatment in closed institutions has proven to be the only effective way to treat and rehabilitate narcotics addicts because most of them require legal restraint for treatment; and

Whereas rigid enforcement of severe and mandatory penalties for violators has resulted in a marked reduction in drug addiction and deterrence of unlawful sale of narcotics in Maryland; and

Whereas we believe that compulsory hospitalization for all addicts is the only hope for successful treatment and/or rehabilitation; and

Whereas the compulsory hospitalization prevents these infected persons from spreading addiction: Now, therefore, be it Resolved by the American Legion, Depart-

Resolved by the American Legion, Department of Maryland, Inc., That we go on record this 21st day of February 1960, against any change in the existing laws regarding drug addiction which would tend to decrease or mitigate mandatory penalties in drug cases; and be it further

Resolved, That we oppose establishment of any open clinics for drug addicts.

RESOLUTION OF THE WOMEN'S CIVIC LEAGUE, INC., BALTIMORE, MD.

JUNE 30, 1960. Hon. George W. Della.

Chairman, Legislative Council, State House, Annapolis, Md.

DEAR SENATOR DELLA: We have been informed that consideration is presently being given in some quarters to legislation which would provide for the treatment of narcotics addicts on a day clinic or outpatient basis. The Federal Narcotics Bureau has advised us that it vigorously opposes any such move and is of the firm opinion that the only effective method of giving any real help to the unfortunate victims of addiction is through treatment while in institutional confinement.

According to the Federal Narcotics Bureau, Maryland laws providing for such institutional care are among the best in the country and by all means should be preserved in their present form. We, therefore, urge that any proposals which might tend to weaken or undermine Maryland's existing legislation in this field be strongly resisted.

Very truly yours,
Mrs. Russell C. Wonderlic,
President.

RESOLUTION OF THE MARYLAND LAW ENFORCE-MENT OFFICERS' ASSOCIATION, INC.

Considering the declarations of the Congress of the United States, the United National Commission on Narcotic Drugs, and the National Research Council that in the treatment of drug addiction methods of ambulatory treatment and open clinics are not advisable; and

Realizing that treatment in closed institutions is the only effective way to treat and rehabilitate narcotic addicts because most of them require legal restraint to submit to treatment; and

Deploring the joint action of certain groups in advocating experimentation with narcotic clinics for legalized distribution of narcotic drugs to addicts for maintenance of their addiction, thereby extending an open invitation to indulgence in drug abuse with its concomitant moral degradation, as a grave threat to the health and welfare of our teenagers; and

Noting that rigid enforcement of severe and mandatory penalties for violators has resulted in a marked reduction in drug addiction and in deterrence of unlawful sale of narcotics in Maryland: The Maryland Law Enforcement Officers' Association, Inc.

Recommends compulsory hospitalization of all addicts as the only possible hope of successful treatment and rehabilitation and to prevent these infectious persons from spreading their pernicious habit; and

Recommends no change in the mandatory penalties as stated in the Uniform Narcotic Drug Act of the State of Maryland; and

Approves that a copy of this resolution be sent to the Maryland Legislative Council Committee on Narcotics; to the Honorable J. Millard Tawes, Governor of the State of Maryland; Mr. George W. Della, president of the Maryland Senate; and to Mr. Perry O. Wilkinson, of the Maryland House of Delegates.

### On Strike

EXTENSION OF REMARKS

OF

### HON. ROBERT W. KASTENMEIER

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES
Thursday, September 1, 1960

Mr. KASTENMEIER. Mr. Speaker under leave to extend my remarks in the Record, I include the following editorial which appeared in the Washington Post on Sunday, August 28. This deals with the problems of the House Rules Committee. No comment is necessary except that at the beginning of the next session of Congress it is intended that basic changes will occur in the structure of that committee.

### ON STRIKE

Many citizens who believe profoundly in representative government must have been shocked to read the other day reports of an agreement among the six conservative members of the House Rules Committee not to grant any rule that would permit any of the controversial bills within its grasp to be enacted. In other words, this little coterie of would-be dictators is said to have conspired to sabotage the August session which had been authorized by both Houses for the completion of vital legislation. Scandalous though this appears, it is routine practice for the Rules Committee.

It is true that the alleged conspiracy broke down in respect of the minimum wage bill, but it appears to have held fast in regard to the school construction and housing bills. Both the Senate and the House had passed bills providing Federal aid for the construction of schools. The little tyrants of the Rules Committee wrecked all the effort that had gone into this legislation by withhold-ing consent to a Senate-House conference. The House was never permitted to vote on the housing bill.

This illegitimate minority strike against even moderate legislation that a majority approves is the more irritating because it flies into the face of the Democratic platform and grossly violates Speaker RAYBURN'S assurances that the committee would not block important bills in the present session. Despite the fine promises, the committee has demonstrated once more that it is a gas chamber for liberal legislation, and there is no good reason to suppose that it will change so long as the House is willing to tolerate its obstructionism.

Reform of the Rules Committee thus seems to be imperative regardless of who may be elected President in November. In view of the shabby way in which the committee has let him down. Speaker RAYBURN might well lead the fight for reform when the new Con-This would not necessarily gress assembles. mean a restoration of the 21-day rule that was in effect from 1949 to 1951. That device, which permitted legislative committees to carry their bills to the floor for a vote when the Rules Committee failed to act on them for 21 days, proved to be a useful weapon against obstruction. But it still would fall short of making the Rules Committee a responsible tool of the House leadership.

Some students of House procedure here advocated that the Rules Committee be replaced by a majority policy committee to be chosen by the majority party caucus at the beginning of each new Congress. If such a committee were then allowed to select its own chairman, it would probably reflect the will of the majority party in the House about as well as any small group could. It could therefore be trusted to recommend rules that would clear the way for the majority party program instead of using the rulemaking power to thwart important legislation which does not happen to coincide with the whims of a Rules Committee chairman elevated to that powerful post by the accident of his seniority.

The principle of making the Rules Committee responsible to the will of the House is far more important than any particular Liberal Members of the House are well advised to begin now to plan for some effective means of relief next year. In our opinion, they will have a large majority of the informed people with them.

# Twentieth Anniversary of the Ukrainian Congress Committee

EXTENSION OF REMARKS OF

### HON. EMANUEL CELLER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. CELLER. Mr. Speaker, I am pleased to insert in the RECORD the following message sent by me to the chairman of the Ukrainian Congress Committee of America, Inc., on the occasion of this committee's 20th anniversary:

Mr. Lev E. Dobriansky, Chairman, Ukrainian Congress Committee of America, Inc., New York, N.Y.

DEAR MR. DOBRIANSKY: I am happy to join with millions of Americans in marking the 20th anniversary of the Ukrainian Congress Committee of America.

There can be no doubt that the 20 years of work of your committee has been of ines-timable value, not only to the 2½ million Americans of Ukrainian ancestry, but to all Americans who cherish the ideals of freedom and dedication to the good fight.

Your committee has been an unfailing source of accurate information concerning the captive nations who cannot speak for themselves.

In appreciation,

Sincerely.

EMANUEL CELLER.

### United States-Israel Cooperation

EXTENSION OF REMARKS OF

# HON. HUBERT H. HUMPHREY

OF MINNESOTA

IN THE SENATE OF THE UNITED STATES Thursday, September 1, 1960

Mr. HUMPHREY. Mr. President, I ask unanimous consent to have printed in the Appendix of the Record a statement by me on United States-Israel cooperation.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR HUMPHREY

As sponsor of the food for peace program and being deeply interested in finding marabroad for America's agricultural abundance, I derive great satisfaction when I hear of a situation that contributes greatly to the sale of surpluses, utilizes the proceeds of such sales for expansion loans and makes an outstanding contribution to the development of a friendly nation.

We find such a situation in Israel, the biggest per capita market for U.S. grain exports in the world. In 1959 U.S. wheat, feedgrain, and soybean exports to Israel had an f.o.b. value of more than \$44 million. Of this, approximately \$25 million were local currency sales under Public Law 480. Dollar barter, and section 402 sales totaled about \$19 million. The export of this volume of grains to any country is of considerable interest to the farmers of Minnesota and other grain producing States.

Practically all of these U.S.-exports move into Israel through the Dagon Silo at Haifa. This facility has benefited from the Cooley amendment to Public Law 480 and contributes to the economy of the country by greatly reducing foreign exchange costs. believe the Senate should know more about this meaningful and interesting project.

As the visitor to Israel approaches Haifa, by land or by sea, his eye will certainly be caught by the esthetically designed "sky-scraper" near the harbor and next door to the railroad station. This is the Dagon Silo, the tallest-almost 200 feet-building in Israel and, based upon its performance record, one of the busiest. But it is not its height nor its artistic design that is of primary interest. Rather, it is the relationship of the functions of this building and the company that operates it to American-Israeli economic cooperation that is dramatic.

With a 51-year concession from the Government of Israel for operation in Haifa Harbor, this facility was incorporated in 1951. The present 20,000-ton silo was completed in the summer of 1955. A model of efficiency, Dagon is also a monument to free enterprise in operation and international financing, including American.

Dagon's American economic ties include the participation by many American invest-ors; the handling of hundreds of thousands of tons of American wheat, feed grains, and soybeans purchased for dollars, bartered for industrial diamonds, and bought under the provisions of Public Law 480; and the expansion of its present facilities through a loan from the Export-Import Bank under the Cooley amendment provision of Public Law 480

Dagon was founded by Dr. Reuben Hecht of Basel, Switzerland. Dr. Hecht, whose family has handled grain for generations throughout Europe, lives in Haifa and personally directs the operations of Dagon. Hecht is also the largest individual investor in the enterprise. Investors include Israeli, Swiss, American, Canadian, and Mexican shareholders. One hundred and eighty-four American investors have subscribed to both capital and 10-year loan certificates of Dagon. Of the total investment in Dagon, that from America amounts to 34 percent. For the past years, investors have received dividends of 8 percent per year on share capital.

Because of the importance of the Dagon facility in moving American agricultural products—wheat, feed grains, and soybeans— Dagon applied for, and received, an Export-Import Bank loan of I£1.550.000. This is being used to construct new bins and elevators which will more than double its current capacity. By October 1960, Dagon will have a capacity of 44,000 tons. Further expansion to 70,000 tons is planned in the near future.

The Dagon silo, in 1959, handled a greater turnover relative to its capacity than any other silo or grain elevator in the world. With a total capacity of 20,000 metric tons. the facility discharged and loaded 74 vessels. carrying 659,858 tons of grain, almost 33 times its capacity. This compares with a U.S. record of 20 times capacity, and a European record (in the port of Rotterdam) of 7 times capacity.

This efficiency was recently rewarded when the Israel Institute of Productivity of the Ministry of Labor awarded both Dagon and Dr. Hecht the 1960 Eliezar Kaplan Prize for

On a per capita basis, Israel is the United States most important customer for wheat and soybeans and the second most important for feed grains. Soybean imports, none of which are purchased for local currency, amount to 3 bushels per person. The second highest per capita importer is Denmark at 1.5 bushels.

In 1959, U.S. exports of grains to Israel

	Metric
	tons
Wheat	192,700
Feed grains	334, 900
Sovbeans	176, 200

When a grain vessel docks, the long sucker tubes are placed in the vessel's hold, and within minutes, the grain flows over an endless belt through a raised tunnel clearing the docks and railroad tracks into the elevator proper. Discharge is at the rate of up to 265 tons per hour and 5,000 tons per day is not unusual. Once in the bins, grain can be bulk loaded into railroad cars or specially designed truck bodies for inland movement. Facilities are also available for bagging. The entire operation is directed from a master control center in the office section of the building. A huge electronic board indicates at all times the status of grain loading and unloading.

The office building, incidentally, contains interesting archeological exhibits developed by Dr. Hecht, who is recognized as one Israel's outstanding amateur archeologists.

The ability to handle grain in bulk rather than in bags has resulted in substantial savings to the Israeli economy. It is estimated that for 1959, the Dagon facility saved the Israeli economy \$2 million in foreign exchange and I£2.5 million in local currency. The savings resulted from (1) shifting grain handling from bags to bulk; (2) virtually eliminating demurrage costs; (3) earned dispatch; and (4) reduced vessel turnaround time, allowing the lowest possible freight rates for charters.

American visitors to Israel should include on their itineraries a trip to the Dagon Silo. Such a trip will dramatically demonstrate how economic cooperation between Israel and the United States benefits both nations. Most important of all is this living demonstration of how we do use our agricultural surpluses in a positive and valuable manner, how we help ourselves to enlarge our markets and how we cooperate with free people in common endeavors.

# The Challenge of the 1960's: Education— Our Greatest Nonmilitary Crisis

EXTENSION OF REMARKS

# HON. FRANK KOWALSKI

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES
Thursday, September 1, 1960

Mr. KOWALSKI. Mr. Speaker, I am proud to have been a cosponsor of the Murray-Metcalf bill, which would have made Federal funds available to the States for school construction and teachers' salaries.

I have said many times, and I say again that, except for our very survival as a nation, there is no more important issue facing America today than the crisis in education. Only with a broad Federal program to supplement the work of the States and local communities can we meet that crisis.

If I am returned to Congress by the voters of Connecticut, I shall again submit my education bill, H.R. 4379, which is identical with the Murray-Metcalf bill and which will provide the means to meet our school crisis.

It is significant that the deciding vote in the Senate against the provisions of the Murray-Metcalf bill—as contained in the Clark amendment—was cast by the man who is now the Republican candidate for President—Vice President Nixon. His vote against Federal funds for school construction and teachers' salaries is typical of the administration's cynical attitude toward education, as demonstrated so often during the past 8 years.

The administration's failure to take decisive action has contributed in large part to the worsening of our crisis in education.

FACTS ON THE SCHOOL CRISIS

We have good reason to be alarmed about our school problem, Consider these facts:

We have a shortage of more than 130,000 classrooms.

One school in every five is an antiquated firetrap and another one in five is on the safety borderline.

Classroom shortages are impairing the education of 10 million children, according to the administration's Secretary of Health, Education, and Welfare.

We have a current shortage of more than 135,000 teachers.

More than half the classrooms in urban districts now have more than 30 children each, although most educators agree that grammar school classes should contain no more than 30 pupils and high school classes no more than 25.

Almost 100,000 teachers—or over 7 percent of all teachers in the country—have only temporary or emergency teaching certificates.

THE YEARS AHEAD

These facts are sobering enough, but the problem will become even more critical in the next decade.

By 1970 we will need 1,500,000 new teachers—at a minimum—which means 150,000 new teachers a year for the next 10 years.

We must provide facilities for more than 20 million additional students in our schools.

Our colleges must erect more new buildings in the next 10 years than they built in the previous 200 years.

SCHOOL NEEDS NEGLECTED

During the past 8 years, our school needs have grown more and more acute.

States and local communities have strained their resources to provide for the ever-increasing school population, but the Federal Government has shirked its responsibility.

State and local spending for education increased from \$7.2 billion in 1950 to \$15.8 billion in 1958. During this same period, States and local communities increased their bonded indebtedness from \$24.1 billion to \$58.1 billion, with much of this new debt resulting from school construction. In depressing contrast, all Federal expenditures for education in 1958 totaled \$917 million.

Many communities have raised their taxes virtually to the limit but still have been unable to keep up with their school needs.

Half-day sessions mean part-time education, and too many of our children are penalized through the shortage of adequate classroom facilities,

RISING COSTS HURT

Mounting construction costs during the past 8 years have been a key factor in the classroom shortage. Building costs have climbed 42 percent during the present administration.

High interest rates resulting from the tight-money policy have meant higher costs for local communities and school districts. Interest rates on State and local bonds are 91 percent higher than they were in 1952.

In 1952, total interest charges on 30year bonds for \$500,000 grammar school were \$164,000. Today they amount to \$314,000.

Higher construction costs and higher interest rates have contributed their share to the crisis in education.

OPPOSITION TO SCHOOL AID

Opposition to Federal aid is often based on the claim that it would result in Federal interference with local control of education.

All the major bills, including the Murray-Metcalf bill, contain specific prohibitions against any control from Washington, Full supervision of schools would remain in local hands.

The history of education legislation proves such a fear to be groundless.

Federal assistance for land-grant colleges has been in effect since the days of the Civil War without any claims by the States of interference from Washington.

The Defense Education Act has made Federal funds available for special educational purposes without bringing any allegations that the Federal Government is interefering with State or local rights.

Likewise Public Laws 815 and 874, which provide Federal aid for schools in impacted areas, have been administered without lessening, in the slightest degree, full local control of schools.

MEETING THE CHALLENGE

First. To meet the challenge in education, we must first make Federal funds available to the States for school construction and teachers' salaries.

Second. We must establish a broad Federal program of scholarships and loans to insure that every qualified young American has an opportunity to complete his education regardless of his family's income. It is tragic that in a nation of our vast wealth there should each year be 100,000 talented young people, ranking in the top quarter of their high school graduating classes, who cannot go on to college for lack of funds.

Third. We must improve and expand the Defense Education Act.

Fourth. We must provide for Federal assistance to colleges and universities to help them provide the academic facilities and living quarters that are needed in the decade ahead.

Fifth. We must establish adequate programs for vocational education, adult education, private libraries, use of new techniques including educational television, and exchange of teachers and students with other countries.

Our children are our most precious possession. It is unthinkable that we should continue to shortchange them and dim their future.

We must keep faith with our children, and with America.

# Beef and Pork Imports

SPEECH

# HON. LEONARD G. WOLF

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Monday, August 29, 1960

Mr. WOLF. Mr. Speaker, in connection with my earlier remarks in the House concerning the effects of meat imports on the domestic economy, I would like to point out that under our present law it is impossible for livestock producers and feeders to secure any relief from the Tariff Commission, even if they can show serious injury to their industry.

This fact was pointed up in a 4-to-2 decision on June 1, 1960, of the members of the Tariff Commission in the case of a petition made by the producers and feeders of sheep. In this instance, the Commission held, in effect, that any objection and showing of injury by imports

of carcass or frozen meat products would have to come, not from producers and feeders, but from the packers themselves. The impact of this decision that producers still would not be entitled to relief even if, in the future, they made a satisfactory showing of injury from imports is devastating. This situation is unrealistic and must not be allowed to

For this reason, I am introducing a bill which, if enacted, will overturn the above-mentioned interpretation in the future and provide that the producers and feeders of the live animals shall be considered interested parties under any escape-clause investigation and are included within the definition of "domestic industry producing like or directly com-

petitive products."

I realize that this bill has no chance for consideration by committee in this session of the Congress. I feel it important, however, to point up the need for prompt action in the next Congress to correct this grievous situation so that the producers and feeders-the people who can be really hurt the most—can be heard. My bill, therefore, is merely an expression of what I believe is the direction in which the Congress should go next year on this subjest.

The text of my bill follows:

A BILL TO AMEND SECTION 7 OF THE TRADE AGREEMENTS EXTENSION ACT OF 1951, AS

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the first sentence of subsection (e) of section 7 of the Trade Agreements Extension Act of 1951, as amended (19 U.S.C. 1364(e)), is amended by inserting before the period at the end thereof a comma and the following: "or any group of producers of the raw or processed agri-cultural or horticultural products from which any such products or articles are obtained."

# The Rx Legend: An FDA Manual for **Pharmacists**

EXTENSION OF REMARKS OF

# HON. HUBERT H. HUMPHREY

OF MINNESOTA

IN THE SENATE OF THE UNITED STATES

Thursday, September 1, 1960

Mr. HUMPHREY. Mr. President, I ask unanimous consent to have printed in the Appendix of the RECORD, an excellent and informative manual prepared by the Food and Drug Administration entitled "The Rx Legend" be inserted in the Appendix of the RECORD.

There being no objection, the manual was ordered to be printed in the RECORD, as follows:

THE RX LEGEND: AN FDA MANUAL FOR PHARMACISTS

"Caution: Federal law prohibits dispensing without prescription."

To a pharmacist, these words on a drug package have a deep significance.

They symbolize his responsibilities as a professional man.

They identify drugs that are not safe for self-medication and that legally may be dispensed only on the prescription of a duly

licensed practitioner. The licensed pharmacist is the legal custodian of such drugs.

These words, the Rx legend, thus join the power of the Federal law with the ethics of the medical and pharmaceutical professions.

Ethics and law require the pharmacist to refuse to dispense a drug when it would endanger the health or safety of the patient.

Knowledge, skill, and ethics have always been required for safe prescribing and dispensing of drugs. But today the need for ethics is greater than ever, because drugs are more potent than ever, and the consequences from misuse of drugs are more serious than ever.

A pharmacist is more than a purveyor of drugs-he is a member of the team of experts who have been scientifically trained to provide medical care to the people. As a consultant to the prescriber, and the custodian of drugs for the community, he is licensed by law to dispense them according to the prescriber's instructions and the requirements of law.

If we did not have the pharmacist, it would be necessary to invent him.

And if we did not have the Rx legend it would be necessary to invent it.

### THE DURHAM-HUMPHREY AMENDMENT

The Federal law referred to in the Rx legend is the Durham-Humphrey amendment. It is a part of the Federal Food, Drug, and Cosmetic Act, our national pure food and drug law. This is the law that stands back of the purity, potency, safety, and informative and truthful labeling of all drugs distributed in interstate commerce. Compliance with this law by reputable drug manufacturers makes it possible for the pharmacist to rely upon the safety and efficacy of the products which he sells or dis-penses to the public. The present Federal Food, Drug, and Cosmetic Act was passed in 1938 and the Durham-Humphrey amendment was passed in 1951.

Named for two pharmacist Members of Congress who sponsored it, the Durham-Humphrey amendment contains a legal definition of the kinds of drugs for human use that may be dispensed by the pharmacist only on the prescription of a practitioner licensed by law to administer such drugs. Thus it leaves to State medical practice laws and boards to determine who is qualified to prescribe drugs, just as State pharmacy laws and boards determine who is

qualified to dispense drugs.

It is illegal, under the Durham-Humphrey law, to dispense an Rx legend drug without a prescription, or to refill a prescription for an Rx legend drug without the authorization of the prescriber. Thus the law carries out the principle that the physician should control the amount of medication given to his patient. A prescription, or a refill authorization, may be transmitted by telephone, and such prescriptions and authorizations must be reduced promptly to writing and filed by the pharmacist. But certain nar-cotics are required to be dispensed only on prescription written by the doctor.

Prescription-restricted drugs are required by the law to be labeled with the Rx legend. and it is illegal to place this legend on drugs that are not so restricted. A fundamental purpose of Congress in the Durham-Humphrey law was to provide the pharmacist with clear guidance as to which drugs may not be sold without a prescription, and may not be refilled without the prescriber's authorization.

### KINDS OF RX LEGEND DRUGS

To dispense drugs legally, the pharmacist must be guided by the Rx legend on the

But it is worthwhile to know the three categories of prescription drugs defined in the Durham-Humphrey amendment:

<sup>1</sup> Title 21, United States Code, sec. 353(b).

1. Hypnotic or habit-forming drugs that are specifically named in the law, and their derivatives, unless specifically exempted by a regulation.

2. A drug which is not safe for lav use "because of its toxicity or other potentiality for harmful effect, or the method of its use, or the collateral measures necessary to its

3. A new drug which has not been shown to be safe for use in self-medication, and which, under the terms of an effective newdrug application, is limited to prescription

dispensing.

It should be borne in mind that the statutory definitions of prescription drugs apply not only to those which are toxic or habit forming but also to many other drugs which may be unsafe because a layman would not know how to use them properly. Many modern drugs even though safe insofar as inherent toxicity is concerned, must be stricted to prescription sale because of the conditions for which they are intended to be used and the diagnostic techniques and collateral therapeutic measures necessary to their use. For example, mephenesin, an antispasmodic, rarely causes side effects, but requires medical supervision for effective use.

In brief, Rx legend drugs are those that are not safe enough for a layman to use in self-medication. Therefore, the label of such drugs should not and does not contain detailed directions, precautions, etc., that would be needed by a layman to use the drug safely and effectively-indeed it would be impossible to provide such information, otherwise the drug would not be restricted to prescription.

The physician and the pharmacist, however, must have complete information about such drugs. Therefore, the law requires the manufacturer to furnish them with the information needed for proper use of the drug.

On the other hand, the labeling of a drug which is not restricted to prescription must bear adequate directions for safe and effective use and warnings against misuse that may be needed by a layman, and the distributor of an over-the-counter drug is required by law to provide such information in the labeling.

### OVER-THE-COUNTER DRUGS

Drugs that may legally be sold over the counter must bear a "7-point label":

1. The name of the product.

2. The name and address of the manufacturer, packer, or distributor.

3. The net contents of the package.

4. Active ingredients and the quantity of certain ingredients. 5. The name of any habit-forming drug

contained in the preparation.

6. Cautions and warnings needed for the protection of the user.

7. Adequate directions for safe and effective use.

The warnings on such drugs are particu-

larly important. Typical warnings tell:

How to use a medication safely, "Do not apply to broken skin"; "Do not exceed recommended dosage." When not to use it, "Do not drive or op-

erate machinery while taking this medication."

When to stop taking it, "Discontinue use if rapid pulse, dizziness, or blurring of vision occurs.

Other warning statements help to answer the important question: Should I see a

"If pain persists for more than 10 days or redness is present, or in conditions affecting children under 12 years of age, consult

a physician immediately."
A pharmacist must be familiar with the active ingredients and labeling of over-thecounter drugs he sells, as well as the drugs he dispenses on prescription. As the licensed expert on drugs, the pharmacist is professionally competent to answer the questions of his patrons about such drugs, without of course attempting to diagnose or to prescribe.

Any drug that does not bear the Rx legend can be sold without a prescription. The consumer has the responsibility for reading and heeding the directions and warnings, if any, which appear on the package, but the pharmacist may render a professional service by calling attention to such directions and Legally, the prescriber need not be consulted about refilling a prescription for a drug that does not carry the Rx legend. However, in the patient's interest a professional determination on this point must always be made by the pharmacist. A physician may write a prescription for a non-legend drug with directions for a dosage that is higher than that recognized as safe for unsupervised use. Such prescription should be handled as though it were for an Rx legend drug and the prescriber consulted before refilling.

### PENALTIES FOR VIOLATION

Modern drugs, especially Rx legend drugs, are so potent that many of them can cause serious injuiries or even death when they are improperly used. Therefore, sooner or later the person who "takes a chance" by selling such drugs illegally is likely to find himself in trouble. Every year hundreds of complaints of drug addiction and other harmful effects from improper use of drugs are investigated by Food and Drug inspectors. Although such injury reports are not usually introduced as evidence they are frequently considered by the judge when sentencing the violator. Heavy fines and

prison terms sometimes result.

First offense: Under the law any person who is found guilty of selling Rx legend drugs without a prescription, or refilling a prescription for such drugs without authorization by the physician, is subject to a maximum penalty of \$1,000 fine and 1 year imprisonment for each separate offense. ach sale constitutes an offense.)

The same penalties apply to sales by drug peddlers or prescribers who cause violations by writing fake prescriptions.

Second offense: \$10,000 fine or 3 years' im-

prisonment, for each violation.

### WHAT TO TELL THE PATIENT-OR THE PHYSICIAN

The fact that a physician prescribes a certain amount of a medicine is evidence that this is what he thinks the patient should have. But every pharmacist encounters patients who want to take matters into their own hands, and doctors who are irritated when asked if they wish to approve refills. What should the pharmacist tell such people, that will be persuasive but not alarming or provoking?

Occasionally a pharmacist may need to explain to a patron why he must have a prescription to obtain an Rx legend drug, or the doctor's approval for a refill. One way to do this is to show him the Rx legend itself on some package. Explain that drugs bearing this wording should be used only when prescribed by a physician "If you need this kind of medicine your doctor will prescribe it for you," is a good approach. Point out that the law is "for your protection."

If the patient is asking for a refill without the doctor's authorization the problem may be what to tell the doctor. Busy physicians are sometimes impatient about refill authorizations. This is wrong. They should re-member that when a pharmacist telephones the doctor about a refill he is not only complying with the law but also cooperating professionally in the care of the patient. The good physician wants to know when his patient feels the need for more of the medicine he originally prescribed. He may wish to increase the dose, or cut it down. He may wish to try something else, or to see the patient again before making a decision. Sometimes a very straightforward approach is best: "Doctor, I want to cooperate with you. Under the law I cannot give Mrs. Jones any more - unless you approve it. What would you like me to do?

Your reputation as a reliable pharmacist will be enhanced, rather than impaired, if you take such a position.

### QUESTIONS AND ANSWERS

The remainder of this booklet will discuss questions frequently raised by pharmacists about the requirements of the Durham-Humphrey amendment. These comments are not to be construed as an interpretation of any State or local pharmacy laws. Comments on these laws should be obtained from the authorities charged with their enforcement. In particular, some State laws restrict to prescription sale certain drugs that are not required by the Federal law to bear the prescription legend. Such laws may also contain restrictions on the sale of drugs by nonpharmacists. While the Federal law does not deal with the question of who may sell over-the-counter drugs, State pharmacy acts in some cases provide for distribution of such drugs exclusively through pharmacies.

Question. How should the refill record be kept in order to comply with the law?

Answer. While the Food and Drug Administration has not issued a regulation specifying the form or manner of keeping a refill record, it is important to keep the record in such a way that when a prescription is pre-sented for refilling the pharmacist can readily tell when the prescription was filled or refilled. Since the pharmacist has to look up the original prescription to provide a refill, perhaps the simplest and most satisfactory way to handle the matter is to keep the refill record on the back or front of the original prescription.

It is urgent that an adequate refill record be kept. Failure to keep a refill record is likely to result in serious violations of the law. Also, it is to the pharmacist's advantage to have complete and accurate refill records so that he can, in the event of an investigation of his practices, show from his records a balance of purchases against legal sales as evidence that he has been complying with the law.

Question. What do I do about refilling a prescription marked "Refill p.r.n.," "Refill ad lib." or some similar designation?

Answer. It is questionable whether any such designation that puts no limit on the frequency of refilling, or the length of time that a prescription may be refilled, constitutes a valid authorization for refilling a prescription. The law gives only a duly licensed physician authority to determine how much of a prescription-restricted drug a patient should get, and a physician cannot delegate to someone else authority that he has by virtue of his license.

This kind of refill authorization is to be discouraged; nevertheless it is sometimes used. The best advice to a pharmacist who receives a prescription so marked is that he use care and professional judgment in handling it; that he refill it only with a frequency consistent with the directions for use, and that he check with the physician after a reasonable time to make certain whether the physician wants the medication continued. If a pharmacist does that, it will be the physician, not the pharmacist, who may be prosecuted for violating the law.

A direction to the patient to take as needed (Sig: PRN) should not, of course, be confused with the prescriber's authorization to refill. It should be noted, too, that a State law or regulation may deal specifically with this question.

Question. From time to time a particular drug is changed from prescription to over-the-counter status. What should the phar-macist do with any leftover stocks of the drug he may have that still carry the prescription legend?

Answer. A drug which bears the prescription legend when it should not, is misbranded and is illegal as an article of commerce. Obviously, a pharmacist should not sell an illegal article. He should either (a) return the drug to the manufacturer, (b) use the residual stock only for filling prescriptions or, (c) undertake relabeling to remove the prescription legend and put on the label adequate directions for use and appropriate varnings where needed, etc. Manufacturers frequently supply sticker labels to facilitate such relabeling.

Question, Sometimes a physician asks that the name of a medicine be put on the prescription package that is dispensed to the Patient. Is this permissible?

Answer. Yes. The law of course requires

the label of a prescription package to carry certain information (the name and address of the dispenser, the serial number and the date of the prescription or of its filling, the name of the prescriber, and, if stated in the prescription the name of the patient, and the directions for use and cautionary statements, if any, contained in such prescrip-tion) but the law does not forbid the addition of other truthful information.

Arguments have been advanced both for and against giving the additional informa-Our only comment has been that, if the physician wants the name of the drug put on the prescription package, it is not illegal to put it there.

Question. Can I give a copy of a prescrip-on? Can I fill or refill a copy of a pretion? scription?

Answer. You can give a copy of a prescription. It should be clearly marked as a copy, and it has no legal status as a valid prescription that can be filled or refilled by a pharmacist. We recognize that a copy of a prescription may be useful for information purposes. From a strictly legal point of view, we think that is the only purpose a copy of a prescription can serve.

The difficulty faced by a pharmacist who wishes to refill a prescription on the basis of a copy is that no matter what kind of refill instructions are marked on the prescription, the pharmacist who receives the copy has no way of knowing of his own knowledge whether or to what extent that pre-scription has been refilled by the pharmacy where it was originally filled. Indeed he cannot ascertain of his own knowledge whether copies have been given to other pharmacies also. His only entirely safe course is to phone the prescribing physician: and then, in practical effect, he is getting a new prescription.

Question. Can I fill a prescription written by a prescriber in another State?

Answer. This situation occasionally arises when a patient has consulted a physician outside the State and has brought a prescription back to his hometown pharmacist for filling. In such cases where a bona fide physician-pharmacist-patient relationship exists usually no question is raised about the technical legality of filling the prescription. Remembering that a professional license in one State does not permit practice in another State, this becomes one of the many areas in which the pharmacist must not only exercise professional judgment but also be certain of the law of his particular State. FDA has questioned the legality of some mail-order businesses that attempt to treat serious disease on a mail-order basis when the physician never sees the patient; but a case involving that type of business has not yet been litigated in the courts.

Question. Can I sell over the counter for veterinary use a drug that is labeled for human use with the prescription legend?

Answer. While it is entirely legal for you to take a product which was intended by its maker for human use and label that product for veterinary use and sell it without prescription (provided, of course, it is a drug which may be legally sold for veterinary use without prescription), you are faced with the problem of supplying complete labeling for the product you sell. Obviously, it re quires special knowledge of veterinary medicine to supply adequate directions for use, appropriate warnings, etc., that should be on the package. If you wish to sell drugs for veterinary use, it is recommended that you purchase such drugs already labeled by the manufacturer for veterinary use with labeling that gives complete directions for such use.

It should be pointed out, also, that certain drugs, even when offered for veterinary use, are restricted to prescription dispensing, If you buy drugs labeled for veterinary use you will find that some bear the legend: "Caution: Federal law restricts this drug to sale by or on the order of a licensed veterinarian, or on his prescription or order.

Question. Sometimes a pharmacist buys an over-the-counter drug in a large package to get a better price. A customer may ask for a smaller quantity. What must the pharmacist put on the label of the repackaged article he sells?

Answer. The law requires adequate directions for use in the labeling of a drug, and appropriate warnings where these are needed for the protection of the user. It is obvious that the purposes of the law are not served if the package which reaches the consumer does not bear such information.

The law provides that a pharmacist will not be charged with responsibility for having sold a misbranded over-the-counter drug if he sells it under the same labeling that was on the package when he received it. Thus, the only entirely safe course for the pharmacist to follow is to put on the label of the repackaged article all the directions for use, warnings, ingredient statement, and any other information that is required by the law, just as they appeared on the original package.

FDA inspectors have investigated injury cases in which the drug responsible was an over-the-counter product that had been repackaged by the pharmacist and dispensed with incomplete labeling. Investigation has disclosed that a disappointingly high proportion of pharmacists do repackage and sell over-the-counter products, including some relatively potent drugs, with wholly unsatisfactory labeling. This has been called to the attention of the major pharmacy organizations with a request for cooperation in securing voluntary compliance with the law.

Some of the more serious violations of this kind have been referred to State boards of pharmacy, or other State enforcement agencies.

Question. What should a pharmacist do with sample packages that may come into his possession?

Answer. He can, of course, give them to physicians; or he can keep them in the original manufacturer's package and use them in filling prescriptions.

Repackaging should not be undertaken without checking on the legal requirements for repacking the particular drug involved. For example, certifiable antibiotics cannot legally be repackaged without obtaining FDA certification on the repackaged article. Similarly, new drugs should not be repackaged without obtaining a supplemental newdrug application. It has been found, too, that in repacking samples different codes of the same material may be mixed, or code numbers or expiration dates may be lost or inaccurately transposed to the new labels. Too often the label used on the repackaged material is incomplete, making the repackaged material illegal and subject to seizure and condemnation proceedings.

Question. Can I accept and return to stock the unused portion of a prescription that a customer may return with a request for

refund?

Answer. It is a very dangerous practice to accept and return to stock unused portions of prescriptions (or, for that matter, unused portions of over-the-counter drugs) that are returned by patrons. Many State boards of pharmacy have issued regulations specifically forbidding this practice, and FDA endorses the actions of these boards as being in the interest of the public health.

There is no doubt that the pharmacist is legally responsible for any hazards of contamination or adulteration that arise by reason of having mixed returned portions of drugs with shelf stock. Investigations of drug injuries have turned up cases where drugs returned by patrons and subsequently resold by the pharmacist were responsible for the injuries. In one instance there was evidence that the patron had deliberately substituted something else for the product which he had used and returned a dangerous substance to the pharmacist to obtain a refund of money.

Question. How long should a prescription be kept?

Answer. This is a matter of business and professional judgment for the individual pharmacist. The statute of limitations for violations of the Durham-Humphrey law is 5 years. Therefore, at the end of that time a prescription would have no value as evidence to establish compliance with the Durham-Humphrey law. During that period, of course, a properly kept prescription record is evidence that the pharmacist has complied with the law.

# Congresswoman Dwyer Reports on the 86th Congress and Union County

EXTENSION OF REMARKS

### HON. FLORENCE P. DWYER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES Thursday, September 1, 1960

Mrs. DWYER. Mr. Speaker, in keeping with the custom of many Members of Congress-and with a practice I have followed for the past 3 years—I am reporting to the people of the 6th Congressional District of New Jersey on the 2d session of the 86th Congress.

First, I shall review the record of this election-year Congress, and then my own activities as the Representative of the

people of Union County.

I have found it an immensely challenging and rewarding experience to represent the more than half million people of our county in the House of Representatives. With this report go my thanks and gratitude for the privilege of acting in your behalf here in our Nation's Capital.

### A DOUBLE FAILURE

I cannot recall another session of Congress which denied a President so many of his major legislative requests and which failed to enact so much of the program of the leadership of that Congress.

Here are several of the bills which died at adjournment:

Assistance to the States for construction of schools and classrooms.

An increase in the minimum wage, and broader coverage of the wage-andhour laws.

Legislation to help keep passenger trains in operation.

Aid to economically depressed areas. Liberalization of the immigration laws, which have made it difficult to reunite families.

A revised farm program which would ease the burden of surpluses on the consumer and taxpayer.

Establishment of a commission to help assure equal job opportunity under Government contracts.

Home rule for the District of Columbia, where residents are still denied the right to vote.

Creation of new Federal judgeships to help relieve the strain on the Federal

A clean elections bill.

Authority to manage the public debt in a noninflationary manner, and a great many other important measures.

Ultimately, the blame for this failure must be placed on the partisan attitude of an election-year Congress-an attitude which valued political advantage more than legislative achievement, and made reasonable compromise frequently unobtainable.

This means that the 87th Congress will be faced with an unusually demanding schedule of major legislation-legislation, including several bills I have helped get started, which will require of Congressmen their devoted and effective attention if further valuable time is not to be lost.

### ANOTHER BALANCED BUDGET

There was relatively little talk this year about balancing the budget or cutting Federal spending—for several reasons. The economy is in good shape. Employment and personal incomes reached record high levels. The budget submitted by the President to Congress last January indicated a surplus of about \$4.1 billion, and since no budget-busting legislation was allowed to become law, there is reason to expect some kind of surplus next June 30. Since last year's Federal budget was also balanced, this will mean 2 straight years of black ink in the Nation's account books.

We are still benefiting, too, from the big tax reduction which President Eisenhower put through in 1954. Our national tax bill this year is approximately \$10 billion less than it would have been had income taxes not been cut. That is an average tax saving of nearly \$60 for every man, woman, and child in our country today.

Legislatively, the two big issues dominating this 2d session of the 86th Congress were civil rights and medical care for the elderly. In both cases, the legislation finally adopted by Congress fell far short of the hopes of sponsors, although all-out opponents of civil rights and medical care legislation were also displeased.

An intensive, well-organized filibuster by southern Democrats in the Senate stripped the President's civil rights recommendations to little more than a voting rights bill, and even this was hedged about by so many cumbersome procedures that the bill may be difficult to enforce.

### MEDICAL CARE FOR ELDERLY

In the case of medical care for the elderly, Congress established a brandnew program, but it also gave new strength to the political issue by approving the weakest, least adequate version

of the legislation.

The bill finally adopted by Congress did two things, principally: First, it provided more generous Federal grants to States for medical care for people on relief under existing old-age relief programs, and second, it initiated similar medical care programs for elderly persons not on relief but who are determined by States to be unable to pay their medical bills.

While the House was prevented from voting directly on either of the two more comprehensive versions of medical care legislation, it was clear from the Senate voting that the great majority of Senators favored a broader program than the one adopted. This means, I feel sure, that medical care for the elderly will be a major issue in the fall elections and, with the beginning of the 87th Congress next January, renewed efforts will be made to broaden the program or to replace it with a social security-type program. Recommendations of the White House Conference on the Aging, meeting in January, will be important in clarifying this issue.

Although the medical-care legislation was not made a part of the social security system, it was incorporated in a bill making broad changes in the social security laws. Some of these changes will be of special interest to Union County, where 30,000 or more retired people are now receiving social security benefits.

SOCIAL SECURITY CHANGES

The bill made persons eligible for benefits who worked in jobs covered by social security only one calendar quarter of every three quarters, rather than in one of every two. It authorized payment of benefits to survivors of workers who died before 1940 and had at least six quarters of coverage. It increased benefits for surviving children. It brought new categories of employment under social security, including employees of nonprofit organizations.

The bill also changed investment provisions so as to obtain a higher yield from social security trust funds; increased annual authorizations for maternal and child health services, services for crippled children, and child welfare; permitted persons receiving aid to the blind to earn additional income without sacrificing benefits; and extended the coverage of the unemployment compensation system.

The bill also made a rather weak gesture in the direction of liberalizing the present earnings limitation which penalizes persons receiving social security who earn more than \$1,200 a year. The change would reduce somewhat the amount of benefits lost by persons earning between \$1,200 and \$1,500—but not much.

The time is long overdue, I believe, when the earnings limitation should be raised at least to \$2,400, as I have proposed in bills I introduced in both the 85th and 86th Congresses. This is not only a matter of justice to people who have earned their social security bene-

fits, but it is also sound national policy to encourage older people who wish to do so to continue to use their experience and talents after they have formally retired. Medical authorities are virtually unanimous in recommending this, and certainly the country cannot afford to lose the skills of its people automatically at age 65.

### FOREIGN AFFAIRS

In the field of foreign affairs, where it is critically important that Congress and the President work harmoniously toward the one great goal of peace and freedom, Congress took significant steps, all of which I supported in the House.

Latin America: Authorized a new program to aid in the economic growth and social development of Latin America—a great continent on which we depend for friendship and help, but which we have often neglected—and to assist the recovery of Chile from the floods and earthquakes which recently devastated that country.

The Foreign Service: Raised the standards for Foreign Service personnel in the State Department by, among other things, requiring greater proficiency in foreign languages by diplomatic personnel assigned to foreign countries and by encouraging the learning of especially difficult languages by Foreign Service officers.

Refugees: Provided for admission of approximately 5,000 refugees, without regard to U.S. immigration quotas, as part of the International Refugee Year program for resettlement of European refugees still in temporary refugee camps.

Congo crisis: Increased the contingency fund available to the President for use in such emergency situations as the Congo crisis.

Cuba: Empowered the President to determine the amount of sugar to be imported from Cuba as an important diplomatic tool in dealing with Cuban Premier Castro; President Eisenhower then abolished the unfilled portion of Cuba's sugar quota for the present year.

NATO! Authorized the appointment of a U.S. Citizens Commission to participate in the NATO Citizens Convention to explore ways to develop democratic freedom by economic and political means

Mutual security: Restored part of the funds cut from the mutual security program after the President warned Congress that the cuts would "jeopardize the security of the country."

International health research: Made it possible for the President, the Secretary of Health, Education, and Welfare, and the Surgeon General to conduct an international cooperative program in health research, training, and planning.

IDA: The Banking and Currency Committee, of which I am a member, entered the foreign policy field when we approved legislation authorizing U.S. participation in the International Development Association—an agency designed especially to help such newly emerging nations as those former European colonies in Africa to achieve a degree of economic stability and progress and thus

avoid the chaos we have seen in the Congo. IDA will also place economic assistance on a much more businesslike basis, with other industrialized nations sharing the cost with the United States.

PROGRESS TOWARD PEACE

The Senate alone acted on three additional measures which should be recorded here. It adopted the food for peace resolution endorsing the President's plan to present to the United Nations this month a proposal "whereby we and other fortunate nations can, together, make greater use of our combined agricultural abundance to feed the needy of the world."

The Senate also ratified two treaties: the new Mutual Security and Cooperation Treaty with Japan, and the Antarctica Treaty to restrict the use of that continent for peaceful purposes only. This latter treaty is particularly significant because it marks for the first time since the cold war began that the United States and Soviet Russia, together with other nations, have succeeded in negotiating a binding agreement which prohibits military operations and nuclear testing and provides for complete freedom of inspection and aerial reconnaissance-objectives we have been seeking, on a larger scale, for many years.

The House, too, acted alone in approving two important resolutions—one of which expressed the sense of Congress that the fundamental freedoms and human rights of the people of captive nations should be restored and which urged the President to pursue this goal at international conferences; while the other expressed congressional condemnation of the Nazi-like desecration of houses of worship and other sacred sites earlier this year.

DEFENSE POLICY

The Defense appropriations bill, traditionally the vehicle Congress utilizes to influence U.S. defense policy, provided funds just short of \$40 billionmore than 50 percent of the Federal budget-an increase of about \$780 million over Defense Department estimates. The bill was passed by rollcall votes in the House of 402 to 5 and in the Senate of 83 to 3, and included these principal items: Increased funds for military airlift-transport of arms and men; approval of the controversial administration-proposed aircraft carrier; a goahead for the B-70 supersonic bomber project; doubled funds to prepare for a more complete airborne alert; speeded up the Army's equipment modernization program; greatly increased the immensely successful Polaris missile submarine program; initiated a new Air Force antimissile system; and added funds to increase our antisubmarine warfare capability.

One of the most potentially important changes made by Congress in the defense budget, however, has gone largely unnoticed. This was a 3 percent across-the-board reduction in the appropriation for procurement of military equipment, a cut totaling about \$400 million. Congress insisted on this cut, as the conference report noted, "in an effort to compel prompt remedial action" by the

Defense Department against waste and duplication in military purchasing.

CONGRESSIONAL INTEGRITY

Among congressional achievements which I supported wholeheartedly and of which I am especially proud, was a series of three amendments designed to prevent congressional abuse of certain of its own privileges. The first, which you may remember I discussed in an earlier report to the people, killed an attempt in the House to allow Congressmen in urban areas to use their congressional rank for junk mail, addressed only to occupant. The second prevented Congressmen and other Government officials from receiving free or reducedrate transportation on U.S. merchant ships, most of which are heavily subsidized by the Government. And the third amendment required public itemizing and accounting of all kinds of funds, American dollars and foreign money alike, spent by traveling Congressmen and committee staff members.

This was a good, though too long delayed, beginning toward eliminating conflict-of-interest situations in Congress. I hope that additional progress will be made next year, and I shall continue my own efforts in this direction.

SOME ACCOMPLISHMENTS

Other legislative accomplishments this year, all of which I supported, were these:

Pure food: To protect consumers of foods, drugs, and cosmetics from color additives found to cause cancer when used by human or animals.

Pay raise: A modest one for postal workers and other Government em-

Health training program: To encourage specialized public health training in nursing, engineering, and public health schools

Housing: A limited bill, in place of general housing legislation, to continue three existing programs: the FHA home improvement loan program, the college housing loan program, and the community facilities loan program—which would otherwise have been halted.

Broadcasting: To prohibit payola and other unethical practices in radio and television broadcasting and adoption of regulations and penalties to be enforced by the Federal Communications Commission

Tax revision: To permit taxpayers a personal income tax deduction of all medical expenses incurred by them in the care of dependent parents over 65 years old.

Veterans loan program: Extended for homes, farms or businesses purchased by veterans.

High price supports for wheat: Rejected, as encouraging further overproduction and high prices.

Library Services Act: Extended to bring the riches of the world of books to many who had never known them.

Special milk programs: Continued for children

Obscene mailings: Strengthened Post Office Department's authority to prevent the use of the mails for distribution of obscene or fraudulent matter.

Narcotics: Established a system of licensing and control over the manufacture of narcotic drugs, and passed a House resolution encouraging the President to call a White House Conference on Narcotics to seek ways of controlling this pernicious evil.

Again this year, both my committees—the Banking and Currency Committee and the Government Operations Committee—where so much of the work of shaping legislation is done, were unusually active, in several cases on matters of direct interest to Union County and the metropolitan New York-New Jersey area.

SAVED: \$85 MILLION

The Intergovernmental Relations Subcommittee of the Government Operations Committee, of which I have been ranking minority member, continued our intensive study of various aspects of the Government's multibillion-dollar agricultural price support program, in particular its increasingly costly surplus grain storage activities.

In accord with our recommendation, the Agricultural Department decided recently to reduce the storage rates it pays to commercial warehousemen by an average 19 percent. This will save taxpayers, I am pleased to report, between \$85 and \$100 million in the present storage year.

The chief objective of farm policy, we urged in our reports, should be to assure an adequate supply of food and fiber for consumers at fair prices. We also recommended further economies in the storage of surplus crops and, in an operation involving more than \$600 million a year, economy is very much to be desired.

Additional savings in storage costs should also be realized as a result of the Agriculture Department's adoption of my recommendation that greater use be made of the "mothball fleet" of World War II Liberty ships anchored in the Hudson River for storage of surplus grain. As I pointed out to the Department, these ships provide high-quality storage at much lower costs. The Department's recent decision to more than double existing stocks of grain there was good news, not only for taxpayers but also for the economy of our region.

CONTROVERSIAL BILLS

The Banking and Currency Committee had more than its share of controversy this year. An overall housing bill was blocked by the Rules Committee, and the President vetoed the depressed area bill.

A substitute bill, which I supported strongly, called for nearly as much assistance as the committee bill and would have directed it far more effectively into areas of deep and chronic unemployment, such as former textile towns in New England and coal mining areas in West Virginia—which is the whole purpose of such legislation. Unfortunately, the majority on the committee preferred to have an issue rather than provide help, and so they refused even to consider the substitute.

Among its more constructive accomplishments, the committee approved amendments to the Small Business In-

vestment Act facilitating the extension of credit to small business enterprises, a bill I cosponsored.

A major disappointment, however, was the committee's failure to act on another bill I introduced in the House, the mass transportation bill, which would provide both financial and planning assistance to metropolitan areas to preserve and improve commuter facilities. The bill was especially significant, I believe, because for the first time it approached the commuter problem on a broad basis and integrated the transportation needs of urban areas with all the other aspects of land use and the future growth of our metropolitan regions.

COMMUTER SITUATION

While we persuaded the committee chairman to hold hearings on the bill, at which I testified, he would take no further action without an OK from the House leadership—which, I regret, never came. Nevertheless, this will be a priority matter for the 87th Congress.

The same blindness to the needs of urban areas blocked another of my commuter bills, a measure to require greater consideration of the public interest by the Interstate Commerce Commission before it permits railroads to abandon passenger service. Here, again, the committee—in this case the Interstate and Foreign Commerce Committee—held hearings on my bill, but then refused—on three separate occasions—to send the bill to the House floor.

Despite these disappointments, I can report some progress in reaching solutions to our grave commuter transportation problem. The Advisory Commission on Intergovernmental Relations, which was created last year by legislation I cosponsored, began operation this year. As one of three House members of the Commission, I obtained the cooperation of my colleagues in giving the transportation problem priority attention. Specific action will be recommended to Congress and to the States, counties, and cities in metropolitan areas early next year.

PORT OF NEW YORK AUTHORITY

One of the most dramatic events of the year was the vote by which the House cited for contempt three officials of the Port of New York Authority following their refusal to submit the authority's files to a House committee investigating the extent of the port authority's jurisdiction. The issue arose, you will remember, when it was learned that the port authority planned to build a huge jet airport in nearby Morris County and to initiate jet operations at Newark Airport.

Since the House had unanimously approved the investigation, and because the Constitution specifically assigns to Congress jurisdiction over interstate compacts, such as the compact establishing the New York-New Jersey Port Authority, the House had no alternative but to approve the contempt citations.

As a result, the issue can now be referred to the Federal courts for an authoritative decision as to the extent of congressional responsibility for interstate compacts. UNION COUNTY IN CONGRESS

Union County was also directly affected by other actions of the 86th Congress:

New Jersey-New York port: The public works appropriations bill included funds for additional navigation work in the port area, for which I testified before the Appropriations Committee. Constant attention to navigation needs in the waters along the shores of Union County and in other parts of the port area is essential for the continued jobproducing growth of this greatest port in the world. The rapid development of our own Port Elizabeth is an impressive example.

Air pollution: A particularly hazardous problem in parts of Union County, it came under renewed attack when we approved legislation authorizing an intensive study of the effects of automobile exhaust fumes on public health. This may lead, I hope, to practical developments reducing or eliminating exhaust fumes.

Teenage drinking: Our campaign to persuade New York State to raise its legal drinking age to 21, in conformity with all five of its neighbor States, received added impetus recently when seven Vermont teenagers were killed on their way back from drinking in New York. Unfortunately, it takes a tragedy like this to arouse the public and their elected representatives to the need for corrective action, but we must seize every opportunity to dramatize the dangers. At my request, Governor Rockefeller has agreed to meet with me to see what can be done, and if nothing else will work, I plan to ask the Advisory Commission on Intergovernmental Relations to find a way in which our five States can cooperate in bringing pressure to bear on New York.

Highways: The continuing investigation of our national highway troubles by the House Public Works Committee may produce some changes which will help protect our own communities from unnecessary destruction by poorly planned superhighways. Meanwhile, I shall continue to do everything possible to help areas like Springfield and Union in their fight to win approval of more acceptable alternate locations.

Post offices: To meet Union County's postal needs, which have multiplied in recent years under the impact of heavy population growth, new post offices have been authorized this year for Springfield, the Mountainside branch of Westfield, Fanwood, Scotch Plains, the Bayway, and North Section stations of Elizabeth, and the Hillside branch of Elizabeth. New buildings in Kenilworth, Roselle Park, and Garwood are scheduled, and a new Muhlenberg area station is under study in Plainfield. In addition, extensive expansion and modernization work has been OK'd for the Summit Post Office. Many other improvements in equipment, facilities and service have been made throughout the county this year. So the many, many hours I have devoted to on-the-spot study of our postal needs and to discussion with regional Post Office officials and the Postmaster General himself are now paying off.

Other Federal-aid programs which I have supported are now contributing to the well-being of our people. For example, funds have been granted for major hospital construction projects in Plainfield and Elizabeth. Public housing, housing for the elderly, and urban renewal projects are in various stages of work in Rahway, Elizabeth, and Plainfield. And a comprehensive project is underway to plan for a water distribution system to serve 30 northern New Jersey communities, including some in Union County.

### HELPING PEOPLE

However, the most rewarding activity of a Congressman, in my judgment, is in the area best described as "helping people." More of my time, I think, is devoted to the multitude of individual problems of individual citizens in Union County than to anything else. This is as it should be, for there is no more important responsibility of a Congressman than to serve as the channel through which individual citizens control their Government.

We cannot always succeed with every request, but we do try. You can be sure, therefore, that your problem is understood, that bureaucratic redtape will be cut, and that within the law and propriety everything that can be done will be done.

This year, to cite a few instances, my staff and I helped to expedite dozens of immigrant visas which meant happy reunions for dozens of families. We helped speed up the issuance of passports, filled requests for thousands of Government documents, answered endless questions about the complexities of Federal regulations, helped servicemen obtain leaves, transfers or, in emergency cases, discharges.

We straightened out numerous snarls which were holding up veterans or social security benefits, including one especially worthwhile case in which a widow of a World War I veteran had been denied for several years her rightful pension benefits.

We have helped to arrange weddings, on the one hand, and obtained the cooperation of diplomatic missions abroad in case of death away from home.

We have obtained military bands for Fourth of July parades, had flags flown over the Capitol for organizations and individuals, and welcomed thousands of you—alone, with your families, or in larger groups—to the Nation's Capital and tried to make your visit here as interesting as possible.

Special mention should be made of Union County's young men at West Point, Annapolis, the Air Force Academy, and the Merchant Marine Academy. Since my election to Congress in 1956, I have made every one of my congressional appointments on a merit basis, as determined by competitive civil service examinations and subsequent Academy exams, rather than on a personal or political basis.

The results speak for themselves. Not a single boy has failed to make good. All of them have ranked well up in their classes, and several have made the dean's

list or other honor rolls—an overall performance well above the average. Union County has a right to be very proud of our representatives in the service Academies and to be confident that their future careers as officers in our Armed Forces will reflect great merit on themselves, their families, and their communities.

### KEEPING IN TOUCH

Finally, as many of you know, I have continued and in some cases expanded my efforts to keep in touch with the people I represent, to seek your views about important issues, and to be ever alert to the needs and interests of Union Countians.

Through my biweekly report to the people, our annual congressional questionnaire, occasional legislative open houses at my home in Elizabeth, a full-time district office, office hours in other communities, a huge volume of correspondence, and as many weekend visits to Union County as I can manage during sessions of Congress, we have kept each other well informed.

I greatly appreciate the effort, the interest and the cooperation you have shown in this mutual endeavor. You have made my work here very worthwhile and very satisfying.

while and very satisfying.

Throughout it all, I am pleased to report, I have maintained a nearly perfect record in answering rollcalls—the point of decision, of course, in every legislative issue. Of the 180 rollcall votes in both sessions of the 86th Congress, I missed only 1, and on that I was paired. This is an attendance record of better than 199 percent and an on-the-record percentage—for 4 straight years—of 100.

In reviewing the year's activities, I have been impressed repeatedly by the way in which everything we do fits together as parts of the pattern of our American way of life. Each of us has a role to play in keeping our country strong and our people free, and in making our America ever more worthy of the traditions and heritage we have received from the past.

Over the Speaker's chair in the Chamber of the House, there has been placed a quotation from Daniel Webster, which may serve to remind us all of the opportunities ahead:

Let us develop the resources of our land, call forth its powers, build up its institutions, promote all its great interests, and see whether we also in our day and generation may not perform something worthy to be remembered.

Together, we can meet this challenge,

### Why Glen Echo?

EXTENSION OF REMARKS

### HON. CHARLES O. PORTER

OF OREGON

IN THE HOUSE OF REPRESENTATIVES
Thursday, September 1, 1960

Mr. PORTER. Mr. Speaker, not far from the Nation's Capital in Montgomery County, Md., residents of the Bannockburn community are helping write some fine pages in American history. These men, women, and children are marching in a peaceful picket line as part of their protest against segregation at the Glen Echo Amusement Park.

That community's fight has been described in detail by one of the "fighters," Hyman H. Bookbinder, in his article entitled "A Community Joins the Fight," which appeared in the July-August issue of the AVC Bulletin. The article, and one other, under leave to extend my remarks in the RECORD, follow:

[From the AVC Bulletin, July-August 1960]

### A COMMUNITY JOINS THE FIGHT (By Hyman H. Bookbinder)

Montgomery County, Md., is right above the District of Columbia border. It is, to all intents and purposes, part of the Nation's Capital, except that as part of Maryland it has the right to vote. And it has used that vote to elect a liberal county government and a liberal Congressman. Many thousands of Government workers live in the county.

The county has for many years boasted of a superb school system, and after the Supreme Court decision it carried out its integration plans quickly and successfully. So much so that when community leaders were consulted about appointing a Negro principal for the Bannockburn Elementary School, which at the time had only white students because there were no Negro children in the area, the response was unanimously affirma-

A couple of months ago, nobody would have suggested that there was any civil rights problem in the area. Today, the

county is full of it.

Glen Echo Amusement Park in the county is a private enterprise with a large swimming pool and a collection of Coney Island rides. It has been closed to Negroes for years, but even liberal Montgomery County never seemed to care very much. Recently, however, some members of the community were distressed at the fact that the county's official recreation program was using Glen Echo Park for its swimming activities. This meant that its buses and its personnel were being used to take white children to Glen Echo, while other children were being sent to the public pools in the District of Columbia. This was considered both illegal and im-

The Bannockburn community is adjacent to the Glen Echo community. It consists of about 200 private homes, and started out about 10 years ago as a co-op. It has a higher than average proportion of residents with labor and ADA-type backgrounds. There are a number of AVC members, too. It was no surprise, therefore, that action against the county's use of Glen Echo Park should initiate here. The PTA and the civic association soon passed appropriate resolutions.

On June 30, however, the pattern of protest was changed sharply. Lawrence Henry, a divinity student at Howard University, showed up with picket signs outside the park He was joined by some other students, both colored and white, who had formed a nonviolent action group. That group had just succeeded in breaking the color bar in northern Virginia restaurants through the sit-in device. Numerous arrests have taken place as a result of various legal tests which were made.

That appearance by Henry and his followers had led from one exciting thing to another in the nearby communities of Montgomery County and throughout the Washington area. As of this writing, the park refuses to yield, and it may successfully hold out until the Labor Day closing.

In nearby Bethesda, a movie theater was picketed round the clock for 100 hours—"1 hour for each year since the Civil War." A Rockville restaurant abandoned segregation after several weeks of picketing led to a policy declaration by the mayor and town council. Several Bethesda restaurants did like-

The biggest victory of all, however, is what all of this has done to the community itself. As it has done elsewhere, the student sit-in movement has sensitized the area of activity, and encouraged others to participate in the fight for human rights. As a parent of a couple of teenagers, I shall forever be grateful for what this has done to educate all the kids in the area.

They saw many of their parents practice what they had been preaching: walk the picket lines, prepare food for the pickets, write letters to Glen Echo and to public officials, attend meetings of the county council,

and all the rest.

They saw at first hand that the fight against Negro discrimination is part of the struggle against anti-Semitism and every other form of intolerance. This they learned when the American self-styled Nazi leader Lincoln Rockwell counterpicketed us with his obscene and hateful signs.

They got into the act themselves. What some of us were beginning to fear was a lost generation, with no sense of purpose or sense of urgency, isn't quite so lost. Dozens of Bannockburn teenagers have walked that picket lines for hours on end. And they have spent hours talking with the Negro students, learning directly and personally what civil rights really means.

What started as a small student protest at Gien Echo soon became a community responsibility. Then groups throughout the Capital area joined the fight. AVO brought out impressive groups. A Capital area committee for equality has been formed to work

on all remaining problems.

I like to think there is a great lesson to learn from the Glen Echo experience. Most Americans believe in the furtherance of civil rights; they would like to see all segregation and discrimination just disappear tomorrow morning. But they don't know how to-or perhaps would rather not-get involved in the actual fight to secure equal rights for all. But once challenged, or given a specific objective, they will respond. They certainly will not patronize establishments known to be segregated; they will sign petitions or write leters when asked; some will walk picket lines; others will feed the pickets.

Unhappily, in these last few years the American people have not been challenged sufficiently and dramatically. President Eisenhower has not once declared that he thinks the Supreme Court decision is right; never has he made a direct and dramatic appeal to the school boards of the Nation to implement the law of the land. He has been content to declare simply that Americans must obey the laws of the land.

My Bannockburn community may be a cut above the average. Perhaps there aren't too many communities where its people will walk picket lines 7 days a week, or hold meetings till 2 in the morning, or invite 50 or 60 pickets to dinner. But I think there are millions of people who will respond if given the opportunity. The sit-in movement has thrown out a challenge to all of us. We dare not reject the challenge.

On Wednesday evening, August 24, five Members of this House went to the scene of the fight for right. I am proud to have been one of them.

I reported to my constituents a few days later in my weekly report to weekly newspapers. That report "Why Glen Echo?" follows:

WHY GLEN ECHO?

(By Representative CHARLES O. PORTER)

The grass is worn bare on the plot of Federal property near the entrance to the parking lot of the Glen Echo Amusement Park in Maryland, a 20-minute drive from Capitol Hill. The oiled surface in front of the main entrance to the amusement center also has been worn down. Nearly every day for 2 months the parking lot has been less than half full.

Americans of all ages, black and white, have been peacefully marching each day from around 5 p.m. to 1 a.m. in protest of the segregation policy of this public ac-commodation located in a State that claims to be integrated.

The now self-sustaining picket line at Glen Echo follows the successful peaceful "sit-ins" at many Virginia restaurants.
This second step has taken longer, but the

walls are tumbling.

On Wednesday evening, August 24, four other Members of the House of Representatives and I drove to Glen Echo. Four of us walked in the picket line at the parking lot water in the picket line at the parking low-entrance. I carried a sign upon which was written "Democrats Support Your Party Platform—Stay Out." My friend SEYMOUR HALPERN, Republican, of New York, carried a sign which stated "Republicans Support Your Party Platform—Stay Out."

Marching with us were Representative CHARLES DIGGS, Democrat, of Michigan, and Representative ADAM CLAYTON POWELL, Dem-ocrat, of New York, Representative BYRON JOHNSON, Democrat, of Colorado, simultaneously conferred with members of the peace-

ful picket line.

Students are leading this crusade. The night I marched I was able to arrange that we Members of Congress met with the manager of Glen Echo. He agreed to arrange a meeting between us and the park owners, Abram and Samuel Baker, as soon as possible. Before then, no negotiations had been held. This was a step forward on a long but important road toward equal rights for all citizens.

PROCEEDINGS OF THE HOUSE SUB-SEQUENT TO THE SINE DIE AD-JOURNMENT

BILLS AND JOINT RESOLUTIONS APPROVED AFTER SINE DIE AD-JOURNMENT

The President, subsequent to the sine die adjournment of the Congress, notified the Clerk of the House that on the following dates he had approved and signed bills and joint resolutions of the House of the following titles:

On September 8, 1960:

H.R. 2069. An act for the relief of James

H. Presley;

H.R. 3313. An act to amend section 200 of the Soldiers and Sailors Civil Relief Act of 1940 to permit the establishment of certain facts by a declaration under penalty of perjury in lieu of an affidavit, and for other

H.R. 4059. An act to amend title 28 of the United States Code relating to actions for infringements of copyrights by the United

States:

H.R. 6597. An act to revise the boundaries of Dinosaur National Monument and provide an entrance road or roads thereto, and for other purposes;

H.R. 6871. An act to amend title III of the Public Health Service Act, to authorize project grants for graduate training in public health, and for other purposes;

H.R. 7124. An act to require the payment of tuition on account of certain persons who

attend the public schools of the District of Columbia, and for other purposes;

H.R. 9432. An act for the relief of Maj. Edmund T. Coppinger;

H.R. 9958. An act for the relief of Brook-

lyn Steel Warehouse Co.;

H.R. 10921. An act to amend section 35 of chapter III of the Life Insurance Act for the District of Columbia;

H.R. 11813. An act to amend the Menomi-

nee Termination Act;

H.R. 12533. An act to amend the Migratory Bird Treaty Act to increase the penalties for violation of that act, and for other

H.R. 13021. An act to provide for assistance in the development of Latin America and in the reconstruction of Chile, and for

other purposes:

H.R. 13053. An act to increase the salaries of officers and members of the Metropolitan Police force and the Fire Department of the District of Columbia, the U.S. Park Police, the White House Police, and for other purposes; and

H.R. 13161. An act making supplemental appropriations for the fiscal year ending June 30, 1961, and for other purposes.

On September 13, 1960:

H.R. 383. An act to authorize the annexa tion of certain real property of the United States by the city of Wyandotte, Mich.;

H.R. 4428. An act for the relief of the legal guardian of John David Almeida, a minor;

H.R. 5396. An act to amend title 28 of the United States Code to provide for transfer of cases between the district courts and the Court of Claims and for other purposes;

H.R. 7877. An act for the relief of Vladi-

H.R. 7990. An act to provide for the conveyance of certain land of the United States to the Citizen Band of Potawatomi Indians of Oklahoma;

H.R. 8424. An act to amend section 505 of the Classification Act of 1949 with respect to positions in the Library of Congress; H.R. 8665. An act to amend the act en-

titled "An act to establish a memorial to Theodore Roosevelt in the National Capital" to provide for the construction of such memorial by the Secretary of the Interior;

H.R. 10311. An act providing that certain provisions of Public Law 335 dated October 7, 1949 (63 Stat. 724), shall apply to the Mercedes division of the lower Rio Grande rehabilitation project, Texas;

H.R. 10548. An act to amend the Helium Act of March 3, 1925, as amended, for the defense, security, and the general welfare

of the United States;

H.R. 11561. An act to authorize and direct the Secretary of the Army to convey part of lock and dam No. 10, Kentucky River, Madison County, Ky., to the Pioneer National Monument Association for use as part of a historic site;

H.R. 11573. An act to provide for the free entry of an electron microscope for the use of William Marsh Rice University of Houston, Tex., an electron microscope for the use of the University of Colorado Medical Cen-Denver, Colo., and for other purposes;

H.R. 12043. An act to amend sections 22, 23, and 24, title 13, United States Code, and

for other purposes; H.R. 12383. An act to amend the Federal Employees' Compensation Act to make benefits more realistic in terms of present wage rates, and for other purposes;

H.R. 12458. An act to increase the amount authorized to be appropriated for the work of the President's Committee on Employment of the Physically Handicapped;

H.R. 12574. An act to amend the Long-shoremen's and Harbor Workers' Compensation Act, so as to provide that an injured em-ployee shall have the right to select his own physician, and for other purposes:

H.R. 12580. An act to extend and improve coverage under the Federal old-age, survivors, and disability insurance system and to remove hardships and inequities, improve the financing of the trust funds, and provide disability benefits to additional individuals under such system; to provide grants to States for medical care for aged individuals of low income; to amend the public assistance and maternal and child welfare provisions of the Social Security Act; to improve the unemployment compensation provisions of such act; and for other purposes;

H.R. 12699. An act to cancel a deed of trust to the United States from the predecessor in name of Gallaudet College and any evidences of indebtedness related to the same transaction, to quiet the college's title to property belonging to it, and for other pur-

H.R. 12993. An act to amend the District of Columbia Teachers' Salary Act of 1955, as amended:

H.R. 13066. An act to amend section 4(a) of the Securities Exchange Act of 1934, as amended:

H.J. Res. 311. Joint resolution authorizing the erection of a statute of Taras Shevchenko on public grounds in the District of Columand

H.J. Res. 704. Joint resolution to remove copyright restrictions upon the musical composition "Pledge of Allegiance to the Flag," and for other purposes.

On September 14, 1960:

H.R. 816. An act to convey certain lands in Oklahoma to the Cheyenne and Arapaho Indians, and for other purposes;

H.R. 1526. An act for the relief of F. P. Tower, Lillie B. Lewis, the estate of Manuel Branco, John Santos Carinhas, Gomez Carinhas, and Manuel Jesus Carinhas;

H.R. 3536. An act for the relief of Guada-

lupe Villarreal, Jr.;

H.R. 4306. An act to provide education and training for the children of veterans dying of a disability incurred after January 31, 1955, and before the end of compulsory military service and directly caused by military, naval, or air service, and for other purposes;

H.R. 7810. An act to credit periods of internment during World War II to certain Federal employees of Japanese ancestry for purposes of the Civil Service Retirement and the Annual and Sick Leave Act of 1951;

H.R. 8156. An act for the relief of Jack Kent Cooke;

H.R. 8166. An act for the relief of the Crum-McKinnon Building Co., Billings, Mont .:

H.R. 9715. An act for the relief of Otis Drinkard;

H.R. 10087. An act to amend the Internal Revenue Code of 1954 to permit taxpayers to elect an overall limitation on the foreign tax credit;

H.R. 10586. An act to enable the Oregon Short Line Railroad Co. to convey title to certain lands in Idaho to the Pocatello First Corporation of the Church of Jesus Christ of Latter-day Saints;

H.R. 10960. An act to amend section 5701 of the Internal Revenue Code of 1954 with respect to the excise tax upon cigars, and for other purposes;

H.R. 11322. An act for the relief of Col.

Joseph A. Nichols; H.R. 11380. An act for the relief of Mr. Joe

H.R. 12536. An act relating to the treat-ment of charges for local advertising for purposes of determining the manufacturers sale price:

H.R. 12759. An act to amend title V of the Agricultural Act of 1949, as amended, and for other purposes; and

H.J. Res. 784. Joint resolution amending the act of July 14, 1960, to extend the time within which the United States Constitution One Hundred and Seventy-fifth Anniversary

Commission shall report to Congress and including certain amendments relating to housing

On September 15, 1960:

H.R. 2565. An act to promote effectual planning, development, maintenance, and coordination of wildlife, fish, and game conservation and rehabilitation in military res-

H.R. 10341. An act to amend the Public Health Service Act to authorize grants-in-aid to universities, hospitals, laboratories, and other public or nonprofit institutions to strengthen their programs of research and research training in sciences related to health:

H.R. 12659. An act to suspend for a temporary period the import duty on heptanoic

acid, and for other purposes;

H.J. Res. 402. Joint resolution granting the consent and approval of Congress for States of Virginia and Maryland and the District of Columbia to enter into a compact related to the regulation of mass transit in the Washington, District of Columbia metropolitan area, and for other purposes; and

H.J. Res. 723. Joint resolution extending an invitation to the Federation Aeronautique Internationale to hold the 1962 world sport parachuting championships at Orange, Mass.

On September 16, 1960: H.R. 10841. An act to amend the Tariff Act of 1930 to place bamboo pipe stems on the free list.

### HOUSE BILLS AND JOINT RESOLU-TIONS DISAPPROVED AFTER SINE DIE ADJOURNMENT

The message further announced that the President had disapproved bills of the House of the following titles:

On September 8, 1960:

H.R. 6767, RAYMOND BAURKOT

I have withheld my approval from H.R. 6767, for the relief of Raymond Baurkot.

This bill would permit the filing of a tax refund claim that was in fact filed after the deadline date set by law.

Public Law 85-859 provided for the refund of internal revenue taxes paid on certain liquors lost as the result of a major disaster occurring prior to the date of enactment, September 2, 1958. It required that claims be filed on or before March 2, 1959. The claimant filed on March 16, 1959, for a refund of \$382.10 paid in taxes on beer destroyed in a 1955 flood. He asserted that he had telephoned the branch office of the district director's office in Easton, Pa., on February 26, 1959, and was informed by an unidentified person that he had a "couple of months" in which to file.

The Easton branch office has no record of any such request for information from Mr. Baurkot. That office, moreover, does not itself handle alcohol-tax problems. Its standard procedure is to refer such inquiries to the assistant regional commissioner's office in Philadelphia which has general supervision over such matters.

Information concerning Public Law 85-859 and its filing requirements were widely disseminated to the liquor industry by the Internal Revenue Service. It appears that the claimant received the industry circular published by the Service but thereafter misplaced it. This circular set forth the March 2 deadline and specifically provided that inquiries regarding claims should be addressed to the assistant regional commissioner's office.

Under these circumstances I am unable to approve this bill. The statutory period of limitations, which the Congress has included in the revenue system as a matter of sound policy, is essential to the achievement of finality in tax administration. Efficient administration of the tax laws is dependent upon taxpayers meeting statutory deadlines. To grant special relief in this case would be to discriminate against other similarly situated taxpayers and to create an undesirable precedent.

DWIGHT D. EISENHOWER. THE WHITE HOUSE, September 8, 1960.

On September 8, 1960:

H.R. 7242, BANKRUPTCY ACT-STATUTORY LIENS

I have withheld my approval of H.R. 7242, to amend sections 1, 57j, 64a(5), 67b, 67c, and 70c of the Bankruptcy Act, and for other further purposes.

I recognize the need for legislation to solve certain problems regarding the priority of liens in bankruptcy, but this bill is not a satisfactory solution. It would unduly and unnecessarily prejudice the sound administration of Federal tax laws. In some cases, for example, mortgages would be given an unwarranted priority over Federal tax liens even though the mortgage is recorded after the filing of the tax lien.

This and other defects of the bill can, I believe, be corrected without compromising its primary and commendable purpose. The Treasury Department and the proponents of H.R. 7242 have been working toward solution of recognized problems in present law, Further cooperative efforts should produce satisfactory legislation that would avoid the undesirable effects of this bill.

DWIGHT D. EISENHOWER. THE WHITE HOUSE, September 8, 1960.

On September 14, 1960:

H.R. 2074, ERIC AND IDA MAE HJERPE

I am withholding my approval from H.R. 2074, for the relief of Eric and Ida Mae Hierpe.

In their income tax return for 1952 these taxpayers reported as income certain disability payments received by Mr. Hjerpe from his employer. During 1952, however, the Court of Appeals for the Seventh Circuit had held such disability payments excludable from gross income, even though the Internal Revenue Service had ruled to the contrary, and in 1957 the U.S. Supreme Court affirmed.

The taxpayers' claim for refund, based upon the excludability of the disability pay received by Mr. Hjerpe, was filed almost 4 years after the 1952 return had been filed and approximately 10½ months after the expiration of the applicable 3-year statutory period of limitations. The claim was accordingly disallowed.

The last Congress enacted legislation to grant general relief, on a nondiscriminatory basis, to taxpayers who had paid income tax on disability pay excludable from gross income under the Supreme Court decision. Relief was not provided,

however, for taxpayers who, as in the case at hand, had not attempted to protect their rights by filing timely claims for refund.

H.R. 2074 would direct the payment to Mr. and Mrs. Hjerpe of \$1,096.48 as a refund notwithstanding their late filing and failure to qualify under the general relief legislation. The bill is similar to several others from which I have withheld my approval in the past.

The statutory period of limitations, which the Congress has included in the revenue system as a matter of sound policy, is essential in order to achieve finality in tax administration. A substantial number of taxpayers paid income tax on disability payments received by them and failed to file timely claims for refund. To grant special relief in this case, where a refund was not claimed within the time prescribed by law, would constitute a discrimination against other similarly situated taxpayers and would create an undesirable precedent.

Under the circumstances, therefore, I am compelled to withhold my approval of the bill.

DWIGHT D. EISENHOWER. THE WHITE HOUSE, September 14, 1960.

On September 14, 1960:

H.R. 7618, H. P. LAMBERT CO., INC., AND SOUTHEASTERN DRILLING CORP.

I am withholding my approval from H.R. 7618, a bill for the relief of H. P. Lambert Co., Inc., and Southeastern Drilling Corp.

The bill would waive the applicable statute of limitations and permit a claim for refund of duty paid on certain nondutiable equipment imported into the United States.

The claimants requested that certain oilfield equipment be entered under provisions of the tariff act affording dutyfree status to property originally manufactured in the United States. The equipment was admitted duty-free after the Lambert Co., the brokerage firm in the case, had posted a bond to assure production of the documentation required to establish U.S. origin. At the request of the brokerage firm, the time covered by the bond was extended on several occasions. At the end of 2 years, and when no further request for extension had been received, customs officials personally contacted the firm and advised that the duty would be payable if the requisite documentation were not furnished promptly. Despite this notice and despite a subsequent assessment of the duty, of which the brokerage firm was apprised and which it could have protested within 60 days, the Lambert Co. failed to produce proof of U.S. origin until after its consideration was barred by applicable law and regulations.

Statutes of limitations should be set aside only when justified by compelling equitable considerations. No such considerations appear here. The only extenuating circumstance advanced in this case is that the notice of the assessment of duty was sent to the wrong party. I am advised, however, that the notice was properly sent to the brokerage firm as the party liable for the payment of duty.

Furthermore, the firm, presumably wellversed in the customs laws, had not only been given repeated extensions on the bond it posted but had also been specifically advised of the imminence of an assessment of duty.

For these reasons I am unable to approve this bill.

DWIGHT D. EISENHOWER.
THE WHITE HOUSE, September 14, 1960.

# LAWS RELATIVE TO THE PRINTING OF DOCUMENTS

Either House may order the printing of a document not already provided for by law, but only when the same shall be accompanied by an estimate from the Public Printer as to the probable cost thereof. Any executive department, bureau, board, or independent office of the Government submitting reports or documents in response to inquiries from Congress shall submit therewith an estimate of the probable cost of printing the usual number. Nothing in this section relating to estimates shall apply to reports or documents not exceeding 50 pages (U.S. Code, title 44, sec. 140, p. 1938).

Resolutions for printing extra copies, when

Resolutions for printing extra copies, when presented to either House, shall be referred immediately to the Committee on House Administration of the House of Representatives or the Committee on Rules and Administration of the Senate, who, in making their report, shall give the probable cost of the proposed printing upon the estimate of the Public Printer, and no extra copies shall be printed before such committee has reported (U.S. Code, title 44, sec. 133, p. 1937).

### GOVERNMENT PUBLICATIONS FOR SALE

Additional copies of Government publications are offered for sale to the public by the Superintendent of Documents, Government Printing Office, Washington 25, D.C., at cost thereof as determined by the Public Printer plus 50 percent: Provided, That a discount of not to exceed 25 percent may be allowed to authorized bookdealers and quantity purchasers, but such printing shall not interfere with the prompt execution of work for the Government. The Superintendent of Documents shall prescribe the terms and conditions under which he may authorize the resale of Government publications by bookdealers, and he may designate any Gov-ernment officer his agent for the sale of Government publications under such regulations as shall be agreed upon by the Superintendent of Documents and the head of the respective department or establishment of the Government (U.S. Code, title 44, sec. 72a, Supp. 2).

### RECORD OFFICE AT THE CAPITOL

An office for the Congressional Record, with Mr. Raymond F. Noyes in charge, is located in Statuary Hall, House wing, where orders will be received for subscriptions to the Record at \$1.50 per month or for single copies at 1 cent for eight pages (minimum charge of 3 cents). Also, orders from Members of Congress to purchase reprints from the Record should be processed through this office.

### CONGRESSIONAL DIRECTORY

The Public Printer, under the direction of the Joint Committee on Printing, may print for sale, at a price sufficient to reimburse the expenses of such printing, the current Congressional Directory. No sale shall be made on credit (U.S. Code, title 44, sec. 150, p. 1939).

# Congressional Record

PROCEEDINGS AND DEBATES OF THE 86th CONGRESS, SECOND SESSION

Vol. 106

WASHINGTON, TUESDAY, SEPTEMBER 20, 1960

No. 152

# Appendix

# NOTICE

The last issue of the daily Congressional Record for the second session of the Eighty-sixth Congress will be published not later than Wednesday, September 21, 1960. It is requested that copy and proofs of speeches withheld for revision, or extensions of remarks as authorized by either House, be submitted to the Government Printing Office or to the Congressional Record Clerk, Statuary Hall, Capitol, before that date.

By order of the Joint Committee on Printing.

CARL HAYDEN, Chairman.

Activities of the Committee on Un-American Activities During the 2d Session of the 86th Congress

EXTENSION OF REMARKS

### HON. FRANCIS E. WALTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES Thursday, September 1, 1960

Mr. WALTER. Mr. Speaker, under leave to extend my remarks in the Record, I include the following report on the activities of the Committee on Un-American Activities during the 2d session of the 86th Congress. This report covers the period from January 1, 1960, to and including September 1, 1960.

Under date of September 18, 1959, I inserted in the Record a report on the activities of the Committee on Un-American Activities during the 1st session of the 86th Congress.

REPORT ET CHAIRMAN FRANCIS E. WALTER ON THE ACTIVITIES OF THE COMMITTEE ON UN-AMERICAN ACTIVITIES DURING THE 2D SES-SION OF THE 86TH CONGRESS

During the period beginning January 1, 1960, and ending September 1, 1960, the committee interrogated 108 witnesses in public session.

### AIR RESERVE TRAINING MANUAL

In February 1960, the Secretary of the Air Force, Dudley C. Sharp, was quoted in the press as categorically repudiating the Air Reserve Center Training Manual as representing Air Force views. Much of the manual dealt with problems of Communist infiltration of church groups in the United States. Some of the material contained in the manual was derived from publications of the Committee on Un-American Activities. Accordingly, Secretary Sharp was invited to appear before the committee to testify on the subject matter.

In response to committee questions, Secretary Sharp testified, among other things, that he did not intend in his prior statements to repudiate the integrity, validity, or accuracy of the testimony before the Committee on Un-American Activities which is quoted in the manual.

COMMUNIST TRAINING OPERATIONS—ACTIVITIES AND PROPAGANDA AMONG YOUTH GROUPS

Continuing a series of hearings on Communist training operations, begun in 1959, the committee held hearings in Washington on "Communist Activities and Propaganda Among Youth Groups." These hearings explored the history and background of Communist penetration of youth groups, surveyed typical Communist propaganda publications which are entering the United States destined to schools and colleges, and developed factual information respecting the Communist-controlled youth festival held during the summer of 1959 in Vienna, Austria.

### ESPIONAGE

Pursuing its continuing investigation of Communist espionage operations in the United States, the committee released testimony taken in executive session from Lt. Col. Frantisek Tisler, former military and air attaché of the Czechoslovak Embassy in Washington.

Colonel Tisler had defected and asked for political asylum in the United States on July 25, 1959. He testified that he had been trained in espionage techniques before coming into this country in 1955 and that, from the time of his arrival until his defection, he had served as chief of the Czechoslovak Military Intelligence Directorate Residentura which had its headquarters at the Czechoslovak Embassy in Washington, D.C. In this capacity, he stated, he had five officers serving under him—four attached to the Embassy and one to the Czechoslovak United Nations delegation in New York. Prior to leaving Czechoslovakia, Colonel Tisler said, he was told that his title of military and air attaché was primarily a legal cover for espionage activities and that his principal job would be to recruit U.S. agents and get information from them on classified U.S. materials. He estimated that during the period of his services in the Czechoslovak Embassy in Washington, 45 percent of the Embassy personnel and personnel of the U.N. delegation in New York was engaged in espionage activities against the

He also testified that an American Communist, Antonin Krchmarek, of Cleveland, had been in frequent contact with Embassy personnel during this period; that the Embassy had provided funds for Krchmarek's defense when he was on trial under the Smith Act; that Krchmarek had contacted the Czechoslovak Foreign Institute (a propaganda agency) when he visited that country in 1950, and that Krchmarek had provided information to Czechoslovak Ambassador Petrzelka on the U.S. Communist Party, the 1958 elections and other matters for transmittal to the Communist Government of Czechoslovakia.

Colonel Tisler also identified Charles Musil, editor of a Czechoslovak language newspaper in Chicago, as an intermediary between Krchmarek and the Czechoslovak Ambassador.

When Krchmarek and Musil testified on May 26, 1960, they repeatedly invoked the fifth amendment in response to questions concerning the testimony of Colonel Tisler. Krchmarek, however, did deny that he had ever received funds from the Czechoslovak Embassy or any of its personnel. He also said that he had never given any classified information to the Czechoslovak Ambassador.

Musil denied that the Embassy or Czechoslovak Government had ever paid any expenses for him, or that he had served as an intermediary between Krchmarek and Ambassador Petrzelka. NORTHERN CALIFORNIA COMMUNIST PARTY

In hearings held in San Francisco in May, during which 42 witnesses testified, the committee explored the organization and operations of the northern California district of the Communist Party. In the course of these hearings, this unit of the Communist Party demonstrated its strength-and danger-as a Soviet fifth column operating on American soil. By means of a carefully organized campaign and with the assistance of a number of Communists fronts, as well as some non-Communist groups and individuals, it not only succeeded in turning out thousands of demonstrators to protest the committee hearings, but also prodded hundreds of them into mob violence on the second day of the hearings. On the very first day of the hearings, a group of hardcore leaders of the northern California district of the Communist Party succeeded in taking virtual control of the hearing room and forcing suspension of proceedings for a period of about 40 minutes. Despite the disruptive activities of these Communists and their dupes, however, the hearings produced extensive information on Communist Party strategy and tactics on the national level, as well as in California.

# COMMUNIST ACTIVITIES AMONG THE SEAMEN AND ON WATERFRONT FACILITIES

The grave danger to the Nation's security posed by the lack of any effective waterfront security program was highlighted in hearings held by the committee in Washington, D.C.

Support for a bill introduced by the committee chairman to correct this situation—which has been brought about by court decisions invalidating the former seamen's security program, was voiced in the hearings by Vice Adm. James E. Hirshfield, Assistant Commandant of the Coast Guard; Ray R. Murdock, Washington counsel for the Seafarers International Union of North America; H. Howard Ostrin, general counsel of the National Maritime Union, and Hoyt S. Haddock, director, seafarers section of the maritime trades department, AFI—CIO.

Two former Communists who had served in the waterfront section of the Communist Party in various U.S. ports, pointed out that Communist seamen were a grave security threat because they could be used for espionage and communications networks, for sabotage, and in the smuggling of Communist espionage agent and couriers into and out of the country.

Representatives of the maritime unions pointed out that under present conditions the United States has no jurisdiction over seamen employed on fiag of convenience ships, which are owned by U.S. civilians but sail under foreign flags with largely foreign crews.

Nine witnesses, all of whom currently hold papers as seamen or ships' radio operators, invoked the fifth amendment when asked questions concerning Communist Party membership and Communist activities.

COMMUNIST PENETRATION OF RADIO FACILITIES

The threat to the integrity of the Conelrad defense system, stemming from Communist radio operators, was explored in committee hearings conducted in Washington on H.R. 12852, a bill introduced by the chairman. This bill, designed to cope with Communist infiltration in the field of radio communications, prohibits the issuance of a radio operator's license to any individual who willfully fails or refuses to answer certain questions relating to Communist activities when summoned to appear before designated Federal agencies.

Representatives of the FCC, the Air Force, broadcasting and cable companies testified in the hearings, in addition to a number of uncooperative witnesses who either hold licenses or have applications for them pending before the FCC and who invoked the fifth amendment on present Communist Party membership.

### REPORTS

### COMMUNIST TARGET: YOUTH

The Communist success in the student riots during the May hearings of the committee in San Francisco proves that it can happen here, J. Edgar Hoover, Director of the Federal Bureau of Investigation, stated in a report entitled "Communist Target: Youth," published by the committee.

The Communists demonstrated in San Francisco just how powerful a weapon Communist infiltration is, Mr. Hoover stated. He continued:

"They revealed how it is possible for only a few Communist agitators, using mob psychology, to turn peaceful demonstrations into riots. Their success there must serve as a warning that their infiltration efforts aimed not only at the youth and student groups, but also at our labor unions, churches, professional groups, artists, newspapers, government, and the like, can create chaos and shatter our internal security.

"Throughout the world today, governments are toppling with stunning rapidity. Whether large or small, the role Communists are playing in these events must not be discounted. The growing strength of our Nation over the years has not proven a deterrent to relentless efforts on the part of the Communist Party, U.S.A., to destroy our security and prepare our Nation for a similar fate."

Commenting on Communist infiltration and agitation tactics among youth, Mr. Hoover stated:

"The successful Communist exploitation and manipulation of youth and student groups throughout the world today are a major challenge which free world forces must meet and defeat. Recent world events clearly reveal that world communism has launched a massive campaign to capture and maneuver youth and student groups."

In the United States the Communist Party is engaged in a major campaign among youth, with campuses throughout the Nation as prime targets for Communist inflitration and recruitment efforts, Mr. Hoover warned.

Using the Communist success in inciting the student riots against the House Committee on Un-American Activities as an illustration, he stated that it is particularly unfortunate that the many youth and student groups in our Nation today are totally unaware of the extent to which they can be victimized and exploited by the Communists.

### WORLD COMMUNIST MOVEMENT

The first volume of a selected chronology of major developments in the history of world communism, covering the years 1818–1945, was prepared for the committee by the Legislative Reference Service of the Library of Congress.

The volume documents the expansion of communism throughout the globe and, in the words of the committee chairman, provides "a basis of judging the continuity, tenacity, and all-encompassing character of the world Communist movement."

The chronology reveals that Communist Parties in all nations, including the United States, have, throughout their existence, followed slavishly the orders of the Kremlin.

Subsequent volumes will document major Communist developments through the year 1957, and an index to the overall chronology will be published.

### CONSULTATIONS

### Lest we forget

This pictorial account of communism in action—a vivid portrait of what communism really is as opposed to what it claims to be—is composed of photographs of events in the Soviet Union and 11 other nations which have become captives of communism. A commentary on the pictures and their sig-

nificance is given by Klaus S. G. Romppanen, president of The Fight for Freedom—a Pictorial Exhibit from which the photographs were obtained.

The "liberating" Communist troops, torture instruments and chambers, mass graves of the murdered victims of communism, the "living dead" survivors of Communist concentration camps and organized starvation campaigns portrayed in this document throw the cold light of undeniable truth on the terror and violence used by Communists to subject the captive peoples of Europe to Communist domination and to crush the resistance of rebellious nationality groups within the Red empire. The photographs drive home, in a manner which words alone cannot, the true nature of the enemy that this country and all humanity faces.

### SOVIET JUSTICE AND SLAVE LABOR CAMPS

A detailed account of the mockery that is Soviet justice, from initial arrest without any legal authority to final imprisonment in Siberian slave labor camps, was given the committee by Adam Joseph Galinski, a for-mer Polish Government official who had fought in both the anti-Nazi and anti-Communist undergroud in Poland before spending almost 12 years in the Soviet prisons and slave labor camps in the Vorkuta area. Mr. Galinski also described the horrible conditions under which inmates of Soviet labor camps and prisons live. He stated that no one, not even Soviet Communist Party members, was allowed inside Soviet slave labor camps and described certain accounts of conditions in these camps, written by Americans who had allegedly visited them, as a tale out of "A Thousand and One Nights." could account for the reports of these people which contradict all he learned of Soviet slave labor camps during his 12 years imprisonment, he said, only by information he heard while a prisoner that the Soviet Government operated "showplace" prisons which were populated by secret-police personnel posing as prisoners in order to hoodwink visiting foreigners. He branded as false the reports that the MVD (secret police) had been shorn of power over Soviet slave-labor camps in 1953. He also stated that America was a legend with the prison-ers; that they hated the regime and looked forward to the downfall of the Communist

### COMMUNIST ECONOMIC WARFARE

Under present conditions trade with non-Communist nations may play the most important role in Moscow's drive for world domination, Dr. Robert Loring Allen, associate professor of economics at the University of Oregon, stated in a consultation with the committee. Military action is increasingly risky for the Soviet Union because of U.S. preparedness and the tremendous destructive power of nuclear weapons. The Kremlin is therefore stressing the use of nonmilitray weapons. Trade, Dr. Allen said, appears to most people to be a completely neutral, nonideological act. For this reason the Soviet Union, which uses trade as a weapon of conquest, might find it possible to utilize it in areas where other weapons such as political pressure, propaganda, and military action were not feasible. Trade is probably the cheapest and most profitable of the nonmilitary weapons in the Soviet arsenal, he said.

For the time being, Dr. Allen stated, the primary aim of the U.S.S.R. is not necessarily Communist Party rule of other nations but rather the transfer of their sovereignty to Moscow. This can be accomplished through trade which, in the vital economic field, can give the Soviet Union effective domination of other nations.

He also said that the Soviet Union has certain built-in advantages in its use of economic weapons against other nations: Soviet trade negotiators have behind them the full power of their Government, an element which their opposite numbers lack; loan negotiations provide a means for obtaining detailed information on a nation's economic condition, and trade relations provide openings for political propagands and also for the achievement of Soviet foreign policy objectives through economic pressure.

DUPING POREIGNERS IN RED CHINA

A carefully calculated and highly organized procedure costing huge sums of money and including thousands of persons has been developed by the Red Chinese govern-ment to deceive visitors to that country, according to Robert Loh, who escaped through Hong Kong in the summer of 1957, after serving as a showcase capitalist and receptionist-host for visiting foreigners in Red China. Certain cities, he explained, have been designated by the regime for visits by foreigners. In each one there is a bureau employing thousands of interpreters and other highly trained personnel to take care of the visitors and to see that they are permitted to enter only certain mills, factories, and homes. Special hotels have been designated for the housing of visitors. These, too, are staffed with specially trained personnel and feature restaurants and shops in which are found better food and products at lower prices than are available to the Chinese people.

When important foreign dignitaries visit a city such as Shanghai, he revealed, as many as half a million people will be selected and trained to give the dignitary a

proper "spontaneous" reception.

This huge Chinese operation of deceit has been so carefully prepared that the regime is successful in deceiving even trained newspapermen and skeptical anti-Communists

who visit the country.

In China, Mr. Loh said: "Whatever the foreign visitors ask, they are bound to hear lies. No truth can be heard." He also said that the Chinese Communists use the same tactics of deception on visiting Communists that they use on the non-Communists.

### LEGISLATION

Based upon extensive investigations and hearings, the committee reported favorably to the House the bill (H.R. 12753) introduced by the chairman to amend the Subversive Activities Control Act of 1950, so as to require the registration of certain additional persons disseminating political propaganda within the United States. On August 22, 1960, the bill passed the House.

The committee also reported favorably the bill (H.R. 11580) introduced by the chairman to amend the Subversive Activities Control Act of 1950, so as to provide that no individual who willfully fails or refuses to answer, or falsely answers, certain questions relating to Communist activities, when summoned to appear before certain Federal agencies, shall be employed on any merchant vessel of the United States, or within certain waterfront facilities in the United States.

### On Labor Day, 1960

EXTENSION OF REMARKS

# HON, HARRISON A. WILLIAMS, JR.

OF NEW JERSEY

IN THE SENATE OF THE UNITED STATES

Thursday, September 1, 1960

Mr. WILLIAMS of New Jersey. Mr. President, an article which recently appeared in the Daily Journal of Elizabeth, N.J., gave a pre-Labor Day description of the accomplishments of the American labor force and some of the areas where additional achievement is necessary.

Among those groups that await improvement, for instance, are the migrant farmworkers. As chairman of the Senate Subcommittee on Migratory Labor, I have seen firsthand evidence of this need, and I am grateful for the notice given by the Journal to it. The editorial points out also that problems exist for the aged, the Negro, members of other minority groups, and those displaced by automation.

The editorial also points out that much credit is due to labor for "the ingenuity and foresight that have made America the world's prime industrial power." We, in this Nation, welcome the annual reminders of the contributions of labor to our general well-being.

Mr. President, I ask unanimous consent to have the article printed in the Appendix of the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

### ON LABOR DAY, 1960

After a long look at the status of the American workingman on Labor Day, 1960, Secretary of Labor James P. Mitchell sees a few clouds on an otherwise bright horizon. The plight of the migratory farmworker,

which has been thrust into national attention by Senator Harrison A. Williams, Ja., another Union County figure on the Capital scene, is troubling the Labor Secretary.

The migrant, who averages less than \$1,000 a year while all around him enjoy abundance, must be afforded an equal economic

opportunity, Mr. Mitchell says.

Problems also exist for the aged, the Negro, and other members of minorities because of discriminatory hiring practices. Automation, the shift of industrial bases, shrinking markets, and exhaustion of resources contribute to difficulties for thousands of others, according to the Labor Secretary.

But for the vast majority of the American labor force, 1960 marks a high point. The gross national product of their efforts is valued at a half trillion dollars, more than ever recorded. Personal income is at an all-time high, and employment totals are inching toward a record. The Secretary terms it a remarkable level of well-being.

American labor can take pride in the statistics cited by Mr. Mitchell for in a large measure it is responsible for them. It has supplied not only the muscle, but much of the ingenuity and foresight, that have made America the world's prime industrial power.

In cooperation with American management, labor has shown the world that the workingman can advance and prosper in societies other than those controlled by the state. The worker's high standard of living in the United States is the Nation's most, potent weapon in the propaganda war.

Understanding between labor and capital, though sometimes obscured by dispute and strike, is at the highest level in its history. In this lies the hope that the clouds that spot the bright horizon soon will be blown away.

# Congressman Moeller Reports to His District

EXTENSION OF REMARKS

OF

# HON. WALTER H. MOELLER

OF OHIO

IN THE HOUSE OF REPRESENTATIVES Thursday, September 1, 1960

Mr. MOELLER. Mr. Speaker, for more than three score years, the 10th

Congressional District of Ohio—the great district I now have the honor and privilege to represent in Washington—was served by my good friend, the late Tom Jenkins, of Ironton.

During his many years of service, Tom Jenkins kept his district informed about what was going on in Washington, particularly those legislative issues affecting the 10th District. I have tried to do the same by sending a periodic newsletter, prepared at my own expense, except for the privilege of the frank, to the people of the 10th District. This newsletter, "News Briefs From Washington," has been so well received that the initial printing of 3,000 copies has been increased to 7,000. These are distributed solely to constituents who have specifically asked me to send the newsletter whenever it is issued.

The overwhelming response in favor of my newsletter now prompts me to prepare and circulate a concise report on the 86th Congress for the information of all residents of the 10th District. Every public official in or out of office, in my opinion, has the just and proper obligation—and I might add, the moral duty—to comply with that Biblical injunction: "Give an account of thy stewardship." Luke 16: 2.

While it is obviously impossible to record in this brief account every word and every action I took in behalf of the people of the 10th District, I am placing into the public record this summary of my efforts and work in their behalf and my personal views and stand upon some of the great issues which came before the Congress.

Some of the most satisfying and rewarding moments of my work during the past 2 years for the 10th District came from the very many favorable results I managed to obtain for those persons who came to me for help. While vitally important to the people concerned, these problems often found quick solution either through a phone call to the Federal officials in charge or a telegram or letter to the field office having jurisdiction. Others were more challenging, requiring concentrated effort and many hours of work. At all times, however, it was my privilege to share the problems and uncertainties of someone in need and deserving of help. The cherished and heartwarming expressions of thanks from the very many people I have managed to help will remain always with me as the greatest reward public service can offer.

Early in the 86th Congress, Mr. Speaker, I was tremendously pleased to be given the highly coveted assignment to the House Committee on Science and Astronautics, the new major standing committee of the House which is the legislative pioneer on the vital problems of space research and development. Dealing with highly technical, scientific research activities and exercising jurisdiction over almost entirely new frontiers of science, the committee has been one of the busiest and hardest working in the House, so much so that it has earned the Holmes Alexander Award as the Outstanding Congressional Committee of the Year.

In the second session alone, this committee conducted some 27 investigations, in many of which I was privileged to participate, whose scope ranged from exploration at the bottom of the sea to Army plans for construction on the moon. My experience and background on this vital committee have already provided direct benefits to Ohio and I shall continue my efforts to see to it that our State receives its equitable share of all Federal awards dealing with space research, missile and allied activities.

The distinguished chairman of this committee, the Honorable Overton Brooks, has indeed been kind to single out my work as a member of subcommittee No. 2 and the special investigating subcommittee. Just recently, Chairman Brooks wrote me in part, as follows:

I would like to take this opportunity to let you know how much I value your efforts on behalf of the committee during the past

on behalf of the committee during the past 2 years, and how much I have enjoyed the close association we have had in working together to make the committee what it is together.

today.

Your contributions to the success and recognition of the committee are immeasurable. Among these, I feel you have made a major contribution because of your work on subcommittee No. 2 and the special investigating subcommittee, and your record of attendance at committee meetings is outstanding.

As a freshman Member of Congress, I was deeply honored-and in a sense overwhelmed-by my designation early in the 86th Congress to be an official delegate of the U.S. House of Representatives to the NATO Parliamentarians' Conference in London. My attendance at this conference, made up of some 650 delegates from the NATO countries of the world, was a stimulating and instructive experience in international relations. It was my good fortune to be named a member of the Spiritual and Cultural Committee at the London Conference which attracted such world leaders as Prime Minister of England Harold Macmillan: Lt. Gen. James M. Gavin; the late Clement Attlee, former Prime Minister of England; Dr. Richard Jaeger, vice president of the West German Parliament; and Nils Langhelle, president of the Norwegian Parliament.

Mr. Speaker, the 86th Congress dealt with many issues. In fact, the House alone during 1959 and 1960 considered nearly 2,000 individual pieces of legislation. Of necessity, I am prevented from full comment on all this varied and extensive legislation and, therefore, will touch only upon some of the major legislative issues affecting the people of the 10th District.

One of the greatest tragedies I have observed during my professional life and more recently during my service in Congress has been the spectacle of many of our older citizens, in what should be the golden years, actually finding themselves in the evening of their lives in privation and want. After a lifetime of toil in industry or on the farm, after spending their earnings in bringing up, supporting, and educating their children, and after contributing their productive years to the strength and wealth

of this Nation, these worthy folks often find themselves discarded and unwanted. The plight of these good people has been of deep personal concern to me and that is why I actively supported and worked for the liberalization of the social security program. My live interest in the aged, based upon conditions I have observed personally, has been intensified by the very many pleas for assistance which have been reaching me in increasing number.

As they enter the fifties and sixties, many American citizens are faced with new problems and new changes in their lives. Often the serious illness of one partner has meant exhausted savings, depleted resources, and often the bare necessities of life if public charity is to be avoided.

While the Congress has grappled periodically with the problem of adequate social security retirement benefits to meet steadily rising living costs, this year a small step toward effectuating a medical care program for the aged was taken by the 86th Congress with the passage of H.R. 12580, which I supported.

However, this is not the complete answer to the high cost of hospitalization and chronic sickness for the aged and their families. Many instances have come to my attention where substantial, hard-working people, suffering from chronic illness after and sometimes before retirement, have had their entire life savings eaten away by heavy medical expenses for hospital, medical, and nursing care.

For the rich and poor alike, this is no problem. The rich can afford to pay. The poor have our social and welfare agencies to which they can turn. For the rank and file of our people, for the hard-working little businessman, the great middle class, professional people and the like who cannot turn this burden over to others, the high cost of medical and hospital care is truly staggering.

I pledge myself anew to continue my work in the Congress to correct the imperfections and injustices of our present laws dealing with the aged so that all these worthy persons, who are truly one of America's great assets, instead of an unwanted liability, such as is now tragically often the case, may enjoy the peace of mind that comes from security from want and misery. This is the sacred cause to which I shall continue to devote unstinted energy and devotion.

Mr. Speaker, inflationary conditions present another tremendously serious problem to all Americans, whether young or old. Constantly rising prices bring new demands for corresponding rises in wages and thus the vicious spiral continues unabated to the point where purchasing power lags far behind consumer prices. The Federal Government must encourage and stimulate increased industrial production and capacity; not hinder or obstruct small business through bureaucratic interference, confiscatory taxes, and the unwise manipulation of interest rates.

The Presidential veto of the depressed areas bill, which had my strong support and vote because of its tremendous potential to the 10th District, was most unwise. I believe the President was not given all the facts when this bill came to him for signature. In May of this year, I urged the President to sign this needed legislation and during the debate in the House, I cited the three counties in Ohio, including our own Meigs County, where this Federal program would do much to revive industrial growth and help provide jobs for our people.

I shall continue to work vigorously in Congress for a Federal program of action to provide jobs—and that is what my people want, not handouts—to maintain a greater and more prosperous

American economy.

It is my belief that we should rehabilitate those areas in need in our own country instead of fostering industries abroad which compete with American plants. I sponsored legislation to protect American industry against foreign competition and will continue my fight in the next Congress to obtain adequate safeguards to protect our industries and the jobs of American workers against the influx of cheaply produced foreign goods which are flooding this country. cut-throat foreign competition is threatening our industries and prosperity, reducing Federal revenue and creating unemployment in many areas of the country and is hurting our own industries in Ohio. I cite particularly those producing clay products, glass, leather goods including baseball gloves, and canvas footwear. Ohio cannot afford to lose any industries in competition with the 10 and 12 cents an hour wages in some countries of the world which have built up their industries under our foreign aid program at the expense of the heavily taxed American worker and American industry.

We must not promote the disintegration of our own essential domestic industries at the expense of our own hardworking people who pay the bill for grandiose foreign aid handouts. I, for one, will continue to seek a more realistic regard and consideration for the interest and needs of American workers and American industries and the general

prosperity of the Nation.

Another pressing domestic problem in an area where the Federal Government plays a vital role is the completion of the comprehensive program to end disastrous floods in the Ohio Basin. Much has been done to alleviate flood conditions in many parts of the basin, but there still is work to be done, especially in those areas which were hit by last year's floods.

During the 86th Congress, I vigorously worked for the vital Belleville locks and dam project, which upon completion will do so much to prevent a repetition of the disastrous floods of the past. I held many conferences with the Army engineers in Washington and in Ohio on this \$57 million project and also sought the aid of my colleagues on the House Appropriations Committee, including Ohio's distinguished Congressman Mike Kirwan, to make available the necessary funds to get this project underway.

My pleas were successful and the Army engineers will now be able to complete the necessary detailed planning of the Belleville project with the \$250,000 appropriated by Congress this year. The Congress voted \$125,000 last year for pre-

liminary Belleville planning.

While additional funds for actual construction would have been desirable. budgetary restrictions and professional engineering estimates have deferred construction until such time as the planning is in the advanced stages. The Belleville work, which will require 5 or 6 years to complete, will be the largest Federal project ever constructed in the 10th District and, naturally, I shall seek construction funds in the next Congress. I have already been assured of the support of the Army engineers and some members of the House Appropriations Committee in this vital matter.

During the 86th Congress, Mr. Speaker, I sought by voice and by vote to support a truly people's government. I have worked for world peace and freedom for oppressed people everywhere, being the sponsor of the Peace Agency bill which has attracted wide interest and support. I have stood for tolerance and understanding, supporting such bills as civil rights, expanded social security. Federal pay raise, emergency housing, extension of GI home loans, minimum wage, and many other progressive measures.

I believe that it has become generally recognized in the 10th District that I have acted at all times to insure, by voice and deed, higher standards of living for our people, that I have sought equal opportunities for the humblest citizen, that I have worked for health and education benefits, that I have supported legislation providing more generous aid for the aged, the needy and the infirm, that I have actively promoted legislation seeking to encourage small business and American industry.

These are all on the public record. These are actions that have received the unqualified endorsement of very many individuals and groups within the 10th District who have given me their wholehearted approval of the record of honorable public service I have sought to

give my district.

For the second time, I am sponsoring for the 10th District a U.S. Government Day, which has attracted wide attention and support from the various Federal agencies which serve Ohio. has been termed an unprecedented service to the district in some quarters because in no other part of our great land has there been such an extensive program evolved for the sole benefit of a congressional district so that the people might meet and discuss problems of mutual interest directly with the Federal Officials concerned.

In addition, this year with the cooperation of the various school leaders in my district, it was possible for me to bring to Washington at my expense several outstanding boys and girls who saw their Federal Government in action. This program received wide acclaim in educational and other circles and attracted wide interest not only in Ohio but throughout the country. These talented youngsters spent a week as my guests in Washington where they took active part in the operation of my office and also had the opportunity to observe, in between several rounds of sightseeing, the intricate workings of their Federal Government.

These are simply some of the highlights so to speak, Mr. Speaker, of my first term of office as Congressman from the 10th District of Ohio. As it can be seen, I have always endeavored to work in the best interest of the people of my district and have done my very best to provide them with responsible representation, clothing the office with the dignity and honor it deserves. I know that the people of the 10th District, mindful of the many years of dedicated service rendered by the esteemed Tom Jenkins to this district, and knowing what I have sought to accomplish for this same district, will want to continue the record of devoted and honorable service.

### Tributes to Dr. Herbert Borchardt

EXTENSION OF REMARKS OF

# HON. JOSEPH C. O'MAHONEY

OF WYOMING

IN THE SENATE OF THE UNITED STATES Thursday, September 1, 1960

Mr. O'MAHONEY. Mr. President, I ask unanimous consent to insert in the Appendix of the RECORD, tributes, two of them from official bodies, to the late Herbert Borchardt. I should like also to record briefly my own tribute to Dr. Borchardt whose death in June has taken a keen spirited public citizen from us.

A great many men would have been justifiably content to have been the authority Dr. Borchardt was on childhood nutrition and its effect on children's teeth. His wide-ranging mind, his compassion for his fellow man and his devotion to public welfare brought him into the arena of public affairs, and it is his contributions in this service which have brought the tribute which I am asking to have printed.

As an effective fighter against communism his assistance to liberal causes and their adherents was most effective. particularly among veterans who respected him highly for the part he played in their affairs as commander of the Veterans of Foreign Wars for the District of Columbia. Someday his part in the senatorial campaigns in the West in 1954 where his quiet but effective manner in setting the issue straight will be enshrined in history as it most deservedly should.

It, therefore, gives me particular pleasure to request that the tributes from the Commissioners of the District of Columbia, the Citizens' Advisory Council of the Government of the District of Columbia, the Greater Washington Central Labor Council, AFL-CIO, the short eulogy from his funeral service, and an editorial from the Washington Evening Star, June 18, 1960, be printed in the Appendix of the RECORD.

There being no objection, the material referred to was ordered to be printed in the RECORD, as follows:

RESOLUTION OF THE GOVERNMENT OF THE DIS-TRICT OF COLUMBIA

The Commissioners of the District of Columbia have learned with deepest regret of the death on Thursday, June 16, 1960, of Dr. Herbert Borchardt; highly respected public official and distinguished civic leader.

Dr. Borchardt acquired an enviable reputation for his remarkably successful career: for his human understanding in dealing with the things that are most important to American life; freedom, culture, and security. His high principles contributed much in making this a better world in which to live. Admired by his many close friends and business associates, he was recognized for his selfless devotion to work in the public service.

Dr. Borchardt was one of our finest citizens. He has served as a trustee of the District Public Library, a member of the Citizens' Advisory Council, commander of the District Department of the Veterans of Foreign Wars, and was a past commander of

the Army and Navy Union.

The Commissioners extend to his sister, Miss Selma M. Borchardt, their sincerest and most heartfelt sympathy for the loss of a brother whose tenderness and understanding have been recognized and lauded by his many friends and associates.

This resolution will be forwarded to Miss Borchardt and a copy will be spread on the minutes of the Board of Commissioners.

ROBERT E. MCLAUGHLIN. DAVID B. KARRICK. A. C. WELLING, Commissioners of the District of Columbia.

JUNE 16, 1960.

RESOLUTION OF THE GOVERNMENT OF THE DIS-TRICT OF COLUMBIA CITIZENS' ADVISORY COUNCIL

Whereas the Citizens' Advisory Council of the District of Columbia is deeply shocked to learn that Dr. Herbert Borchardt, member of the Council since July 1, 1957, passed away on Thursday, June 16, 1960; and

Whereas Dr. Borchardt rendered 3 years of outstanding and devoted service to the Council, participating actively in studying many of the problems submitted to the Council by the Commissioners of the District of Columbia: and

Whereas his loss will be keenly felt and his memory will be cherished by the members of the Council and his many friends and

associates in the District government; and Whereas in Dr. Borchardt's death, the Council has lost a forceful leader, a wise counselor, a kindly man, and a dear friend, and desires to express its great appreciation of his fine qualities and to enter this testimony to the memory of one it can ill afford to lose: Now, therefore, be it

Resolved, That the members of the Citizens' Advisory Council of the District of Columbia, extend to his family their heartfelt sympathy.

This resolution shall be forwarded to the sister of Dr. Borchardt, Miss Selma M. Borchardt, and a copy spread on the minutes of the Citizens' Advisory Council.

EDWARD BURLING, Jr., Chairman, Citizens' Advisory Council.

RESOLUTION OF THE GREATER WASHINGTON CENTRAL LABOR COUNCIL, AFL-CIO, MEMO-RIALIZING DR. HERBERT BORCHARDT

Whereas Dr. Herbert Borchardt, a delegate to this council and its predecessor, the Central Labor Union, for a period of approxi-mately 25 years, passed away on June 16, 1960: and

Whereas it is the desire of this council to appropriately express its grief upon the loss of a beloved and devoted member; and

Whereas Dr. Borchardt, although qualified to serve in other fields, elected to spend most of his time in promoting the welfare of the people of the Nation's Capital in particular and the country in general, especially attempting to help those who were least capable of helping themselves: Therefore he if

Resolved. That this council offers the sincere condolence of all of its delegates to the bereaved family of Dr. Borchardt and expresses its deep sense of gratitude for the contribution made by this devoted citizen, soldier, humanitarian, and trade unionist throughout the years of his lifetime.

# A EULOGY OF Dr. HERBERT BORCHARDT (By Chaplain John Lambrides)

"I am the resurrection and the life. He that believeth in Me tho he were dead, yet shall he live. Whosoever liveth and believeth in Me shall never die."

We have gathered here to pay our last respects and to bid farewell to our comrade, Dr. Herbert Borchardt, who at the time of his departure was commander of the Veterans of Foreign Wars, Department of the District of Columbia.

Some lives are capped with one crowning achievement, like the topping of a cake. Other lives are ingrained throughout with good deeds like the grains of fine wood or marble. Such was the life of Herbert Borchardt. His sister, who was his lifelong companion, declares that her brother's entire life was a eulogy. From his youth up, Herbert befriended the unfortunate and was ready to give a helping hand to those in distress. He bore arms as a courageous soldier on the field of battle, and he bared his arms as a public-spirited citizen in the field of progressive legislation. Borchardt was blinded to color, creed, or class distinction. There was no "other side of the track" for this good man whose sole aim was to do good.

Herbert Borchardt always knew which side he was on. He never lost his sense of direction, and he always faced and paced toward the goal of service for his God and country. He loved our flag, and his loyalty

never flagged.

The commander was known and respected on the Hill, and he was known and trusted in the halls of the District. No one doubted his motive. He was dedicated to the preservation of his country, and for provision of veterans who bore the marks of military service. He never married, but he was faithfully wedded to his work as an ambassador of good will. He was keenly interested in the hospitalization of veterans. He was a loyal friend to Mount Alto Hospital, and urged recognition of the urgent need for a new veterans' facility in the Nation's Capital. The finest memorial to departed comrades, he held, would be to provide modern hospitals for their living comrades—the veterans.

The career of Commander Borchardt did not run down. He was active to the very end—until the final summons came. The hundreds of you whe have come here to these services have expressed your love and your respect by your presence, and you and many others have also said it with these magnificent flowers.

"And I heard a voice from heaven saying, write, 'Blessed are the dead who die in the Lord from henceforth; yea saith the Spirit, that they may rest from their labors and their works do follow them." Revelations 14: 13.

[From the Washington Evening Star, June 18, 1960]

### DR. HERBERT BORCHARDT

With the death at 67 of Dr. Herbert Borchardt, Washington has lost a native son who rose to prominence as a promoter of community betterment. In and out of public service he devoted long hours and much energy to causes which he believed would

benefit his fellow citizens and thus would make the Nation's Capital a more attractive place in which to work and live. ing his country in combat in World War I, Dr. Borchardt became interested in veterans affairs and was elected commander of the District Department of the Veterans of Foreign Wars. He also took an active part in the trade union movement, especially as it related to the Federal establishment, and was a delegate to the Central Labor Union for a quarter of a century. His knowledge of labor problems led to his appointment as a representative of the interests of labor on the Commissioners' Citizens Advisory Council. And, meanwhile, he served the whole community as a trustee of the Public Li-brary. His friends and his associates in many civil, patriotic, trade, and other fleids of endeavor will miss his good counsel and leadership.

Congressman Harold R. Collier Reports to the People of the 10th District of Illinois

EXTENSION OF REMARKS

# HON. HAROLD R. COLLIER

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES Thursday, September 1, 1960

Mr. COLLIER. Mr. Speaker, under leave to extend my remarks in the RECORD, I take this opportunity to provide the residents of the 10th Congressional District of Illinois with a brief résumé of major legislation and of my activities as their Representative in the 86th Congress.

Looking back over my 4 years as a Member of Congress of the United States, I say unhesitatingly that my two greatest concerns have been maintaining peace in a world of great international tensions, as well as a strong national defense through military and economic stability.

In spite of the delicate and critical situations which have developed in the face of Communist threats, we can still look with optimistic hope that a permanent peace will be achieved. To accomplish this, we have strengthened our national defense to a point where today we are the most powerful nation on earth. This has been accomplished in the face of maintaining a balanced budget in both 1959 and 1960.

Certainly our national security is dependent upon the economic strength of our free-enterprise system, which can only be weakened unless prudence in national fiscal affairs is exercised by those who control the Federal purse strings.

While there are those in the Congress who prefer to avoid any discussion of the national debt through expansion of increased Federal spending programs, we must inevitably face this problem realistically if we are to keep our internal security abreast in strength with our national defense.

We must never lose sight of the fact that the services and the doles provided by the Federal Treasury come alone from tax dollars. We must remember, too, that tax dollars sent to Washington

for expenditure by the Federal Government shrink in their spending power because of excessive administrative costs of bureaucracy. The businessman, factory workers, and housewife alike feet the squeeze of inflation and higher taxes, and a retiree and pensioner is in no way immune from the effects of inflation. It is my opinion that a good legislator must keep this in mind when the temptation of yielding to pressure groups confronts him, particularly during an election year.

The 86th Congress has certain achievements to which it can point with pride and failures which certainly the American public have been quick to recognize.

SUMMARY

The 86th Congress convened on January 7, 1959, and adjourned September 1, 1960. The Senate was in session 280 days and the House 265 days. Both Houses filled nearly 36,000 pages of the Congressional Record. From the standpoint of legislation introduced, there were 20,164 public and private bills, joint resolutions, and so forth, introduced in the Senate and House of Representatives. Only a fraction of these bills were finally enacted into law. To date, 1,130 new public laws have resulted from the work of the 86th Congress; many of these were private bills or legislation of a minor nature, however.

### COMMITTEE ASSIGNMENTS

During the 86th Congress I served as a member of the Committee on Interior and Insular Affairs during the first session and the full session on the Committee on Interstate and Foreign Commerce. Both are major legislative committees. I am also on the Subcommittee on Transportation and Aeronautics of the Committee on Interstate and Foreign Commerce. In extracurricular duties in Washington, I was the past year reelected to the board of governors of the National Rocket Society, vice president of the Illinois State Society of Washington, and a member of the legislative Republican policy committee of the House.

### HAWAIIAN STATEHOOD

After many years of deliberation, the 86th Congress voted statehood for Hawaii in one of the most historic actions in recent history. As a member of the Interior and Insular Affairs Committee during the 85th Congress and the 1st session of this Congress, I helped formulate the legislation which granted statehood for the Territory of Hawaii, as well as our 49th State, Alaska, which gained its status as a State a year prior.

### NATIONAL DEFENSE

With a current defense budget of approximately \$40 billion, we have built a well-balanced, flexible and retaliatory force to keep the peace, and I have supported necessary appropriations for these measures. My support of our national defense program is based on my convictions that we must be constantly alert and ready to meet any additions and revisions necessary to produce the unmistakable margin of military supremacy upon which our national security rests. A strong national defense is, in the world in which we live today,

a deterrent to war; for those who would attack us would do so perhaps quickly if we were a vulnerable nation.

LABOR

Enactment of the Landrum-Griffin bill went down in history as the major legislative achievement of this past Congress. After many months of hearings by the McClellan Subcommittee on Labor Union Abuses, Congress passed this law in one of the most heated legislative sessions in history. There were those who said the law did not go far enough and others who insisted that it went too far. The fact of the matter is that the Landrum-Griffin bill, while not everything that the proponents and opponents found entirely satisfactory, was basically a sound and effective compromise. It prescribed regulations for the accounting and reporting of union dues and funds and outlawed blackmail picketing and secondary boycotting.

Title I of the act, generally known as the bill of rights, is designed to guarantee rank-and-file workers important, fundamental democratic rights within their unions. Many examples could be cited to demonstrate this legislation has had a wholesome impact upon the conduct of union affairs.

BUDGETARY ANALYSIS

In his state of the Union address in January, President Eisenhower predicted a budget surplus for 1960-61. As the current session came to an end, it appears that this surplus will approximate \$1 billion.

There were certain legislative proposals which would have completely eaten away this surplus and created a deficit had it not been for the efforts of the determined minority and executive leaders to hold the line. Certainly, however, the pressures were perhaps greater in this election year than at any other time during my tenure of office. Ardent supporters of the big spending programs will undoubtedly renew their fight when the 87th Congress convenes in January. There are those who have little conception of the costs of the national debt which has accumulated over the past three decades. As a matter of fact, if all the spend-ourselves-rich bills had been passed, it is estimated that our annual budget would be in excess of \$125 billion annually. So much for the budget.

THE FARM PROGRAM

The patchwork quilt of farm legislation with its system of controls offers no visible solution in our agricultural economy. Such proposals as might have been identified as a reincarnation of the old Brannan plan were offered during this session. Needless to say, the basic impracticality of the program doomed it to failure. The Senate did pass a wheat bill which would have cut both acreage allotments and support prices. All in all it seemed that there were those in Congress who obviously preferred a political issue to any possible solution. As a result, one program after another went down the drain and into pigeonholes and Secretary of Agriculture Ezra Taft Benson was made the "whipping boy" as every sound program was watered down until nothing workable remained.

SOCIAL SECURITY AND MEDICAL CARE

The proposed Forand bill which would have provided medical care for a portion of the elder citizens failed. Instead, the social security legislation adopted liberalized the \$1,200-a-year earning limit for recipients and further provides disability payments at any age instead of a proposal lowering the retirement age for the men to 62 years.

The medical care bill for elder citizens finally adopted provided for \$202 million a year in Federal contributions to the States to help pay medical bills for elderly people on the welfare rolls.

The fight over this legislation was one of the major political issues of the session, and the medical care bill finally adopted was the result of a complete inability to agree on any of the more sweeping proposals.

TAXATION

A bill to permit American business firms that operate in more than one foreign country the option of lumping all their overseas profits and losses in figuring taxes was adopted this year. A bipartisan majority supported this program which they said encourages overseas assistance in undeveloped countries. This, however, remains to be seen.

There were many proposed tax changes but most were put over until next year when rate cuts, as well as an overhauling of depreciation provisions

will be a major issue.

Congress did reduce transportation excise tax from 10 percent to 5 percent but reversed the original House position on a bill to remove the excise tax on telephone service. Your representative was one of those who introduced original legislation in these fields.

### A WELL-INFORMED CONSTITUENCY

In my opinion, a well-informed constituency is paramount to an understanding of a Congressman's work and the important functions of government. For this reason, I established a policy of publishing a newsletter on congressional activity as well as my stand on every major legislative issue. More than 500,000 of these were mailed to citizens and taxpayers in my district. Everyone who indicated his or her desire to be placed on my mailing list received these reports. In addition, my staff sent out news releases regularly and special reports on more complex legislations.

I also conducted a public opinion poll throughout my district in the form of a questionnaire sent to approximately 50,000 homes representing a random cross section of the people.

Shortly after my election to Congress, I established a district congressional office which was open this past session every day 8 hours to assist the public in problems which arose while Congress was in session and during the recess.

Following adjournment of Congress in August of last year, I remained in my district until we reconvened and delivered 60 speeches of a nonpolitical nature on congressional activity, appearing before civic and church groups, service organizations, and even high school classes throughout the district.

My staff assisted several hundred residents of the district who visited Washington with their families during the past 4 years. In fact, we dedicated our efforts to being as close to each and every citizen as was humanly possible because we felt the need of bringing the activities of the Federal Government close to those who are affected by the laws which we pass and who must assume the burden of the cost of the vast operation of the Federal Government. My district office is located at 6608 West Cermak Road, Berwyn, Pioneer 9–4115. I welcome the opportunity to hear from you.

### Poland and America

EXTENSION OF REMARKS

## HON. PAT McNAMARA

OF MICHIGAN

IN THE SENATE OF THE UNITED STATES
Thursday, September 1, 1960

Mr. McNAMARA. Mr. President, at their 15th biennial national convention, the Polish Legion of American Veterans adopted a series of significant resolutions.

The resolutions reflect a great awareness by this group of patriotic American citizens of the basic conflict that exists in our world today—the conflict between freedom and totalitarianism.

Perhaps it is natural that the members of the Polish Legion of American Veterans would exhibit this awareness. These men are, of course, veterans of the American Armed Forces, and thus they know the horrors of war.

At the same time, however, they have another common bond, that of a cultural relationship with a Polish homeland, and quite frequently, a blood relationship with those who are citizens of that nation.

We all are proud of our Americanism, but we also can be proud of the homeland of our fathers. In the case of Polish-Americans, this pride is tempered by the fact that Poland is still under the heel of communistic totalitarianism.

The fact that Poland, no doubt because of the will and the spirit of her people, has done much to resist total communistic encompassment, still does not ease the pain that exists when there is not complete freedom.

Thus, the resolutions adopted by the PLAV take note of the need for their America to remain strong and also of the necessity that the plight of Poland and her sister nations not be forgotten.

I ask unanimous consent that excerpts from these resolutions be printed in the RECORD as part of my remarks.

There being no objection, the excerpts from the resolutions were ordered to be printed in the Record, as follows:

EXCERPTS FROM RESOLUTIONS ADOPTED BY THE POLISH LEGION OF AMERICAN VETERANS AT THEIR 15TH BIENNIAL NATIONAL CONVENTION, CHICAGO, ILL.

1. As loyal patriotic American citizens, we pledge our loyalty to the United States of America, and we hereby renew our military oath to defend and fight for your country.

2. In memory of those comrades who have given their lives for their country and in honor of those who have suffered combat wounds and disabilities, we pledge ourselves to fight communism at home and throughout the entire world in order that we spread democracy and promote free enterprise everywhere.

3. On this 21st anniversary of the invasion of Poland and the commencement of World War II and in light of Soviet domination of Poland through military occupation, we pledge ourselves to continue our demands for the restoration of freedom to our brothers in Poland. We urge the President of the United States to use his high office for this

We urge that military appropriations of the United States be kept at a high level with the primary goal being an adequate military defense and that fiscal and budgetary considerations be made secondary. We urge a reappraisal of our entire defense policy in order to determine its adequacy with the following objectives in mind: (a) An adequate retaliatory force to deter any ag-gressor in a nuclear war; (b) an adequate Military Establishment to assure victory in the cold war; (c) economic power sufficient to assure victory in economic warfare with Communist imperialism.

5. In this presidential election year we urge the candidates for that high office to use restraint in their campaign promises, in order that the cruel hoax perpetrated by one of the candidates in 1952 should not be repeated, when he promised to wage war for the liberation of Poland; he gained votes at the price

of human misery.
We further urge that our Government carry on its dealings with the people behind the Iron Curtain on a high plane and at a realistic level so that there be no repetition in any part of the world of the 1956 Hungarian uprising with its bloodletting; this uprising was the result of false hope of liberation and aid which had been prom-

ised to the Hungarian peoples.

6. The impending visit of Mr. Khrushchev to the United Nations and the United States is met with mixed feelings by the PLAV. In the light of the aborted summit conference of May 1960 and the indignities to which President Eisenhower was exposed in Paris at that time, we, of the PLAV, urge that there should be no enthusiasm shown for Mr. Khrushchev on his arrival in the United States. However, in the event that the head of the Russian Government desires to confer with our President on the subject of disarmament, or to discuss other problems in order to relieve world tensions, we feel that it is the duty of President Eisenhower to receive Mr. Khrushchev for this purpose. It must never be said that the United States is unwilling to discuss world problems with those whose views differ from our own. A fallure to accede to the request for a conference with Mr. Khrushchev would be utilized to the fullest by the Russians in their propaganda in the uncommitted parts of the

7. We support our comrades in arms—the Veterans of Foreign Wars-in their stand that American schools should teach all children the basic principles of communism. This course should be included in order that our children may compare our way of life with the Communist methods and in order that they may determine for themselves the superiority of democracy and free enterprise over totalitarianism and communism.

8. We urge that the Federal Government assist primary and secondary education throughout the entire United States by substantial appropriations in order that (a) the education standards of the entire country be raised to the highest level possible; (b) that those portions of the country whose stand-ards fall below the national average be elevated in order that all children in the United States be given the same education; (c) that gifted children be given the opportunity for advanced training and study on a college and graduate level, without regard to their own financial situation.

Mr. McNAMARA. Mr. President, it is vitally important that we Americans never forget that millions of human beings-literally, our brothers and sistersare forced against their will to live under dictatorship.

As soon as this is forgotten, as soon as we become complacent with our material benefits and lazy in our minds, we, ourselves, run the risk of becoming easy prey for the dictatorship of the Communist or the Fascist.

But when we keep firmly in mind that totalitarianism has subjugated millions of persons, and will take over still more if left alone by the free world, then we will be constantly alert to the dangers.

We cannot, of course, be content only with combatting the Communist ideology in our own Nation. This is not good enough. It is intolerable to the American concept of freedom that people anywhere can be deprived of their liberty by force

That is why the fate of Poland-the dramatic fight of the Polish people-is also our fight.

In the case of Poland, we have a unique opportunity to combat communism.

In the first place, the peoples of America and Poland are historically friendly. Millions of Poles have emigrated to the United States, many of them to my own State of Michigan.

This has established a strong bond between our two countries, a bond which, we trust, never will be severed.

But there is another common ground between us: the inherent love of freedom

The Polish Constitution of 1791 is a remarkable document, one that established a parliamentary system and which

All power in civil society is derived from the will of the people.

Unhappily, events in Europe conspired to stifle that birth of freedom-stifle in but not kill it, because freedom's flame still burns.

We will never forget when that flame burst out in 1956 when the heroic people of Poznan turned on their Communist oppressors.

The common bond of the love of freedom and the cultural ties between our two countries make it all the more necessary that our Government maintain a constructive relationship with the Government of Poland, even though it is a Communist government.

In so doing, we can help keep the flame of freedom burning, and we can show the people of Poland that their faith and their hopes have not been shattered.

In recent years, more than \$200 million in agricultural commodities have gone to the people of Poland.

We must continue that sort of properly administered aid. We must liberalize our immigration laws to provide a haven for the displaced.

We must keep alive the traditions and the heritage of Polish freedom, as with the issuance in October of a "champion of liberty" commemorative stamp honoring Ignace Jan Paderewski. I am honored to serve, incidentlly, on the Paderewski Centennial Committee.

I must make special note, however, of the resolution numbered 5 which I have

placed in the RECORD.

This resolution emphasizes the danger in making false promises to the people of Poland and the other Communistcontrolled countries; promises too often recklessly made by some politicians. These can lead only to bloodshed and not to freedom.

But with the constructive efforts I have mentioned, I believe that the day will come when, with the help of God, Poland will again be free.

### Hon. Carl Durham

SPEECH

## HON. RALPH J. SCOTT

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES Wednesday, August 31, 1960

Mr. SCOTT. Mr. Speaker, prior to coming to Congress, I was not acquainted with Carl Durham, but many of my friends who did know him invariably spoke of him as being about the finest gentleman you ever saw. During the 4 years I have been privileged to know and be associated with him, I have come to that identical conclusion. On every occasion, under all circumstances. he is a gentleman in every sense of the term. No Member of the House is held in higher respect and esteem by those who know him than CARL DURHAM.

It has been said, "Gentility is neither in birth, wealth, manner, nor fashionbut in the mind. A high sense of honor, a determination never to take a mean advantage of another, an adherence to truth, delicacy, politeness toward those with whom we have dealings, are its essential characteristics." CARL DUR-HAM has all of these characteristics and has maintained them through the performance of his trying duties in one of the most important, influential, and sensitive positions in the Congress as chairman of the Joint Committee on Atomic Energy.

No Member of Congress whom I have known has approached the performance of his duties more conscientiously or with a deeper sense of personal responsibility than CARL DURHAM. In the histories that will be written of this period there will certainly be a chapter devoted to the use and development of atomic energy. Carl Durham's name will as certainly be listed high among those whose good commonsense, courage, and vision made immense contributions to the wonders of this, the atomic age.

I join my colleagues in expressing regret that CARL has seen fit to retire and in wishing him many years of happy retirement in an atmosphere more restful and peaceful than that in which he has labored so long and so well.

## Testimonial Dinner for James P. Mitchell, Secretary of Labor

EXTENSION OF REMARKS

## HON. CLIFFORD P. CASE

OF NEW JERSEY

IN THE SENATE OF THE UNITED STATES

Thursday, September 1, 1960

Mr. CASE of New Jersey. Mr. President, it is my pleasure to speak a few words of praise on behalf of a respected and dedicated public servant whom I am fortunate indeed to count as a fellow resident of the State of New Jersey. He occupies with distinction and high ability one of the most sensitive Cabinet posts in the Eisenhower administration, that of Secretary of Labor.

In the 7 years that he has held that important office, he has been the valued and trusted adviser to both President Eisenhower and Vice President Nixon. He is held in high esteem by working men and women everywhere. He is respected by members of the business community. And he has won the admiration and affection of those who work under him in the Department of Labor.

I am sure, Mr. President, that everyone in this Chamber knows that I am referring to the Honorable James P. Mitchell. Because he is a friend of the workingman, because he is a statesman in labor affairs, because he has administered his office with dignity and fairness Secretary Mitchell was recently honored at a testimonial dinner sponsored by the leaders of the unions which comprise the AFL—CIO and by the United Mine Workers. It is the first time in history that such a high tribute has been accorded a Secretary of Labor by leaders of the labor movement.

His testimonial, which was signed by the James P. Mitchell testimonial dinner committee in recognition and appreciation of the years of service he has rendered to the working men and women of America as Secretary of Labor, was presented him "on behalf of the working men and women of the United States as a symbol of affection and esteem to their friend, the Honorable James P. Mitchell, in grateful appreciation and recognition of his untiring and selfless devotion to their welfare, in tribute to his intelligent statesmanship and competence as a public administrator, and for his human understanding, wise counsel and good sense in providing extraordinary leadership as Secretary of Labor in advancing the welfare of the people of the United States."

I ask now, Mr. President, unanimous consent to have included in the RECORD the text of the address by President Eisenhower at the testimonial dinner.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

ADDRESS BY DWIGHT D. EISENHOWER, PRESI-DENT OF THE UNITED STATES, AT TESTI-MONIAL DINNER HONORING JAMES P. MITCHELL, U.S. SECRETARY OF LABOR, JUNE 20, 1960

Mr. Chairman and distinguished guests, I feel that there is something possibly sym-

bolic about my appearance here this evening. I stand in front of you in plain view, and for some years I have been the target for some of the sharpest barbs that some of you have had to launch in my direction, and I don't know of any time when I've been more exposed than I am at this moment.

But there are two specific areas outside of our common patriotism and love of country in which I find myself always in agreement with the AFL-CIO and indeed the other unions here represented. Those two are: In our recognition that we are but one Nation in the world and that our own prosperity, our own progress, and our own peace depend upon our friendship with those nations and our leadership of them in the paths of peace; and the second: Our common admiration for your guest of honor, Jim Mitchell.

Now. I'd like to talk for just a moment about these two subjects. Time and again I have been encouraged in heart-warming fashion by the members of all our unions in efforts to increase the spirit of friendship and the depth of understanding between this Nation and other nations who, like us, believe in the dignity of man and his possession of inalienable rights given to him by his Creator.

There is in the Cabinet a committee that has as its job trying to promote better markets throughout the world, so that our economy may prosper as we help others to prosper. As their purchasing power rises, our prosperity rises with it.

This is the kind of thing that we understand together and this is the kind of thing in which the AFL-CIO has always been in the forefront in supporting. I cannot tell you how much this has meant to me, because there are those shortsighted people who believe that by building around ourselves walls, walls of guns and walls of tariffs, that we can live in a secure and prosperous isolation.

My friends, you at least, the people of these organizations, have shown that they recognize the falsity of any such belief and indeed have been on the positive side of working to destroy such illusions and delu-

sions in this country.

Fortunately, the number of people that so believe is diminishing, and I am completely sure that part of that result has been because of your enlightened efforts, and for this, on behalf of the entire Nation, I must thank you.

Now, I get to my second subject, Jim Mitchell.

I was once told by a very distinguished soldier that practically every general's reputation as it was recorded in history was a result of his skill in picking a chief of staff. I rather think, if I am going to live in history, one of the reasons is the wisdom I had in selecting Jim Mitchell as your Secretary of Labor. Because he and I both have learned this about the leaders of labor. They do not see eye to eye with us always, but they respect a man of courage, of honesty, of integrity, and who tries to dig under the facades of slogans, of wisecracks, and to get at the facts, get them out so that people looking together at the same problem are not talking about something that is false or distorted, but things as they are, the realities of situations.

I have had the great fortune, the great good fortune of having Secretary Mitchell at my side now these 7½ years. For that good fortune, I thank the Almighty, because he has constantly championed the cause of labor as such and its right to get its proper due because the people who with their hands and their heads and their thinking produce the wealth of this country are entitled to their proper dues and at the same time say that in a free enterprise country, if we're to be preserved as such, that we must recognize the needs for profit, because if there

are no profits there will be no investments and free labor as we know it will not continue to exist.

This is the kind of thing he's taught, the kind of thing he's preached, outside and within the confines of the Cabinet room.

Each of us, you of labor, we of Government, have got a very deep responsibility to the United States, the Nation that we believe under God is destined to lead the entire earth to better paths, finer paths, toward peace and justice in this world.

And so I think, regardless of the points of difference you have found and discovered and criticized within this administration, which was not only your right and probably at times your accurate calculation—I don't know—

But I say this, no man has ever been more dedicated to the idea that whatever is good for the United States is good for labor than has Jim Mitchell.

And, therefore, as I salute you, all of you, of the labor movement, I salute him and his family who are so fortunate to be here as part of the group that you're honoring along with him this evening.

Thank you and good night.

Mr. CASE of New Jersey. Mr. President, at this point I want to submit for the RECORD a letter written to Secretary Mitchell on the occasion of the testimonial dinner by the top career civil service officials of the Department of Labor.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

JUNE 29, 1960.

Hon. James P. Mitchell, Secretary of Labor, Washington, D.C.

DEAR MR. MITCHELL: The honor paid you tonight by the American labor movement is will deserved. You have made an outstanding contribution to the welfare of the working people of our Nation.

We career civil-service officials of the U.S. Department of Labor desire to express our own admiration, affection, and respect for you. We consider ourselves most fortunate to have had your wise, fair, and able leadership during the past 7 years. It has been a pleasure, a privilege, and an inspiration to work with you.

Your distinguished service as Secretary of Labor has brought prestige and respect to the Department of Labor. Under your direction, its services to the people of our Nation have grown immeasurably.

Sincerely,
Millard Cass, Deputy Under Secretary;
James E. Dodson, Administrative Assistant Secretary; Nelson M. Bortz, V. S. Hudson, Seymour L. Wolfbein, Charles D. Stewart, Deputy Assistant Secretaries; Harold C. Nystrom, Acting Solicitor; John Leslie, Director of Informa-tion; Edward E. Goshen, Bureau of Apprenticeship and Training; Robert C. Goodwin, Bureau of Employment Security; A. W. Motley, Bureau of La-bor Standards; Hugh W. Bradley, Bureau of Veterans' Reemployment Rights; Aryness Joy Wickens, Economic Adviser to the Secretary; Edward J. McVeigh, Director of Personnel; Leonard R. Linsenmayer, Bureau of International Labor Affairs; John L. Holcombe, Bureau of Labor-Management Reports; Ewan Clague, Bureau of Labor Statistics; Clarence T. Lundquist, Wage and Hour and Public Contracts Division; Frances A. Ambursen, Women's Bureau.

Mr. CASE of New Jersey. Finally, Mr. President, I ask unanimous consent for inclusion in the Record several news-

paper editorials, as well as a column by a respected newspaper commentator, which will show the extent of the public's awareness of, and appreciation for, the fine record of Secretary Mitchell.

There being no objection, the editorials and column were ordered to be printed in the RECORD, as follows:

[From the New York Times, July 1, 1960]

A TRIBUTE TO MR. MITCHELL

The testimonial dinner given to Secretary of Labor James P. Mitchell, sponsored by 28 top leaders of the American labor movement, was a tribute to a man who has amply deserved it. The occasion was unique both because of the kind of people responsible for it and the character of the recipient himself. It would be almost unbelievable, if it hadn't happened, that so large and influential a group of unionists, whose politics are traditionally Democratic, should honor a Cabinet member in an administration whose policies labor has so bitterly attacked.

Remarkable, too, is the man who for almost 7 years has kept the confidence and respect of a Republican President and members of his Cabinet and of leaders of organized labor—with all of whom he often differed widely. This could only have been done by an unassuming person of stubborn integrity, dedicated to the welfare of the Nation's workers, intimately familiar with the conditions of their life and well aware both of the possibilities, and the limitations, of methods to improve their lot.

Mr. Mitchell, in short, is an idealist of rare sophistication. We, too, applaud his achievement.

[From the Washington Post, June 29, 1960] SALUTE TO JAMES P. MITCHELL

Secretary of Labor James P. Mitchell will be the recipient of a unique tribute tonight. He is to be honored at a testimonial dinner sponsored by President George Meany, of the AFL-CIO, and numerous other leaders of the labor movement in recognition of nearly 7 years of public service in his present post. The event is the more noteworthy because Mr. Mitchell is part of an administration that is often criticized as being probusiness, and he has himself sometimes felt the barbs of sharp labor criticism.

When Mr. Mitchell was chosen in 1953 to succeed Martin P. Durkin as Secretary of Labor, some union leaders found the appointment incredible. For a long time his standing among the labor chieftains seemed very doubtful. As the years passed, however, his sincerity in promoting the welfare of labor has come to be widely recognized. Secretary Durkin had tried to bring about a spectacular agreement upon modification of the Taft-Hartley Act and failed. Secretary Mitchell concentrated on more basic and immediate problems, and he has succeeded in considerable measure both in improving working conditions and in securing amendment of the Taft-Hartley law.

His efforts in behalf of migratory workers have been especially outstanding. In many instances he has contributed to better understanding between employers and employees and to the settlement of stubborn disputes over wages and working conditions. Though he advocated many of the stiff legislative reforms that were written into the Labor-Management Reporting and Disclosures Act of 1959, some of which were vehemently opposed by organized labor, his persistent work for advancement of the status of wage earners has earned their respect and appreciation. It is refreshing that political differences have been laid aside for recognition of Mr. Mitchell's good work in behalf of all those who toil.

[From the St. Louis Globe-Democrat, June 28, 1960]

TESTIMONIAL DINNER FOR JIM MITCHELL

Tomorrow night in Washington a large group of the top labor leaders of the country are tendering a testimonial dinner to Secretary of Labor James P. Mitchell.

This is a truly remarkable acknowledgment of the public service of one of the most effective men ever to occupy labor's chair in the President's Cabinet. During the 7 years Jim Mitchell has been Secretary, he has worked indefatigably to bridge the historic gap which has unfortunately existed between all Republican administrations and the organized labor management.

On the record and behind closed doors, Secretary Mitchell has won the personal respect of the great majority of labor leaders. Dealing with a group which has traditionally demanded 100 percent compliance as the price of their affection—and then will rarely bestow it on a Republican—Jim Mitchell has been no doormat.

More important, however, he has inculcated a sense of mutual give-and-take which has been helpful and which will bear even more fruit in years to come. The dinner is of such importance that the United Mine Workers are joining with the AFL-CIO in honoring Mr. Mitchell.

Jim Mitchell needs no accolade such as this to give him his "well done," but it must, nevertheless, be reassuring to him to know that his 7 years of dedicated public service are being recognized by the most important men in the labor movement today and, beyond this, by the public as well.

[From the Jackson (Mich.) Citizen-Patriot, July 1, 1960]

A GREAT SECRETARY OF LABOR

The testimonial dinner tendered Secretary of Labor James P. Mitchell by the Nation's labor leaders (James R. Hoffa excepted—he was not invited) was a tribute to a man who has done a fine job.

It was unusual in that the guest of honor and President Eisenhower may have been the only Republicans in a crowd of Democrats.

But partisan politics did not keep the men who lead the Nation's unions from their expression of gratitude for the work of a friend. They also recognize the fact that the Cabinet post most directly concerned with their interests finally is being given the stature it deserves.

Mitchell might be classed as the first great Secretary of Labor. Since the Department was created as a separate agency in 1913, it has been filled with a succession of comparatively weak administrators or labor men who were so close to the forest they couldn't see the trees.

Strangely enough, the Labor Department fell to its lowest estate under the direction of Miss Frances Perkins during the Roosevelt administration when labor exerted the greatest influence on government.

In his first appointment to the Department, President Eisenhower repeated the mistake of his predecessors by naming a card-carrying plumber, Martin P. Durkin. On his departure the President turned, not to a labor man, but to a labor expert in the form of Mr. Mitchell.

The result obviously has been pleasing to the unions and to Mr. Eisenhower. With one voice they praised this man who has served so well in a difficult time.

[From the Kansas City Star, June 18, 1960]
LABOR HONORS THE SECRETARY

James P. Mitchell became Secretary of Labor in 1953 with the promise to do "the best possible job for the people of the United States." Now we hear testimony to his success from a source that traditionally has taken a dim view of Republican Secretaries of Labor. The American labor movement will honor Mitchell at a testimonial dinner in Washington June 29.

Perhaps the most remarkable aspect of labor's tribute is that only a few months ago union leaders were still roundly denouncing the Secretary for his part in writing the labor law of 1959. For that purpose, the dusty old phrases once applied to Taft-Hartley were hauled out. Apparently the union leaders are beginning to realize that they can live with—and prosper under—the 1959 law. It is by no stretch of the imagination the slave labor act that it has been called. Perhaps the Mitchell dinner is a small indication that labor is beginning to realize as much.

Mitchell has been no exception to the rule for men in his job. He has been attacked by both labor and management. That's the nature of his post. But he has worked hard at steering a moderate course in the public interest. He has been the President's articulate spokesman on industrial relations. He has worked closely with business and labor and, as all Cabinet officers do, occasionally has "put his foot in his mouth." He has infuriated some labor leaders, but one union man recently commented:

"He understands our problems. He speaks our language."

No doubt Jim Mitchell still has his share of critics, but he certainly has some solid accomplishments for his record.

[From the New York Herald Tribune, June 26, 1960]

LABOR'S FRIENDLY CRITIC

(By Roscoe Drummond)

Washington.—The interests of American labor have never been better represented in Government than during the 6-year tenure of James P. Mitchell in the Eisenhower administration.

Partisanship and Presidential politics aside, the labor leaders are giving almost unanimous evidence of their high regard for Mr. Mitchell with a testimonial dinner in Washington June 29 sponsored by the combined union movements, including the CIO-A. F. of L. and the United Mine Workers.

U.S. labor leaders are rarely united on anything. They are completely united in paying this tribute to Mr. Mitchell for his role in the conduct of the Labor Department and in labor-management affairs in an administration toward which they have been critical and distant.

There is no political purpose in this gathering of some 500 leaders of the labor union movement to express their appreciation for his public service. Though not one of their own—like Martin Durkin—Mr. Mitchell has proved an able spokesman for but not a prisoner of organized labor. Nearly all of his hosts will be supporting the 1960 Democratic presidential nominee a month hence. On this occasion they will be acknowledging the fairness and the effectiveness of Secretary Mitchell, who is working for the nomination of Vice President Nixon.

Mr. Mitchell would himself not be averse to being Mr. Nixon's running mate and it is known that this would give President Eisenhower no pain. Other than Attorney General William Rogers, no one has worked more intimately with the Vice President than Secretary Mitchell. They have been close allies in the administration. Together they negotiated the settlement of the steel strike last fall. They have developed great respect for each other.

The labor movement's testimonial dinner does not imply political support for Secretary Mitchell if he becomes the Republican vice-presidential candidate. He would be entirely

on his own. It also does not imply that the union leaders like everything in Mr. Mitchell's record.

It is Mr. Mitchell's foremost conviction that U.S. unions must do more than they have thus far in seeing that their own interests are parallel with the public interest.

Too many labor leaders." Mr. Mitchell told me on one occasion, "tend to make the same mistake which many industrialists made a half century ago when their attitude was interpreted as being-'the public be damned.' There is a disregard of public opinion on the part of quite a few labor leaders. Their sense of public responsibility is not equal to the powerful role they play in public affairs.

"The American labor leader has become too important and powerful a figure not to heed fully his responsibility to the community and to public welfare. Unions operate in a much wider area now, one far removed from the basic bargaining operations. They influence legislation. They administer funds. They invest their members' money. They publish newspapers. They take part in oversca programs and international conferences. They take economic, social, and educational actions which have little bearing upon their traditional bargaining function."

Mr. Mitchell is not suggesting in the least that labor's national role should be narrowed but rather that its national responsibility should be equal to its power. What he is saying is that he would like to see labor more consistently and, symbolically, accept the motto that "what's good for the Nation is good for labor"—rather than vice versa.

One thing is certain: a great merging of national interest is needed to produce the increased productivity and economic growth to win the contest with the Soviets during the decade of the sixties.

[From the Decatur (III.) Review, June 27, 19601

TESTIMONIAL DINNER FOR MITCHELL

Secretary of Labor James P. Mitchell will be honored Wednesday night by a wide range of top labor leaders in the Nation. The testimonial dinner is doubly noteworthy because of Mr. Mitchell's political affiliation, one few

labor leaders share.

Secretary Mitchell has served the Eisenhower administration for 6 years. Most of the country's top labor officials feel, on the Whole, that he has done a fair and effective Job in labor-management relations. His role in helping settle the long and costly steel strike is a recent example. His work in the Eisenhower Cabinet has earned him strong support for the Republican vice presidential nomination, a possibility discussed by columnist Victor Riesel elsewhere on this page.

The testimonial dinner, however, does not mean labor goes wholeheartedly for the Secretary of Labor, nor does it mean he is completely in agreement with the labor union leaders. In an interview with Roscoe Drummond, New York Herald Tribune service columnist, Mr. Mitchell gave some of his basic views on labor leadership:

"Too many labor leaders tend to make the same mistake which many industrialists made a half-century ago when their attitude was interpreted as being 'the public be damned. There is a disregard of public opinion on the part of quite a few labor leaders. Their sense of public responsibility is not is not equal to the powerful role they play in public affairs.

The American labor leader has become too important and powerful a figure not to heed fully his responsibility to the community and to public welfare. Unions operate in a much wider area now, one far removed from the basic bargaining operation. They influence legislation. They administer funds. They invest their members' money. They publish newspapers. They take part in overseas programs and international conferences.

They take economic, social, and educational actions which have little bearing upon their traditional bargaining function."

These are telling words. Labor today must broaden its range of public responsibility. The power of such unions as the Steelwork ers and the Teamsters over the Nation's functioning is obvious. To go with that power, Secretary Mitchell rightly says, there must be a sense of public responsibility.

[From the Union City (N.J.) Hudson Dispatch, July 2, 1960]

LABOR LEADERS DINE SECRETARY MITCHELL

We thought we had seen just about everything in our long career as a newspaperman but something new was added Thursday night when between 400 and 500 American union labor leaders gave a testimonial dinner at \$20 a plate to none other than Republican Secretary of Labor James P. Mitchell, of New Jersey.

This was a most extraordinary turn of events, for it is estimated that 90 to 95 percent of organized labor's tycoons vote straight down the line Democratic. such a dinner been staged for New Deal or Pair Deal Democratic Secretaries, it would have been taken as a matter of course.

Not so in the case of the Labor Secretary in President Eisenhower's Cabinet, who has survived 7 years at the laborious post, and we hasten to say no pun is intended.

To make dinner even more remarkable, Mr. Eisenhower, enmeshed in the amenities attendant upon the visit of the King and Queen of Siam to Washington, managed to break away long enough to put in an appearance at the Mitchell tribute. He joined in the festivities and lauded the man who has been his labor aid since 1953.

The idea behind the unusual affair was stated to be personal and nonpartisan. Labor leaders said they wanted to express their appreciation of Mr. Mitchell's efforts on behalf of the workers, even though they felt he had not been able to deliver on issues they regarded as top priority.

"There have been times, we know, when Jim Mitchell could have done a much more effective job for labor's justified objectives if he had enjoyed greater authority—times when it appeared he was fighting with both hands tied behind his back," William F. Schnitzler, secretary-treasurer of AFL-CIO. said

Others who spoke were Jacob Potofsky, president of Amalgamated Clothing Workers of America, and George Harrison, president of Railway and Steamship Clerks. George Meany, president of AFL-CIO, was honorary

On the dinner committee were such union labor bigwigs as Walter Reuther of United Auto Workers, A. E. Lyon, of Railway Labor Executives Association, and Thomas Kennedy, who recently succeeded John L. Lewis as president of United Mine Workers. Particularly noticeable by his absence was James R. Hoffa, beleaguered boss of the Teamsters' Union.

Those who promoted the tribute to Secretary Mitchell declared the dinner was not a political insurance affair. Much was made of this point by Arthur J. Goldberg, counsel for the Steelworkers, who with AFL-CIO Vice President Joseph D. Kiernan, handled many details of the unprecedented testimonial.

[From the Elizabeth (N.J.) Journal, July 1, 19601

### LABOR'S LOVE FOR MITCHELL

Organized labor is the most militant segment of the Democratic Party and when it arranges a tribute for a Republican Cabinet official on the eve of a presidential campaign, the motives speak for themselves.

The dinner that 500 labor leaders held to honor Secretary of Labor James P. Mitchell was formal acknowledgment that in his 6

years in Washington, he has done an outstanding job. President Eisenhower's appearance spoke for administration approval.

Just as significant as the list of those who turned out to honor Elizabeth's Jim Mitchell was the absence of James R. Hoffa. The Teamster leader, whom many regard as the symbol of what's wrong with labor, had no reason to honor the hard working Secretary.

Mr. Mitchell has been among the foremost in the fight to clean up unionism. He consistently has defended the good in the labor movement despite the unpopularity of the cause among some members of his own party.

The Secretary's accomplishments in establishing good will with a traditionally hostile group stand out even more sharply when they are compared with the failings of some other members of the Eisenhower team. Mr. Mitchell has been an unsung, but valuable, member of the administration.

The remarkable aspects of the labor tribute were well publicized and undoubtedly one of the most interested readers of all the news copy was Richard M. Nixon. Mr. Nixon, presumably mulling over vice presidential possibilities, must be giving considerable thought to Mr. Mitchell.

[From the Asbury Park (N.J.) Press, July 3, 19601

### MR. MITCHELL'S PERFORMANCE

The testimonial dinner given to Secretary of Labor James P. Mitchell, by hundreds of union leaders emphasizes the unique role Mr. Mitchell has filled with distinction as a member of President Eisenhower's Cabinet

It is no secret that many of the union leaders prefer a Democratic administration to a Republican administration. A number of the speakers at the dinner made this point clear, but they also said that in the difficult assignment Mr. Mitchell has carried out for President Eisenhower there is almost unanimous agreement that only a person of Mr. Mitchell's ability could have met the tests that confronted him.

New Jersey residents will be quick to join in organized labor's admiration for Mr. Mitchell. They have noted that he has been available for all interests whenever management or labor have required his services. Moreover, they have come to respect the understanding and ability he has brought to the function of Government in resolving controversies which affect the Nation's wel-

Mr. Mitchell has been honored by many of the Nation's leading colleges for the administrative talents he has contributed as a member of the President's Cabinet. is because he has consistently devoted his efforts toward more efficient use of the Nation's manpower and has repeatedly sounded the call for young people to prepare themselves for the serious tasks ahead when the Nation must rely on today's students as its leaders of the future.

Mr. Mitchell, as a New Jersey resident, has honored his home State by the distin-guished service he has rendered to the Eisenhower administration and the Nation. President Eisenhower, as stated by Jacob Potof-sky, president of the Amalgamated Clothing Workers of America, "reflected great credit on the administration by the appointment of the Secretary of Labor."

In the closing days of the Eisenhower administration many have expressed the view that Mr. Mitchell would add competence and stature to the Republican presidential ticket as a nominee for vice president. Whether political considerations will dictate this turn in his career must await developments. But in any event the Nation should make certain that Secretary Mitchell is not lost to the public service.

HIGH TESTIMONIAL TO A REPUTATION

Labor Secretary Mitchell has a right to feel that his integrity and fairness have been unusually well certified.

For close to 7 years he has given satisfaction to a Republican administration as one of its Cabinet officers.

A few nights ago he was honored with a testimonial dinner tendered him by 28 of organized labor's principal leaders. These men, traditionally Democratic and often hostile to the administration of which Secretary Mitchell is a member, wanted him to know that he is appreciated and trusted.

Plainly Secretary Mitchell has achieved exceedingly well in his dealings with men and the affairs under his jurisdiction.

He told us once that between his family's desires and the need to attend to his personal fortunes he wouldn't be altogether sorry to be out of public life. If he does leave it when the next inauguration occurs, he will do so with a hearty "well done."

[From the Toledo (Ohio) Blade, July 1, 1960]

### LABOR'S SECRETARY

When a Cabinet officer in an administra-tion often accused by labor of being probig business hails a union leader, it's worth mentioning. But when the combined AFL-CIO leadership, plus that of the United Mine Workers, goes out of its way to fete a cabinet officer in the same administration, that's really news.

Such an event was held the other evening in Washington, where 800 labor leaders and guests—including President Eisenhower—gathered to honor Secretary of Labor James Mitchell.

Mr. Mitchell took over his Cabinet post nearly 7 years ago under inauspicious circumstances. He was succeeding a trade union official—Martin Durkin—as Labor Secretary. He was moving into an administration already under fire from unions for supposed business influence. And his own background in the field of business was viewed dimly by many union chieftains. Yet, through the years, Mr. Mitchell proved to be an eloquent and sincere spokesman for

the cause of the laboring man. He fought hard for labor's causes in administration circles, and not always successfully. He managed to reflect the views and objections of union leaders in administration thinking to a far greater degree than labor thought possible. And he gradually won the respect and admiration of some of his stanchest critics within the family of labor.

Jacob Potofsky, Amalgamated Clothing Workers' president, expressed labor's view of Mr. Mitchell probably as well as anyone at the recognition dinner when he said, "It is no secret that we of labor have not viewed with enthusiasm some of the present administration's appointees. But there was one appointment that we believe reflects great credit on the administration and that is the appointment of the present Secretary of Labor.

The timing of labor's honoring Mr. Mitchell, on the eve of a presidential campaign, was not lost on political observers. And labor may yet see more of him, even though the present administration is drawing to a close. For just a few hours before its big dinner for him, one labor official—Lee Minton, president of the Glass Bottle Blowers Association-called upon the Republican Party to nominate Secretary Mitchell as its vice-presidential candidate.

Obviously, from labor's viewpoint, it could do worse.

[From the Detroit Free Press, July 6, 1960] Report to the People of the First Congressional District of Idaho

> EXTENSION OF REMARKS OF

## HON. GRACIE PFOST

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES Thursday, September 1, 1960

Mrs. PFOST. Mr. Speaker, as you know, this recently adjourned session of the 86th Congress was one of the longest and most spirited in history. I was kept busy representing the people of Idaho not only in the House, but also on my committee assignments with the House Interior Committee and the Public Works Committee. As part of my duties as chairman of the Public Lands Subcommittee I steered through Congress scores of important measures vital to our State and the Nation. In addition, I testified before both House and Senate committees on various matters affecting the Gem State. I took part in House debates on many bills and answered the many thousands of letters from the people in the First Congressional District of Idaho. The Outdoor Recreation Resources Review Commission of which I am a member, has also required much of my time in studying the recreation, conservation, and development needs of our country.

### IDAHO MATTERS

Important to Idaho was an amendment to the \$2 billion omnibus highway bill under which our State will get some \$2 million in extra funds for forest access and development roads during the next 2 years. Legislation which I cosponsored expanded the Federal school milk program and provided Idaho schoolchildren with more than 5 million half pints of milk during the past school year.

The State's library program was aided through passage of the Library Services Act under which Idaho will receive almost \$73,000 in Federal funds next year, and roughly similar amounts for the succeeding 4 years. Two of my bills clarifying land titles for the Nez Perce Indians were approved. I backed legislation authorizing the Government to strike 10,000 special centennial medals for the celebration of Idaho's 100th anniversary as a Territory in 1963. I sponsored a bill transferring a 2,400-acre area along the Cascade Reservoir in Valley County from the Reclamation Bureau to the Forst Service, thus paving the way for its development as recreation and camping sites.

### FARMING

Little was done to help the farmer in the 86th Congress, mainly because of the wide gap between the congressional viewpoint and that of the Eisenhower-Nixon administration. A bill designed to benefit the wheat farmer, which I cosponsored, was vetoed by the President. Another bill I sponsored to lift the income level of the small family farmer also fell by the wayside. Net farm income is still \$3.5 billion below 1952, even though the Republican administration has spent more on its farm programs in 7 years than was spent by all previous administrations since the Department of Agriculture was founded in 1861.

I sponsored a bill under which funds were appropriated to underwrite a more effective program for eradication of the dread cattle disease, brucellosis. The administration tried to cut this program back drastically. I was able to cut redtape and help secure a number of rural electrification loans, including \$284,000 for the Idaho County Light & Power Co-op Association.

After viewing frost damage to the fruit of Canyon, Gem, and Payette Counties. I helped get them designated as emergency loan areas for the farmers. Congress rewrote the sugar laws and there is a good chance Idaho's sugar beet quota will be increased in the near future. I vigorously opposed extension by the United States of its sugar-buying agreement with Castro's Communistcontrolled Cuba, and I sponsored a price support bill to improve conditions for the dairy farmers which is now law.

#### MINING

I sponsored-and helped push through the House-a bill to aid the hard hit lead-zinc industry, including many small mine operators in Idaho. As you know, the measure was killed by a Presidential veto. I supported a depressed areas bill. under which the Government would have pumped fresh economic life into depressed areas, including Shoshone County, but this, too, was vetoed. I also went to bat for our torpedoed cobalt industry, urging that domestic minesmainly in Idaho-be favored over foreign imports.

### BUDGET

The 86th Congress pared White House budget requests by \$211.6 million. brought the overall amount by which Democrats have slashed administration budgets during the past 7 years by \$12.7 billion. And, despite taxing you more than ever before in American history, this administration has added \$20 billion to the national debt during those years. The interest on the national debt alone is now costing us taxpayers more than \$8 billion a year—almost \$1 million every hour. Roosevelt's highest peacetime budget totaled just \$9 billion and Mr. Truman's peacetime budget \$39 billion. Truman trimmed the national debt by \$3 billion during his 7 years in office.

### MEDICAL CARE-SOCIAL SECURITY

Congress approved a very modest medical-care-for-the-aged program. measure will largely help those presently on public assistance, if the State provides enabling legislation to match Federal funds. Congress also made slight improvements in social security lawsraising the earning limitation from \$1,200 to \$1,500 for those who must work to supplement their income.

### SCHOOLS

I supported a broad school program designed to strengthen the Nation's educational system, with no Federal control. Despite official figures from the U.S. Office of Education showing the Nation to be short 132,000 classrooms this fall, with 800,000 children on double shifts, the House Rules Committee blocked final action on the measure.

In summary, the adjournment of the 86th Congress marked the longest period of divided Government in history. For 6 years, the executive branch of the Government has been controlled by one political party and the Congress by another. This past Congress did not accomplish all I had hoped for, but it faced up to some of the most controversial issues of our times. In view of the circumstances, its achievements were substantial. Important gains were made for both Idaho and the Nation.

### Three Hundred Years Old

EXTENSION OF REMARKS

## HON. HARRISON A. WILLIAMS, JR.

OF NEW JERSEY

IN THE SENATE OF THE UNITED STATES
Thursday, September 1, 1960

Mr. WILLIAMS of New Jersey. Mr. President, President Eisenhower has signed a resolution for the creation of a National New Jersey Tercentenary Commission. The Commission will work with a State commission now at work in the preparation of plans for observances, celebrations, and historical research.

The Long Branch (N.J.) Daily Record has expressed the genuine feeling of appreciation that the people of New Jersey feel for the national interest thus demonstrated in the anniversary of one of the Original Thirteen Colonies.

Mr. President, I ask unanimous consent to have the article printed in the

Appendix of the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

## THREE HUNDRED YEARS OLD

Last week the House of Representatives passed a resolution creating a New Jersey Tercentenary Celebration Commission. This resolution had been previously introduced in the Senate jointly by Senators Case and Williams of New Jersey and with its passage by the House now only awaits the President's signature to become law. This is an important law of real significance.

In 1964 New Jersey will celebrate her tercentenary. In 1664 the Duke of York deeded to Lord Berkeley and Sir George Carteret that land which became known as New Jersey and immediately thereafter Berkeley and Carteret published a declaration of law for this colony which became known throughout American history as "The Magna Carta of New Jersey." The 300th anniversary of these events is one in which all citizens of this State can take pride.

The creation of a New Jersey Tercentenary Celebration Commission is an act with far-reaching significance for the citizens of the north Jersey shore area. The Commission, which will have 15 members, 7 to be appointed by the President plus 4 Members of the House of Representatives and 4 Members of the Senate, will work with county

and local patriotic and historical groups to promote interest in the development and of the rehabilitation of historical sites, the publication of historical data, and the promotion of interest in New Jersey's long and glamorous history among the people of our neighboring States and abroad.

In a resort area, the creation of such a Commission is of particular significance as it is another factor which will draw people to this area and help those who promote it to take a deeper pride in its past as well as its present and its future.

### Furcolo Education Insurance Plan

EXTENSION OF REMARKS

## HON. MICHAEL J. KIRWAN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES Thursday, September 1, 1960

Mr. KIRWAN. Mr. Speaker, a distinguished former Member of this House, Foster Furcolo, now the Governor of Massachusetts, has been acclaimed all across the Nation for his education insurance plan. Under this plan, every high-school graduate can attend the college of his choice for which he qualifies academically regardless of his family's financial resources. I take great pleasure in inserting into the Record an analysis of the Furcolo education insurance plan:

FURCOLO EDUCATION INSURANCE PLAN

1. ORIGIN OF THE FURCOLO EDUCATION
INSURANCE PLAN

Gov. Foster Furcolo first publicly announced the existence of his education insurance plan at the Governors' conference in Montana in July 1960. Subsequently, on July 20, 1960, Gov. Foster Furcolo released a more detailed analysis of his new and revolutionary education insurance plan. At that time, the Governor stated: "Under this plan, for the first time in the history of America, lack of money no longer will prevent any youngster in the country from obtaining a higher education." The Governor stressed that under this program no change of any kind is required in the educational curriculum or method of teaching or scholastic standards. "A student has the identical choice of courses and colleges as he does now," Furcolo pointed out. "My plan does not require any change in the admission standards and procedures now established by the individual colleges."

When Governor Furcolo was a Member of Congress, he proposed a revolving fund to make loans to needy students. That proposal, now in effect under the title of the National Defense Education Act, has enabled thousands of students to go on to higher education.

"In the original Federal scholarship plan," Governor Furcolo explained, "I had incorporated certain applications of insurance principles in the use of revolving funds that later led me to explore the possibility that there might be a fuller solution to the financial problems of higher education by applying certain fundamental principles of insurance and ioan funding. In the course of exploration, I met with various insurance experts who were pursuing the same possibility. The result is the education insurance plan.

After developing the plan in detail, Governor Furcolo then submitted it to friends and advisers from extensive studies of its

application of these principles to the problems of financing higher education.

When lengthy study and review disclosed no apparent flaws, it was then quietly submitted to a few financial and insurance experts. After these preliminary studies were completed, Governor Furcolo's advisers and expert assistants concluded that the plan was basically sound and workable. Governor Furcolo then publically released the plan to the Nation at the Governor's Conference in Montana in June 1960.

"I am releasing a broad outline of this education insurance plan in the belief that the time has come when this plan should be carefully studied by educators, insurance and financial experts, and parents across the Nation," Governor Furcolo told the conference of the Nation's Governors in Montana. "This wider study is required in order to detail precisely how this plan may be applied and adapted to the needs of individual colleges and their students."

The first announcements of the Furcolo plan were greeted with enthusiastic approval by educators, insurance experts and interested parents all across the Nation. Thousands of letters poured into the Governor's office from every part of the country. Most of the letters were from anxious parents and students who hoped that the plan could be placed into immediate operation. Many letters, however, came from experts who made numerous suggestions.

The Furcolo education insurance plan has now passed the preliminary stage. A committee of experts who are in agreement on the practicality of the plan is now being formed to actually write the small print and negotiate the first underwritings by insurance companies and the details of financing.

#### II. BASIC INFORMATION

The essence of the Furcolo education insurance plan is to enable every qualified high-school graduate to attend the college of his choice regardless of his family's financial resources. This is achieved by reducing the annual cost for the student to no more than 35 percent of the normal total charges by the college of his choice for 1 year's tuition, room and board, books, and other standard fees. This reduction is achieved by spreading the payments over a longer period of time, usually 20 years; this is made possible by combining several well-recognized principles of insurance and finance.

Three alternative methods of applying these principles have been developed after thorough consultations with the various experts. Under each method of the Furcolo education insurance plan, as student applies in the normal manner to the college of his choice for admission. If the college accepts him, he and his parents or guardian sign a contract with a nonprofit educational foundation under which they jointly and separately agree to pay a level annual sum for the next 20 years; in return for which the foundation pays the college in the student's name the total amount of fees, including tuition, room and board, and books, and other standard fees for each of the 4 years. The annual payment by the student and/or his parents is 35 percent of the fees paid to the college in his name for 1 year.

# III. FIRST APPLICATION: 20-PAYMENT LIFE AT 5 PERCENT INTEREST

Under the first application of the Furcolo education insurance plan, the foundation purchases a 20-payment policy on the individual student that consists chiefly of the features of life insurance, with considerable reduction from the ordinary premium rates because of the grouping of great numbers of such students. The annual payment by the student and/or his parents to the foundation includes sufficient funds to meet the annual premiums on the insurance policy, a reserve for lapsed premiums and contingencies and annual payment of interest at 5

percent on the amount advanced in his name to the college. At the end of 20 years, the foundation will receive the cash surrender value of the policy including accumulated dividends, which is then used to repay the loan or principal advanced in the student's name to his college. The foundation may have additional money from the principal and interest of the reserve and contingency funds and the principal and interest of the death payments, which normally occur in approximately 70 of each 1,000 individuals

of this age group.

A substantial lapsed-premium and contingency fund is built up in the first 4 years, while the student is still attending college. Annual payments of interest are made only on the sums actually advanced in the student's name to the college. That portion of the student's annual payment which, beginning with the fifth year, will be utilized for the payment of 5 percent interest, but which need not be fully expended for interest in the first 4 years, is accumulated at interest in the reserve fund. In the fifth year, therefore, a substantial premium reserve fund of approximately 150 percent of the annual payment by the student is accumulated. It is believed that this reserve fund plus the comparatively small additions to this fund made annually from the student's payments will provide sufficient security to insure the fiscal soundness of this application of the Furcolo education insurance plan as a whole.

The nonprofit foundation, which is the vehicle for this application, need not have substantial assets of its own. Apparently, the contractual obligations on the part of the student and his parents, plus the safety factors arising from the reserve funds from all of the students to cover those few students and parents who will default and whose obligations cannot be collected, will be sufficient to enable the foundation in turn to borrow the money it advances to the various colleges.

Two main sources of such borrowings by the foundation have been explored. first is the insurance company with whom the policies are written. Such a loan has several attractive features for an insurance company. The total face value of all the policies for the students participating in this plan amounts to several millions of dollars each year. The annual payment of interest at 5 percent, while below the cur-rent money market rate, is sufficiently secure and close to the current rate of interest in the open market so as to justify the loan by the insurance company, especially since a worthwhile social purpose is thereby served. Governor Furcolo has been approached by several existing charitable foundations with substantial assets which are anxious to determine if they can assist this program by serving as a coguarantor for the education foundation or by being responsible for the payment of whatever sums are required in order to increase the annual interest rate above the 5 percent paid for by the student to whatever percentage, such as 51/4 or 51/2, that would be required in the prudent judgment of the directors of the insurance companies concerned. The other source of such borrowings by the foundation is the pension funds and other funds of large labor unions. Some unions have indicated an interest in participating on terms similar to those outlined above, perhaps with the additional provisions that a priority be established, at least initially, for those student applicants who are the sons and relatives of the members of the union.

The experts who were consulted in the further exploration of the Furcolo education insurance plan believe that this is the most practical application for immediate widespread use. The expenses of administration under this application would be borne by the insurance broker who would bear these ex-

penses from his commission which, in turn, would probably be at a lower rate than that usually paid if these policies were sold on an individual basis. There are some savings for the insurance company in that the insurance company bills only the foundation for the one sum of all premiums due and the insurance company receives one check each year for all of the premiums due in that year. This saving in administration by the insurance company enables the insurance company to underwrite the millions of dollars of insurance at lower than usual premiums. The annual payment of interest at 5 percent, with the additional percentage above being paid by charitable foundations with substantial assets if this is necessary, is sufficient to justify the loan of the principal involved by the insurance companies to the educational foundation.

The use of an educational foundation in this application enables a thousand or more students from one community, State, or region to apply to one source for financial aid even though they prefer to go to colleges with greatly varying annual charges. Under this application, the colleges themselves need make no commitments as to any percentages of present or future students who would participate in this plan.

IV. SECOND APPLICATION: ANNUAL AMORTIZA-TION OF PRINCIPAL AT 4 ½ PERCENT INTEREST

Under the second application of the Furcolo education insurance plan, the educational foundation takes out group-creditor insurance on the unpaid balance of the principal borrowed by the foundation and advanced to the colleges in the names of the individual students. The cost of such insurance is extremely low. The remainder of the annual payment by the student is used by the foundation in turn to make an annual amortization payment of principal and an annual payment of interest at 41% percent on outstanding principal, in a manner very similar to that of payments on a 20-year home mortgage. Since the maximum pay-ment of interest and principal under this application begins in the fifth year, a very substantial reserve fund is accumulated by the end of the fourth year. That portion of the student's annual payment which, beginning with the fifth year, will be utilized for the amortization and interest, but which need not be fully expended for these purposes in the first 4 years, is accumulated at interest in the reserve fund. In the fifth year, therefore, a substantial premium reserve fund of approximately 270 percent of the annual payment by the student is accumulated. In other words, the accumulated reserves at the end of the fourth year under this application are over almost one-fourth of the entire amount advanced to the student. It is believed that this reserve fund, which is even more substantial than under the first application, will provide sufficient security to insure the fiscal soundness of the second method of applying the Furcolo education insurance plan

Under this second application, there may be a greater need for a contribution by other charitable foundations in the form of annual supplementary payments so as to enable higher interest payments than the 4½ percent financed by the student. The lower interest rate, however, is partially offset by annual amortization payments and by the increased safety factor because of the higher accumulated reserves at the end of the fourth year.

V. THIRD APPLICATION: 20-PAYMENT LIFE WITH DEFERRAL OF INTEREST UNTIL THE 20TH YEAR

The third application of the Furcolo education insurance plan requires a total deferral of interest payments for the 20 years during which a 20-payment life policy matures. Under this plan a much greater face policy is purchased by the foundation with

the total cash and accumulated dividend value at the end of 20 years being sufficient not only to repay the moneys advanced in the student's name to the college of his choice, but also for the payment of simple interest at 5 percent or 6 percent. Under this application, at the end of the 20th year. the foundation receives a substantial sum above that which is required for repayment of principal and payment of interest. additional income arises from the death payments which will have occurred in the instance of approximately 70 students out of 1.000 and from the reserve fund, slightly higher than under the first application. attractive feature of this third application is that the foundation thereby acquires a sur-plus disposable income which it may then use to encourage the expansion and improvement of educational facilities, or a combination of both. This third application is possible only for those comparatively few educational institutions with substantial uncommitted endowment funds.

#### VI OTHER APPLICATIONS

There have been other suggested methods of application of the fundamental principle of the Furcolo education insurance plan; that is, the reduction of the anual cost to the student of approximately one-third of the annual college cost by the stretching out of payments over 20 years. These other applications are still undergoing preliminary exploration by various experts. clusion is perfectly clear: the principles and objectives of the Furcolo education insurance plan are sound and practical and are sufficiently flexible so that they may be applied with many variations. The variety of variations is in effect a guarantee that a practical method of application can be devised and adopted to meet the needs of any reasonable group of students and colleges.

### VII. BACKGROUND INFORMATION

In order to place the need for the Furcolo education insurance plan in perspective it should be recalled that approximately 70 percent of those parents who have children under 18 years of age expect to send their children to college. Only 40 percent of these parents now have a savings plan specifically to meet these college expenses. The median saved by this 40 percent annually is only \$150—about one-tenth of what is required for one student for 1 year at an average college.

Further, the costs of a college education are rising rapidly. Obviously, the amounts now being saved are not nearly enough to meet the educational expenses of our children. It should also be remembered that the size of the average family has been increased in recent years so that parents are faced with the prospect of sending not one but two, three or more children to college in a relatively short space of time.

One of the incidental effects of the Furcolo education insurance plan is that it allows the student himself to pay for his own education. Every able-bodied American youth at the age of 18 can almost certainly earn the very small annual payments required to meet 1 year's payment for tuition, room and board, and books at college.

The average American youth can earn this \$300 or \$400 in the summer between school years or with a modest amount of part-time work during the school year. One of the additional advantages of the Furcolo education insurance plan is that even the poorest student will now have the time not only for attendance in class but also for private study, extracurricular activity and the bull sessions that are invaluable parts of a college education.

Many responsible educators are greatly concerned over the possibility that private educational institutions may be priced out of the market by the unavoidable increase in

costs and the competition from public-supported institutions. One of the great benefits of the Furcolo education insurance plan is that the annual cost for the student who attends the highest priced private institution is only a few hundred dollars greater than the student who attends the least expensive State university. Further, one of the benefits of this plan is that it provides a means by which the higher priced private institutions may confidently expand their existing facilities since this plan guarantees they will not be priced out of the educational market.

It should be realized that this plan becomes meaningful when the total fees which have to be paid for the student to the college reach \$1,000 or more a year. This figure is reached even at the least expensive State university where the tuition fee is low when the cost of room and board, books, etc., are added to the tuition charge. For any institution which has large numbers of both day students and boarding students, two separate rates may be established. This presents no great difficulty.

Accommodations can be made for those

Accommodations can be made for those students who wish to do graduate studies. Such accommodations can easily be com-

The Furcolo education insurance plan has been developed in part with the expert assistance of the American Educational Insurance Fund, Inc., which prepared the original actuarial figures. While the underlying principles of this plan are fairly easy to comprehend, care should be taken that when specific figures are computed for a particular college or foundation, the assistance of competent and informed insurance analysts who are familiar with the many insurance and investment intricacies of this plan is necessary.

This Furcolo education insurance plan is in conformity with the basic principles of life insurance underwriting. It should be realized that these students constitute a preferred risk group.

Apart from any insurance principles whatsoever, it is certainly preferred that we do everything within our power to insure that no qualified American youth is denied access to a college education for financial reasons.

## Wrong Man for the Job

EXTENSION OF REMARKS

### HON. ERNEST GRUENING

OF ALASKA

IN THE SENATE OF THE UNITED STATES

Thursday, September 1, 1960

Mr. GRUENING. Mr. President, I ask unanimous consent that there be printed in the Congressional Record an editorial from the New Bedford (Mass.) Standard Times of August 31, 1960, entitled "Wrong

Man for the Job."

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

WRONG MAN FOR THE JOB

Political campaigns often produce strange statements, but few as astounding at Richard Nixon's announcement that, if elected President, he will assign Henry Cabot Lodge to try to bring lasting peace to the Middle East.

Nixon told the Zionist Organization of America he would give Lodge, retiring U.S. Ambassador to the United Nations and his vice presidential running mate, "primary responsibility" in the "search for practical means to achieve (this) lasting peace." It would be virtually impossible to suggest a field in which Lodge would be more likely to fail. It was Lodge who, by direct action in the U.N. caused the failure of allied military operations that would have saved the Suez Canal for unrestricted use by the free world.

The sequence of events by which Lodge achieved this result tells its own tragic story:

On October 9, 1956, former Secretary of State Dulles, recognizing that the Suez Canal is a basic factor in the Middle East problem, told the U.N. Security Council there was "little chance" of settling the Suez situation as long as any nation could use the vital waterway as an instrument of its national policy.

Dulles stood firmly behind British-French proposals for international control of the

By November 1 of 1956, Israel had launched an attack on Nasser and Britain and France had gone to the aid of Israeli forces in Egypt. The military action followed weeks of fruitless negotiations, during which Nasser, his government shaken by Egypt's domestic problems, became increasingly irresponsible and belligerent.

Rapid successes brought the three allies to within hours of complete victory—a triumph which promised solution of the Middle East's basic issues.

By late November, however, the United Nations had before it an Afro-Asian resolution calling for withdrawal of British, French, and Israeli forces from Egypt "forthwith," and without any prior commitments whatsoever from Egypt.

Lodge wanted to please the Afro-Asians. Bypassing the State Department, which had instructed him to abstain from voting

had instructed him to abstain from voting on the resolution, Lodge telephoned President Eisenhower's chief of staff, Sherman Adams. Adams boldly authorized Lodge to defy Dulles and follow his own inclinations.

Lodge voted in favor of the Afro-Asian resolution. That single vote did more harm to this Nation's relationships with Britain, France, and Israel than all that had gone before. It was cast after the British and French already had agreed in principle to withdraw from the Suez and advised Israel to this effect.

Lodge's vote on the Middle East weakened the Western alliance, established Nasser unshakably in power, whether or not his people wanted him; humiliated America's friends and perpetuated Middle Eastern problems to the present hour.

As recently at last July 30, the London Daily Express commented editorially, "Bitter is the price that the United States is paying for the disastrous Suez policy of Mr. Lodge. The United States made excuses for Egyptian brigandage in stealing the Suez Canal."

Now, by some unfathomable Nixonian reasoning, the Vice President sees in Lodge, architect of Middle Eastern disaster, the man most likely to succeed in solving some of the very problems he created.

Allies of the United States in the Middle East and elsewhere may wonder how wrong the Vice President can be.

## Social Security Amendments of 1960

EXTENSION OF REMARKS

### HON. BYRON L. JOHNSON

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES Thursday, September 1, 1960

Mr. JOHNSON of Colorado. Mr. Speaker, under leave to extend my

remarks in the Record, I include an analysis of the provisions of the Social Security Amendments of 1960 and its potentialities by Wilbur J. Cohen, professor of public welfare administration, University of Michigan School of Social Work.

Prof. Wilbur J. Cohen, of the University of Michigan School of Social Work, the eminent authority on social security legislation, has prepared for publication in the journal of the American Public Welfare Association, Public Welfare, a thoroughgoing analysis of the provisions of the social security amendments of 1960 and their potentialities.

I include it here in the RECORD for the attention and consideration of my collegues:

THE SOCIAL SECURITY AMENDMENTS OF 1960: AN ANALYSIS OF THE PROVISIONS OF THE LEGISLATION AND ITS POTENTIALITIES

(By Wilbur J. Cohen, professor of public welfare administration, the University of Michigan School of Social Work)

The Social Security Amendments of 1960 contain modest but important improvements in the social security program. The final changes were largely noncontroversial in character and were adopted with bipartisan and wide support.

In the 25th anniversary year of the social security the Congress examined proposals relating to every title of the Social Security Act. As a result of this consideration, Congress developed legislation which made changes and improvements in nearly all of

the programs in the act.

The major issue before the Congress in the 1960 legislation was how to extend medical services to the aged. The legislative process was marked by controversies in both the House and Senate over establishing some type of contributory insurance plan for medical services for the aged. The Forand bill utilizing the contributory social security approach was defeated in the House Committee on Ways and Means. The Anderson-Kennedy amendment utilizing the same approach was defeated in the Senate. Likewise, the Javits amendment providing for Federal grants to the States for subsidizing voluntary health plans for the aged, supported by President Eisenhower and Vice President Nixon, was defeated in the Senate.

The evidence presented to the congressional committees indicated that the cost of adequate medical care for older people was increasing. The Congress concluded that these costs derive, to a large extent, from the fact that impressive improvements have been made in medicines and medical technology, which assist in diagnosis and treatment, and from improved hospital and other facilities, and their wider availability to the public. The knowledge that these costs are unpredictable, and sometimes very heavy, especially for older men and women living on reduced retirement incomes, became a matter of grave concern to the Congress.

As a result, the legislation provides for a program of Federal assistance to the States for an expanded program of medical care for persons aged 65 and over. Under this plan the Federal share of existing old-age assistance plans will be increased to encourage States to strengthen their medical programs for these people or to initiate new programs. In addition, Federal money will be made available, on liberalized matching formula, to assist the States in aiding those aged persons, many of them otherwise self-sufficient, who need help only in meeting the costs of medical care.

In addition to these changes the new legislation improves and expands the old-age, survivors, and disability insurance program. On a selective basis it extends coverage and improves certain benefits. This is done without increasing the contribution rates.

The unemployment insurance program is improved. For the first time in 25 years the Federal contribution rate is increased. This will enable the Federal loan fund to be built up to \$550 million instead of \$200 million. Coverage is also broadened somewhat.

The authorization for Federal grants for maternal and child health services, crippled children services and child welfare services is increased to \$25 million annually.

The exemption of earned income in the aid to the blind plan is increased and the continued approval of the Missouri and Pennsylvania blind assistance plans is extended to June 30, 1964.

The old-age assistance provisions of the law as well as the new medical care provisions are amended so that Federal funds may be obtained for any medical care in behalf of an individual, who is a patient in a medical institution as a result of a diagnosis that he has tuberculosis or psychosis with respect to any period before the individual has been a patient in such an institution as a result of such diagnosis, for 42 days.

OLD-AGE, SURVIVORS, AND DISABILITY INSURANCE (OASDI) IMPROVEMENTS

## 1. The disability insurance program

- (a) Removal of age 50 eligibility requirement: An estimated 250,000 people—disabled insured workers under age 50 and their dependents—will qualify for benefits through removal of the age 50 qualification for benefits.
- (b) Trial work period: The law strengthens the rehabilitation aspects of the disability program by providing a 12-month period of trial work, during which benefits are continued for all disabled workers who attempt to return to work, rather than limiting this trial work period to those under the formal Federal-State vocational rehabilitation plan, as in existing law.
- (c) Waiting period: The law provides that the disabled worker who regains his ability to work and then within 5 years again becomes disabled will not be required to wait through a second 6-month waiting period before his benefits will be resumed, as was required previously.

### 2. Liberalized insured status requirement

The new law liberalizes the insured status requirement by making eligible for benefits persons who have one quarter of coverage for every three calendar quarters elapsing after 1950 (or age 21) and before retirement age (65 for men, 62 for women), disability or death. The old law required one quarter of coverage for each two quarters so elapsing. (No change would be made in the requirement that a person must have a minimum of six quarters of coverage or the provision giving permanent insured status to persons with 40 quarters of coverage.) The change makes the requirement in the short run comparable to that which will prevail in the long run (permanent insured status with 40 quarters of coverage in a working life). For example, a person reaching retirement age in 1960 would need to have only 13 quarters of coverage to be insured, whereas under present law, he would need 18 or 19 quarters of coverage. About 400,000 people—workers, dependents, and survivors—will be eligible for benefits as a result of this change.

 Improved benefit protection for dependents and survivors of insured workers wives, widows, children, husbands, and widowers

The new law will increase the benefits payable to children in certain cases and would provide benefits for certain wives, widows, widowers, and children of insured workers who are not now eligible for benefits.

(a) Survivors of workers who died before 1940: Survivors of workers who died before

1940, and who had at least six quarters of coverage, would qualify for benefit payments. About 25,000 people, most of them widows aged 75 or over, would be made eligible for benefits for the first time by this change.

benefits for the first time by this change.
(b) Increase in children's benefits: The benefits payable to the children of deceased workers, which now can be somewhat less than 75 percent of the worker's benefit depending on the number of children in the family, would be made 75 percent for all children, subject to the family maximum of \$254 a month, or 80 percent of the worker's average monthly wage if less. About 400,000 children would get some increase in benefits as a result of this change.

### 4. Liberalized retirement test

A new principle is incorporated in the retirement test. Under the old law a beneficiary under age 72 lost 1 month's benefit for every \$80 (or fraction thereof) by which his annual earnings exceeded \$1,200. Under the new law, a beneficiary can earn up to \$300 additional (above the \$1,200) and can retain one-half of such additional earnings. Any earnings above \$1,500 will result in a reduction of benefits of \$1 for each \$1 of earnings. The change is generally more favorable to retired persons who work and introduces an incentive element into the fettrement test between \$1,200 and \$1,500.

### 5. Increased coverage

The coverage of the program would be extended to additional people—parents who work for their sons and daughters in a trade or business, workers in Guam and American Samoa, American citizens employed in the United States by foreign governments and international organizations, and certain policemen and firemen under retirement systems.

Another opportunity would be provided for an estimated 60,000 ministers to be covered under the program. If the States take advantage of the opportunity offered them, nearly 2½ million employees of State and local governments could obtain coverage for certain past years on a retroactive basis. Other provisions would facilitate coverage for some of the noncovered people employed in positions covered by State or local retirement systems and for the 100,000 noncovered employees of certain nonprofit organizations.

### 6. Investment of the trust funds

The law makes certain changes in the investment provisions relating to the Federal old-age and survivors insurance trust fund and Federal disability insurance trust fund so as to make interest earnings on the Government obligations held by the trust funds more nearly equivalent to the rate of return being received by people who buy Government obligations in the open market.

These changes make for more equitable treatment of the trust funds and are generally in line with the recommendations of the Advisory Council on Social Security Financing.

7. Technical and minor substantive changes

The new law makes a number of amendments of a technical nature. These provisions will correct several technical flaws in the law, make for more equitable treatment of people, and simplify and improve the operation of the program.

# 8. Financing and actuarial status of the trust funds

The improvements provided in the new law in the old-age, survivors, and disability insurance program will not necessitate an increase in social security taxes to keep the program actuarially sound. Both trust funds will remain in actuarial balance.

# 9. Scope of Advisory Council on Social Security Financing

The Social Security Amendments of 1956 authorized the establishment of periodic

advisory councils to study and report on the financing of OASDI. The new law provides that the council to be appointed in 1963 is to make findings and recommendations with respect to extension of coverage, adequacy of benefits, and all aspects of the OASDI program in addition to those relating to financing. Under this amendment the council can consider medical care proposals.

THE MATERNAL AND CHILD WELFARE PROGRAMS

The new law provides that the authorization for annual appropriations for the maternal and child health services program be increased from \$21.5 million to \$25 million; the crippled children's services from \$20 million to \$25 million; and the child welfare program from \$17 million to \$25 million. A new authorization for research and demonstration projects in the child welfare services program permits grants to public and other nonprofit institutions and agencies for this purpose.

IMPROVEMENTS IN UNEMPLOYMENT INSURANCE

The changes made in the legislation improve and extend the Federal-State program of unemployment insurance. The changes were noncontroversial. The new law:

Increases the net Federal unemployment tax (the tax that may not be offset by a credit for taxes paid under a State program) from three-tenths to four-tenths of 1 percent on the first \$3,000 of covered wages.

(2) Provides that the proceeds of this higher Federal tax after covering the administrative expenses of the employment security program will be available to build up a larger fund for loans to States whose reserves may become depleted. The loan fund is increased from a maximum of \$200 million to \$550 million or four-tenths of 1 percent of total wages subject to State unemployment taxes, whichever is higher.

(3) Makes improvements in the arrangements for financing the administrative costs of the program by building up a revolving fund of \$250 million for such expenditures.

- (4) Tightens the conditions relating to eligibility for and repayment of loans.
- (5) Extends the coverage of unemployment insurance to some 60,000 to 70,000 additional employees such as those working in Federal Reserve banks, Federal credit unions, and commercial and industrial activities of nonprofit institutions.
- (6) Provides that Puerto Rico will be treated as a State for the purposes of the unemployment insurance program.

CHANGES IN AID TO THE BLIND PROGRAM

## 1. Increase in the income exemption

Effective July 1, 1962, a State agency, in determining need for blind assistance, must disregard the first \$85 of earned income per month plus one-half of earned income in excess of \$85. Until July 1, 1962, a State is permitted to disregard the first \$85 per month and the excess or to continue to apply the \$50 per month exemption in the old law.

### 2. Missouri and Pennsylvania plans

Special legislation providing for the approval of the Missouri and Pennsylvania blind assistance plans expire June 30, 1961. This temporary provision is extended to June 30, 1964.

### MEDICAL SERVICES TO THE AGED

The new legislation makes three basic changes in the existing old-age assistance provisions (title I) of the Social Security Act to encourage the States to improve and extend medical services to the aged:

- (a) Increases Federal funds to the States for medical services for the 2.4 million aged persons on old-age assistance;
- (b) Authorizes Federal grants to the States for payment of part or all of the medical services of a group of persons totaling about 10 million who may, at one time or another,

be in need of assistance in paying their medical expenses;

(c) Instructs the Secretary of Health, Education, and Welfare to develop guides or recommended standards for the use of the States in evaluating and improving their programs of medical services for the aged.

After extended debate Congress designed a Federal-State matching program based upon principles of Federal-State cooperation. This program is established under title I of the Social Security Act, thereby providing additional matching funds to the States to (1) establish a new or improve their existing medical care program for those on the old-age assistance rolls, and (2) add a new program designed to furnish medical assistance to those needy elderly citizens who are not eligible for old-age assistance but who are financially unable to pay for the medical and hospital care needed to preserve their health and prolong their life. This twofold plan would thus cover all medically needy aged 65 or over, whether or not they are eligible for old-age assistance, or whether or not they are eligible for the benefits under the social security or any other retirement It accomplishes this objective program. within the framework of a Federal-State program with broad authority allowed to the States as to the programs they will institute, improve, and administer in meeting the health needs of the aged when illness occurs or continues.

MEDICAL CARE FOR THE AGED RECEIVING OLD-AGE
ASSISTANCE

### 1. Purpose

The provisions of title I provide Federal funds to the States for medical services to aged individuals who are determined to be needy by the States. States provide needy aged persons with "money payments" for medical services and also provide "vendor payments" to the suppliers of medical care (for instance, doctors, hospitals, and nurses). Congress found that these provisions vary greatly. Some States have relatively adequate provisions for the medical care of needy aged persons; others have little or no provision. The increased Federal financial provisions in the new law are designed to encourage the States to extend comprehensive medical services to all needy persons receiving monthly assistance payments. Participation in the Federal-State program is completely optional with the States, with each State determining the extent and character of its own program, including the standards of eligibility and the nature and scope of benefits.

### 2. Effect of the legislation

Prior to the 1960 legislation the Federal Government made available to the States funds for medical services to needy aged persons, but Federal financial participation was limited to a stated statutory proportion of average assistance expenditures up to \$65 per month.

To encourage all States to develop a comprehensive medical care program, additional Federal funds will be available to the States, effective October 1, 1960, as follows: A provision is added to the existing law to provide for Federal financial participation in expenditures to vendors for medical services of up to \$12 per month in addition to the existing \$65 maximum provision. In effect, the Federal maximum is raised from an average of \$65 to \$77 a month. Where the State average payment is over \$65 per month, the Federal share in respect to such medicalservices costs would be a minimum of 50 percent and a maximum of 80 percent, depending upon each State's per capita income. Where the State average payment is \$65 a month or under, the Federal share, in respect to such medical-services costs, would be 15 percentage points in addition to the existing Federal percentage points (50 to 65 percent); thus, for these States the Fed-

eral percent applicable to such medical-services costs would range from 65 to 80 percent.

A State with an average payment of over \$65 a month would never receive less in additional Federal funds in respect to such medical-services costs than if it had an average payment of \$65. For example, if a State has an average payment of \$67, including an average of \$10 in such medical-services costs, and has a Federal medical percentage of 70 percent, it will receive an additional Federal payment per recipient of old-age assistance (over previous law) of the larger of (a) 15 percent of \$10, or \$1.50, or (b) 70 percent of \$2 (i.e., the excess of the average payment over \$65), or \$1.40.

As to Puerto Rico, Guam, and the Virgin Islands, their additional matching for vendor medical expenditures will be on up to an additional \$6 a month per recipient rather than the additional \$12 a month for the States and the District of Columbia. This was done because their matching maximum for old-age assistance is an average of \$35 a month per recipient in contrast to \$65 for the States. Under existing law there are also dollar maximums applicable to Guam, Puerto Rico, and the Virgin Islands for the public assistance programs, these are increased proportionately on condition that the additional increases are used for vendor medical expenditures under the old-age assistance.

The payments under this program would be made directly to providers of medical services.

#### 3. Eligibility

Each State has the responsibility of determining the standard of eligibility for the medical care it provides aged persons. For aged persons receiving money payments the State must take into consideration any income and resources of the individual.

#### 4. Scope of medical services

There is no Federal limitation on medical services provided under the bill. Each State may determine for itself the scope of medical services to be provided in its program.

### 5. Federal matching

The bill provides for an increase in Federal funds for medical services. The formula, as outlined above, would result in Federal funds in addition to those presently provided. Additional Federal funds may be obtained only for medical services, within the \$12 per recipient maximum for payments, made directly to providers of the medical services. States have the option of transferring part or all of the money payments now made for medical services to vendor payments.

MEDICAL ASSISTANCE FOR THE AGED NOT RECEIVING OLD-AGE ASSISTANCE

### 1. Purpose

The new law amends existing title I to make it clear that States may extend their assistance to cover the medically needy. The States would have a financial incentive to establish such programs where they do not exist or to extend such programs where they are not adequate in coverage or comprehensive in the scope of benefits.

A State desiring to establish a program for assisting low-income individuals in meeting their medical expenses would submit an amendment of its old-age assistance plan which, if found by the Secretary of Health, Education, and Welfare to fulfill the requirements specified in this title, would be approved for Federal matching. A number of the plan requirements are substantially the same as those in the present public assistance titles. Other plan requirements are directed specifically to accomplishing the purposes of the new title, to assist aged persons who are able to meet their expenses other than their medical needs.

A State would have broad latitude in determining eligibility for benefits under the program as well as the scope and nature of the services to be provided within the limitations prescribed. Thus, each State would determine the tests for eligibility and the medical services to be provided under the State program within the limitations described below. Federal financial participation would be governed by the establishment of an approved plan subject to the criteria and limitations prescribed in the law.

#### 2. Eligibility

Benefits under a State program may be provided only for persons 65 years of age or over to the extent they are unable to pay the cost of their medical expenses. Under this program, it will be possible for States to provide medical services to individuals on the basis of an eligibility requirement that is more liberal than that in effect for the States' oid-age assistance programs. The State plan could not be approved if it includes any residence requirement which excludes any individual applying for medical assistance for the aged who resides in the State.

Section 1 of the Social Security Act is amended to provide that one of the objectives of the title is to furnish medical assistance to individuals who are not recipients of old-age assistance but whose income and resources are insufficient to meet the costs

of necessary medical services.

It would cover all medically needy aged 65 or over; it would cover every such person. including those under the social security system, railroad retirement system, civil service system, or any other public or private retirement system whether such person is retired or still working, subject only to the participation in the program by the State of which they are resident; it would cover the widows of such workers as well as their dependents who meet the age 65 requirement and are unable to provide for their medical care. There are many individuals who have not worked under the social security program or any other retirement program for a sufficient time to ever become eligible for retirement benefits; any or all of these groups would be able to receive medical assistance under the State health plan.

A State may, if it wishes, disregard in whole or part, the existence of any income or resources, of an individual for medical assistance. An individual who applies for medical assistance may be deemed eligible by the State notwithstanding the fact he has a child who may be financially able to pay all or part of his care, or that he owns or has an equity in a homestead, or that he has some life insurance with a cash value, or that he is receiving an old-age insurance benefit, annuity or retirement benefit. The State has wide latitude to establish the standard of need for medical assistance as long as it is a reasonable standard consistent with the objectives of the title. In establishing such standard a State must comply with all other applicable provisions of sec-tion 2 of the Social Security Act, as amended by the new law.

This is based on the grounds that an aged individual who has adjusted his living standard to a low income, but who still has income and resources above the level applicable for old-age assistance, might be unable to deal with his medical expenses. The Congress intends that States should set reasonable outer limits on the resources an individual may hold and still be found eligible for medical services. Individuals who are recipients of old-age assistance in any month would not be eligible for participation in the medical assistance program in that month.

### 3. Scope of benefits

The scope of medical benefits and services provided will be determined by the States. The Federal Government, however, will participate under the matching formula in any program which provides any or all of the following services, provided both institu-

tional and noninstitutional services are avail-

- (1) Inpatient hospital services;
- (2) Skilled nursing home services;
- (3) Physicians' services;
- (4) Outpatient hospital services; (5) Home health care services;
- (6) Private duty nursing services;
- (7) Physical therapy and related servfces.
  - (8) Dental services:
- (9) Laboratory and X-ray services; (10) Prescribed drugs, eye glasses, dentures, and prosthetic devices;
- (11) Diagnostic, screening, and preventive services; and
- (12) Any other medical care or remedial care recognized under State law.

The Federal Government will not participate as to services rendered in mental and tuberculosis hospitals.

The description of the care, services, and supplies provided with Federal financial participation which may be provided for recipients of medical assistance for the aged is intended to be as broad in scope as the medical and other remedial care which may be provided as old-age assistance under title I of the existing law with Federal financial participation. The various types of care and services have been enumerated primarily for informational purposes. A State may, if it wishes, include medical services provided by osteopaths, chiropractors, and optometrists, and remedial services provided by Christian Science practitioners.

The medical provisions permit the States to utilize, at their option, existing voluntary health insurance plans if they instance, a State may make payments to Blue Cross, Blue Shield, or group practice prepayment plans for any medical services. More-over, a State may utilize one or more of these plans in one or more communities. It is not necessary for the voluntary plan to be statewide in operation as long as the State provides for the payment on behalf of individuals on a statewise basis of the medical services covered in the State plan. A State may, if it wishes, pay for such services on a premium, fee for service, salary, or per capita basis, or any reasonable combination of such methods.

The eligibility conditions and the scope of medical services provided must be statewide in operation and be available to all persons in the State in similar circumstances. the State may select more than one method to carry these policies out. For instance, it may insure part of the hospitalization costs through a Blue Cross plan by paying the premium therefor; and if the State wishes, any part of the hospital cost not met through such insurance might be paid in part or whole by the State welfare agency. The State welfare agency could arrange through the State health department and a State visiting nurse agency to pay for visiting nurse services. All of these alternatives are available to a State provided it makes available the same content of medical service to all persons it has determined to be eligible under the income standards it has selected itself.

### 4. Federal matching

The Federal Government will share with the States in the cost of the new medical assistance program in accordance with the matching formula prescribed by the new law. The Federal share of the cost will be determined in the same general manner as now provided for the portion of the old-age assistance payments between \$30 and \$65 per month; that is, the Federal share will depend upon the per capita income of the State as related to the national average, but with a range from 50 to 80 percent. For Puerto Rico, Guam, and the Virgin Islands the matching will be on a 50-50 basis. no maximum upon the dollar amount of Federal participation in the new program. Appropriation requirements, therefore, would depend upon the programs developed by the States. Thus, the total cost would depend upon the scope of services offered and the number of persons found eligible by the States under the respective State plans.

The Federal Government will participate in the cost of administering these programs on a dollar-for-dollar basis, as is now true in the case of the four public assistance programs.

In recognition of the fact that some States might be able to take advantage of the Federal funds for this program very quickly, Congress set the effective date for the new program as October 1, 1960.

#### 5. Plan requirements

There are 10 plan requirements which a State must meet to obtain Federal funds and which apply to both old-age assistance and medical assistance for the aged. Nine of these are identical with those in the previous

- (1) Provide that it will be in effect in all political subdivisions and be mandatory upon those subdivisions if administered by them;
- (2) Provide for financial participation by the State:
- (3) Provide for establishment or designation of a single State agency to administer or supervise administration of the plan:

(4) Provide for giving claimants a fair hearing if their claims are denied or not acted upon with reasonable promptness:

(5) Provide methods of administration

found necessary for the proper and efficient operation of the plan-these must include a merit system for personnel;

(6) Provide for making of necessary reports to the Secretary;

(7) Provide safeguards against use and disclosure of information concerning applicants for and recipients of assistance, except for purposes directly connected with the ad-

ministration of the plan;
(8) Provide all individuals wishing to do so an opportunity to apply for assistance, and provide that assistance will be furnished with reasonable promptness to those who are eligible; and

(9) Provide, if the plan includes assistance for or on behalf of individuals in private or public institutions, for the establishment or designation of a State authority or authorities to be responsible for establishing and maintaining standards for such institutions.

The new plan requirement is one which states that a State plan must include reasonable standards, consistent with the objectives of title I for determining the eligibility of individuals for old-age assistance or medical assistance and the extent of such

The amended law retains the provisions included in the law in 1939 that the State plan for old-age assistance must provide for taking into consideration any other income and resources of an individual in determining his need for old-age assistance. requirement is omitted for medical assistance to the aged.

There are four new plan requirements for the medical assistance for the aged. The State plan must-

- (1) provide for inclusion of some institutional and some noninstitutional care;
- (2) prohibit enrollment fees, premiums, and similar charges as a condition of eligibility;
- (3) include provisions, to the extent required by the Secretary's regulations, for the furnishing of assistance to residents of the State who are temporarily absent therefrom;
- (4) provide that property liens will not be imposed on account of benefits received under the plan during a recipient's lifetime and limit recovery of benefits paid from the re-cipient's estate after the death of any surviving spouse.

The act provides that nothing in the amended title I is to be construed to permit a State to have in effect with respect to any period more than one State plan approved under such title.

#### MEDICAL GUIDES AND RECOMMENDATIONS

As recommended by the Advisory Council on Public Assistance, appointed pursuant to the Social Security Amendments of 1958, the law instructs the Secretary of Health, Education, and Welfare to develop guides or recommended standards for the information of the States as to the level, content, and quality of medical care for the public assistance medical programs. He would also prepare such guides and standards for use in the new programs of medical assistance for the medically needy aged. It is expected that the Secretary will appoint an Advisory Commit-tee on Public Assistance Medical Care with whom he will consult on the medical assistance program. In these ways it is expected that the additional Federal funds made available in this bill will be channeled as rapidly as possible into an improvement in and extension of medical services to needy aged persons. Under existing provisions of law the Secretary has authority to make any recommendations for changes in the program should any changes become apparent in the administration of the program. These provisions should insure the development of an effective and efficient program adapted to the needs of the aged, and to the differences among the States.

According to Senator Kerr, it is hoped and expected that States will make every effort to take advantage of the new legislation on October 1. Those States which do not have sufficient legislative authority or appropriations to take advantage of it were encouraged by him to do so as rapidly as possible. The Secretary was requested to make a report to the Congress by March 15, 1962, as to the steps taken by the States to carry out the purposes of the legislation. Such report shall include whether the States have utilized the additional funds to extend and improve their medical program for needy individuals, and the Secretary's recommendations for obtaining the proper level, content. and quality of medical care in those States which he finds have not done so.

The Secretary was also requested to make study of all the medical resources available to meet the needs of public assistance recipients and to report his finding to the Congress. According to the House commit-tee report: "The information is of vital importance to the Congress in considering the problems of medical care needed by the lowincome people of the Nation. The committee expects the Department will obtain the cooperation of the States and various other public and voluntary agencies and organizations in making the study" (p. 58).

### NUMBERS OF PERSONS AFFECTED AND COSTS

Under the revised title I, State plans (with Federal matching funds) could provide po-tential protection under the new program of medical assistance for the aged to as many as 10 to 15 million persons aged 65 and over whose financial resources are such that, if they have sizeable medical expenses they will qualify. These 10 to 15 million persons would include the vast majority of the 12 million individuals aged 65 and over who are receiving old-age and survivors insurance benefits—as well as other aged persons, too. Each year, after all State plans are in full operation, the Department of Health, Education, and Welfare estimates one-half to 1 million persons may become ill and require medical services that will result in payments under this title.

In the first year after enactment of the law, when relatively few States will probably have had an opportunity to develop comprehensive plans (although it is expected that

all States now not having comprehensive medical programs for their old-age assistance recipients will adopt or extend such programs) an estimated additional \$60 million in Federal funds would be expended for medical assistance for the aged. In addition, increased Federal funds for matching vendor medical-care payments in respect to the 2.4 million old-age assistance recipients are estimated at about \$140 million. Thus, under both programs combined, the additional Federal cost would total about \$200 million. The Department estimated that the States and localities would participate to the extent of about \$60 million. The combined tent of about \$60 million. The combined Federal, State, and local funds involved might be around \$260 million.

With respect to costs after the new programs have been in effect for several years, it must be considered that the old-age assistance roll is decreasing slowly, but that States with no vendor medical payments now (or with small payments of this type) will probably develop quite comprehensive medical-care programs for the old-age assistance recipients. The increased Federal funds for matching the vendor medical-care payments of old-age assistance recipients are estimated at about \$175 million annually in the long run. In addition, an estimated \$165 million in Federal funds for medical services for the aged may be provided in a full year of operation after the States have had opportunity to develop these programs (and this figure could even be somewhat higher if all States had relatively well developed and comprehen-Thus, under both programs sive plans). combined, the annual Federal cost would total about \$330 million. The State and local funds would be in the neighborhood of \$170 million. The combined total thus would be about \$500 million.

### CONCLUSION

The 1960 legislation does not compare in scope or significance with the Social Security Amendments of 1950, 1954, 1956, or 1958. By rejecting the contributory social insurance approach for meeting medical care costs for the aged and instead extending the pub-He assistance approach, the Congress flaunted the principles it has reiterated on several occasions. However, it should be recognized that this same experience occurred in 1950 when Congress rejected disability insurance and enacted disability assistance only to make disability insurance the basic program in 1956.

If major reliance is placed on the public assistance approach for meeting medical care needs of the aged, it is likely that the potential cost may be in the neighborhood of \$1.5 to \$2.5 billion annually from general revenues. It is reasonably certain that the States will not be able to meet their share of such costs and hence the potential will not be realized. The issue still remains, then, what additional mechanism needs to be created to make public assistance medical care a supplementary or second line of defense instead of a primary resource.

The congressional debate indicated that there was bipartisan support for some additional Federal action to deal more effectively with the problem of medical care for the aged. It is likely, therefore, that the next session of Congress will see some additional legislation enacted which is not based upon the public assistance approach.

Many States cannot take full advantage of the 1960 legislation without new legislative authorization and appropriations. Consideration should be given to calling special sessions of the State legislatures to implement the new legislation. States which have administrative authority to implement the new legislation in part or in whole should make every attempt to do so.

The 1960 legislation does introduce some important new principles: the abolition of

any residence requirement for medical assistance, the Federal financial share for medical assistance without any dollar maximum; and the introduction of the incentive principle in the retirement test in OASDI. Moreover, the abolition of the age 50 limitation in the disability insurance program is notable achievement. Four years previously the disability insurance program was enacted in a most controversial and close debate. The program was enacted in the Senate in 1956 by only one vote to spare. Yet, despite the opposition of the medical societies, insurance companies and employer groups to its enactment, the administration of the program has been a success. Its extension in 1960 is ample testimonial to the fact that each step in the evolution of social legislation is won the hard way, over tremendous opposition, and criticism. Then when enacted, it eventually becomes part and parcel of the American way of life and accepted by most of those who originally opposed it.

The 1960 legislation is thus another step in the process of social legislation which will continue.

## Tells Story of First French Visit

EXTENSION OF REMARKS OF

## HON, HARRISON A. WILLIAMS, JR.

OF NEW JERSEY

IN THE SENATE OF THE UNITED STATES Thursday, September 1, 1960

Mr. WILLIAMS of New Jersey. Mr. President, the American Field Service has made it possible for many Americans to participate in student exchange programs abroad. It has helped our students to understand viewpoints and problems of other nations; it has replaced occasional misunderstanding with rapidly growing friendship. An article in the Hunterdon County (N.J.) Democrat of September 1 gives an account of the program as seen by one New Jersey student. I believe that it tells much about the program and its effects.

Mr. President, I ask unanimous consent to have the article printed in the Appendix of the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

TELLS STORY OF FIRST FRENCH VISIT

"I love France, but there's no place like said Conrad Eberstein, Hunterdon Central High School senior who returned on Wednesday, August 24, 1960, aboard the SS Waterman after a 21/2-month stay in France. Conrad, the son of Mr. and Mrs. Daniel

Eberstein of rural Flemington, is the first Hunterdon County student to be sent abroad by the American Field Service.

He praised the AFS program as "one of the best things that ever happened to a youth."

"I felt as if I were facing the world all alone," said Conrad when after a 9-day voyage to France with about 800 other AFS students and a tour of Paris with 28 others, he alone got off the train in Jonzac and met his French family.

"You have to adjust, but it's difficult to avoid making comparisons."

He spoke of the food, "It's terrific, I liked

everything," he said, noting that he had gained weight.

A typical breakfast consisted of a pot of tea, coffee, or hot milk and pastries which were dunked in your beverage until finished.

Lunch, a more elaborate and formal meal, began with what Conrad described as a meat salad-tuna fish with lettuce and tomatoes, for instance. The plates were cleared away, and the meat course was served. "It was impolite to refuse a second helping," he added.

There was a pause between each course of the meal, which lasted about an hour. After the meat came the potatoes and then the vegetables. Dessert consisted of a plate of various cheeses and fresh fruits. Bread, but rarely butter, was eaten with the meal and always washed down with wine.

When asked about the clothes, it was Conrad's opinion that Americans are better

#### OUR ROADS BETTER

Roads are different, too. "Our roads are superior," he stated because, he said, we have bigger and more cars, and gasoline is cheaper. Small cars are more convenient in France because there are so many in cities, and the streets are so narrow.

But there are many misconceptions which the French and Americans have about each other, such as the French thinking all

Americans are rich.

The picture that Americans have of French girls as being free and uninhibited is wrong, said Conrad. They are "severely kept" and don't date until they are 18. Then it's usually in a group, and it's not until a special boy who will probably be her husband comes along that a boy and girl date alone. Conrad felt that American teenagers were

generally more socially mature and poised, but he added that scholastically Annie-Claude "knew much more than I did."

"In science she's way over my head, and in math we're about even." She has studied in her boarding school French, Spanish, and English. In her English class she is reading Shakespeare and so far has read more Shakespeare in what is to her a foreign tongue than Conrad has read in school in his native language. His French family was pleased that Conrad Insisted that only French be spoken

Vacations are vacations in France. It's a period of rest and recuperation from school work, and generally speaking very few stu-

dents have summer jobs.

His "father," Dr. Pierre Ouary, is a surgeon with three children-Francine, 23 years old and a nurse, Annie-Claude, 17, who wants to be a chemical engineer and enjoyed flying planes, and Pierre, 15, who would like to be an English translator with the United Na-

He placed his French family, who were "maman," "papa," "sister," and "brother" from the first day, in an upper-middle socio-

economic bracket.

Conrad's "father" was on vacation during his visit to France and traveled with Conrad to surrounding towns in the family Peugeot 403 which seats four comfortably and could

squeeze in six.

Although everyone in Jonzac, a town about the size of Flemington, but seven or eight centuries old, knew Conrad, he said that far more attention was paid here to Hunterdon Central Exchange students Kit Svenson or Jamaliah Rahmat.

There was no newspaper publicity or public ceremonies. His family had a small informal party on the night of his arrival, but Conrad was not the recipient of any special or unusual attention.

Highlights of his trip were a tour through the Louvre in Paris where an English-speaking guide explained the art in detail. "I began to appreciate art," said Conrad.

Marseilles was his favorite city because "it was the first I saw through my own eyes." New York, he explained, he had seen through the eyes of his parents and Paris through the eyes of AFS.

He described the Côte d'Azur, famous French resort spot, as "the best thing in the world." It's hot with no humidity.

There's rarely a cloud in the sky, and when it does rain, "It always seems to be at night."

When asked about any feeling of anti-Americanism, Conrad thought that the French felt "many things America did was wrong, but that they held nothing against the American people."

On his departure his "parents" presented him with a watch. The townspeople gave him a pair of white kid tie shoes, and the Ouarys' neighbors gave him a viewmaster similar to the kind familiar to Americans which holds a circle of colored pictures.

"I was kissed goodby like a son," he said. He's been greeted like a son in Flemington. Yes, he intends to go back to France someday, but right now it's good to be home.

## Sermon by the Very Reverend Francis B. Sayre, Jr.

EXTENSION OF REMARKS

## HON. FRANCIS E. WALTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES Thursday, September 1, 1960

Mr. WALTER. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the sermon by the Very Reverend Francis B. Sayre, Jr., dean, the Washington Cathedral:

SERMON PREACHED IN WASHINGTON CATHEDRAL BY THE VERY REVEREND FRANCIS B. SAYRE, JR.

"I will stand upon my watch, and set me upon the tower, and will watch to see what he will say unto me, and what I shall answer"—Habakkuk 2: 1.

The minor prophet Habakkuk, who spoke these words, was a contemporary of Jeremiah; and, because neither humans nor history ever really change so very much he is also contemporary with us. At least he would have found this thorny world painfully familiar. The Chaldeans were the troublers of his time: "that bitter and hasty nation," as he called them. But if he lived today, he would not be hard put to it to discern the modern counterpart of those enemies who "march through the breadth of the earth, to possess dwelling places that are not theirs." Whatever side of the Katonga border you live on in the Congo today, the tribe on the other side looms fearsome: "terrible and dreadful \* \* \* their horses are swifter than leopards, and are more fierce than the evening wolves \* \* \* they fly as eagles that haste to devour. They come all of them for violence." Before the Chaldees, it had been Egyptians and Persians. After them Nazis and Communists—and all the panoply of their persistent puppets.

Was there ever a time in the world when in the stillness of despair some man's soul did not echo the prophet's cry:

"Destruction is before me. There is strife, and contention riseth up. Therefore the law is slacked and justice doth never go forth.

"O Jehovah, how long shall I cry and Thou wilt not hear Why dost Thou show me iniquity and look upon perverseness?"

And what does God whisper to the prophet's aching indignation? What holiness or comfort is there for the sole surviving child of the recent Lumumba massacre in a mission compound; or for an African kicked and shot by a South African white man who plously tells him that God made him trash; or for a Chinese hiding in the

bilge of a junk, drifting down the heavy river that flows away from the familiar wretchedness to unknown rescue in Hong Kong? Up—Climb up to a height, says the Lord. Mount your tower and watch. Take your eyes off the sidewalk and fasten them on the horizon; squint out in the distance the signs of the times, and perchance while you're looking, you'll find the healing of the hurt closer than ever you thought—right beside you.

So it was, at any rate, with Habakkuk. He took a long view of the despoiler: the ruthless Chaldee who in his day swept men's minds and bodies into one net of bondage, and worshipped, like the Russians in our day, not God, but the net itself. But when he had lifted up his eyes so that he could see the whole sweep, he saw that these wreckers were really sifters: God could use them too, to winnow out truth from falsehood, courage from selfish pleasantry. They tested the mettle of resistance. They were the means of God's judgment on the world: that which was unworthy among his own people would not survive.

"Thou, O Rock, hast established the tyrant for correction," proclaimed the brave prophet. Out of pain would come the strength of integrity—a new and cleaner life.

Thus Habakkuk came to the great conclusion for which the Bible remembered the leader who lived just before Israel collapsed. For in the midst of all the chaos this man stood upon the tower of his fatth, and renewed for his people the undergirding meaning of it all: "Art not thou from everlasting, O Jehovah my God, my Holy One? We shall not die."

Because God is, we are too. And not until anguish and bitter disappointment have taken all else away, does either a man or a nation lift up his eyes to the hills whence cometh help. In the crucible of fire, purpose is born.

This past summer I saw a lot of those towers which mankind has left here and there to mark his vigil through the ages: On the coast of Africa, the medieval keeps built by Dane and Spaniard, Frenchmen, and Portuguese, to guard his trade and protect his colonizing foothold. At the edge of the broad Atlantic, modern radio towers built to patrol the invisible ether and transmit warnings of storm or riot. But one of the most remarkable was a tower I saw in Italy, near Ostia, the ancient port of Rome. Another keeper of the coast, it was built to defend the imperial commerce against marauding pirates. Every rampart is still intact, and one could imagine the sentinel on the parapet alert for the threatening sail. There was meaning in his world: around him the peaceful fields bearing the fruitful image of Creation, and how God meant the world to be; beyond, the trackless ocean across which the pride of man's destruction might come sailing on any fair breeze. But no one keeps watch in that tower nownot because there are no longer marauders in the world, but because the land has silted up in the centuries. Mother Tiber has deposited upland soil in the coastal marsh, and the turret that was once scoured by the waves is now 8 miles from the sea-the lookout gone, its purpose spent—just an archaic landmark past which plods the weary peasant home from his daily round.

More than one has remarked that the watchtowers of our faith are in like condition. The mighty acts of God—His judgment, His salvation, His sure defense—are so slited up in our lives by the slow deposit of selfish habit, the little dust of unlifted thought, that the spire of vision and of hope is held prisoner upon the flatness of the days. Meaning is choked by the accumulation of familiar triviality, and those turrets which

once were watchtowers of our purpose, where once we climbed to decry the portents of God's providence, are now but monuments of a dead past.

Thus many have observed of the present political campaign that, while both candidates, both parties, evince a certain technical skill of organization, they each lack the power to inspire, to lift the sights of a complacent yet bewildered people to a fresh understanding of what God means us to be and to do in this confused world. Professionalism is not enough, when you have lost your purpose. All the stampedes and clever manipulations of the conventions last summer only brand the bankruptcy of leaders who have built no towers from the top of which they and their followers might clearly behold the threatening realities at work on every continent of the world today, including our own. As Democrats cheered for Adlai, then voted for Jack, the Congo blew up; and in that explosion balanced the fate not only of Western civilization, but of all international cooperation as well. But nobody mentioned this, so far as I have heard, in either con-

These are the issues at stake in the world just now, which is to say for us—in this election. Threatening sails are on every horizon, but our towers are all silted up. And there is no watchman: no brave prophet to see God's winnowing in the prostrating chaos of our time; no national leader to rediscover God's eternity in the long run, who therefore will reassure us that therefore we live.

In vain one looks for this among the ascendant politicians; in vain in Life magazine's gift to the American people of a series of articles on "the national purpose." In vain, too—it would seem at the moment—from a good part of the Protestant clergy, who in the myopia of a battle long since gone by, persist in seeing the great issue of this election as being the threat of Roman Catholic domination of a free people.

When my friend Dr. Peale cites the awful precedent of what happens in Spain or Colombia today, he misses the point about America. We are not Spain or Colombia; not bound by a history and tradition that binds us moribundly to the middle ages; but we are a new nation, ennobled by a new experiment in a new world, by which we have sought to reflect the fact that God made us all, not just some, in his own image, and that therefore we can trust one another in equality and liberty.

This is the issue of our times: whether we as a people will dare to abide in such freedom trustfully, and whether the other nations of the world-the new ones of Africa or the old ones of Asia or the tired ones of Europe-will believe this of us, believing, too, through what we are and do that God will also bless such a cause, so that they, too, may share in it. In this sense religion is by all means an issue in this campaign, but not Roman Catholicism. And in this sense it is the basic battle of all mankind in this crisis; whether the net of the enemy will at last succeed in scooping us all into its maw; or whether God may not, in His strange way, use even the sorrow and the distress to sift out a new vision, a new world for the watchman to see upon his tower.

"Could ye not watch 1 hour?" Christ asks of His disciples.

"I will stand upon my watch and set me upon a tower," says Habakkuk, "and will watch to see what He will say to me, and what I shall answer."

God grant that we, too, as a people, may lift our spirits to watch for the eternal purpose of God in our Nation's life; and that, though it be assaulted in this world, we shall be humble enough to be cleansed by adversity and to remain faithful to the glory which God has set upon the circle of the earth.

## Dr. Smith, Should Anybody Make a Profit on People Getting Sick?

EXTENSION OF REMARKS OF

## HON. ROMAN L. HRUSKA

OF NEBRASKA

IN THE SENATE OF THE UNITED STATES Thursday, September 1, 1960

Mr. HRUSKA. Mr. President, in the months since I accepted an assignment to the Antitrust and Monopoly Subcommittee, its chief activity has been a series of public hearings on so-called administered prices in the drug industry.

On other occasions, I have observed that the forays of this subcommittee sometimes extend into areas where it is difficult to perceive a connection with the subcommittee's stated jurisdiction. Testimony, for example, has been taken on the efficacy of certain modern drugs and on the style of certain advertising in professional journals.

The press reports and daily headlines which flow from these hearings, if taken literally, tend to leave great numbers of our citizens with the impression that an unscrupulous industry is marketing inferior products through shady practices at excessive prices with outrageous profits.

There has now come to my attention an article from the summer quarter. 1960, issue of Quest magazine which does much, in my estimation, to set straight the record of the drug industry, its practices and problems. Its title is, "Dr. Smith, Should Anybody Make a Profit on People Getting Sick?"

This article, Mr. President, containing the forthright answers of Dr. Austin Smith, president of the Pharmaceutical Manufacturers Association, to the questions of the editors of Quest, is most helpful to a better understanding of the drug industry. I request therefore that it be included in the Appendix of the RECORD.

There being no objection, the article Was ordered to be printed in the RECORD, as follows:

DR. SMITH, SHOULD ANYBODY MAKE A PROFIT ON PEOPLE GETTING SICK?

With the cost of drugs making headlines, Quest interviewed Dr. Austin Smith, president of the Pharmaceutical Manufacturers Association, asking him about this emotioncharged subject. Here are our questions, and his answers:

"Question. Dr. Smith, should anybody make a profit on people getting sick?

"Answer. This seems to me a question of providing service, providing necessary service, not one of people profiteering on illness. You could just as well ask the question should one provide food for those who are hungry. They are necessary services, both of them-foods and drugs. Or housing, clothing.

"Question. Well then, Dr. Smith, when your own family is sick, do you enjoy buying

"Answer. I don't suppose anyone enjoys buying anything that represents something for which there is no pleasure. But I can say that I have never regretted buying drugs because I realize the life-saving value or the comfort-giving value of them.

"Question. What do people pay for drugs? "Answer. You can answer that in several

ways. First, the prescription that is bought today by the average person amounts to around \$3. About 60 percent of prescrip-tions cost \$3 or less; and 85 percent cost \$5 or less. About one in a hundred come to \$10 or more.

"Question. All right, then, how much of that \$3 average prescription represents pro-

"Answer. Of the \$3, the retailer gets about a dollar, the wholesaler, 45 cents, and the manufacturer, \$1.50. If he makes about 13 percent profit on a dollar and a half-which is the average for the drug industry—I think it is obvious that he isn't making very much money on a \$3 prescription drug item.

"If I remember correctly, the cost of drugs per person per day came to 5 cents in 1958. At the same time, food and tobacco came to \$1.31, transportation 54 cents, and recreation 27 cents. How many times have you heard people who drive cars complain about having to buy a couple of quarts of oil? They are spending far more for gasoline than they are for drugs. The average person doesn't have many prescriptions during a lifetime. Some have quite a few, some have none. When you take all these factors into consideration. I insist that we should be speaking about the low cost of drugs rather than talking of them as expensive.

"Question. Are drugs as big a part of the cost of health as they once were?

"Answer. No; the percentage of the dollar, the health dollar, that is devoted to drugs is steadily declining. The total number of dollars spent for drugs obviously is increasing because of the expanding population and be-cause of the frequency of individual illness, but the percentage of the medical care dollar spent on drugs is less, and is continuing to show a gradual decrease.

"Question. Can you compare drug costs to hospital costs? Is it hospital costs that

show a greater increase?

"Answer. Oh, yes; much more. Drugs have increased much less than have other forms of medical care-or the cost of living in general. The full impact, because of Blue Cross and Blue Shield, of hospital costs is not so obvious to the general public as the price of drugs.

"Question. But then, Dr. Smith, where do all these figures of 7,000-percent profits on

drugs come from?

"Answer. Such a 7,000-percent markup really has nothing to do with profits. figure you refer to was a markup over the basic chemical that was used in one drug, and doesn't take any other costs into account. You can take tapwater and make it suitable for injection into the body; theoreti-cally, you have a markup of several hundred thousand percent. But one firm's profit was actually 7.6 percent.

'Question. That's way below the average of 13 percent you mentioned, isn't it?

"Answer. Yes; but it is on just a single item. The figures for 1958 showed overall profit after taxes were less than 13 percent. Question. But on individual items the

profit can vary?

"Answer. Yes. Manufacturers may lose money on some items, they may make just percent on others, and they may make considerably more on a few when these drugs first become available. It's a common experience that the price will come down as production increases and as other factors come into the picture—and soon some better drug is put on the market.

'Question. But can't a maker protect his

profit by patenting his drug?

'Answer. Well, he can protect it, but he can't guarantee it. A patent doesn't necessarily guarantee a profit. In fact, many patents don't result in marketable products, so here there's no profit at all. About all you can say is that a patent gives you the hope of protecting an investment.

Question. Then don't you have the case of other manufacturers trying to get around

the patent, trying to find similar drugs that wouldn't be covered by the patent?

"Answer. Yes; in fact, that is one of the advantages of the patent system; it discloses enough about a new product to encourage competitors to develop something that is better or cheaper.

"Question. How many new drugs are

turned up in a year?

"Answer. Not very many. According to a study that was made in 1958, the drug industry produced and screened about 114,000 compounds that year. Of this 114,-000, only about 1,900 looked as though they might be worth clinical trial. And when clinical tests of these are through, possibly between 40 and 60 will eventually appear on the pharmacist's shelves for use by the doc-It has been estimated by some economists in the industry that 1 out of 7 marketed products is profitable, so that means that if 1 drug in 2,900 pans out, 1 in about 20,000 is profitable.

'Question. Now this figure of 114,000 new drugs in 1958, would the number be about

the same for 1959?

"Answer. I can't tell you; 1958 is the only year such a study has yet been made in this area. I would be willing to hazard a guess there would be as many or more.

"Question. Could you compare it, say, to 1939? Were many new compounds studied

"Answer. Oh, no. Obviously not. The de-velopment of the so-called modern drug therapy or chemotherapy is essentially a post-World War II development. While the sulfonamides and antibiotics were developed for armed service use during the war, the application of these lifesaving drugs for the public came after the war.

"Question. Where were these modern drugs

discovered?

"Answer. I don't have that figure offhand, but I do know that on basis of a study com-pleted for 1959, out of 60 new products that were introduced in the United States, 43 were discovered in this country.

"Question. What country came next?

"Answer. I don't know. I would suspect France, but I don't know. It could be the Scandinavian countries, England, Switzerland, Germany, or France.

"Question. Now, take one of the drugs that was developed abroad. Would it sell for less in the country where it was discovered?

"Answer. Probably. In general, if you check the per capita income or the average hourly wage of people in these other countries and compare it to the same figure for the U.S. citizen, you will find about the same ratio on drug prices abroad to drug prices here. Where the average hourly wage is lower, the same drug can be made more cheaply. This also means that the cost of distribution would be somewhat less.

"Question. But then could a drug produced in some other country be sold here for the

price it is overseas?

"Answer. There is a problem to that. The Food and Drug Administration does not recognize tests made overseas. What usually happens is that a U.S. manufacturer learns about a drug discovered elsewhere, and he arranges to make it available in this country. Once he has conducted his own tests, he makes the drug in his own plant and markets it. These tests-like those on all products-are to check safety, usefulness and, of course, quality.

"Question. How does the cost of these quality control tests compare to the actual manufacturing cost?

"Answer. They represent considerable investment. For example, a fairly well known firm opened up a new control laboratory for This control his plant a few months ago. laboratory cost about \$2 million. In it is about a million dollars worth of equipment, and it will cost about a million dollars per year to keep it going-just so he can test his products to make sure they meet all the

requirements that are necessary.

"Another way of looking at this is to consider the number of tests that go into the control of simple things like a tranquilizer or an aspirin preparation, or of a steroid hormone. I asked three firms, three differ-ent firms, to type a list of the number of steps that would be involved. The company that makes an aspirin preparation, a simple aspirin that is sold to physicians, gave me a list of steps which required six sheets of 8½ by 11 paper. The manufac-turer of the tranquilizer gave 10 sheets. The manufacturer of the steroid said he couldn't do it. It would have taken 1,000 sheets.

"Question. You mentioned steroids. Aren't these the products that old people

often need a lot of?

"Answer. Well, the industry has a number of studies underway at this time. One is a study of the drug needs that exist in the United States, with particular reference to old-age groups and low economic income groups. These individuals do have special needs—but their needs are not just confined to drugs. They have special requirements for food, rent, utilities, too.

"Question. Then what about the welfare people in Connecticut? Were they wise to advise the use of generic-named drugs, rather

than of trade-named drugs?
"Answer. I don't think, in general, you could save too much without running a risk of drug substitution-with somebody other than the physician determining what kind of a drug reaches the patient, which means that inferior quality drugs might be purchased.

"Question. How do the brand-name and generic-name drugs compare as to price and quality?

"Answer. In general, with the exception of a few percent, there isn't much price difference between the trade name products and the generic name products that are made available at the well-known pharmaceutical houses. There are some manufac-turers that will make available a cheaper brand of drug. But these are not necessarily marketed with the same controls that the better houses provide to insure product quality.

"Question. A few months ago, a major magazine said patients should pressure their doctors into prescribing the lower cost drugs. What do you think of that?

"Answer. Physicians prescribe the drug that they think is best suited to the patient's needs. I am sure that what the doctor has in mind when he prescribes a drug is the best interest of the patient in every respect. He obviously wants an effective drug, a drug he can depend on, and he is becoming increasingly aware of the cost of drugs so I am sure that the proper approach is not the patient telling the doctor what to prescribe, but the patient having faith in what the doctor does prescribe."

## The Best Naval Reserve Unit in the Country

EXTENSION OF REMARKS OF

## HON. ALBERT H. BOSCH

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. BOSCH. Mr. Speaker, last year it was my pleasant duty to attend the ceremonies awarding the coveted Forrestal home county of Queens. This trophy is awarded to the best Naval Reserve surface division out of the more than 300 throughout the country. These Reserve units are judged on the basis of achievement in the following areas: on-board strength, attendance at drills, active duty for training, petty officer participation and advancement in rating. The unit with the highest cumulative score wins the trophy.

I have just been advised that the same unit, Surface Division 3-77, has accomplished the singular achievement of winning this award again this year and, as Vice Adm. Charles Wellborn, Jr., said in his telegram of congratulations:

It is hard to reach the top position but in this program, it is harder to repeat the performance.

In further recognition, the Chief of Naval Operations, Adm. Arleigh A. Burke, said in a telegram to the division:

By repeating your 1959 performance you have become the first division ever to win the James V. Forrestal trophy twice. My heartiest congratulations to each member of your Surface Division 3-77 for your sustained outstanding record.

The U.S. Naval Reserve Training Center at Whitestone comprises two surface divisions, 3-77 and 3-76; a CB Division 3-17; a Naval Security Group 3-1; CED Company 3-42; Ship Activation Maintenance and Repair Division 3-3. It is also the home of the Reserve crew for the U.S.S. Harris. These units afford training for approximately 800 men and offi-cers. The commanding officer of this important naval training center, Comdr. Robert J. Stankowski, who now has to his credit two winners in 2 consecutive years. also should be commended for bringing in his CB Division 3-17 in third place this year in national competition, and for the fifth-place spot that was awarded to Naval Security Group Division 3-1. Such accomplishment could only be achieved by deep and sincere dedication and devotion to the cause of the Navy, unceasing work, and intelligent leadership-my hat is off to him.

No less honors should go to Comdr. A. D. Oder, commanding officer of Battalion 3-22, who commanded Surface Division 3-77 during the period of its Forrestal winning competition last year, and who has since understandably been promoted to the command of the entire battalion.

The commanding officer of the winning Division 3-77 is Lt. Comdr. Prentice Cushing, Jr., of Douglaston, Queens, who guided his division to victory in grueling competition, and who has demonstrated the ability to keep a top team in topflight

It is indeed gratifying to me to know that the Navy has an active, vigorous training program. I am glad also that the best Reserve unit in the entire country is in my own county of Queens. I hope that the Whitestone Training Center will continue to be the finest and it is my hope that the Department of the Navy will give appropriate recognition to these splendid officers.

trophy to a unit of the Naval Reserve Words Nullified by Deeds—A Look at the Training Center at Whitestone, in my Administration's Middle East Poli-

EXTENSION OF REMARKS

OF

## HON. ERNEST GRUENING

IN THE SENATE OF THE UNITED STATES Thursday, September 1, 1960

Mr. GRUENING. Mr. President, I ask unanimous consent that there be printed in the Congressional Record a statement which I have prepared on the administration's Middle East policies.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR GRUENING

Almost 4 years ago, on November 2, 1956. Vice President Nixon stated: "There can be no double standard of conduct in international affairs."

On June 26, 1958, in soothing the fears of party officials concerning the effects on their political fortunes of the Sherman Adams affair, Vice President Nixon stated: "The

public memory is short."

Probably in no other aspect of its administration of public affairs does the Eisenhower-Nixon administration hope that the public memory will be shorter than with respect to its double standard of conduct in the Middle East-of its words nullified by its deeds.

President Truman acted to give U.S. recognition to Israel as a sovereign state in May 1948. The United States was the first nation

in the world to take this step.

President Truman acted promptly and decisively and adopted a policy of support and friendship for the new Republic of Israel because he was a realist facing up to pertinent and deeply significant facts.

For the fact was that Israel, with a land area of only 7,800 square miles and a population of \$650,000, was the only true domocracy in the Middle East.

The fact was that its people were free people and its political institutions founded on America's own cherished principle of government by consent of the governed.

The fact was that it was an oasis of civilization in a desert of backwardness, an oasis surrounded by dictatorships controlling areas and populations many times greater than those of Israel and ruling them without regard to individual rights or free-

The fact was, and has increasingly become. that this long savagely persecuted people, with unprecedented effort, dedication and determination and in the face of incredible obstacles, were converting this tiny arid sliver of earth into a civilized homeland blooming with agriculture, flourishing with small industries and setting up in that long stagnant backwater of the world new high standards of education, health, and welfare.

The fact was that if peace was to come to that troubled area of the world, the example of democracy, working and progressing, that was Israel, must be encouraged and maintained, an example to shine as a beacon to lead the neighboring backward and oppressed peoples to better living standards and greater freedom. Clearly, while the feudal Arab chieftains had no interest in the greater emancipation of their own peo-ple, how obviously desirable was such a policy for the United States to proclaim and

But instead, the Eisenhower-Nixon administration, while occasionally professing sympathy with the aims and aspirations of

Israel, has acted to the contrary.

There was the administration's buildup of the prestige and power of the Arab nations without an equal effort to maintain the status and strength of Israel as the democratic outpost in the Middle East-the symbolic gift of a pistol to General Naguib, Nasser's predecessor—the invitations to heads of state of the Arab nations, quickly offered and readily accepted—the economic aid granted without regard to whether it would merely intrench the feudal rulers or benefit their people.

There was the policy of impartiality in which the Eisenhower-Nixon administration, professedly dedicated to peace, studiously overlooked the fact that the Arab nations were proclaiming unabashedly that they were at war with Israel and were united in the purpose to achieve Israel's destruction and the extermination of its people. It was a policy almost tantamount to a declaration that the United States would look the other way while Israel's neighbors undertook its annihilation.

There was the pressure on the British by the United States to give up the Suez Canal, Without a commitment from Egypt guaranteeing free transit for the trade of all nations.

There was the disavowal of the tripartite agreement under which the boundaries of Israel were guaranteed and the United France, and Great Britain were pledged to prevent any change in the relative armed strength of the countries of the Middle East.

There was the persistent refusal of the Eisenhower-Nixon administration to supply arms to Israel to meet the ever-growing imbalance in armed strength between Israel and her hostile neighbors due in great measure to the fact that Soviet Russia, recognizing the vacuum left by the disavowal of the tripartite agreement, was hastening to make Egypt an armed camp.

There was the heightening tension between Israel and its Arab neighbors because of the hit and run raids of Egyptian fadayeem units into Israel's territory resulting in 364 Israeli wounded and 101 killed in the course of 1,843 cases of armed robbery and theft, 1,339 cases of armed clashes, and 172 cases of sabotage, all on Israeli soil—with Israel's continued unheeded protests to the United Nations, none of which resulted in the application of any effective sanctions against the Arab nations.

There was the continued and mounting blockade of the Suez Canal by Egypt against shipping to and from Israel regardless of the flag flown by the vessel carrying the Israeli goods and the reaching into the cities of the United States by the Arab nations to enforce the blockade by requiring American firms doing business in Arab countries to discriminate against employees of the Jewish race, even in their offices in the United

Then came the Aswan Dam fiasco. First the Eisenhower-Nixon administration promised financial aid to Nasser for the construction of the dam. Then, suddenly, for reasons never adequately explained the admin-istration withdrew its offer. Nasser promptly retaliated by seizing the Suez Canal. At that time, Nasser assured the world that there would be free and open transit through the canal without discrimination, overt or covert; this covers both political and technical aspects. Further, Nasser promised that the operation of the canal should be insulated from the policies of any country.

These promises were not kept

The blockade of the Suez Canal continued. The raids by the Egyptians, urged by the propaganda machinery of the United Arab

Republic, were stepped up. Finally, in October 1956, in desperation Israell troops marched into neighboring areas to seize the enemy's operating bases.

It was then that the Eisenhower-Nixon administration, after ignoring for years the warning signs of danger in the increasing tempo of Egyptian raids across Israeli bor-ders, the blockage of the Suez Canal, which was slowly cutting off Israel's economic lifeline, and Israel's repeated but unavailing appeals to the United Nations, moved against its traditional friends and allies, Britain and France, and against the only democratic nation in the Middle East, Israel.

Ambassador Lodge, on behalf of the United States, called for a meeting of the United Nations Security Council to consider a resolution of the United States. That proposed resolution, introduced by the United States in anger at Israel's action to prevent further marauding attacks, not only demanded that Israel withdraw, but called upon all members of the United Nations "to refrain from giving any military, economic, or financial assistance to Israel so long as it has not complied with this resolution."

A taut world then witnessed a curious voting pattern in the United Nations. On that resolution the United States and Soviet Russia voted for the imposition of sanctions against Israel-a strange bed fellowship that Henry Cabot Lodge had wrought for the United States-while France and Great Britain voted against such action.

And the next day-on a Soviet resolution calling merely for a cease fire and for Israeli withdrawal-the United States abstained from voting because, as Ambassador Lodge explained it, he could not vote for a resolution which did not contain the sanctions against Israel which he had first proposed. (He is the man whom Presidential Candidate Nixon now proposes to send to the Middle East to straighten out its difficulties.)

It was at that point that Vice President Nixon treated our break with our traditional allies-France and Great Britain-as an accomplishment rather than a setback. He stated:

"For the first time in history [as a result of the Suez crisis], we have shown inde-pendence of Anglo-French policies toward Asia and Africa which seemed to us to reflect the colonial tradition. That declaration of independence has had an electrifying effect throughout the world."

The electrifying effect upon the world was closer to dismay than to rejoicing.

In pressing for the withdrawal of Israeli troops, President Eisenhower himself appeared before a nationwide television audience and made the solemn pledge that if the Suez Canal were blockaded in the future such action "would be dealt with firmly by the family of nations."

Israel withdrew its troops. It relinquished the fruits of its brilliant triumph on the field

But Nasser, emboldened by what, after a crushing military defeat, had become, thanks to the U.S. action before the U.N., a clearcut victory, tightened the noose around Israel's economic existence by stringently enforcing his ban against all ships dealing with Israel using the Suez Canal.

In December 1959, despite strong congres sional protests, the International Bank for Reconstruction and Development made a loan of \$56 million to Nasser to widen and deepen the Suez Canal.

No quid pro quo, no conditions relating to freedom of transit, were requested or exacted from the United Arab Republic in exchange for this munificent financial and moral support.

This loan was granted at almost the precise moment when a Danish and a Greek ship were being detained at Port Said because they were involved in trade with Israel—at exactly the hour when Egypt was publicly and defiantly repudiating its pledge of "free and open transit through the canal without discrimination, overt or covert," and was acting in violation of President Eisenhower's proclaimed commitment.

It should be noted that all the U.S. representatives on the International Bank voted for this loan. The president, the three vice presidents and the treasurer of the Bank are all American citizens. The United States controls 32 percent of the voting strength of the Bank. With European nations interested in preserving free transit through the Suez Canal, the United States controls over 50 percent of the Bank's vote. A simple word from the White House to the Bank's officialdom indicating that it was the policy of the United States not to grant such a loan without a commitment on the part of the Egyptian Government to allow freedom of passage to ships of all nations, would have been accepted and acted upon by the U.S. officials at least and would, undoubtedly, have prevailed with the other board members.

Either the commitment to allow freedom of transit would have been made, or the loan

would not have been made.

The promise of President Eisenhower that any action to blockade the Suez would be "dealt with firmly by the family of nations" was nullified by the action of the International Bank, with the United States having almost one-third of the votes, in granting the \$56 million loan without even an attempt to secure a commitment for the free passage of all ships. A negative vote by the United States—and the Bank—until and unless there was an assurance of free transit through the canal would have been understood-an affirmative vote for the loan cannot be understood except in terms that the Eisenhower-Nixon administration does mean what it says about championing freedom of transit through the Suez Canal.

This action is in marked contrast to the following high-sounding words recently uttered by Vice President NIXON in reply to an inquiry from President Label A. Katz of B'nai B'rith:

"I believe that we must continue to press for the effective implementation of the principle of freedom of the seas and free access to international waterways, and the protection of the interests of American seamen and shipping now being discriminated against by the Arab boycott and blacklisting policy."

It seems obvious that the United States, by not matching its deeds to its words, has continued and aggravated the tension in the Middle East.

The question of freedom of transit through the Suez Canal was considered by Congress this year in connection with the pasage of the Mutual Security Act Amendments of 1960.

Senator PAUL DOUGLAS, of Illinois, proposed an amendment to the bill to the effect that it was the sense of the Congress that assistance under the Mutual Security Act be administered so as to give effect to the principles that the United States favors freedom of navigation in international waterways and economic cooperation between recipient nations.

This provision was bitterly fought by the administration in the Senate. The amendment was adopted by a vote of 45 to 25 with 77 percent of the Democrats voting for it and 60 percent of the Republicans voting against it. Both Senator Kennepy and Senator Johnson voted for the amendment.

Senator Johnson's motion to table a motion to reconsider the vote carried by a vote of 40 to 29 with 73 percent of the Democrats voting for it and 71 percent of the Republicans voting against it. Actually the amendment carried with it no compulsion since it gave the President discretion to follow or not to follow the Senate's recommendation to use economic aid as a lever to enforce free-dom of navigation. Since that time it has become clear that the Eisenhower-Nixon administration has disregarded the Senate's suggested policy.

Indeed, the administration's strong reac-

tion against conditioning foreign aid upon

adherence to the principle of freedom of transit through international waters is in marked contrast to its insistence in October 1956, in the United Nations that all member nations withdraw economic aid to Israel.

Four years ago—and about 2 weeks before Israeli troops marched to capture neighboring Egyptian bases from which the murderous raids on Israel had been launched, and Ambassador Lodge asked the Security Council to impose economic sanctions against Israel, Vice President Nixon said:

"As an example, President Eisenhower's patient yet firm leadership in the crises that developed over the Suez Canal is making itself felt throughout a tense world today. I can report to you that we are making headway in this difficult matter; we have kept the peace; and it appears that Mr. Eisenhower's tolerance and wisdom and leadership will serve to avert armed conflict in that part of the globe."

But these high-sounding words have been nullified by the actions of the Eisenhower-Nixon administration since taking office.

They have been nullified by:

U.S. pressure upon Great Britain to withdraw from the Suez Canal without receiving assurances from Egypt as to free transit of the canal.

Denial of arms to Israel while arming Saudi Arabia and while Communist Russia was arming Egypt.

Ignoring the increased tempo of Egyptian raids upon Israel.

The consistence of Ambassador Lodge of the imposition of sanctions upon Israel.

The vote by the U.S. members of the International Bank in favor of a loan to Egypt for the Suez Canal without the receipt of assurances that there would be free transit.

The strong fight by the Eisenhower-Nixon administration against the adoption of an amendment by the Congress expressing its opinion that economic aid should not be granted to nations which did not honor their commitments regarding freedom of transit in international waters.

The Eisenhower-Nixon record must be judged not by its words but by its deeds, and by the wide gap that exists between promise and performance.

As Senator Kennedy has said in referring to the mutual security amendment that gives the President the power to crack down on the violators of freedom of navigation if he chooses to use it:

"If America's word to the world is to have any meaning, if the decisions and resolutions of the United Nations are to be binding on all parties, if the mutual security amendment which I cosponsored with Senator Paul H. Douglas is to have meaning, if the clean, thoughtful language of the Democratic platform is to have meaning—the influence of this Nation and other maritime powers must be brought to bear on a just solution that removes all discrimination from the Suez Canal."

For the past 7½ years that "influence of this Nation" has conspicuously not been brought to bear.

### Analysis of Our Atomic Aircraft

EXTENSION OF REMARKS

## HON. WILLIAM E. MINSHALL

OF OHIO

IN THE HOUSE OF REPRESENTATIVES Thursday, September 1, 1960

Mr. MINSHALL. Mr. Speaker, in our complex Defense Establishment, it is often difficult for the average citizen to

keep abreast of constantly changing techniques and developments. Mr. Lowell K. Bridwell, distinguished Scripps-Howard reporter, who represents my hometown paper, the Cleveland Press, has performed yeoman service in bringing to his readers a graphic description of development of the B-70 engine. His article follows:

### Analysis of Our Atomic Aircraft (By Lowell K. Bridwell)

IDAHO FALLS, IDAHO.—The red warning light blinked ominously, but the familiar ear-splitting scream of twin jet engines was muffled to a gentle whine.

These were the only above-ground signs that a group of General Electric Co. scientists and engineers were operating a nuclear powerplant capable of flying a plane:

But they were just tests—such as have been

But they were just tests—such as have bee going on in various forms for 3½ years.

The heat-producing nuclear reactor, connected to two jet engines by a steel tubing and mounted on a specially designed platform, is tested in a movable aluminum-skinned building. The jet exhausts are connected to a long tunnel which empties into a huge smokestack similar to those seen on powerplants. But this is just the surface.

Below ground, thick-walled rooms house scientists, technicians, instruments, and intricate wiring. These instruments, coupled to the nuclear powerplant, tell the scientists how every part is functioning.

This clumsy power package was never designed, of course, to be put in a plane.

Yet GE scientists have operated it continuously for 65 hours at temperatures believed to be over 2000°

be over 2,000°.

Dr. J. W. Morfitt, GE's Idaho test station manager, suggested the "engine" could have gone on for many more hours. The 2,000-plus temperature is substantially higher than will be needed for "chemical fuel" engines for the B-70 which still is on the drawing boards.

The B-70 engines, also to be built by GE, will be able to handle a much greater volume of air, however, and therefore produce more thrust than the infant nuclear jets.

"The volume of air we can handle is a real problem," said Brig. Gen. Irving L. Branch, aircraft nuclear-propulsion chief. The higher the heat and the greater the volume of air pushed through a jet, the more thrust it will produce.

That's the reason, Branch said, the present metal core nuclear reactors are to be replaced with ceramic core reactors.

GE scientists and AEC officials already have tested large components of a ceramic core reactor and found them satisfactory.

A ceramic core reactor, to provide the necessary heat, may be used in both GE's direct cycle system and Pratt & Whitney's indirect cycle. But it is more important to the GE method.

A regular jet engine takes in outside air through its front scoop, compresses it and then releases it into a combustion chamber where jet fuel is burned. The heated and expanded air is then released through a turbine and out the exhaust, producing thrust.

In GE's engine, the nuclear reactor merely will replace the combustion chamber and the air will be heated and expanded as it passes through the reactor.

In Pratt & Whitney's powerplant, the nuclear reactor will be used to heat liquid metal which then will be pumped through pipes to a radiator. The air will be heated and expanded as it passes through the radiator.

Branch says the indirect cycle has the potential of producing as much thrust as GE's powerplant, but will weigh less. He conceded, however, that all the special tubing, pumps, valves, and other equipment in the Pratt and Whitney system become a "plumber's nightmare."

Regardless of which system is selected, according to General Branch, the actual jet engine presents no problem. GE already is working on a new model which will be even larger than the one designed to go into the B-70.

Discovering relatively light shielding for the reactors to protect the plane and ground crew from harmful radiation effects once was one of the major drawbacks to nuclear aircraft propulsions. This problem also has been largely licked, Branch says.

Summer Rebellion: It Aims at Releasing the Brake Instead of Applying Pressure

EXTENSION OF REMARKS

## HON. HARRISON A. WILLIAMS, JR.

OF NEW JERSEY

IN THE SENATE OF THE UNITED STATES
Thursday, September 1, 1960

Mr. WILLIAMS of New Jersey. Mr. President, teachers in the United States have demonstrated time and time again that, when freed from the pressures of overcrowded classrooms and routine duties, they will draw upon their imaginations and resourcefulness to develop active interest and intellectual accomplishments among their students.

An article by Fred M. Hechinger in the August 14 issue of the New York Times demonstrates this fact anew. Although he writes about experimental projects, he clearly shows that student response can reach new heights when new efforts are made.

Mr. President, at a time when many citizens are searching for ways to make our educational process even more productive than it is now, Mr. Hechinger's article has special significance. I ask unanimous consent to have it reprinted in the CONGRESSIONAL RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

SUMMER REBELLION: IT AIMS AT RELEASING THE BRAKE INSTEAD OF APPLYING PRESSURE

(By Fred M. Hechinger)

Summer school, 1960, may go down in history as the proving ground for the educational revolution. Its slogan could be: "Never again underestimate the power of the student's mind."

Nobody will ever know how many separate and independent experimental programs of learning were carried out this summer, but the great majority appear to have had one common aim; to forget what the rulebooks say about how much or how little a student at a given age can absorb.

Here are some unorthodox experiments, each an attempt to break out of the strait-jacket of routine school organization:

1. Elementary school age: Last week, the first season of Science & Arts Camps, Inc., in Fairfield County, Conn., came to a close. On the day before commencement, 6 weeks after the opening session at the Darien High School, an 11-year-old boy was heard discussing his summer study of Aristotle's views on politics. Most of the 216 children were able to speak and understand simple Russian phrases and manage the Russian alphabet. At least one boy, who had always considered fifth-grade mathematics a necessary evil, had revised his scholarly estimate radically

enough to make mathematics his favorite subject. Everyone of the grade-school children had found daily work at writing and art compatible not only with mathematics and science but with outdoor fun and summer games.

SUPPORT ENLISTED

The SAAC program, born of an idea by Dr. Hertzel Fishman, past chairman of the Fellowship of Ministers in Greenwich, Conn., has enlisted the cooperation of seven school districts in Pairfield County and enrolled children from public, private, and parochial schools in a combination of day-camp and academic adventure.

The children, 9- to 11-year-olds, from fourth to sixth grade, came with IQ's ranging from 118 to 185. Most of the "master counselors" were outstanding teachers, some imported from other school systems. They were assisted by selected college students and talented high school seniors and juniors. Several high school principals took part in the direction.

Every youngster spent large blocks of time each week at science, communications (writing, debate, and discussion), Russian, art, and mathematical concepts and theory. During up to 2 hours of a 6-hour day, the children had free time in which they carried on their favorite subjects on their own.

#### SCHOLARSHIP AID

Tuition was \$180 per child, but 30 students received scholarship aid. Included in the summer fee is the promise of a year-round followup program in which teachers, school administrators, and community volunteers will cooperate to offer the students continuing after school instruction. About 60 of the group have already been selected for continued Russian study.

Dr. Stanley Lorenzen, principal of Westport's Staples High School and one of the SAAC directors, said the experience showed children ready to do far more advanced work than is generally expected of them. He thinks this may influence the regular school

2. Special high school courses: The movement to make summer high school instruction something better than just an extension of the regular school program now is in its second or third year. A typical course which only a few years ago would have been considered radical, is a special offering in humanities at Long Beach (N.Y.) High School. It includes art, music, literature and a study of politics, Along with a great deal of reading and extensive writing, students take carefully guided trips to museums, to foreign consulates and to special exhibits. They comment on their findings not only in words but in the medium natural to their talents—painting, satirical sketches, or poetry.

In a different approach, the first group, 50 selected high school science students spent 6 weeks at the National Youth Science Center, temporarily established this year on the Nasson College campus in Springvale, Maine, but to be moved next year to "Science Island," the abandoned site of Fort Levett.

Alded by a National Science Foundation grant, this program, too, has freed students from the administrator's time chart. Robert Matlin, a Jamaica (N.Y.) High School student, said last week: "This has been great. All these hours at a stretch, without any bells forcing you to another class, really helps you make progress."

### GIFTED STUDENTS

On a nationwide basis, gifted high school science students this year are taking college-level work at 137 college centers across the country.

3. College "infiltration": Another summer success story is the record established by high school students on college campuses, alongside full-fledged college students. In each instance, the high school students constituted a small minority, attended classes "incognito," with the instructors often unaware of their lowly position on the academic ladder.

At Trinity College in Hartford, Conn., where a small-scale tryout of the idea was quietly run last summer, this year 32 high school students who were only juniors last term surprised college officials: last week's final reports showed that 18 ranked fourth or higher in their courses. In three courses, the high school juniors took top rank away from their college elders.

At Columbia, the enrollment included 36 high school students of whom 3 had been only sophomores last year. The rest were juniors. Thirty-five of them are reported doing "very well." The youngest student, who was 15 in February, is successfully taking a graduate university course in mathematics.

Obviously, these examples of ferment in summer school only skim the surface of hundreds of similar experiments across the country. The details are not nearly as important as the trend. All of these approaches have in common the assumption that the students' minds are capable of great effort and achievement—far greater than outlined in the usual syllabus.

All of them show that many youngsters not merely the few exceptional ones in the "genius" class—are not operating at full steam in their regular school work and respond with enthusiasm when their interest and imagination are aroused.

All of them stress that the key to a really successful education program is the superior teacher, free to impart his own strength, rather than a standardized routine. This unfortunately also underlines the difficulty of translating summer success into everyday progress.

All of them benefit from far greater freedom from public pressures and bureaucratic blueprints since they are "voluntary" and proceed with the consent of teachers and students.

Whatever the difficulties of mass-education may be, there is an inevitable moral in a group of elementary school children at Darien asking permission to finish a math problem before joining a square dance. There is a lesson in Fairfield summer school students asking to be allowed extra time to finish their artwork after class. There is an educational meaning in a mother's remark: "For the first time our girl wasn't afraid of being too good."

The secret was not in applying pressure but in releasing the brakes.

It would be foolish to expect that the summer skirmishes are going to make an immediate, radical difference on the broad, entrenched education front. But it is fair to suggest that, after this summer, many schools will never be quite the same again.

## Report to the People of the Ninth Congressional District of Indiana

EXTENSION OF REMARKS

OF

## HON. EARL HOGAN

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES Thursday, September 1, 1960

Mr. HOGAN. Mr. Speaker, I have had the honor and privilege of representing the people of the 9th Congressional District of Indiana in this 86th Congress and I believe it is an obligation of a Member of the Congress to report to the people he represents. The duties of a Representatives are many and varied, but generally fall in three categories. First, it is his responsibility to legislate; second, he must serve the needs and requirements of his constituency; and third, he must act as a clearinghouse for the opinions and views of those he represents on legislative and administrative matters.

My devotion to these three responsibilities has been clearly demonstrated. I have been present at more than 98 percent of all quorum calls and votes T have had the honor to serve on the Agriculture Committee charged with the responsibility for legislation pertaining to our plaguing farm problems. Because Congress does much of its work in committees, attendance at committee meetings is important. In committee meetings witnesses are heard: Members work with the professional staff on research and background information pertinent to legislation being deliberated upon before it comes to the floor of the House. My agricultural background has been an invaluable asset and, I believe, an aid to the work of the committee during my tenure, reflecting credit to the Ninth District

Endeavoring to serve my constituency I traveled the entire 14 counties comprising the Ninth District on three different scheduled tours to conveniently afford all an opportunity to personally discuss any matter with me. Correspondence has been carefully and expeditiously answered. Gratifying results have been forthcoming from social security, veterans, and other cases which have had my personal attention.

The first session, which ended on September 15, 1959, was the longest peacetime session in 37 years, adjourning immediately before Khrushchev was about to arrive in Washington for what was to have been an exchange visit with our President.

History will record that this Congress has worked under extremely difficult circumstances to draft laws which would best meet the urgent needs of the American people and survive the threat of a veto. The President's veto threat hung ominously over the Congress throughout its deliberations and was often used to cut the substance from worthwhile measures.

The record of the 86th Congress will show also, that contrary to the President's prediction that the 86th Congress would engage in a cold war of partisan politics, on a number of issues important to our Nation, the President received more support from the Democrats in Congress than he did from the members of his own political party. A number of needed and constructive Democraticsponsored bills, however, were either vetoed or stopped by threat of veto. Included were proposals to advance a solution to the problem of chronic unemployment and economically depressed areas, to promote home ownership and stimulate lagging home construction, to clean up the polluted water of our Nation, to provide adequately for the needs of our elder citizens-all affecting the human needs of our Nation.

The 2d session of the 86th Congress began on January 6, 1960, and ended

September 2, 1960.

Although veto in the 1st session of the 86th Congress delayed flood control by a year, funds for the beginning of flood control activity for the Whitewater River, Franklin and Dearborn Counties, has been secured in 2d session action. The French Lick Creek watershed project received approval also in the second session. It is encouraging to look forward to giving a helping hand to other areas in their development of watershed projects.

The towns of Napoleon and Sunman were aided by Federal grants-in-aid for sewage projects. The President's veto of the water pollution control legislation adversely affects half-dozen Ninth Dis-

trict towns needing assistance.

The veto of the wheat bill last spring was topped only by the tobacco price stabilization veto. The second session saw the tobacco bill pushed through to a successful conclusion. Wheat legislation, however, passed in the Senate during the second session, was not acted upon in the House.

The depressed area development legislation would have benefited areas in Indiana. The veto action will retard development of needed assistance on a loan and grant basis to help fellow Americans

get on their feet.

Much has been said about the Federal budget. Of over \$77 billion expenditures in fiscal year 1960, almost \$42 billion was spent for national defense, \$31/2 billion for foreign aid which related to the national security, \$21/2 billion for atomic energy development and research, \$51/2 billion for the cost of services to veterans, present, past, and future. In addition, \$9.2 billion was spent in fiscal 1960 to pay interest on the Federal debt which interest payment has almost doubled from \$5.8 billion in 1952 because of administration policies favoring a hard-money policy with higher interest rates to lenders.

With the addition of \$51/2 billion on the farm support program, slightly over \$10 billion remained for all of the other important functions of the Federal Government-including its criticized welfare

programs.

Amendments were made to the Social Security Act by this Congress. A program of Federal grants to the States for medical care for the low income and aged was approved. The earning restriction was relaxed and the disability age requirement was dropped.

The Railroad Retirement Act was revised, increasing benefits to retired employees; Congress also extended the benefits of temporary unemployment compensation for 3 months in States

whose payments had expired.

Veterans legislation was vigorously pursued in the 86th Congress. Twentyeight public bills were enacted directly affecting the veteran and his family.

Requested increases in gasoline tax, postal rates, and interest rates on commercial bonds were denied by Congress.

A slight increase in interest rates on series E and H bonds that individuals can own, was granted.

The Federal aid to education through school construction passed by both the House and the Senate, died with adjournment as the House Rules Committee refused to let the legislation go to a final conference

A 5-year extension of the Library Services Act, providing matching funds to States for the extension and establishment of public library service in rural communities was passed. Although the State of Indiana has not taken advantage of this program in the past, future administrations can look forwad to the opportunity.

Labor abuse legislation was enacted in the first session and civil rights received consideration. The second civil rights law in almost 100 years was passed, involving voting rights. Federal employees were given an increase in pay, overriding a Presidential veto, and the opportunity to participate in a health insurance plan.

Hawaii was admitted to the Union by

an act of the 86th Congress.

Suspension of the Federal Communications Act equal time requirement so that the 1960 presidential and vice presidential candidates can stage TV-radio debates without obliging broadcasting networks to give corresponding time to fringe-party nominees for those offices, was legislated.

In international affairs, the Congress again appropriated \$3.5 billion in the first session and \$3.7 billion in the second session for the mutual security program. I voted against the bill in both sessions. I do not feel that the vast appropriations being made year after year can go on indefinitely while we preach economy in our domestic appropriations. The entire program must be overhauled and the excessive waste and extravagance pruned.

Our foreign affairs are governed by policies of the President which he in turn requests Congress to implement. events of the year 1960 are world shaking and have produced crises which may well mark the course of civilization. We have learned that no one nation can stand alone in our world today. The most challenging task for the next administration is the reestablishment of a sound moral foreign policy and a sound U.S. economy policy.

Many other bills have become law in the 86th Congress. Some bills which I believe were worthy did not pass and a good many that were not worthy did not pass. Certainly, this Congress has worked far more days than most Congresses. Each and every piece of legislation considered was given my close study and conscientious vote.

Inquiries are most welcome at all times. I have done my best to be responsive to the needs and opinions of the residents of the Ninth District and to discharge my responsibility as a Representative in the U.S. Congress in a manner that reflects credit and honor to those I am privileged to represent.

The Late Honorable Usher Burdick

EXTENSION OF REMARKS OF

## HON. PHILIP J. PHILBIN

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. PHILBIN. Mr. Speaker. I am most deeply touched by the passing of my very dear and cherished friend, Hon. Usher Burdick, for many years an outstanding Member of this body.

Anything I might say about the sterling qualities, high character, superlative ability, lofty patriotism, and magnificent contributions of this great American would be most inadequate fittingly to portray one of the noblest men I have ever known.

As the Members of this House who have served with him will testify, Usher Burdick was unique. When the good Lord created him, He broke the mold. There never could be another like him.

Usher Burdick was as many sided in his interests as Benjamin Franklin, as versatile in his talents and gifts as the great Thomas Jefferson, but he had the spark of life, the elan vital about him that was seemingly without parallel. His understanding and love of humanity was deep; his friends were bound to him with hoops of steel.

Patriot of the highest order, steeped in the richest traditions of the Nation, loyal Americanism was a part of his very being. It was well illustrated in a letter he sent me just a few days before he passed "to that land from whose bourne no traveler ever returns." He wrote:

This is the land of my ancestors, the land I have been devoted to for many years. It is a great land of freedom and I propose with all my heart to fight against its enemies whoever and wherever they may be. I will do anything to preserve our U.S. institutions, including our capitalistic system which the Communists are dedicated to destroy.

It is a demonstrated fact that there never could be a better, a finer or nobler American than Usher Burdick. And there could never be a human being in this whole wide world more unselfishly devoted to his fellow man. His rich, varied and busy life was principally one of most unselfish service to his great State and Nation and the American people. His career was most distinguished and illustrious. He filled several high posts of most important governmental responsibility with outstanding distinction and universally acknowledged approbation.

Integrity was his precious badge of honor, an integrity as rugged and enduring and unsullied as the eternal hills of his beloved State. Intellectual honesty was his prized possession and he stood by his ideals and convictions with a tenacity and, at times, a ferocity that neutralized his enemies and inspired his friends and supporters.

A brilliant experienced lawyer, veteran of many courtroom battles, his mind was as sharp as a razor. In argument or debate he was a master of pointed satire, and a pervasive sense of humor often devastating to his opponents.

He never hesitated when he deemed it necessary to hit hard at his opponents, but he scrupulously avoided bitterness, bias or acrimony. Throughout his long illustrious career he exhibited and exemplified a spirit of tolerance, broadness, fairness and good sportsmanship for which he was noted in the House.

Possessed of a keen sense of humor, he was virtually without an equal as a raconteur who reveled when among his friends in recounting many humorous anecdotes in his long, busy, eventful life.

Outstanding All-American football star at Minnesota where he worked his way through college and law school, he was an instinctive sportsman and displayed deep interest in competitive games. He carried the high code of his athletic training into public life, hitting hard when the occasion required it, but always following the rules of a noble Christian gentleman and a true sportsman

While he devoted himself to helping all the people, he had a special interest in and sincerely felt compassion and love for the American Indian. Lifelong, effective friend of the Indian in and out of Congress, thoroughly schooled in Indian lore, customs and language, he fluently spoke several different Indian dialects.

In his last campaign just a short while ago when he successfully appealed to his former constituency of his great State in behalf of his distinguished and able son, Quentin, our former esteemed and beloved colleague in the House, and now U.S. Senator from the great State of North Dakota, Usher is said to have referred to some of the opposition as being so devious that "they had to sleep in round tents."

The election of his son, Senator Quentin Burdick, to the U.S. Senate was undoubtedly one of the great satisfactions of his illustrious career, the crowning glory and triumph of a lifetime devoted to unselfish service to the people. In truth and fact, his joy and happiness were so great that he broke his usual tacitum and ofttimes stoic front to express his complete gratification.

A few short weeks later, after he had lived to see his beloved son take his seat in the great Senate of the United States, he was called by his Creator to his eternal reward.

His passing came as the crashing of a great oak in the forest reverberating through the Capitol, through his State, and the Nation, and re-echoing again and again in so many places the depth of sorrow and grief that was felt by all upon the demise of such a great American.

Usher Burdick was a truly dedicated man, inflexibly and unalterably committed to great principles of government rather than to formal party organizations. His philosophy was primarily that which permeates the Constitution of the United States—liberty-loving, peaceloving, and devoted to forward-looking

policies responsive to the needs, aspirations, hopes, and welfare of the American people.

Usher Burdick wore no man's collar. Fiercely independent minded and individualistic, he was an implacable foe of social injustice, profundly interested in ordinary people whose well-being and betterment always came first with him.

He sprung from early American ancestry, from a rugged country and from hard pioneer life, where the going was always tough, where luxury and ease were unknown, but he trained his great mind and widened his naturally curious interests until he encompassed an unbelievably wide range of activities.

He was a farmer and a rancher, a successful breeder of beef cattle and thoroughbred Palamino horses. He had a flair for farm business, but eschewed sharp practices.

He was also a connoisseur of art, and books and documents and was as expert a binder as most professionals. His interest in books carried him to many places.

He was also a connoiseur of art, and he possessed at the time of his death some outstanding American masterpieces of the ranching and Indian country.

He was an avid reader and an accomplished author with several fine books to his credit, particularly his authoritative treatise on Sitting Bull.

In the Congress, he was long a powerful voice in behalf of the people of his State and the farmers of America. Steeped in the American free heritage, he opposed communism at every turn with all his heart and devoutly believed that in the great struggle now going on between communism and democracy, communism was doomed to defeat because it ignores man as an individual soul and a freedom-loving individual.

There are many facets indeed of the life of this great man, Usher Burdick, that I cannot deal with in this brief but truly heartfelt tribute to his memory. He has left us a precious legacy of loyal friendship, devoted family life, dedicated service to his fellow man and peerless Americanism.

A legion of people mourn his passing and his great contributions will long be remembered, not only in his great State, but in the Halls of Congress where he was so distinguished for rugged sterling character, unsullied integrity, untiring energy and undeviating loyalty to the principles of the American Constitution.

He has also left a most distinguished family to follow in his footsteps—Hon. Eugene Burdick, a learned, highly respected, outstanding judge in North Dakota, illustrious Hon. Quentin Burdick, whom we all know, esteem, and admire, the most recently elected Member of the U.S. Senate, and Mrs. Elleen Burdick Levering, a charming, gracious, lovely, and accomplished woman and mother, talented lawyer, wife, and helpmate of our own beloved and esteemed colleague, so justly lauded in this body, the able and distinguished Congressman Robert Levering, of Ohio.

For those of us who knew and loved Usher Burdick as a great human being and great American that he was, his passing fills our hearts with deep sadness, but in the memory of his friendly, warm, beaming countenance, loyal friendship and distinguished, unselfish service to the Nation we will all have reason to be grateful that this great American from the great Midwest lived so courageously, worked so diligently and served so faithfully and effectively in the vineyards of American democracy.

A great man and a great Congressman has left us. Our hearts go out in profound sympathy to his bereaved family for their irreparable loss.

May the good Lord bring to our beloved friend, Usher Burdick, eternal rest and peace in his heavenly home.

## Development of Nuclear-Powered Aircraft

EXTENSION OF REMARKS

## HON. WILLIAM E. MINSHALL

OF OHIO

IN THE HOUSE OF REPRESENTATIVES Thursday, September 1, 1960

Mr. MINSHALL. Mr. Speaker, as a member of the Defense Appropriations Subcommittee of the House, I am always pleased when the press does an outstanding job of bringing to the reading public the facts on various aspects of our national defense program. Mr. Lowell K. Bridwell, Scripps-Howard representative of the Cleveland Press, recently wrote an excellent article on development of nuclear-powered aircraft. It is well worth the attention of my colleagues:

DEVELOPMENT OF NUCLEAR-POWERED AIRCRAFT
(By Lowell K. Bridwell)

IDAHO FALIS, IDAHO.—A huge airplane hangar, big enough for an indoor football game, stands forlornly on the grounds of the Atomic Energy Commission's National Reactor Testing Station near here.

This \$10 million concrete structure, built on a desert-like plateau in the shadow of Saddle Mountain, is a hopeful yet frustrating symbol of man's efforts to get off the ground with a nuclear-powered airplane.

After 14 years and an outlay of more than \$1 billion, there's still no such craft ready for the combination hangar and engine test facility. For at least 3 or 4 more years, and another \$1 billion, there isn't going to be one.

Air Force and AEC experts will tell you a nuclear-powered plane could be flying over the United States right now. But the program for its completion has been in a flux, alternately upgraded and sidetracked or obscured.

"To my way of thinking," Adm. J. T. Hayward told the House Appropriations Committee, "It is a monument to how not to run a technical program." Hayward is the Navy's Research and Development Chief.

This program started less than a year after the first atomic bomb was dropped on Japan. A small, inspired group of scientists soon concluded nuclear energy could be used to fly an airplane.

But all sorts of obstacles, including controversy, were encountered even as the proj-

ect grew

By 1953, scientists were working toward a goal of flying an old B-36 with nuclear engines. The B-36 was a huge, combination jet and piston-engine bomber which even then was considered obsolete. But aircraft nu-clear scientists wanted to use it in tests.

Former Defense Secretary Charles Wilson balked at spending money on a test vehicle which wouldn't be militarily useful. He

canceled the program.
Stung by Wilson's denunciation of the Stung by program, officials came up with a plan for a nuclear "hot rod." They decided they wanted They decided they wanted a plane which could fly three times the speed of sound, rove the world for days without stopping or refueling, carry a covey of nuclear ballistic missiles and pack enough electronic gear to tell the crew everything including that day's baseball scores.

It wasn't until 1956 that defense officials were forced to conclude what many nuclear scientists thought in the first place—the kind of plane they wanted couldn't be built with existing knowledge and material.

There have been other ideas for eventual "weapons systems" using a nuclear-powered plane, but it's been mostly in the last year that emphasis has been placed on getting a

good powerplant first.

During this period the nuclear-plane program has been on a straight and aggressive research and development schedule. Dr. Herbert F. York, the Defense Department's research and engineering chief, has insisted that a superior powerplant be built before anyone decides how an atomic airplane shall be used.

"We have been making tremendous progress because there have been no changes during the past year," says Brig. Gen. Irving L. Branch, aircraft nuclear-propulsion chief.

Two of the Nation's best known aircraft powerplant manufacturers are working on the problem.

The General Electric Co. is centering on the "direct cycle" approach, and Pratt and Whitney Aircraft Corp. is trying to perfect the "indirect cycle" method.

The House Appropriations Committee, disappointed over slow progress and angry over the amount of money it is costing, demanded the Defense Department make another study and choose between the two power systems by this month.

As the target date arrives, the committee almost certainly will be told that research and development on both systems must con-

"It would be impossible to choose between them now," says General Branch.

As it stands, both systems are scheduled for advanced testing in late 1962 or early 1963.

## The House Rules Committee: That Roadblock in Congress

EXTENSION OF REMARKS OF

## HON. JAMES M. QUIGLEY

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES Thursday, September 1, 1960

Mr. QUIGLEY. Mr. Speaker, an interesting article in the New York Times magazine for August 7, 1960, by Mr. Tom Wicker, of the Times Washington bureau, provides much background information on the powerful conservative coalition which dominates the House Rules Committee.

Under leave to extend my remarks, I include the full text of the article:

AGAIN THAT ROADBLOCK IN CONGRESS

(By Tom Wicker)

Washington.—It would not be easy for even as resourceful a presidential candidate as Senator John F. Kennedy to explain from the rear platform of a campaign train how a single congressional committee could frustrate the Democrats' 128-vote majority in the House of Representatives and their 66-to-34 lead in the Senate.

Yet that is what the House Committee on Rules is in a position to do in the postconvention congressional session that opens tomorrow. And since the committee is manned by eight Democrats to only four Republicans, its power to obstruct the Democratic program cannot easily be blamed on the other party

The fact is that a conservative coalition of Republicans and southern Democrats has made the Committee on Rules virtually a third branch of Congress, equal to and sometimes superior to the Senate and the House. In the new session the authors of the Democratic platform of 1960 may find that out the hard way.

If the Nation elects Senator Kennedy to the White House in November, in spite of all the Rules Committee can do in August, he will find in January that the committee is a major barrier to his party's far-reaching programs for economic growth, civil rights, and social welfare.

This barricade on the liberal path manned by a six-man conservative junta that holds the Rules Committee, the House, and all too often the Congress as a whole, in parliamentary thralldom. The committee's able and determined chairman, Howard WORTH SMITH, of Virginia, is the conservatives' leader as well as the head coach of the 90-odd southern Democrats in the House.

Judge SMITH (he earned his title by early experience on the Virginia bench) is slightly stooped with his 77 years but not at all with submission to the North, the liberals, the New and Fair Deals, the young upstarts in the party of his fathers or in fact to the 20th century. He is ranked among the strongest Members of the House and his wily leadership multiplies the conservatives' power

Most of the Rules Committee's authority, however, derives from its right to decide what bills, of the thousands introduced each session by zealous Congressmen, shall go to the House floor for action. The committee can force consideration of bills that have not been approved or even studied by the customary legislative committees. More often, it digs a grave in its files for measures it does not like, despite the approval of other committees.

Almost nothing can be done in the Houseand thus in the Congress itself-without the consent of the Committee on Rules. Each when both the Senate and the House have passed a measure, the committee holds a final trump: Unless the two bodies have enacted identical bills, it can prevent the House from entering a conference to iron out the differences and effect final passage.

If anyone proposes to change these rules of the game in the House, he first must get clearance from—you guessed it—the Commit-tee on Rules. No liberals need apply.

Judge Smith wields his committee's authority sometimes subtly, sometimes bluntly, but always effectively. His southern exposure is shared by the next ranking Democrat on the committee, WILLIAM COLMER, of Mississippi, a loyal Smith disciple.

The two men can count on the almost unvarying support of the committee's four Republicans-Leo Allen, of Illinois, Clarence BROWN, of Ohio, BRAZILLA CARROLL REECE, of Tennessee, and HAMER BUDGE, of Idaho. Not one of the four can say the word "liberal" without a grimace.

Mr. ALLEN is not noted for the felicity of his phrases but he once described the committee's attitude in a nutshell. It was some years ago, when the New Deal Democrat, Adolph Sabath, of Illinois, was the committee chairman and the conservative coalition's chief victim. That day, Sabath was trying hard just to get the floor in his own commit-

"Adolph has a right to be heard," LEO ALLEN finally told his teammates. "Let him

speak for 2 or 3 minutes.

Inheriting Mr. Sabath's role of frustration are the other six members of the present committee—all garden-variety Demo-crats, responsive to the moderate leadership of Speaker Sam RAYBURN of Texas. It takes an affirmative vote to get committee approval, and long-suffering liberals like RAY J. MADDEN, of Indiana, and RICHARD BOLLING, of Missouri, have seen many a pet project go down on tie votes-not defeated so much as stymied.

Since July 22 the Committee on Rules has been preventing final pasage of a school construction bill by withholding its per-mission for a Senate-House conference on their differing versions of the measure. The committee also is sitting on a Democratic housing bill. And when the new session opens tomorrow it will hold the power of life, death, or modification over the so-called Forand bill to provide health benefits for the aged through the social security system, and over a measure to increase the minimum wage and extend its benefits to more work-

In an election year, the last two are regarded, inelegantly but accurately, as "gut" issues. Moreover, they are Democratic platform planks. But different versions of each will be passed in the Senate and the House, making them as vulnerable as the school bill to the power of the "third house" block a conference and final passage.

The legislative bottleneck formed by the Rules Committee was one of the major factors that pushed the Democratic leadership into the politically risky August session. essence." one philosophical House Member said last month, "we're having a special session because of the Rules Committee. It's what we've got instead of fillbuster."

No sanction rests in the Constitution for the Committee on Rules and certainly not for the vast array of powers it has arrogated to itself. The framers simply granted the House of Representatives the right to determine the rules of its proceedings and let it go at that.

Most of this constitutional authority, however, was delegated to the committee in the late 19th and early 20th centuries, through the shrewd rulings of Speakers Thomas B. Reed and "Uncle Joe" non. The size and disorder of the House made centralized control inevitable and these Speakers-the czars of the Congress in their day-were delighted to provide it.

The House eventually revolted against 'Cannonism" in 1910, under the leadership of George W. Norris, of Nebraska. It stripped Speaker Cannon of his power to appoint committees, name chairmen, and sit as chairman of the Rules Committee—but it left the committee's powers intact.

Until 1937, however, the committee functioned generally as a docile arm of the party in power—a sort of "traffic cop" directing bills to the House floor in logical order. But in the late stages of the New Deal, disgruntled conservatives-representing the southern Democratic-Republican coalition that had been formed in the House-selzed effective command of the Rules Committee and turned its latent powers to their own

One of this resourceful combination's most effective gambits is to demand amendments, written to conservative specifications, before approving a given piece of legislation. Or it may clear one bill as payment for the demise of another.

This year, for example, floor debate on the House version of the minimum-wage bill was allowed only after the coalition had exacted assurances that a measure it disliked even more—one which would permit certain kinds of picketing by building-trades unions—would be buried in the Education and Labor Committee.

The school-construction bill went to the House floor only after it had been pruned and restricted far below the wishes of its author, Frank Thompson, Jr., of New Jersey. But Mr. Thompson knew the Rules Committee had been holding the broader, more expensive Murray-Metcalf bill in its deep freeze since 1959, and trimmed his sails accordingly. Ironically, the committee now refuses to permit final passage of even the stripped-down Thompson bill.

The most important action of the present Congress was achieved over the committee's far-from-dead body. After sitting on it all through 1959, the coalition cleared the civilrights bill only because it was confronted with a fait accompil—a discharge petition, signed by a majority of the House, that would have reclaimed the bill from the committee if it had been exercised.

Such a petition is one of only 3 weapons available to determined members of the House if they want to challenge the Rules Committee. It requires the signatures of 219 Congressmen, a constitutional majority. Only the Fair Labor Standards Act of 1938 and the Federal pay raise bill of 1960 have become law through discharge petitions in the House.

The chairmen of other committees also may call for a House vote on bills being held by the rules panel; on two special days—known as Calendar Wednesdays—each month. But each chairman must take his turn and may get only a few Calendar Wednesday chances each session. Moreover, a bill called up in this fashion must be debated and voted on the same day—a large order.

On 2 days of each month, in addition, bills may be passed under suspension of the rules, with or without benefit of Rules Committee approval. This requires a two-thirds majority. Such a vote on a controversial bill would be like beating the Yankees 4 straight in a world's series, with no bats.

The ordinary difficulties of carrying out any of these maneuvers will be magnified by the brevity of the forthcoming session, scheduled to last only 3 weeks. Also Judge Smith may choose to do his disappearing act, one of the neater ploys in his repertory. In August 1957, he vanished from Washington, leaving his committee without the power to call itself to order, while the civil rights bill of that year gathered dust in its files. Word seeped back from Virginia that Judge Smith had gone to inspect a barn that had burned on his nearby dairy farm.

on his nearby dairy farm.
"I knew Howard Smith would do most anything to block a civil rights bill, but I never suspected he would resort to arson." Speaker RATEURN quipped, somewhat wryly.

But if Judge SMITH goes to such lengths this year, he may suddenly find the House in the mood for a new revolt, like the one that toppled Uncle Joe Cannon. In the last days before the preconvention adjournment there were two significant indications of the prevailing mood.

For one thing, Judge SMITH found it expedient to take the floor for the unprecedented purpose of defending his committee against an attack by a freshman Democrat, GERALD T. FLYNN. Rookie Congressman are a dime a dozen in the House and the judge's speech seemed to betray an increased sensitivity to criticism.

The next day, the House passed by only 8 votes, 182 to 167, a bill to pay the moving costs of Virginians being displaced by Wash-

ington's grandiose Dulles International Airport. Observers interpreted this reluctant approval as a slap at Judge Smrrn, for whose Virginia constituents the bill would provide large benefits.

One of the highest ranking Democrats in the House says bluntly: "The boys are serious this time." But in the same breath, he adds: "Of course, they won't get anywhere."

That was an experienced, if not cynical judgment reflecting the extraordinary difficuty of reforming any part of Congress, much less the Committee on Rules.

To begin with, even liberals admit that this powerful group, when it functions in its role as a "traffic cop," is a necessary part of House procedure. Moreover, it can be a useful servant of the leadership, as President Elsenhower learned early in his administration.

In 1953, the Rules Committee was in Republican hands, with Leo Allen in the chair. Acting for the White House, the committee buried a tax-cutting bill being pushed by the venerable Representative Dan Reed, the Republican chairman of the Ways and Means Committee.

Later, the vengeful Mr. REED held up in his own committee the administration's bill to extend an excess profits tax and raise about \$200 million in badly needed revenue. The Rules Committee rudely bypassed the old chairman and sent to the floor its own extension bill—which had been nowhere near the Ways and Means Committee.

Judge SMITH blandly assures critics of the committee's less laudable activities that a majority of the House can always change things if they aren't satisfied. But in fact, it might be easier to overthrow the Government than the Committee on Rules.

A rules change, even if it could be pushed through the Rules Committee itself, would have to be approved by the House—where the Republican-Southern Democrat axis is entrenched. Moreover, a move against any committee would be dangerously near a move against the House leadership hierarchy—an insurgency not attractive to junior Members who depend on the same heirarchy for favors and advancement.

It is true that the Rules Committee's record in the 80th Congress—when it blocked universal military training. a labor bill, amendments to the Social Security Act, and a civil rights bill—led to a reform in 1949 and 1950 under which a chairman could get House action on a bill after the committee had held it for 21 days or more. Under that rule, eight major bills were wrested from its grip. But it took the conservative coalition little time to reestablish its authority and abolish the 21-day rule in 1951. When liberals sought a new reform in 1959, the best they could get was a pledge of assistance from Speaker Rayburn.

Many liberals concede the Speaker has worked hard to fulfill his promise; but his best has not always been good enough, in their view. They believe public opinion is on their side and they are almost certain to move for reform in January—particularly if a new Democratic administration lends them its support.

The Democratic study group, an organization of House liberals, is pondering several proposals—restoration of the 21-day rule, for instance. But most run squarely against the fact that the Smith-led conservative coalition on the committee and in the House probably could defeat any major rules change.

For that reason, a proposal that is under close study is the election of the eight Democratic committee members at an open majority caucus at the beginning of each Congress. If followed in 1961, the plan would be aimed not at the respected Judge SMITH but at ousting his Mississippi spear carrier, Mr. Colmer. That would turn the balance of power against the coalition, seven to five,

by a purely internal Democratic maneuver against which the southerners could not muster Republican support.

On the other hand, this would be a direct assault on the cherished congressional principle of seniority. Members of other committees would think twice before violating the seniority rule, fearing that the precedent thus set next might be turned against them. Thus, the liberals may try to do no more than stack the committee by adding two or three Rayburn-type members.

Actually, there is no ideal way to reform the Committee on Rules because there is no ideal way to reform men. So great, however, is the present conservative coalition's power to frustrate liberal legislation that many Congressmen believe any Democratic administration would have a duty and a necessity to move against it.

## South Jersey Medical Research Foundation

EXTENSION OF REMARKS

## HON. HARRISON A. WILLIAMS, JR.

OF NEW JERSEY

IN THE SENATE OF THE UNITED STATES
Thursday, September 1, 1960

Mr. WILLIAMS of New Jersey. Mr. President, I have been informed that the National Foundation has awarded a research grant of \$41,752 to the South Jersey Medical Research Foundation. The news is particularly welcome because it shows how a worthy effort in New Jersey is receiving encouragement, as well as funds, for a very vital area of research.

A news release from the National Foundation gives details of the grant and its purposes.

Mr. President, I ask unanimous consent to have the release printed in the Appendix of the Record.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

SOUTH JERSEY MEDICAL RESEARCH FOUNDATION
(By Dr. Lewis L. Coriell)

Tissue culture research that has bearings on both cancer and virus diseases will be continued at the South Jersey Medical Research Foundation, Camden, under a March of Dimes grant of \$41,752 from the National Foundation.

The grant was announced jointly today by Mrs. W. H. K. Fleck, president of the New Jersey foundation, and Basil O'Connor, president of the National Foundation. The project will be directed by Dr. Lewis L. Coriell, research director.

In recent years tissue culture has become an important tool for study of cancer, virus infections, birth defects, and certain inherited diseases. Dr. Coriell's work in polio research led him into a new approach to cancer.

At first, he was searching for a strain of normal cells, maintained in cultures, which might serve as a suitable substitute for the expensive monkey kidney cells now used for growing polioviruses to make Salk vaccine. In the course of such studies, he and other investigators have found that certain originally normal polio-susceptible cells which grow continuously in laboratory cultures apparently have changed into cancer cells. Upto now, no tissue culture-adapted strain of cells has been found which is capable of producing poliovirus in abundance and at the same time is clearly nonmalignant.

Why cells from normal tissue take on the appearance of cancer when adapted to tissue culture growth is not known. But the finding has given cancer workers a new approach to study of malignant transformation of normal cells.

cancer.

The Camden investigators also have been making comparative studies of various lines of tissue culture-adapted cells. They have found that the number and distribution of chromosomes, which contain hereditary information, tend to vary greatly among the cells derived from the same animal species. Chromosome differences also were found in the same strain of cells (such as HeLa cells) grown in different laboratories.

Their studies also showed that tissue culture cells often are contaminated with bacteria, particularly of the group known as pleuropneumonia-like organisims (PPLO), without showing visible signs of their presence. PPLO are difficult to isolate and their presence usually goes unnoticed unless special effort is made to detect them. Although they appear to be harmless to man, Dr. Coriell and his associates are exploring the ways of ridding cell cultures of these ubiquitous contaminants.

For these and other reasons, Dr. Coriell's laboratory will concentrate its efforts on the problems related to chromosome changes and bacterial and other contaminations of cell cultures. At the same time, he will study and characterize various strains of tissue culture-adapted cells currently used in re-search laboratories. Together, these studies can give much needed information to investigators working with cell cultures.

Dr. Coriell's group also will continue its study of anticancer serum obtained from a cow inoculated with HeLa cells, derived from a patient with cancer of the uterine This immune cow serum protected rats against HeLa cell-induced cancer. now will be tested in selected cases of uterine

Plan Needed To Stabilize Domestic Livestock Prices and Create Methods To Expand Trade in Our World Markets

EXTENSION OF REMARKS

## HON. LEONARD G. WOLF

OF IOWA

IN THE HOUSE OF REPRESENTATIVES Thursday, September 1, 1960

Mr. WOLF. Mr. Speaker, in light of the growing seriousness of this problem, I have urged the Secretary of Agriculture to call an emergency nationwide conference of livestock producers in order to formulate an overall plan which will stabilize domestic livestock prices and create methods and procedures by which our world markets in this vital area of our economy can be expanded.

I have asked the Secretary of Agriculture the following questions, the answers to which I believe will shed some light on this fast deteriorating situation:

First. Are there any Agriculture Department policy decisions which might have caused the astonishing rise in the importation of red meats while our export markets for most livestock industry products have remained very sluggish?

Second. Have rapidly falling farm livestock prices been the result of the tremendous increase of red meats from abroad, plus the decision of certain meat processing industries to constrict the domestic market in a quest for greater and greater profits in the short run?

Third. Why is it that our agricultural producers who are acknowledged to be the most efficient in the world are not only losing their own domestic markets but are unable to increase their markets abroad?

Fourth. In light of the fact that the annual fall hog market glut will be upon us in a very few days, do you now have any plans to deal with the problem? I need not tell you that it becomes more urgent than ever that a comprehensive plan go into effect immediately.

Statement by Congressman Earl Hogan at 12-State Democratic Conference and

EXTENSION OF REMARKS

OF

## HON. EARL HOGAN

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES Thursday, September 1, 1960

Mr. HOGAN. Mr. Speaker, under leave to extend my remarks in the REC-ORD, I include the statement I was privileged to give in behalf of Indiana farmers during the 12-State Democratic conference and rally at Des Moines. Iowa, August 20-21, 1960:

PRESENTATION BY CONGRESSMAN EARL HOGAN, DEMOCRAT, NINTH INDIANA DISTRICT, AT 12-STATE DEMOCRATIC CONFERENCE AND RALLY, DES MOINES, IOWA, AUGUST 20-21, 1960

Mr. Chairman, it is a real privilege to come before this meeting in behalf of the farmers of the great State of Indiana, for they are in

a squeeze and are hurting.

The official research conducted by Purdue University on farmers' accounting records have been completed for 1959. Briefly, they show one of the most drastic drops from 1958 to 1959 of any year since the Hoover de-pression. But even more disastrous these records for much better than average Indiana farmers show that the farmers in my State are going in the hole and going in the hole rapidly.

These university analyzed farm records show that if farmers in my State were to get just a national legal minimum wage for their labor and that of their families, they would not have earned any return whatsoever on their large investment of capital and operating expenses. Or to put it the other way, if these farmers had been required, as indeed many of them were, to pay going rates of tight-money interest on their capital investment, they would have been working the entire crop year of 1959 for less than nothing, with no return on either their labor or their management know-how. In fact the figures show that the best, most efficient farmers in Indiana had to work for nothing and pay something besides for the privilege of farming in 1959, I know these figures are quite accurate because I had the same kind of results on my own small farm.

One of the first things I did after I was elected to Congress was to work out a proposal with the help of the farm leaders in my district and I introduced it. If my bill, H.R. 7188, had been enacted it would have raised farm income, cut Government costs of the farm program, and set up a conservation program that would make a major contribution to the future strength of our Nation.

Needless to say the Republican administration sent up an adverse report on my bill. However, more than a score of my colleagues and I got together early this year and developed a Family Farm Income Act which contained the provisions of the bills we had introduced separately. And, Mr. Chairman, we added other neded features and found that that bill, too, faced the stubborn oppo-sition of the Republican administration. some of their banker and processor allies, and all of the Republican members of the House Committee on Agriculture of which I am honored to be a member.

There is no secret of what is needed in the way of an improved farm program; we need something that will begin to raise farm income imediately before still more family farms have gone down the drain; a program that will reduce the drain on the Federal Treasury; a program that will not stack up more and more wheat and feed grains in the Commodity Credit Corporation warehouses where large sums are being paid for inter-est, handling changes, and storage of no

benefit to farmers.

All of us know, Mr. Chairman, that we need a program that will conserve and develop our soil and water resources. A program that will give farmers a means to raise their incomes to a fair parity level; that will help them preserve their farms; that will allow them to use marketing orders, marketing quotas, and acreage allotments to balance their production, and market sales to a volume that will clear the market at a fair price.

There's nothing unique about the proposals I have made. They are fully covered in the fine farm plank adopted by the great Democratic convention in Los Angeles. think most of you agree with me that the Democratic platform farm plank is the most forward looking most meaningful farm plank that any political party has ever written into its platform.

Our farm plank is dedicated to the family farm. The kind that you and I grew up on. The kind of farm that the Nation should preserve and promote for the national best interest. The kind of farm that Thomas Jefferson and the other Founding Fathers considered to be the foundation and backbone of the democracy in this Republic.

It states several basic principles: Parity of farm income so that efficient family farmers can earn as much on their labor and capital investment as can be earned by similar productive resources in other parts of the economy; the use of abundant food and fiber for unemployed and our needy here at home and to encourage the undecided na-tions around the world to adopt democracy. to balance farm production with demand; to set up a national safety reserve of food and fiber; and to once and for all set up a farm program that will improve and stabilize farm income get the issue off the front pages into operation and get on down the road-instead of forever and always having to fight continuing rearguard actions against those who keep on wanting to destroy the farm program and the family farm

The farm problem is not just a sudden emergency; it is not a problem that is temporary. The farm income problem is caused by deeply underlying continuing features of a national economy that are continuous and continuing.

To solve the farm income problem will take continuing programs and continuous effort. But if we set up such a program that can be carried out by the democratically elected farmer committees making adjustments every year to tailor the overall program to local needs, then we'll have an ongoing program that can be adapted to emerging needs by farmers themselves within congressional safeguards and Congress won't be called upon to consider a farm program bill every year. Constant public controversy over farm policy is no good kind of farm program. We need a policy that we can set in motion and quit having public political fights about in Congress every day.

### Nuclear-Powered Aircraft

EXTENSION OF REMARKS

## HON. WILLIAM E. MINSHALL

OF OHIO

IN THE HOUSE OF REPRESENTATIVES Thursday, September 1, 1960

Mr. MINSHALL. Mr. Speaker, development of our nuclear-powered aircraft is a matter of first importance in our Nation's defense. Mr. Lowell K. Bridwell, Scripps-Howard representative of the Cleveland Press, has done an excellent job of arousing interest in the project in a highly readable article written on the spot. It follows:

(By Lowell K. Bridwell, Scripps-Howard staff writer)

IDAHO FALLS, IDAHO.—The radically new nuclear-powered aircraft Air Force officials now want built will be about the same size as a B-52 jet bomber. But there similiarity will end.

The nuclear plane will have two small wings in front. The main wings will be near the rear. The rudder which sticks up from the tail of most planes will disappear. It will be replaced with two rudders, one at each of the main wingtips.

The plane will first be test flown with regular jet engines, weighted to account for the heavy nuclear propulsion machinery. The regular jets eventually will be replaced by nuclear jets, but these will be placed near the tail of the main fuselege.

the tail of the main fuselage.

The first nuclear aircraft probably will still use at least two regular jets to take off and land.

"We want to start flying as soon as it is reasonably possible," said Brig. Gen. Irving L. Branch. "When we start flying, then we'll start learning a lot of things real fast."

General Branch is chief of the nuclear aircraft propulsion program under development at the Atomic Energy Commission's National Reactor Testing Station near here.

General Branch cautions that the first atomic plane still will be a test vehicle.

Even so, it won't be an aerial sissy. It will be able to fly fast or slow, high or low, cruise for 5 days or longer if the crew can stand it, carry a bigger payload and do other things no other airplane ever built can do.

When the straight jet engines are replaced with nuclear jets, Branch said, it is possible ballistic missiles can be carried along the wings where the regular jet engines formerly were placed.

The general hinted that nuclear and aircraft engineers now firmly believe an atomic airplane can be built in 10 years to exceed even the wildest dreams of earlier supporters.

"As we get closer to flight stage," Branch said, "people will be able to see all kinds of potential. They will want us to get on with something better."

General Branch, who recently flew to the Strategic Air Command headquarters at Omaha, Nebr., to give its top officers a secret briefing on the program, unfolded this picture: The plane will be able to maintain a constant airborne alert. It can cruise slowly well off the coast of an enemy nation. It can spurt to 600 miles an hour when called on. Missiles presently are being developed which will turn it into a flying Cape Canaveral.

It can operate without a fixed base. It does not have to be refueled in the air.

It will be sufficiently safe to fly from many military airfields. If it crashes, there will be no greater danger than in other aircraft mishaps. A crew can fly it for longer periods than they can stand without harmful radiation effects.

And because of its practically unlimited range, it can attack an enemy from any place on the globe instead of flying a predictable nath

Branch said Congress would be asked next January for the money to take another big step—the actual construction of the airplane frame in which to put the nuclear propulsion machinery.

sion machinery.

The Convair Division of General Dynamics already has been working on preliminary designs. Convair has spent more than \$50 million on the program so far, but only a small portion of that has gone into the design of the plane officials now think will be used.

## Medical Care for the Elderly

EXTENSION OF REMARKS

## HON. FRANK T. BOW

OF OHIO

IN THE HOUSE OF REPRESENTATIVES
Thursday, September 1, 1960

Mr. BOW. Mr. Speaker, I take this means to report to hundreds of constituents who have sent me messages concerning medical care for elderly citizens.

In response to their requests and those of thousands of other Americans, the Congress has taken a great step toward broadening Government responsibility for medical care for the aged.

As many as 10 million elderly Americans—those who most need help—can be helped by the new medical care program.

The Federal Government stands ready to begin this program October 1, 1960. When it will go into effect will depend upon action taken by the 50 States, for this is a Federal-State cooperative program in the same category as aid to dependent children, unemployment compensation, vocational rehabilitation, oldage assistance, and many others.

Each State may determine, within the broad provisions of the Federal law, how it will administer the medical care program.

The Federal law does not require, as has been claimed, that any individual take a pauper's oath, and it specifically forbids any State to require a lien on the home of any individual so long as he or his wife, or husband, is living.

### As Senator Gore has said:

Under different circumstances, this proposal would be regarded as a very great, liberal advancement in social betterment.

The circumstances, as all of us understand, were the political controversies arising out of demands for the much more far-reaching proposal by our colleague from Rhode Island, Mr. FORAND.

Again quoting the liberal Democrat Senator. Mr. Gore:

The circumstances really do not detract and should not be allowed to detract from the very great benefits and the very large forward steps encompassed in the bill.

I supported this measure in the belief and hope that it will bring relief and ease the burdens of millions of older people who are entitled to its benefits. I urge the State of Ohio to use whatever legal authority it now possesses and to enact such additional legislation as may be required to give the fullest advantages of this generous Federal legislation to our people.

### Safeguards Needed

EXTENSION OF REMARKS

## HON. HARRISON A. WILLIAMS, JR.

OF NEW JERSEY

IN THE SENATE OF THE UNITED STATES

Thursday, September 1, 1960

Mr. WILLIAMS of New Jersey. Mr. President, we in this Nation are witnessing a growing concern about the effects of a vast Federal highway construction program upon the pattern of life in our cities and suburbs. Recently I introduced a bill to minimize the often unfortunate impact of the highway program. A recent editorial in the Newark (N.J.) Star-Ledger indicates that the bill might find useful application throughout the Nation.

Mr. President, I ask unanimous consent to have the editorial printed in the Appendix of the Record.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

### SAFEGUARDS NEEDED

The controversy over depressing or elevating the East-West Freeway has centered attention on a problem which up until now has been generally neglected. This is the effect of highway construction on urban development.

An elevated highway is the most economical to build in the congested sections of Essex County through which the East-West Freeway must pass. But a depressed roadway would be much more desirable from the point of view of local urban development.

However, the U.S. Bureau of Roads, which must approve the highway plans (since the Federal Government pays 90 percent of the roadbuilding cost), is not interested in urban development. Its primary interest is in getting the freeway built as economically as possible.

This disinterest in local needs has disturbed many officials as well as the residents of the communities directly concerned. Senator Case and Senator WILLIAMS, of New Jersey, have pointed out the shortsightedness of such a policy.

And Senator Williams, of New Jersey, has put forth a proposal which deserves serious study as a way for avoiding the kind of situation that has arisen over the East-West Freeway.

The Williams proposal calls for the creation of commission to give regional planning and regional considerations a place in the Federal highway construction program.

There is nothing novel about the concept of a regional planning body. But these proposals usually don't materialize because the localities are jealous of giving up their prerogatives and putting their development

into the hands of outsiders.

What is different about the Williams proposal, however, is that it would establish a new policy directive for the use of Federal highway funds. Under this policy, the development of orderly and well-balanced communities would be a major factor in the allocation of Federal highway funds.

In other words, agencies dispensing Federal highway funds would be instructed to take into account the effect of the construction on the local areas. And the regional planning bodies would make clear what these

effects would be.

WILLIAMS points out that under this policy "equal consideration of community values and community living would be given; the needs of interstate commerce would not be the only determining factor taken under consideration by the Federal Bureau of Roads in making important decisions on alinement and design."

There is no doubt that had this policy been in effect at the time the East-West Freeway came up for consideration, the decision would have been in favor of a depressed

highway.

Perhaps the Williams proposal cannot be instituted in time to be effective in the case of the East-West Freeway. But this certainly is not the only highway that will be built in the future in New Jersey with Federal funds. The problem spotlighted by the East-West Freeway will recur with other roads. The Federal Government is spending billions of dollars on new roads—and this is a long-range program.

a long-range program.

The roadbuilding program will have a profound effect on the localities through which the new roads pass. The interests of the localities, therefore, must be safeguarded—and that is exactly what the Williams pro-

posal aims to do.

New highways should not disrupt local development. They should assist the localities—which already are working against heavy enough odds in trying to push through improvements.

### Ukrainian Congress Committee

EXTENSION OF REMARKS

## HON. WILLIAM T. MURPHY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES Thursday, September 1, 1960

Mr. MURPHY. Mr. Speaker, it is with pleasure and pride that I insert my message of greetings in the Appendix of the Congressional Record commemorating the 20th anniversary of the founding of the Ukrainian Congress Committee of America which is being celebrated this fall by the branches and member organizations of the Ukrainian Congress Committee of America, Inc.

This year we mark the 20th anniversary of the Ukrainian Congress Committee of America. The year 1960 also marks the beginning of a new decade that all men hope may bring peace, justice, and freedom to all the peoples of the world.

No people has hoped and dreamed more of this freedom, or struggled harder for it, than the Ukrainians. Whether they are the 40 million people still enslaved by Russian communism or their 2½ million free brethren in America, they have never ceased to dream and to fight for a free Ukrainian nation.

No one could fail to admire the indomitable will of a people who have kept alive their dream through centuries of oppression. And no one who loves freedom can fail to hope that the freedom may at last be achieved.

To this purpose, the Ukrainian Congress Committee of America has waged an unceasing battle against communism. They have continually exposed the dangers of communism to all free peoples when some might forget their peril.

All Americans join with me in hoping that the 1960's will see the culmination of the hopes of the Ukrainian Congress Committee of America, and of Ukrainians everywhere, for a free Ukrainian nation.

## Medical Care Program Under Social Security Is the Only Answer

EXTENSION OF REMARKS

## HON. FRANK KOWALSKI

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES
Thursday, September 1, 1960

Mr. KOWALSKI. Mr. Speaker, only by enactment of an adequate medical care program, under social security, for our senior citizens, can the Government of the United States keep faith with its

people and with the future.

I regret that bitter opposition to an adequate, truly meaningful program limited congressional action to a bill which makes only a token approach to this grave problem and which, at administration insistence, includes requirements for a means test which is entirely repurpant to Americans.

### INADEQUATE BILL PASSED

The medical care bill which was passed at this postconvention session is inadequate and unfair. Many of us who recognized its grave faults were forced to vote for it because the Republicans made it plain that it was the only bill they would allow to go through, and the only bill that the President would not veto.

It should be remembered, Mr. Speaker, that we were prevented from even having a vote on the Forand bill—a bill which I had the honor to cosponsor.

Let us look at the bill that was passed. It involves two separate programs.

First. It will provide additional Federal assistance to the States for medical care for those receiving public relief.

Second. It will make Federal assistance available to States which set up their own new medical assistance programs, but the assistance will be available only on a matching funds basis. Thus, each of the 50 States must establish by law its own program and must appropriate the necessary money. Also, and most importantly, even when this is done, if it is, help will be available only to those who meet a means test. In other words, to get any help in meeting medical costs, the applicant must show that he is unable to pay the costs himself.

This pauper's oath provision is a revolting requirement.

Let us have a medical care program which is not based on the idea of public charity.

THE NEED FOR PROTECTION

The need for an adequate Federal program to help our senior citizens meet the cost of illness is plain.

Let us look at some of the facts:

Each year, there are 150 Americans out of each 1,000 who require hospital care, but for those in the 65 to 74 age group the rate is 292 per 1,000—or almost double the rate for the general population.

We all know how hospital and medical costs have zoomed, with hospital costs alone now more than double what they were 13 years ago. The cost of medical care has risen 49 percent.

Older people must spend an average of three times as long in the hospital as

younger patients.

Illness for the elderly comes at a time when their incomes are at a minimum level. They simply cannot afford the staggering costs of illness, nor can they meet the cost of adequate private insurance.

It would be a happy state of affairs if all our senior citizens did have incomes sufficient to meet all their reasonable needs, including the cost of illness, Unfortunately, such is not the case.

Almost two-thirds of our senior citizens have incomes, from all sources, of

less than \$1,000 a year.

Nor do our older Americans have assets which could be readily converted into cash to meet the costs of illness. At least half have less than \$500 in such assets.

The elderly just cannot afford to be

sick.

PRIVATE INSURANCE?

As a Representative from Connecticut, home of the great insurance industry, I would be delighted if private insurance provided the answer to this great social problem.

The insurance companies have made great strides in the field of medical care insurance. They are to be congratulated for what they have done.

But private companies simply cannot afford to provide the coverage that is needed, at prices that our senior citizens can afford.

It is reported by the Department of Health, Education, and Welfare that about 6 million people of our 16 million Americans of 65 or older have some kind of insurance protection against costs of illness. But only 27 percent of those have policies which will pay for as much as half of their medical bills. The insurance carried by the other 73 percent of this minority fortunate enough to have any insurance will pay for less than half of their medical costs.

I believe that the insurance industry would benefit by enactment of a Federal program of medical care under social security.

It would allow the companies to withdraw from an unprofitable field and concentrate on supplemental coverage which can provide good protection at reasonable rates which will allow fair return.

The basic social security law was opposed by some insurance experts yet it has proved to be of great benefit to the insurance industry by providing a base for the establishment of many new life insurance and pension plans.

It would be well to recall what the President's Commission on Health Needs of the Nation said about this problem of medical care for the elderly. I quote from its report to the President in 1955;

It is clear that the solution to the problem of payment for health services to the aging does not lie in currently available private insurance programs with premiums paid by the aged. Nor does it lie in any reasonably anticipated increase in cash benefits under old-age assistance or old-age and survivors insurance. Rather, the situation requires a new approach.

#### DR. MAC LEAN'S STATEMENT

The former president of the National Blue Cross Association, Dr. Basil C. MacLean, gave eloquent support to Forand-type legislation.

Such a bill, he said, "provides a way of dealing with the question with dignity and effectiveness."

Said Dr. MacLean:

As a physician, I have had an intimate look at the special and personal health needs of the aged. As a hospital administrator, I have seen that need reflected as a burden of obligatory and uncompensated service that acted as a constant drag upon the hospital's economic support and growth.

As New York City Commissioner of Hos-Pitals, I have seen these problems further translated into financial and social deficit for the entire community. As president of the National Blue Cross Association, I participated first-hand in the attempt to meet some of those problems through existing vol-

untary prepayment organizations.

A lifetime's experience has led me at last to conclude that the aged simply cannot afford to buy from any of these the scope of care that is required, nor do the stern competitive realities permit any carrier \* \* \* to provide benefits which are adequate at a price which is feasible for any but a small proportion of the aged.

### KOWALSKI BILL SUMMARY

It is my intention, Mr. Speaker, if I am reelected to the House of Representatives, to submit again my bill, H.R. 7778, identical with the Forand bill, to establish a Federal program of medical care for senior citizens, under social

Here is a summary of my bill:

First. The proposal: To amend oldage and survivors insurance so as to provide insurance against the cost of hospital, nursing home, and surgical services to all those eligible for old-age and survivors benefits or who would be eligible if they applied.

Second. Its purpose: As people grow old, they need more medical care but usually have less money to meet its rising cost. Most of them cannot get adequate protection through private insurance, and a severe disability may mean fi-

nancial disaster.

Individual health insurance policies are expensive; they usually exclude a preexisting condition; they may be refused or canceled. Group insurance also is unavailable to most retired persons and aged widows since they have no employment connection such as normally is required.

Young widows and children similarly have low incomes and little opportunity to obtain private insurance.

Many hospitals have constant and serious financial difficulties because they have to provide free service to these people. Private charities and public assistance agencies frequently pay for such hospital care or help make up hospital deficits.

The proposal would transfer to the selfsupporting insurance system a financial burden which now falls on individuals and private charities, and on public assistance financed by taxpayers. Thus it would work in the direction preferred by Congress.

Fifteen million persons would be eligible in 1961.

Third. The benefits:

A. Hospital and nursing home services: Each eligible person would be insured against the cost of hospital care, including a semiprivate room and all the hospital services, medical care, drugs, and appliances which the hospital customarily furnishes its bed patients. The insurance system would not pay the attending doctor's bills, except for surgical services

Skilled nursing home services would be covered if the patient is transferred to the nursing home from the hospital and if the services are for the same condition or one arising from that for which he received hospital care. The care in the nursing home could be extended so that up to 120 days of combined care would be provided in a 12-month period but only 60 days could be hospital care.

B. Surgical services: The insurance system would pay the cost of surgical services provided in a hospital, or in case of an emergency or for minor surgery, in the outpatient department of a hospital or in a doctor's office. Any individual may freely select the surgeon of his choice provided the surgeon has attained specified professional recognition-subsection (c) (2), except in cases of emergency or where the requirement of such certification is not practical. The cost of oral surgery by a dentist in a hospital would be covered.

C. Procedures for insured persons: The insurance procedures would be like those already developed for patients covered by private insurance plans that provide service benefits.

A person eligible for hospital or nursing home insurance would, as at present be admitted to such an institution on his physician's referral. The patient could receive insured services from any qualified practitioner or institution which has agreed to participate and to be paid for services insured under the plan. In emergency situations, referral or prior agreement could be waived.

Fourth. Administration: The program is to be administered by the Secretary of the Department of Health, Education, and Welfare. The OASI system would use its existing recordkeeping system to certify eligibility, to issue insurance cards, and the like. For aged beneficiaries, this would mean paid-up hospital and surgical insurance for life.

Any qualified provider of services would have the right to participate. Payments could be made at such rates as are provided in each agreement, covering the actual costs incurred, or on some other mutually agreed basis. Widely used patterns for determining rates have been developed under Government and private programs.

The agreements are to stipulate that the payment at the agreed rates shall constitute full payment for the contracted services; the patient may not be billed for additional sums for the contracted services. Agreements of this type are now in effect under the Federal program for medical care for dependents of members of the Armed Forces.

The Secretary could make agreements directly with providers of services or with their authorized representatives. Group practice prepayment plans would be

included.

The Secretary shall prescribe regulations and establish an advisory council. He may utilize the services of private nonprofit organizations to the extent that he determines that their utilization will contribute to effective and economical administration.

Fifth. Special safeguard: Nothing in the bill shall be construed to give the Secretary or administering agencies authority over the internal management of participating institutions or over the practice of medicine or the manner in which medical services are provided.

Sixth. Exclusions: Persons eligible for permanent and disability benefits are not included. The proposal does not apply to costs incurred in Federal hospitals, or in tuberculosis or mental institutions, or in other countries. It does not cover all types of nursing homes or apply to institutions that provide primarily domiciliary care. It does not apply to workmen's compensation cases unless arrangements are made to reimburse the insurance system. It does not include elective surgery, or nonsurgical medical services except those customarily furnished by hospitals as an essential part of hospital care for bed patients.

Seventh. Financing: The bill would increase contribution rates of employers and employees by one-fourth percent each and of the self-employed by three-

eighths percent.

SUPPLEMENTAL BILL

It is also my intention, Mr. Speaker, to submit a bill establishing a special program of medical care for those not eligible for protection under the social security system.

This would provide coverage for the several million of our senior citizens who are not within the social security pro-

A CHALLENGE TO AMERICA

The problem of adequate medical care for our senior citizens, under a program that will preserve their dignity and independence, is a challenge to America. It is a challenge we must meet.

The needs of our older citizens have been neglected long enough. It is time that we faced up to those needs and took the action that is necessary.

The basic question is a simple one of social justice. We have a moral obligation to our senior citizens—an obligation which we must fulfill.

A medical care program under social security will be a sound program, a humane program. It will show to the world that America keeps faith with her citizens, that she recognizes the great contributions of those who have done so much to build and strengthen our great land.

I shall keep fighting for such a program, with all my energy, until it becomes law. Despite the bitter opposition, right shall prevail.

Statement by Senator Dodd in Regard to Judge J. Joseph Smith and Mr. William Timbers

EXTENSION OF REMARKS

OF

### HON. THOMAS J. DODD

OF CONNECTICUT

IN THE SENATE OF THE UNITED STATES
Thursday, September 1, 1960

Mr. DODD. Mr. President, I ask unanimous consent to have printed in the Appendix of the Record a statement by me about Judge J. Joseph Smith and Mr. William Timbers.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR DODD

On September 1, 1960, I received unanimous consent to insert at a later date a statement about Judge J. Joseph Smith and Mr. William Timbers who, on that day, were confirmed by the Senate for the posts of U.S. circuit judge for the second district and U.S. district judge for Connecticut, respectively.

Judge Smith has long been recognized as one of the greatest jurists ever to sit on the bench in Connecticut. Prior to his appointment to the Federal bench in 1941, he served with great distinction three terms in the U.S. House of Representatives. A dedicated and thorough scholar of the law, exceptionally well fitted by temperament for the judiciary, a man of brilliant perception and insight, an experienced jurist with two decades of service on the Federal bench behind him, Judge Smith is the universal choice of the Connecticut bar for this post on the second circuit.

I have had the privilege of appearing in court and trying cases before Judge Smith. I feel for him the admiration and respect that are felt by all attorneys who have engaged in litigation before this outstanding turist.

And so, along with all of those who have known and worked with Judge Smith, I am deeply gratified by his confirmation for the post of U.S. circuit judge for the second circuit.

I am also pleased with the confirmation of Mr. William H. Timbers to succeed Judge Smith as U.S. district judge for Connecticut. During the hearings concerning the confirmation, we heard a series of impressive tributes to Mr. Timbers' qualifications for this post. He was consistently lauded for his legal ability, his judicial temperament, and his experience in complex legal questions. The first of those testifying in favor of Mr. Timbers included outstanding private

attorneys, university professors of law, and high-ranking Government officials. I have worked on legal matters with Bill Timbers and can personally vouch for his outstanding legal competence.

I congratulate Mr. Timbers upon his confirmation and I am sure that he will maintain in his new post as district judge for Connecticut the same standard of excellence set by his predecessor, Judge Smith.

## International Space Law and Outer Space

EXTENSION OF REMARKS

## HON. STYLES BRIDGES

OF NEW HAMPSHIRE

IN THE SENATE OF THE UNITED STATES
Thursday, September 1, 1960

Mr. BRIDGES. Mr. President, the distinguished Senator from Iowa [Mr. Martin] delivered a most thoughtful and enlightening address before the 11th International Astronautical Congress at Stockholm, Sweden, on August 16, 1960.

Senator Martin's speech was entitled "International Space Law and Outer Space," which I know is a subject of deep interest to all Americans. I therefore ask unanimous consent to have a copy of this address printed in the Appendix of the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

INTERNATIONAL SPACE LAW AND OUTER SPACE (Address by U.S. Senator Thomas E. Martin, of Iowa, before the Space Law Colloquium of the 11th International Astronautical Congress, Stockholm, Sweden, Tuesday, August 16, 1960)

I am pleased and honored to have been invited to speak before you today. The International Astronautical Federation has since its foundation in 1950 provided a valuable international forum for the review of outer-space problems and for the stimulation of action in governmental and international public bodies. I hope it will continue to provide this valuable service. In view of the uncharted nature of much of the work in astronautics, the contribution of private thinking and analysis can be of immense importance to the future development of man's efforts in outer space.

The stirring era in which we live is witness to the extension of man's activity into a medium entirely new to him. In the realm of space exploration man is faced with technical and scientific demands of unparalleled difficulty. At the same time, he is given priceless opportunity—a chance to establish new relations with his fellow man in a new environment, relatively free from the limiting influence of precedent.

Starting with a clean slate, man should so plan his activities in outer space as to preclude the possibility of the armed conflicts and controversies, which have characterized his history on this planet. He can promote a new atmosphere, based on scientific cooperation and the rule of law, which might serve as an example for his earthbound relations with his fellow man. As Ambassador Henry Cabot Lodge stated in an address to the 14th General Assembly:

"International cooperation in the exploration of outer space offers an avenue along which nations may approach mutual understanding and peace. Working together on the great challenges of explorations beyond the confines of earth can create a new perspective, in which national boundaries and national rivalries recede in importance."

Certainly we can agree that the incentives for international cooperation in outer space are many and very substantial. Tremendous expense is involved in space exploration. Geographically widespread and yet tightly coordinated observation stations are required. Coordination of operations is imperative if we are to avoid mutual interference and minimize the danger of accident and damage as traffic in outer space increases in intensity. All these factors urge the importance of international cooperation.

And there is another grim argument for cooperation: Scientific progress has inevitably made possible the use of outer space for new and more dangerous means of waging This fact requires that maximum cooperative efforts be made among the nations to guard against the use of outer space for aggressive purposes. Recognizing the great dangers lurking in such use, the United States over 3 years ago proposed a study of means to reserve outer space for peaceful purposes only. Today the United States stands prepared to enter upon such a study separately from the overall problem of disarmament. A concrete proposal in this direction has been made by the 5 Western Powers to the Geneva Conference of the 10-Nation Committee on Disarmament. These nations have urged the banning of weapons of mass destruction in orbit or stationed in outer space.

I hope very much that outer space can be reserved as a great area for peace. It would be a tragic thing indeed if the wars and national rivalries which have too often characterized relations among the nations here on earth were to be projected into outer space.

It is gratifying to note that the strong incentives for international cooperation in outer space which I have mentioned have not been without effect. Even in the initial stages of space exploration, such cooperation has made an important contribution in the tracking of earth satellites and the assembly of scientific data. Wide recognition of the desirability of mutual assistance in this new field is reflected in the intelligent and significant cooperation of states, organizations and individuals during the International Geophysical Year (1957-58). It is also reflected in the continuation of these tivities under the aegis of the Committee for Space Research of the International Council of Scientific Unions.

A special and important example of international cooperation, is furnished by the transmission by the United States to the U.S.S.R. of a number of tape recordings of the data received from Sputniks I, II and III.

As the pace of outer space activities increases, there will grow, in addition to the need for cooperation, a need for regulation and control of such activities in order teminimize conflicts of interests and operations. This involves the establishment of broad principles and specific regulatory measures to meet operational requirements.

Because of the very newness of the field of outer space exploration, the context and nature of many potential problems are not yet clear. I therefore believe that it is premature, at this time, to attempt to draw up a comprehensive legal code to cover all contingencies in outer space. It is, after all, a cardinal rule that the development of international law must follow the dictates of concrete need. We do not know enough about the difficulties that may be encountered in outer space to foresee the precise nature of the entire range of regulatory measures which may one day be necessary.

There are, however, certain problems which can be identified at present and studied with

regard to possible regulatory and control measures. In this task, as you know, the United Nations ad hoc Committee on the Peaceful Uses of Outer Space has made preliminary identification of a number of areas which call for international coordination and

control on a priority basis.

Now I would not go so far as to suggest that we install stop-and-go lights in outer space in order to control traffic there. But just as some regulatory measures become necessary for traffic on our international highways and on the high seas, so a certain degree of regulation and control will be essential with respect to outer space activities.

Among these problems, it is interesting to note a useful connection between identification and registration of space vehicles, advance notice of their launchings, and a possible system for guarding against surprise attack or use of outer space for aggressive purposes. It may well be that experience gained in this field may be useful in disarmament and arms control measures.

Regarding freedom of outer space for exploration and use, the ad hoc committee took a liberal and forward-looking view. It pointed out that "during the IGY " \* \* and subsequently, countries throughout the World proceeded on the premise of the permissibility of the launching and flight of space vehicles \* \* regardless of what ter-ritory they pass 'over' during the course of their flight."

This premise appears to have been sup-ported by the fact that such space activity has been undertaken and that no nation has raised objection to the launching of space vehicles by another. Thus it would seem to me there has been acceptance of the principle of freedom of exploration and scientific observation in much the same manner as was agreed in Washington last December 1 with respect to the continent of Antarctica.

A similar possibility exists regarding the exploration of and assertion of claims to celestial bodies. Last year agreement was reached by the signatory states to the effect that no territorial claims are to be submitted under the Antarctica Treaty. Why should not serious consideration be given to adherence to such a practice with respect to bodies in outer space? Certainly at the present state of man's knowledge and capabilities it would seem that the resources of natural bodies in space, like the vast regions of space itself, represent sharable assets of the community of nations. Scientific exploration of a planet conducted under the national auspices of one country should in no way involve the prohibition of similar, noninteriering, exploration by other countries.

The question of the establishment of a recognized boundary between air space and outer space is an especially complex one, in my estimation, it represents a surprising number of difficulties—difficulties which may possibly prove insuperable. The main argument for determining a space boundary is that it would help to preclude states from making claims to "sovereignty" large parts of space on the assertion that they are "air space" rather than "outer space"

The criteria for such a boundary determination, however, are not easy to establish. Should the division between air space and outer space be defined in terms of the physical characteristics of the air? Or should it be based upon the purpose of flight or on the physical characteristics of flightcraft? There are, for example, vehicles which have the characteristics of both aircraft and spacecraft. These operate on aerodynamic principles in one part of their flight and on pure rocket principles in another.

In order to avoid these difficulties, it has been suggested that an arbitrary limit might be chosen. But where would the line be drawn? Would it be at an altitude of 50,000

feet, or 70,000 feet, or perhaps as high as a manned plane might fly? The result of any arbitrary limit, it seems to me, would likely be either to fetter space activities by inap propriate rules or to interfere unnecessarily with the existing regime of international aviation.

Even if the difficulties of fixing a stationary boundary were overcome, the achievement would not solve all problems. This would be most obviously the case were the boundary to be fixed at a relatively high altitude. For example, artificial satellites often come much closer to the earth at some points in their orbits than at others. In some cases the perigee, or point nearest the earth, falls within one or more boundaries which have been proposed, while the apogee, or farthest point, falls outside. To me, it would make little sense to impose one legal regime, or status on the satellite at perigee and another on the same satellite at apogee.

Another problem would arise in connecttion with establishment of a high altitude space boundary. As altitude increases, the relevance and adequacy of normal air space boundaries decrease. There is progressively less relationship between objects located or activities taking place "above" specific national territory on the surface of the earth. For example, reentry and landing of an object traveling at high speed and high altitude are apt to take place hundreds, or even thousands, of miles farther on in its line of travel.

Rather than seek to limit space activity on the basis of altitude alone, other factors might be equally relevant. Should not one consider the trajectory of the space vehicle or object, its flight mission, the instrumentation and other functional characteristics of the vehicle in question, for example, in the search for appropriate criteria? Even with the resort to such criteria, however, much will remain in dispute. It would, I think, be ill advised to accept a boundary for outer space before its practicality and utility are thoroughly established.

These are some of the imponderables with which we are faced in the formulation of legislation and procedures governing man's activities in outer space. The factors which must be taken into consideration are exceedingly complex, and the technical and scientific information as yet available con-cerning many aspects of such activities is far from complete. These facts underline the need for considerable caution in drawing up legal provisions relating to outer space activities.

Despite this complexity, however, the accelerating rate of outer space exploration renders indispensable the early consideration of regulatory measures in certain specific areas, as I have indicated earlier. With the growth of customary practice and the accumulation of laws and agreements dealing with particular subjects, a system of laws governing human relations in outer space will gradually be filled out.

In the growth of such a system, the in-ternational community will wish to see its basic policy aims, as affirmed in such docuas the United Nations Charter, reflected in the body of outer space law. These aims include the reservation of outer space for peaceful purposes, the encouragement of international cooperation and the encouragement of scientific research, particularly in the interest of achieving practical benefits to increase human welfare.

The hope of cooperation in outer space was put eloquently not long ago by Dr. T. Keith Glennan, Administrator of the National Aeronautics and Space Administration, when he said:

"Out of the efforts of the dedicated and inspired men of all nations may yet come that common understanding and mutual trust that will break the lockstep of suspicion and distrust that divides the world into separate camps today."

Faced with the tremendous opportunities

presented by outer space, we owe it to ourselves and to all posterity to rise to the occasion and meet the challenge with statesmanship and breadth of vision.

## The Significance of Flowers

EXTENSION OF REMARKS

## HON. GEORGE GRANT

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES Thursday, September 1, 1960

Mr. GRANT. Mr. Speaker, recently during the recess of Congress, accompanied by my family, I traveled in Eng-land and several other countries on the Continent. I was particularly fascinated by and interested in, not only the innumerable flower gardens and small plots, but by the potted and boxed plants in homes, factories, and business establishments. Especially, did this seem to be true in France, Italy, Holland, Scotland, and Germany. From a hotel in Rome, I could see countless apartments, and each window had pots or boxes of flowers; also they could be seen blooming in practically every skylight opening. As I gazed upon the serene loveliness of these flowers, there came to my mind a thought which grew stronger each day-if the whole world could see and feel the significance of these flowers, it would be a great forward step toward peace.

Someone has written:

There is a tongue in every leaf-A voice in every rill; A voice that speaketh everywhere.

It was Wordsworth who said:

To me the meanest flower that blows can give Thoughts that do often lie too deep for

tears.

### Longfellow wrote:

Wondrous truths, and manifold as wondrous, God hath written in those stars above; But not less in the bright flowerets under us Stands the revelation of His love.

In all places, then, and in all seasons, Flowers expand their light and soul-like wings.

Teaching us, by most persuasive reasons, How akin they are to human things.

Flowers sing a song, Flowers preach a sermon; If we will only hear A song, a prayer of peace.

It is said that music has the power to charm the savage beast. Why cannot this be said of flowers? For, like music, flowers are a universal language. There is no language barrier in flowers. people do not have to understand each other's language or way of life in order to appreciate the same beautiful flowers. Flowers tell a story; they have a language all their own; perhaps, this is nature's secret language, one of peace, serenity, and kindness.

Flowers are the lexicon of lovepeace and tenderness—as opposed to hate and malice. Can one who loves flowers be a mean person or be one who really hates a foreigner? Flowers are a silent token of worthwhile sentiments and a message of peace and love—"Peace on earth, and good will to men."

Many of the nations of this earth have national flower emblems. The United States has not officially adopted a flower as its national emblem. However, most of the 50 States do have an official flower. While petitions have been circulated, polls taken, and legislation introduced to adopt this and that flower as the national emblem, such has not been done. Perhaps it would be an excellent idea to bunch all of the individual State flowers together and adopt this bouquet as the national flower emblem of the United States.

Regardless of what flower may be the State or national emblem, all flowers silently emblazon love and peace. In the language of flowers, the Madonna lily signifies sweetness; the water lily, purity of heart; lily-of-the-valley, happiness; red rose, love; blue violet, faithfulness; purple lilac, emotions of love; goldenrod, encouragement; and countless others, too numerous to mention, give messages of peace.

If only every person who plants a flower would dedicate it to peace, what a wonderful world we would have. These seeds would grow, not only in the flowerpots, boxes, plots, and gardens; but their message would grow in the hearts of all; a message of hope and faith and one that preaches the futility of war.

We all realize that before this idea can engulf the world that man's attitude toward the ideology of war and distrust must be changed, but herein lies the seed to help bring about this change. If patriotic, civic, flower, and garden clubs in just one country would accept this idea and contact like organizations throughout the world, a possibility of universal peace exists.

Since music is universally loved,
And we can appreciate its tone;
Why not help the white dove,
By a peace flower in each home?

May not a simple flower
Proclaim the end of war?
"Tis true it has the power
To do this and far more.

Then let all nations combine, In one universal score, To use the flower as a sign That war shall be no more.

God in his goodness to every land Gave each His flowers to love; So let's join a great brotherhood band To give thanks to our Father above.

May we through the goodly message of flowers hasten that day when "They shall beat their swords into plowshares, and their spears into pruning hooks"; and war shall be no more.

Hon. Graham A. Barden

SPEECH

## HON. RALPH J. SCOTT

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES
Wednesday, August 31, 1960

Mr. SCOTT. Mr. Speaker, during my short service in Congress I have had one

experience that stands high among the most pleasant ones of my entire life, the privilege and honor of becoming acquainted and associated with many Members of the U.S. Congress. Among these I regard my esteemed colleague, Hon. Graham A. Barden, as outstanding in several respects, for his strength of character, courage, ability, and dedication to the causes he believes are just and right.

Long occupying a position of great power and influence as chairman of the House Committee on Education and Labor, he did not use his position as a weapon of domination and abuse but rather as a medium of great service to his country and to his people.

The real measure of a man may often be discovered by his reaction to power and authority vested in him. Graham Barden's career and record in Congress reveal that he has understood that authority is always accompanied by responsibility and that power may become tyranny without wisdom. Again and again during his long congressional career he has demonstrated his deep wisdom, keen sense of responsibility, dedication to the causes he believed to be right, and has stood steadfastly by his convictions in the face of many partisan political pressures.

I regret to see this my respected and esteemed friend retire from Congress, but I wish for him and his good and lovely wife many, many happy years in quiet and peaceful retirement among the scenes and among the people they love so much

## Imports Peril American Standard of Living

EXTENSION OF REMARKS

## HON. WILLIAM G. BRAY

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES Thursday, September 1, 1960

Mr. BRAY. Mr. Speaker, it is becoming increasingly apparent that our present foreign trade policies are wrecking industries in America that are vital to the communities in which they are located and to the employees in these industries, and are eleminating from the American scene industries and skilled workmen so essential to our economy, security, and well-being.

I want to relate some of the circumstances which have led to our unfavorable trade policies and point out certain industries in southern Indiana with which I am especially familiar that are being seriously damaged by our import policies.

BACKGROUND OF PRESENT TRADE POLICIES

Through the centuries, international trade has been a system of exporting those articles which a country or area produces in surplus and importing those which other countries produce in surplus quantities. Countries normally sell what they have in abundance and buy those items which are scarce. In the natural course of international trade one would not expect Brazil to import coffee; Cey-

lon, tea; Iceland, fish; Japan, silk; Honduras, bananas; or Malaya, rubber. Yet, that in a sense is just what we are doing today in our zeal to help various countries improve their economic status. The American people have been motivated by a spirit of altruism to help their neighbors around the world. The question arises as to just how long and to what extent you can materially help your neighbor and still remain strong yourself. The predicament in which we find ourselves today is not the fault of one political party; both parties have assisted in forging trade policies that benefit friendly countries or countries we erroneously expected to be friendly.

Reciprocal trade agreements which were begun in 1934 were intended to work for the mutual benefit of ourselves and other countries. I would be the last to say that no good has been accomplished by reciprocal trade agreements, and I also would be the last to desire to stifle legitimate trade. However, for reasons which I will not attempt to discuss at this time, trade agreements are geared more and more to encourage the importation of foreign-made goods and, in many cases, to discourage the exportation of American products. I have supported amendments which would have made our trade agreements truly reciprocal and not one-sided against American trade. I spoke against the reciprocal trade bill on June 10, 1958, and at that time pointed out the growing problems of unemployment caused by unfair foreign competition. The developments in the last 2 years have shown that I was accurate in my estimate, as imports have cut deeper and deeper into the markets for domestic production.

I have spoken on the floor of the House and have appeared before appropriate committees many times, pointing out specific instances of industries which were being unfairly damaged or even destroyed by these trade practices. Those of us who saw these approaching dangers attempted in 1958 to limit the extension of the Reciprocal Trade Act to 2 years instead of 4. Today I believe the Congress is alerted and would not extend the act without more adequate protection for American industry.

CHEAP FOREIGN LABOR CREATES TRADE INEQUITIES

The difference between labor standards in the United States and those in other countries creates a trade barrier for which even the superiority of American know-how and machinery cannot compensate in all cases. The wages paid to the men who mine the coal, who produce the raw materials and who operate the machines in the factories abroad are often less than one-tenth of the wages paid the man who performs the same type of labor in America. This labor cost factor, both direct and indirect, allows foreign products to be imported into the United States at prices which domestic producers cannot meet and still maintain our high standard of living.

AMERICAN TAX DOLLARS AND KNOW-HOW USED TO DEFEAT AMERICA

This condition was made doubly unfair after World War II when the American taxpayers began to send billions of their dollars abroad to rebuild damaged industry and install more modern ma-

chinery than American industry enjoyed at that time. We also sent abroad the best in know-how—our experts in the fields of farming, engineering, production, and other technical assistance. Industry was even called upon to surrender to foreign countries trade secrets that they had previously kept from their competition here. Although I have mentioned all of this on the floor many times, in the closing of this session, I again want to point out a few specific inequities I have found which affect southern Indiana.

STONE, GLASS, TILE, AND WOOD PRODUCTS

Veneers, plywood, and fabricated wood products such as furniture and doors are moving from European and Asiatic markets to the United States at accelerated rates.

As indicative of a trend, a \$140 million Lincoln Cultural Center in New York City, partially being paid for by Federal funds, is being built entirely out of Italian stone, carved by stone masons in Italy.

The American glass industry will be destroyed completely within a few years unless remedial action is taken. Last year 8.5 million boxes of window glass were imported into the United States—one-third of the normal U.S. production. That represents a gain of more than 100 percent in less than 2 years.

Structural tile from Spain threatens to replace the demestic product within a few years. Clay sewer pipe faces the same fate from foreign imports. Foreign workmen are held to wage rates of only a fraction of those paid to their American counterparts.

RUBBER GOODS, GARMENTS, SHOES, AND BRUSHES

Those industries in American manufacturing rubber products such as clothing, raincoats, and the like, are facing competition from Japanese manufacturers that is impossible to meet under present Government trade policies. Japanese labor that receives less than one-tenth of what American labor receives will completely eliminate our producers unless our country does something about it.

Imports from Japan and Hong Kong are cutting heavily into the garment industry of the United States.

Shoes from Italy and other countries are replacing those made in the United States. Advertisements even attempt to make foreign-made shoes the style today as opposed to our own domestic-made shoes.

The brush industry is also threatened by imports.

TV-RADIO PARTS, BATTERIES, AND VARIOUS ELEC-TRONIC ITEMS

The great American electronic industry is facing rapidly increasing competition from Japan. Although the United States has pioneered in this field, once the engineering and tests are completed, then cheaply paid Japanese labor is able to produce it at far less cost than can our own workers who enjoy our high standard of living.

COAL AND OIL

The importation of residual fuel oil, principally from Venezuela, has caused a cutback in domestic oil production and has replaced 43 million tons of coal

which would have come from American mines and provided jobs for 20,000 miners. I have heard it stated that we were purchasing this residual fuel oil from Venezuela to help them and to build friendship, yet when Vice President Nixon visited Venezuela mobs attempted to murder him.

AGRICULTURE

The importation of 800 million pounds of meat, in 1959 adversely affected the market for livestock raised on American farms. This was an increase of 100 percent over 1957 imports.

A greater damage to U.S. agriculture, however, results from the importation of products that take the place of American-grown products. A good example of this is the increasing importation of casein, a milk product. Last year more than 100 million pounds of casein were imported. In hearings on this matter, Mr. W. E. Huge, vice president of Central Soya Co., stated:

Duty-free imports of casein directly displace a potential market for industrial isolated soybean protein approximating the equivalent of 6½ million bushels of U.S. soybeans annually.

Importing products which are also raised on American farms depresses our farm markets.

AMERICAN INDUSTRY MOVING ABROAD

When American industries found that they were failing to compete with the cheap labor abroad, they began to build factories abroad to utilize cheap foreign labor and power and ship their goods back to the American market. Over 3,000 of the leading American manufacturers have spent a total of more than \$27 billion in establishing plants abroad.

On August 17, 1959, on the floor of the House, I discussed this trend in detail, emphasizing the effect it ultimately would have on American industry. Not only does this trend injure business today, but it also takes away from American business the research which develops business and industry for the future.

THERE IS A SOLUTION FOR THIS PROBLEM

There are sensible solutions to our trade problems-solutions which would not stifle legitimate trade and which would return us to the principles that were intended in the original reciprocal trade legislation. Several of us in Congress attempted to accomplish this through amendments to the bill in 1958. We attempted to give the Tariff Commission rather than the State Department the authority to furnish the list of articles to be negotiated under reciprocal trade agreements. We also attempted to allow agriculture and labor to be heard by the Commission before harmful negotiations were undertaken. We attempted to include provisions which would allow farmers, farm organizations and related agricultural interests to appeal directly to the Tariff Commission. We lost in those attempts, but I believe that we are all becoming sufficiently aware of the injury to American labor, business and farmers so that when the renewal of this legislation comes up again, such amendments certainly will be adopted.

Another solution to our present trade difficulties has been offered which appears to have real merit. It is suggested

that the United States base its tariff in an inverse ratio to the wages paid in the exporting country. This would cause an importer of cheap-labor products to pay a higher tariff, which would prevent the present gross unfairness to American producers and should tend to raise the wages in exporting countries.

REASONS BEHIND CONTINUED INEQUITIES IN TRADE POLICIES

There are several reasons for the resistance to a trade policy that would be fair and equitable to American producers. Many fail to realize that the reciprocal trade agreements are operating in total disregard of the meaning of the phrase "reciprocal trade."

Another reason is that it is human nature to like to sell high and buy low. If we could draw 1960 wages and buy at 1932 prices, it would be wonderful. However, the workman who loses his job to the Japanese workman cannot pay his landlord, his doctor, his grocer, and he cannot pay taxes that pay the teacher. When enough Americans lose their jobs in this manner, the national economy will tumble.

There is also a very powerful lobby which encourages imports into the United States. Billions of dollars are made by those who import products into the States, and their public relations directors are doing a most effective job.

Most foreign countries do not receive imports from America in the same altruistic spirit as we receive theirs. In fields where American know-how and capabilities are so great that we can overcome the obstacles of the low wage rates of other countries, many artificial barriers are placed against American products, such as excessive tariffs, quotas, blocked currencies, and absolute prohibition.

These increased imports from abroad are the principal cause of our diminishing gold reserve.

As I have pointed out for the last 4 years, the American standard of living is the highest in the world, and it is still improving. However, the inequities against American business are increasing. Many industries have as yet been unaffected by our trade policies, but each year more and more American industries are being injured and some are folding up or moving out of the United States.

In the coming session of Congress something must be done to remedy this situation. The responsibility of trade and tariffs belongs to Congress according to the Constitution. We must again assume our direct responsibility and act in the best interest of America.

New Horizons

EXTENSION OF REMARKS

## HON. WINT SMITH

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES
Thursday, September 1, 1960

Mr. SMITH of Kansas. Mr. Speaker, I wish to call to the attention of the

Members a statement by Dr. Austin Smith, president of the Pharmaceutical Manufacturers Association, Washington, D.C., entitled "New Horizons," in which he points out what might be expected from the U.S. pharmaceutical industry under our free enterprise system:

I want to talk about the future, to tell you what we think we see in the future, and to discuss with you some of the pharmaceutical industry's plans to advance a national purpose upon which there is no disagreement. That national purpose is the conquest of disease, and with each new battle won, longer, healthier, and more rewarding lives for our people. Then I shall return to examine how certain activities and trends discernible today can affect this national purpose for good or for ill.

### THROUGH THE LOOKING GLASS

It is, let us say, the year A.D. 2000. Words that strike fear like cancer, polio, heart attack, have become as unexciting as diphtheria, typhoid fever, and smallpox were in the language of 1960. Far less serious, but at best a real nuisance, the common cold has been practically eradicated. There are pharmaceutical remedies for all of these; more important there also are preventive remedies.

You can be fitted with a substitute heart or lung.

As you sleep, work, or play a tiny instrument taped to your chest transmits vital body data to your family physician's computing center. If indicated, a return impulse triggers release of a measured prescription dose into your blood stream to avert a silent stroke or a concealed coronary.

There is a pill which enables many to condense a full week's sleep into 48 consecutive hours so that if necessary they can be awake and active continuously for most of the remainder of the week.

Hypnosis has become fully integrated into medical practice with pharmaceuticals designed specifically as adjuncts to such therapy.

The sex of a yet-unborn child can be predetermined in the second month of pregnancy. Moreover, there is mounting evidence of how to improve the human species through controlled mutation of genes.

Undreamed-of remedies are coming from the sea and, oddly enough, from large-scale screening and analysis of the herbs and barks and waters used by the dwindling number of African witch doctors.

Partly because of drugs, severe physical pain can be eliminated and no longer causes anxiety.

Electronic computers continuously record the everchanging characteristics of virus strains. They transmit electromagnetic impulses that correspondingly alter the structure of antiviral medicines stored in pharmacies and drug warehouses and home medicine closets throughout the country.

Application of research into cellular nucleic acids—the so-called mother molecules of life—has created an entirely new field of medicine, preventive genetics, to forestall certain birth abnormalities.

It occurs to me that until very recent years, few spokesmen in any scientific field would hazard so long a view through the looking glass of history yet to come—certainly not 40 years ahead, at any rate. To do so would be to invite labels ranging from harmless crackpot to certifiable lunatic. Visions of the future were safely reserved to the fiction writers—and for an escape from the workday world and its realities, one might turn of an evening to the daydreams of a Jules Verne or the social nightmares of a George Orwell.

Today, however, all of us are flipping ahead through the calendar, and nobody laughs or sacers. So much of yesterday's science fic-

tion has become today's science fact, and in many ways Buck Rogers seems an average young astronaut, and not an exceptionally gifted one at that.

No doubt the change was heralded by the harnessing of nuclear energy, first shown to the world with the atom bomb. But even those who at the time may not have seen with clarity how swiftly the future was crowding the present, must have awakened with the launching of artificial satellites, the dawn of the space age.

These two dates in current history are central to our subject tonight, for it was in the interval between the two that a less noisy but no less spectacular revolution occurred in medicine, ushering in what we might call the age of chemotherapy. Within less than a generation, from roughly 1940 to 1960, more effective new drugs to prevent, diagnose, and treat countless illnesses became available than in the entire sweep of recorded medical history. The well-known sulfa drugs \*made headlines in the late thirties, but it was the forties that electrified the medical world.

First in the early 1940's came penicillin and in swift succession the broad-spectrum antibiotics to fight infection. Then came the steroid hormones—cortisone, hydrocortisone, dexamethasone, and the rest of this galaxy of stars, giving relief to millions of arthritis sufferers who would otherwise be crippled today, and to sufferers from scores of other serious or annoying conditions. We have the tranquilizers and their opposites, the psychic energizers, which have cut the populations of our mental hospitals and restored many thousands of mentally disturbed persons to productive lives. And of course, there are hundreds of others too numerous to mention here.

A qualitative measure of the scope of this revolution in drugs can be glimpsed in a survey conducted by one of our leading companies which found that 80 percent of the prescriptions written for its products during the third quarter of 1959 could not have been written 10 years before. Why? The drugs did not exist then.

But it is in human terms that the acceleration of medical progress, in which chemotherapy has so important a role, finds its most meaningful expression. In the years from 1930 to 1958 alone the death rate from Influenza and pneumonia dropped 68 percent. Deaths from killers like gastritis, duodenitis, enteritis, and colitis dropped 82 percent. Child deaths from all causes dropped 57 percent in infants under 1 year of age, 80 percent in children 1 to 4 years old, and 71 percent in children 5 to 14 years old. It this same period modern drugs have helped add nearly 10 extra years to the average American's lifespan.

### RESEARCH: FORECAST OF THE FUTURE

There are solid, supportable reasons to expect cancer cures and even a cancer preventive at least by the year 2000. For one thing, within a very few years we have already developed more than 20 compounds now used in the treatment of various kinds of cancer. These are not cures, to be sure, but some of these preparations prolong the lives of cancer patients and in some cases even cause significant remissions in certain forms of the disease. This is real progress, for in one sense the ultimate purpose of medicine is to prolong the life of a given individual to coincide more or less with average life expectancy of the times. Accordingly, even a few years or months in that direction must be considered a step forward.

But more significant is the fact that massive retaliation against cancer and other killer diseases is very new and very promising. In the cancer war alone, in 1958, 28,000 chemicals, compounds, or other substances were prepared or obtained, and biologically tested in pharmaceutical industry laboratories. Of

these, 60 proved promising enough to test clinically in humans. In 1959, according to figures PMA released only recently, 36,000 substances were laboratory tested, and of these 59 showed promise for clinical testing.

A similar research crusade is being waged against heart and cardiovascular diseases. More than 20 effective new drugs are in wide-spread use today, all of them developed since 1939. In 1958, from 8,200 substances tested, 187 were selected for testing in humans. In 1959, the latter figure was 164.

And the same applies to other leading diseases. In 1959, 841 substances which showed laboratory promise for their effectiveness against allergy and infectious diseases were tested in humans; 217 substances were tried in the area of arthritis and metabolic diseases; and 321 were studied in the field of mental health, neurological diseases and blindness.

Thus each year we have recruited promising new cadets for our army of effective drugs. From this unending parade will come improvements in the form of added years of life for those who suffer from today's most vicious diseases. Let us make no mistake: The drugs that cure or prevent cancer, or that insure again a fatal coronary occlusion, will be worth all the hundreds of steppingstone drugs that pointed the way to them, those which merely helped but did not prevent or cure. There is no way on earth to assess the price, for no price is really too high to vanquish enemies like these.

We say that the progress we envision and the progress we have enjoyed in recent years is priceless. Yet the price is being questioned. Thus it would be a mistake to overlook the tremendous economic impact the lengthening of life and the alleviation of suffering have on the individuals helped, and indeed on the overall American economy.

I ask you to imagine what it means to the dignity and to the economic well-being of the crippled arthritic when, through the administration of corticosteroid drugs, he leaves his wheelchair to return to his job. Or to contemplate the saving in expense and the improvement in the income of the mental patient who spands months rather than years in the hospital, thanks to the tranquilizers and psychic energizers. And how do you compute the economic impact on the family of a child who does not die of an infection but lives a productive life into old age, because of the antibiotic drugs?

The National Health Education Committee estimates that 3,840,000 lives were sayed in the 20 years following 1937, primarily by the medical research discoveries of the sulfa drugs and antibiotics. This represents a decline of 15 percent in the national death rate in just two decades. To gage the impact of this feat on the economy, consider just one year, 1957. In that year, according to the NHEC, the Federal Government collected \$1 billion in income taxes alone that would have been lost without this great saving in life. And in the same 365 days, \$7.6 billion was added to personal income simply because more people lived and worked longer.

Now in that same year—1957—arteriosclerosis and related diseases took the lives of 215,320 persons of working age. Let us suppose a drug, or several drugs, had been available to add 1 more year to those productive lives. What would this have meant to the national economy? A conservative computation shows that even this small progress would have provided an additional \$1 billion to personal income and \$146 million in revenue to the Treasury Department. If that contribution is possible through a small improvement in present treatment, what could we expect from curative drugs?

Let's look briefly at another area in which the pharmaceutical industry has made great strides in recent years—the field of mental health. For 10 years after World War II the population of State mental hospitals zoomed ever upward, rising an average of 10,000 per year. Then came the tranquilizers to help bring about, for the first time, a reversal in this trend. The mental population, instead of rising, began a descent. Between 1955 and 1958 the population of patients in State mental hospitals decreased by 13,000.

We could, if there were time, work up some impressive statistics about the savings this revolutionary change wrought on personal and State mental-care expenses. But I'll confine myself to just one final figure that I think you will agree has had a beneficial impact on our own pocketbooks. If this alarming increase in the population of State mental hospitals had not been reversed—if we were required to provide 10,000 new beds a year over that period of 1955–58—the cost to the States would have been another \$860 million.

No: we cannot hang a price tag on so priceless a possession as a man's good health, or on the extra years of life he may have gained from medical progress. But we can measure, ns these few examples show, the meaning in economic terms of the relief from pain, the extra years of work, the shortening of hospitalization. We may not always realize it, but each of us owes some part of our prosperity to the increased vigor and

longevity of our society.

We were talking about recent advances in research into specific medical problems. But much of our medical research is more fundamental in nature. In the laboratories of the drug industry and in private laboratories, in universities, hospitals, and in the laboratories of the National Institutes of Health other forms of basic research are also being pursued. Success in these areas may well narrow the fields in which we must search for disease preventives and cures.

For example, biological research into the living cell—what it consists of and why it works as it does—not only promises clues to the essence of life itself, but has already given us valuable insights into the cancer riddle and should give us many more. For we do know that cancer cells develop when something happens to normal, healthy cells. When we learn more about the nature of that something, medicine will take a giant step forward.

In this respect it is significant to report that in 1960 the American pharmaceutical industry will give to others an estimated \$5.700,000 in grants and contributions for education and research in the medical and related sciences. This is outright, nostrings-attached support of scientific inquiry in addition to and apart from the more than \$200 million the prescription drug makers will devote to their own research.

When we consider how these expenditures of effort, brainpower and money are increasing year by year in geometrical progression, it is difficult to see on the basis of these facts alone how we can fail to achieve our hopes for the year 2000.

But it is not enough to say that we must win through to victory regardless of the cost. In a free enterprise industry the cost must be counted. Research expenses can be incurred only if there is hope of recouping the cost through the sales of useful medications at a profit. This means that the 2,000 research failures that precede every commercial success must be paid for out of the income provided by prescription items that do sell in quantity.

I am sure you are all familiar with the recent approval of an oral polio vaccine by the Surgeon General who, after extensive testing of the live virus vaccines, approved one of them for use in this country. This act marks a significant step forward toward the elimination of one of our most virulent scourges. Yet I wonder how many people noticed a small item that didn't appear in any headlines and is notable only because it is commonplace in the pharmaceutical in-

dustry. That item said that, although the Surgeon General approved one oral polio vaccine for mass use in this country, two others were not approved. One company, the item went on to say, had spent upward of \$13 million to find, develop, and test an oral vaccine that did not gain approval of the Government. Thirteen million dollars in a good cause, for research that may have provided new fundamental knowledge that will find application elsewhere, but \$13 million also for a product that may never transcend the testing stage.

Although this is a recent incident it is not an isolated one. The company that finally succeeded in synthesizing cortisone has estimated that its research costs approached \$25 million. A competing company spent many millions before abandoning the job as hopeless. In the past decade the pharmaceutical industry has invested \$1 billion in research and, even in a good year, only about 40 new chemical compounds are put on the market. But by the middle of this decade our industry will be spending a similar amount every 2 years. I find it hard to believe that such an intensification of effort will not speed the advance of medical progress.

THROUGH THE LOOKING GLASS, DARKLY

But, of course, we can fail.

We can fail if other press divorce proceedings to break up a uniquely successful marriage between the drive for financial gain on the one hand and the drive for scientific success on the other. As we have seen, pharmaceutical research can only be pursued at enormous cost in dollars. Others who would throttle the financial incentives of the drug industry might reflect on the consequences to the Nation through the stagnation of privately financed research programs that promise better health and longer life for millions.

We can fall if others tamper with the machinery of a delicately balanced system—one that expects and depends on thousands of costly failures to point the way to one success that will have priceless value for humanity.

We can fall if others seek to substitute the "iron maiden" of bureaucratic control for the independent decisions of freemen in a free industry acting in the proved traditions of a free society. Here the lesson should be particularly clear. In the 42 years of its existence under total governmental control, the pharmaceutical industry of the Soviet Union has produced absolutely nothing worth while. But it has not hesitated to pirate and to market our discoveries. Ironic, is it not, in the constant, deadly game of one-upmanship with the Russians, some people advocate that we throw away a trump card? Ladles and gentiemen, let me remind you, there has been no missile gap in pharmaceuticals.

To us in the pharmaceutical industry and to those of you who are at the same time students of our industry and judges of our performance, the possibilities for failure that I have sketched above must surely seem unthinkable. All the history of past achievement and the promise of future achievement stemming from present efforts in pharmaceutical research argue for success.

General of the Armies John J. Pershing

EXTENSION OF REMARKS

## HON. HAROLD C. OSTERTAG

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES Thursday, September 1, 1960

Mr. OSTERTAG. Mr. Speaker, this month we will celebrate the 100th anni-

versary of the birth of a great American and a great soldier, General of the Armies John J. Pershing. Many of us here were inspired to serve under his victorious leadership in the first great war of this century.

Before playing his historic role in the First World War, General Pershing fought in the Spanish-American War and the Philippine insurrection, and commanded the troops sent into Mexico in pursuit of Villa in March of 1916. After serving as commander in chief of the American Expeditionary Force in World War I from 1917 to 1919, he was appointed Chief of Staff of the U.S. Army on July 1 of 1921, in which capacity he served until his retirement in 1924.

General Pershing was a product of our democracy. No nobler example of the rise and progress of a humble citizen to greatness and a nation's gratitude is anywhere presented to us. He was a soldier of human liberty. The glory of his achievements is an epic. The historians who come after us to record the events of our times will linger in admiration over the career of this great American. Wherever men enjoy liberty, there will descend upon his memory the benediction of their heartfelt prayers.

May his spirit ever guide us with a truer and nobler courage, to stand as soldiers should stand in the battle to preserve our liberties.

National Cultural Center—Progress Reports by the National Federation of Music Clubs, the New York Times, and the Journal of the American Academy of Arts and Sciences

EXTENSION OF REMARKS

## HON. FRANK THOMPSON, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES
Thursday, September 1, 1960

Mr. THOMPSON of New Jersey. Mr. Speaker, 2 years have elapsed since the 85th Congress, on August 22, 1958, enacted into law the National Cultural Cen-

ter Act.

It seems little short of amazing that 2 years after Congress adopted the National Cultural Center Act, and only 3 years before it is due to expire, officials of the National Cultural Center have reached the point where they feel they must know what is to go into the center and what purposes it is to serve.

The New York Times reported on July 31, 1960, that:

To aid them come to conclusions about what the center should offer, the trustees have engaged G. A. Brakeley & Co. of New York to interview several hundred persons on such questions as how a national cultural center can encourage interest in the performing arts and what organizations should operate in the center.

Prof. Arthur Schlesinger, Jr., of Harvard University, tells us there is no automatic virtue in councils such as that which the Congress established to bring the National Cultural Center into being.

Professor Schlesinger adds that-

After a protracted delay, President Eisenhower named the 34 members of the new [National Cultural] center's board of trustees. Of the whole group, only a handful had shown any evidence of knowing or caring anything about the arts; the typical members include such cultural leaders as the former football coach at West Point.

\* \* His television adviser \* \*. We ought to set up a Federal Advisory Council on the Arts composed, not of Presidential chums and other hacks, but of professional and creative artists and of responsible executives [museum directors, presidents of conservatories, opera managers, etc.].

It is widely known that a Presidential assistant, Robert Hampton, who handles the work of the White House patronage desk, selected the people whom President Eisenhower later appointed to the National Cultural Center. When one looks at the tremendous success of the Lincoln Center of the Performing Arts in New York City, one is forced to conclude that part of the current troubles of the National Cultural Center are directly traceable to the White House patronage desk.

I include as part of my remarks a section of the legislative report of the National Federation of Music Clubs and an article from the New York Times:

NATIONAL FEDERATION OF MUSIC CLUBS RE-PORT OF NATIONAL LEGISLATION CHAIRMAN TO NATIONAL OFFICERS AND NATIONAL BOARD OF DIRECTORS (1959-60) MEETING IN LOUIS-VILLE, KY.

### NATIONAL CULTURAL CENTER

The 10-acre Foggy Bottom site selected for the National Cultural Center is too narrow and awkward for the architect's plan to build a vast edifice housing all the performing arts under a single roof. The Commission of Fine Arts has raised some fundamental questions about the construction of the overpowering Theodore Roosevelt Bridge which might overshadow the cultural center and render the site generally untenable.

George A. Brakeley & Co. are interviewing top performing artists and art patrons throughout the Nation (to date 150 have been interviewed) on such topics as whether the cultural center should serve principally the city of Washington or the entire United States; how a cultural center can encourage interest in the performing arts; and what organizations should operate in the center.

Carlton Sprague Smith, music division, New York Public Library, heads a panel of five currently checking reaction to the idea of a national cultural center.

When survey work has been completed, the fund raising will begin with the initial appeal to foundations and great wealth, and a later appeal to the lesser wealth. Actual construction will begin only when one-third of the required funds have been obtained.

Still undetermined is the role Government should play in providing Federal guldance to the cultural center and whether or not Government should or will appropriate funds to assist the work of the cultural center.

What is needed realistically, practically, and noncompetitively: not the current \$75 million grandiose proposal, but one all-purpose auditorium that could be constructed and endowed for \$25 million or \$30 million for use as a symphony hall where opera and ballet could be performed. Such a structure should be designed to permit desirable additions and improvements as adequate funds would be acquired.

The fact that some appointments to the Advisory Council on the Arts have been people from fields of endeavor totally unrelated to the arts (a football player, for ex-

ample), people who never at any time were even remotely aware of the numerous legislative proposals introduced and debated in the Congress for many years for a cultural center makes it not at all surprising that 2 years after congressional authorization to construct a cultural center, what should go into such a structure neither has been determined nor is understood.

Mr. Robert Humphreys, staff director, National Cultural Center, recently informed your national legislation chairman of the appointment by Chairman Robert W. Dowling of National President Bullock to the Advisory Council on the Arts, official confirmation by President Eisenhower anticipated approximately September 15, 1960, 2 years after the enactment of the National Cultural Center Act (Senator J. WILLIAM FULBRIGHT and Representative Frank THOMPSON, JR., sponsors), September 2, 1958.

[From the New York Times, July 31, 1960] CULTURAL CENTER—HAVE THE PLANNERS OF NATIONAL PROJECT PUT THE CART BEFORE THE HORSE?

#### (By Ross Parmenter)

Though it is still in the planning stage, the National Cultural Center has already had its ups and downs. One of its greatest ups came on September 2, 1958. That was the day Congress authorized the center and set aside 9 acres along the Potomac for its construction. But a down followed fairly quickly. Sherman Adams, President Eisenhower's assistant, was one of the center's godfathers and his exit from the Capital meant a delay in the appointment of the necessary trustees.

It was 5 months before the administration got the trustees named. Thereafter things moved fairly rapidly. Edward Durell Stone, who designed the U.S. Pavilion at the Brussels World's Fair, was engaged to draw up plans for the center and a fundraising firm was engaged to promote it.

Mr. Stone got to work and his plans were unveiled with a fanfare at a news conference in Washington on November 21. It was held in the office of Arthur S. Flemming, Secretary of Health, Education, and Welfare, who is the chairman of the center's board of trustees. The plans showed a series of great circles with the Potomac Parkway being bent back from the river so the center would be directly on the waterfront.

### FIVE HALLS

Five halls were called for: an opera house seating 4,000; a concert hall seating 3,000, a playhouse seating 1,800, an auditorium seating 1,000 and another seating 500. All were to be under one roof, with a grand salon capable of seating 6,000 as an extra dividend.

Shortly after the plans were announced, the center had another down. It discharged its fundraising firm.

Now it is in a period of soul searching. One reason is that realistic appraisals have brought home the fact that the \$25 million envisaged as necessary for the center 2 years ago is not nearly enough. Now it is seen that to get the center in operation will require closer to \$75 million. Center officials feel that they will have to be a lot more definite about the kind of center they plan to create before they can start turning to the public with appeals for that much money.

So far the center has had substantial funds available for planning, and it is estimated that about \$200,000 has been spent to date. And at present there is no financial pinch—though the backers wish to continue anonymous. However, it is known that present financial support will not be sufficient to build the center, and the trustees are committed to a policy of private capitalization.

Before they can turn to the foundations and to other sources of wealth for heavy

support, the trustees feel they must have something clear-out to offer. Specifically, they feel they must know what is to go into the center and what purposes it is to serve. At present about the only major agreement is that the center, like the one proposed for New York's Lincoln Center, should be for the performing arts.

Some feel that, in placing so much preliminary emphasis on the physical plant of the center, the cart has been placed before the horse. To aid them come to conclusions about what the center should offer, the trustees have engaged G. A. Brakeley & Co., of New York, to interview several hundred persons on such questions as how a national cultural center can encourage interest in the performing arts and what organizations should operate in the center.

There is hope that the Nation itself will engage in the discussion. Should the center contain, for instance, a national television center, which would operate in somewhat the same way as the British Broadcasting Corp.? Another burning question is whether it should serve principally as a cultural center for the city of Washington, or whether it should transcend Washington to serve the whole country?

The role of the National Symphony in the center dramatizes this last question. If the center becomes the home of the Washington orchestra, it will be favoring a local orchestra over all the other orchestras of the Nation. Then there is the question: Are there enough audiences in Washington to go round for a performing arts program so much larger than the Capital enjoys at present.

Carleton Sprague Smith, of the New York Public Library, who prepared a major report on the library-museum for Lincoln Center, has been engaged as one of the principal investigators for the national center. He has taken a forthright position on the legislation setting up the center.

"This public law," he has noted, "make no mention of the national role the cultural center should play. It is a purely Washington operation. This naturally causes considerable resistance. Unless another law is passed that takes the Nation into consideration the National Cultural Center will not come into being."

### TOO GRANDIOSE

Mr. Smith said it had also become evident from his investigations that most people in the arts feel that the present plan of five theaters for the center was too grandiose. The feeling is that three would be enough. There is strong sentiment, too, for making each auditorium an all-purpose hall. That is, able to present concerts, operas, plays, and ballets. The capacities frequently suggested are 3,000, 1,800, and 1,000.

The people of Washington showed their en-

The people of Washington showed their enthusiasm for the center in May. A dinner for the cause was announced. Within 2 weeks, even though the artists to appear had not been revealed, the 700 dinner tickets were snapped up. And they cost \$8.50 apiece.

Having only the acoustically poor Constitution Hall for concerts and Lisner Auditorium and the Capitol Theater for other actractions, Washington certainly needs better playing facilities both for touring attractions and for its own performing organizations. So the city stands to benefit greatly from a handsome center. Everyone feels, too, that better halls will cause more attractions to play in Washington.

Lifting the cultural tone of the Nation's Capital would help the Nation. Especially would it improve the impression of the Nation, made through its Capital, on representatives of foreign countries. They in turn would transmit their views to their home countries. But many non-Washingtonians Mr. Smith had spoken to said they could not get very enthusiastic about any center in Washington unless it truly served the Na-

tion by stimulating the performing arts everywhere else.

His own feeling is that it should be partly educational, that it should stir interest in the arts as well as providing a showcase for the best performing art that is available. But this raises the question of what role the National Government should play in providing Federal guidance. Ultimately, too, the question will arise as to whether the Government should or will contribute money to aid the center's work.

Robert Humphreys, staff director for the center, expects the surveys to be completed by the fall. A widespread campaign for money will start shortly thereafter, with the first appeals going to the foundations and the great wealth. Then there will be a shift to "lesser wealth." And it is expected that there will be no start on actual construction until at least a third of the needed money is in the till.

Besides its trustees, the center has an advisory committee. The committee includes Martha Graham, Helen Hayes, Herman D. Kenin, Howard Mitchell, Robert Montgomery, and Fred M. Waring.

## Our Great American College Fraternity System

EXTENSION OF REMARKS

### HON. GEORGE GRANT

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES Thursday, September 1, 1960

Mr. GRANT. Mr. Speaker, during the last few years, an attempt has been made by certain persons to bring about a change in our great American college fraternity system. These "would-be changes" seem to overlook the fact that college fraternities, as they have functioned through the years, have rendered a distinct service to college life in many ways. For example, friendships due to close association in undergraduate years, are kept alive by alumni members throughout life. However, it is not my Durpose here to defend the college fraternity system, as such; this I would gladly do in another forum. The pros and cons of the college fraternity system is not the issue at this time; I am here to call attention to the membership of this House the real threat that will eventually destroy these organizations through forcing them to lift all restrictions relating to membership.

I believe I can approach this subject With an unbiased opinion. Upon entering college, I did not join a fraternity. Later, when I did, this was the first secret organization of which I became a member. Some of my best friends in college were not members of any fraternity while others were members of fraternities for Which I could not meet the membership qualifications. My college fraternity accepted only those students who professed the Christian religion and were members of the Caucasian race. Generally speaking, the membership of the Ancient Free and Accepted Masons is restricted to those of the Jewish and Protestant Christian faiths, Elks, members of the Caucasian race, and so on.

My college fraternity was founded by two Protestants and a Catholic. Later, I joined the Woodmen of the World, Elks, Moose, and the Masonic bodies, including the Shrine. I have sat in Masonic and Shrine meetings with members of the Jewish faith and in the Elks and other secret orders with members of the Protestant, Catholic, and Jewish faiths. Certainly, there has been nothing other than brotherly relations in these groups. Now, do you mean to tell me that this is un-American?

Members of the Negro race have a Masonic and Elks order of their own which are large organizations. To confuse this issue with that of civil rights is pure folly. This has nothing to do with civil rights or any phase of integration. Certainly, I would not propose to all Negro fraternities and sororities that they be required to accept members of the Caucasian race: nor would I say to a Jewish fraternity that it must accept those of other faiths, to a Catholic fraternity that it must accept members other than Catholics, to Acacia that it must accept members other than Masons-none of these things would I do-any more than I would tell a church what members it must accept.

While the present challenge of changing membership restrictions seems to be directed only toward college fraternities, if its advocates are successful on this level, they will eventually move to all fraternal orders, such as the Masons, Knights of Columbus, Knights of Pythias, Woodmen of the World, Benevolent and Protective Order of Elks, Moose, Shrine, and many others.

By nature, there is a feeling of fraternalism in the heart of man; do nothing to suppress it. Because man wants to limit this close, social fraternalism in no way signifies that he does not believe or give voice to hope and faith in universal brotherhood or that he necessarily believes in discrimination in the sense it is today used, particularly in politics and political life. Keep politics out of fraternities.

We must be careful that in our zeal for democracy we do not destroy democracy itself; keep up this trend, and in time fraternities will be mere instruments of the state-being told whom, when, and how they must initiate. Change the membership restrictions because of the explanation of its advocates that this is all they want, and the next thing will be "Now that you claim to have changed your constitution and bylaws relating to membership, show evidence of good faith; in other words, show that you mean it by initiating a certain number of those whom you did not heretofore solicit."

Everything in America is not wrong. Change for the sake of change should never be. Everything that is old is not necessarily wrong. The principles upon which college fraternities were founded will never change. There are certain truths that are eternal—the same yes-

terday, today, and tomorrow. Truth, love, and honesty will never change; and, in my opinion, this great American college fraternity system should not either

You cannot have a fraternity in name alone. The college fraternity is a product of our college life. Either this system, as we know it, is worth fighting for: or, it is not. If there is no will to fight for its survival, then it is not worthy of continuance. It is high time to make up our minds. As for me, mine is made up. This is one place where there can be no compromise. Either the selective system of membership is right, or it is wrong. If it is wrong, then the whole fraternity system is wrong. If fraternities are a bad influence on college lifelet us prohibit them-either by legislation in State universities or by action of the board of trustees or other proper authorities in private schools. If one believes that the fraternity system has no place in American colleges, then let him come out in the open and advocate the abolition of all fraternities. In other words, let us admit that the whole idea is wrong and go out of business.

The founders and pioneer members of our college fraternities did not have easy sailing. Stumbling blocks of many kinds were thrown in their pathways. And over the years both State and private institutions have from time to time forbidden fraternities on the college campus

I recall one particular instance, where even though fraternities were not forbidden, the school authorities forbade those students who were fraternity members to participate in any extracurricular activity, such as athletics, glee club, and so forth. However, this restriction was later withdrawn. In other colleges, subrosa chapters existed; but mark well that in none of these instances was there ever any challenge to the method of membership selection.

For many years, there have been rules and regulations, and properly so, by college authorities setting out scholarship requirements, particularly those with respect to rushing. But the present challenge is something new and of an entirely different order. This, too, will pass if it is met by a united front on the part of a great majority of the fraternities. "United we stand; divided we fall" could never be applied to a more appropriate situation than in the instant case. Every fraternity should join forces and serve notice to these "would-be do-gooders" to keep their hands off these private organizations.

I am aware that this issue has popped up from time to time over the years, but it never got anywhere until in recent years when there has come a pressure from without seeking to pick up a few converts from within and have them bore within their individual fraternities. This new philosophy is not catching on in the way some of its proponents had hoped it would, but their form of ideology never gives up; rather, it continues and continues.

I believe in progress; I like to call myself a progressive. But do not let us in our desire to accept so-called, universal brotherhood feel that it devolves upon us to dictate to all fraternal orders as to just what their principles and requirements of brotherhood are to be.

Do this today, and tomorrow you will be told whom you must take in. This effort is only the beginning; continue to give ground, surrender the principles upon which your fraternities are founded, do away with the cornerstone of the organization, the "arc of covenant," so to speak, and all is lost. The very foundation of every fraternity is its freedom of choice in selecting its members. Destroy that landmark and you destroy all.

Either we are going to have fraternities, or we are not. If we do, they can exist only as real fraternities and be worth anything where each organization has the God-given right to set its own qualifications for membership.

Over the past years we have noted from time to time where in a few isolated instances some local chapter would pledge or sometimes initiate a person who did not meet the qualifications of the national organization; and, in turn, the local chapter would be penalized in some manner or have its charter withdrawn. You cannot, of course, have a national organization which is worth its name that does not maintain discipline and enforce its constitution and bylaws.

Recently, a national fraternity holding a convention changed its membership requirements which led to the resignation of one of the founders of this fraternity

Webster defines a fraternity as the state or quality of being a brother or brothers; brotherliness; a group of men joined together by common interests, for fellowship, and so forth. "Baird's Manual of American College Fraternities" defines fraternity as a mutually exclusive, self-perpetuating group which organizes the social life of its members in accredited colleges and universities, as a contributing factor to their educational program, and draws its membership primarily from the undergraduate body of the institution. If college fraternities are forced to change their membership qualifications, then the foregoing definitions would be only hollow shells.

If college fraternities do not escape this attempt being forced upon them and is what I conceive to be an un-American trend, then make no mistake about it; the effort will next extend to all fraternal organizations, and on to all private clubs, and then even to the churches. So, I say, hands off—hands off before it is too late to control this spreading infection.

This challenge behooves all liberty-loving persons—whether members of a college fraternity or not—to stop, look, and listen at some of the trends in our Nation today. This is no time for fraternities to act under duress. Many founders of your individual orders were faced with problems and more difficult situations than this, and they certainly did not meet the issue by compromising. Today is not too late to overcome this threat; tomorrow may be.

### Lincoln's Ideals of Government

EXTENSION OF REMARKS

## HON. J. GLENN BEALL

OF MARYLAND

IN THE SENATE OF THE UNITED STATES

Thursday, September 1, 1960

Mr. BEALL. Mr. President, I ask unanimous consent to have printed in the Appendix of the Record the text of a brief talk on "Lincoln's Ideals of Government," given at a special program in the Eastern High School, Washington, D.C., by Mr. Hallie Shorts, a history teacher at that school. I understand that Mr. Shorts is a combat veteran, a scholar, as evidenced by his having won a Phi Beta Kappa key, and popular with his pupils.

Our history teachers in schools across the land not only teach the academic facts of history but have the serious responsibility of teaching young America about the privileges which ensue from American citizenship. It would appear from this talk that Mr. Shorts takes proper advantage of his position to instill in the hearts and minds of his pupils a love for and appreciation of our country.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

LINCOLN'S IDEALS OF GOVERNMENT

Lincoln was—with all his greatness—an understanding man, a sympathetic man with such a sense of humor that he might even smile if I could tell in his presence what I am going to tell you.

I feel a kind of close relationship to Abraham Lincoln. I was born only 30 years after he passed away. I knew people who had known Lincoln. One thing that always impressed me, and encouraged me a bit, was that Lincoln was a homely man, but there was strength and dignity in that homeliness. Perhaps it was to conceal some of that homeliness that Lincoln accepted the advice of little Grace Bedell when she wrote him that he would look better if he let his whiskers grow.

Abraham Lincoln was a Republican and a politician. He never ceased to be a party man. He was a Republican because he be lieved it was his duty as an American to be a Republican because he could best serve his country as a Republican and he based his policy on the creed of the Republican Party for he was thoroughly convinced that the Constitution, the true interests of his country, and the laws of God demanded this. Yet he never governed as a party chief, for he knew that such a procedure would be unpardonable. With utter disregard for consequences and following the dictates of his conscience he was President of all the United States representing and serving all the people irrespective of their political beliefs. During the long bitter Civil War he never once uttered an abusive word about the Southern people and maintained the hope that the war would end and that all the people would be united again in heart as well as politically.

Lincoln's ideals of government were most democratic; again and again in word and deed he expressed his belief that government of the people, by the people, and for the people was not only the best government on earth but the hope of the world. It was only the requirements of a terrible war which caused him, but temporarily, to assume

powers which he believed belonged to the people. How unfortunate it was that he was not permitted to head our Federal Government when peace returned. These ideals were a part of him; they grew from his humble origin. \* \* \* These ideals were enriched from his study of the Bible, from Shakespeare, from the history of his country and of the world and from his own deep reflection.

I should now like to quote from Lincoln's own words in speeches and writings to show what he thought about the various duties and problems of his day and in some cases of our day.

Civil War: I look upon it as an attempt on the one hand to overwhelm and to destroy the national existence, while, on our part, we are striving to maintain the government and institutions of our fathers, to enjoy them ourselves, and to transmit them to our children and our children's children forever.

"In your hands, my dissatisfied fellow countrymen, and not mine is the momentous issue of civil war. The Government will not assail you, unless you first assail it. You can have no conflict, without being your-selves the aggressors. You have no oath registered in Heaven to destroy the Government, while I shall have the most solemn one to preserve, protect, and defend it."

Elections: "When an election is passed, it is altogether befitting a free people, that until the next election, they should be as one people."

Faith: "Let us have faith that right makes might, and in that faith let us to the end dare to do our duty as we understand it."

Government: "This Government must be preserved in spite of the acts of any man or set of men. It is worthy of your every effort. Nowhere in the world is presented a Government of so much liberty and equality. To the humblest and poorest amongst us are held out the highest privileges and positions."

Humility: "I must, in candor, say I do not think myself fit for the Presidency. I certainly am fiattered, and gratified, that some partial friends think of me in that connection."

Labor: "There is no permanent class of hired laborers amongst us. The hired laborer of yesterday labors on his own account today. Labor is the superior of capital and deserves much the higher consideration."

Liberty: "What constitutes the bulwark of our own liberty and independence? Our reliance is in the love of liberty which God has planted in our bosoms."

Public opinion: "Our Government rests on public opinion. Whoever can change public opinion, can change our Government, practically, just so much."

And now I wish to conclude with quotations from two of the greatest speeches of all time—Lincoln's Second Inaugural Address and his Gettysburg Address:

"With malice toward none; with charity for all; with firmness in the right, as God gives us to see the right, let us strive to finish the work we are in; to bind up the Nation's wounds; to care for him who shall have borne the battle, and for his widow, and his orphan—to do all which may achieve and cherish a just and lasting peace among ourselves, and with all nations."

"It is rather for us to be here dedicated to the great task remaining before us—that from these honored dead we take increased devotion—and we here highly resolve that these dead shall not have died in vain—that this Nation under God, shall have a new birth of freedom—and that government of the people, by the people, and for the people shall not perish from the earth."

### Congressman Celler's Report to His Yoters

EXTENSION OF REMARKS

## HON. EMANUEL CELLER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. CELLER. Mr. Speaker, as this year comes to a close, I want to render the accounts of my stewardship to the voters of the 11th Congressional District of New York.

With the close of the 86th Congress, I count the 10 years of my chairmanship of the Committee on the Judiciary as the most productive of my 37 years in Congress. I have taken great comfort in serving some 19 terms and wish to continue in this service as your Congressman and hope you will reelect me in the coming elections.

#### CIVIL RIGHTS

The Judiciary Committee of the House under my chairmanship succeeded, after almost four decades of inaction, in initiating and having enacted two civil rights bills; one the Civil Rights Act of 1957 and the other the Civil Rights Act of 1960, both bearing my name.

Only a portion of the work to be done in this area is complete. I shall continue the long fight, to assure the rights guaranteed by the Constitution to every citizen regardless of race, creed or color, in all areas, including housing, public facilities, schoolrooms, jobs, and the right to vote.

I have been named by the Democratic nominee for President, the Honorable John F. Kennedy, to serve together with the Honorable Joseph S. Clark U.S. Senator from Pennsylvania, to draft the necessary legislation to bring to life the pledges of the Democratic Party platform on civil rights, which I helped draft as a member of the drafting committee of the Democratic platform committee at the Los Angeles Democratic National Convention.

### IMMIGRATION

Under my chairmanship, the Judiciary Committee has taken big steps toward the eradication of inequities in the Immigration and Nationality Act: We have enacted legislation enabling thousands of alien orphans to be brought into the United States and suitably adopted; we have enacted legislation that has hastened the reuniting of families and shortened the wait by many years; we have eliminated many of the burdensome procedures such as preexamination, and have permitted an adjustment of status without leaving the country; we have enacted legislation allowing for the participation of the United States in World Refugee Year; we have enacted legislation which changes from 25 to 15 years the residence requirement which precludes the loss of citizenship by naturalized citizen residing in a foreign coun-

Here again is a task that has not been completed. I shall continue my efforts to amend the Immigration and Nationality Act so that the national origins quota system may ultimately be eliminated and to the end that all distinctions between native born and naturalized citizens be assured of the full protection of our laws and to the end that in our selection of immigrants from Europe there shall be no discrimination as to setting up of quotas against people of southern and eastern Europe, like Italians, French, Spanish, Hungarian, Czechs, Poles, and so forth, and in favor of northern and western European groups. All must be treated alike.

#### DOMESTIC POLICIES-GENERAL

I have sponsored and supported legislation increasing the minimum wage, granting Federal aid to education, extending and strengthening urban redevelopment and slum clearance, and giving aid to depressed areas.

I have opposed all of the legislation that would interfere with the rights of labor.

I have supported, and shall continue to support, medical care benefits for the aged as part of the social security insurance system. I have supported, and shall continue to support, housing construction of more than 2 million homes a year.

#### DISTRICT OF COLUMBIA VOTE

I believe, too, that the Judiciary Committee can take pride in the fact that it succeeded in sending to the States the constitutional amendment, offered by me, which, when ratified by three-quarters of the States, would permit the people of the District of Columbia to vote for President and Vice President for the first time in its history. This is an issue not far removed from the voters of my district since, in a very true sense, it is an extension of civil rights and the wiping away of unwarranted disabilities in the exercise of the ballot. The adoption of the constitutional amendment was one of the most gratifying experiences of my life.

## PRESIDENTIAL INABILITY

While the question of what will happen should the President become disabled while in office was never resolved by the Congress, I am proud of the work my committee and I accomplished in clarifying many of the difficulties. The work of the committee in hearings, special reports, and questionnaires have brought us closer to the solution of this problem.

### PUBLIC DEFENDERS-APPORTIONMENT

Some battles go on Congress after Congress, but it is wrong for any legislator, convinced of the rightness of his view, to despair. Just as the Celler Anti-Merger Act against monopolies finally became law, after a 20-year battle, just so, it is my hope that the legislation which I have sponsored again and again will become law. I have particular ref-erence to an act which would provide attorneys for indigent defendants who cannot afford to hire counsel and, to that other important piece of legislation, to provide for more just representation of the people in the Congress-doing away with gerrymandered districts for political gain.

FOREIGN AFFAIRS

I have supported all legislation to permit the economic growth of the underdevelopd world. It is my belief that this is one of the most potent instruments in the search for peace with honor. International cooperation is an absolute necessity in the world today—we cannot withdraw from the world in isolation. The farthest point in the world today is as close as a rocket ship can make it.

I have strenuously opposed boycotts and blockades imposed by the United Arab Republic upon Israel. I have petitioned the President and the Secretary of State to keep America's promise that the Suez would be free for all shipping, including that of Israel. I have introduced legislation that would prevent the Department of Defense from recognizing the Arab boycott and, hence, preventing American citizens from obtaining shipping contracts to Arab lands if they had traded with Israel. I have urged every reasonable financial aid to little Israel.

I have supported, without reservation, that portion of the Mutual Security Act which permits the President to withhold foreign aid from any country which boycotts and blockades a friendly nation.

I have urged, both in the press and on the floor of the House, increased aid to India since I believe that in the Asian world, India, vis-a-vis Communist China, must prevail.

### ANTITRUST

The work of the Antitrust Subcommittee, of which I am chairman, has been particularly fruitful. The committee succeeded having enacted into law a bill designed to help enforce the prohibitions of the Clayton Act against price discriminations, tie-in arrangements, mergers, and interlocking directorates.

In connection with its investigation of the Federal Communications Commission's relationship to negotiations for the American Telephone & Telegraph Co. consent decree, the subcommittee ascertained that the Commission had failed, despite repeated recommendations by its staff over a number of years, to investigate telephone rates or even to conduct a general telephone rate inquiry. The subcommittee noted, also, that as a result of a \$65 million long-distance telephone rate that had been authorized by the FCC in 1953 without a hearing, longdistance telephone users may have been overcharged \$159 million in the years 1955, 1956, and 1957.

To remedy this situation, the subcommittee recommended that the FCC institute "promptly a comprehensive formal rate investigation." Shortly after the report was issued, the FCC acted upon the subcommittee's recommendation. As a result, on July 24, 1959, the FCC ordered A.T. & T. to cut long-distance telephone rates by \$50 million a year.

As a result of the subcommittee's investigation, the Department of Justice brought four cases to enforce the provisions of the oil-pipeline consent decree. In three of these cases the defendants agreed to the Department's interpretation and stipulated that they would follow the Attorney General's rulings in the

future. On the remaining issue, the Supreme Court on June 8, 1959, ruled against the Department of Justice. This particular issue, the "shipper-owner share" question, was one of the most important that had arisen under the consent decree. The adverse decision of the Supreme Court underscores the need for additional action by the Justice Department if the goal of common-carrier pipeline transportation in the oil industry is to be realized.

Also as a result of the subcommittee's

Also as a result of the subcommittee's investigation of shipping, the subcommittee was able to refer 127 possible instances of violations of the Shipping Act to the Federal Maritime Board and 26 other possible violations of law to the Department of Justice.

The Attorney General, on the basis of the subcommittee's hearings record to that time, embarked upon grand-jury investigations of steamship industry practices in San Francisco and in Washington. Numerous subpenas duces tecum were issued, directing more than 150 firms to produce documents for use of the grand jury. Preliminary litigation, seeking to quash the subpenas, initiated by approximately 60 of those served, was terminated favorably to the Government in June 1960 and the investigations are underway.

The Federal Maritime Board, in response to the subcommittee's referral of possible violations, opened a number of important investigative and rulemaking dockets.

PORT OF NEW YORK AUTHORITY'S INQUIRY:

In March 1960, at the request of members of the New Jersey congressional delegation, the staff of the Antitrust Subcommittee was directed to make a study of the activities and operations of the Port of New York Authority, including a review of the scope of the authority's major operations.

The Port of New York Authority is an interstate, regional development authority established under bistate compacts between the States of New York and New Jersey, approved by Congress in 1921 and 1922, for the purpose of dealing with the planning and development of terminal and transportation facilities and improving the commerce of the port district. It was the declared expectation of Congress that the effectuation of these compacts would "better promote and facilitate commerce between the States and between the States and foreign nations and provide better and cheaper transportation of property and aid in providing better postal, military, and other services of value to the Nation." Under the Constitution, all interstate compacts must be approved by Congress. When the Port of New York Authority compact was originally approved. Congress inserted therein a most important reservation; namely, that Congress reserved the right "to alter, amend, or repeal" the compact. The present investigation is in part based upon this reservation. In addition, the operations of the authority exercise a farflung influence on interstate commerce. yield tax-exempt revenues in excess of \$100 million annually from tunnels,

bridges, terminals, airports, and shops valued at more than \$900 million. The port authority's operations affect the economic lives of millions of Americans living outside as well as inside the port development area and the States of New York and New Jersey. They intimately affect the operation of Federal agencies responsible, among other things, for the national defense, navigable waterways, and air, rail, and highway traffic. In short, they profoundly affect Federal interests of many and various kinds.

Nevertheless, although there were 2 days of hearings before the subcommittee in 1952 on a resolution that would have withdrawn congressional consent from the compacts and the authority, neither the Judiciary Committee, to which is assigned responsibility for interstate compacts of this character, nor any other congressional committee, has ever conducted a general investigation of the Port of New York Authority to determine its conformance or nonconformance to the limits of its authority or the extent or adequacy of its performance of its responsibilities in the public interest.

What is more, in recent months, complaints varying widely in character and gravity concerning the operations of the port authority under the compacts, have come to the attention of the subcommittee. For example, it has been alleged that the port authority, in combining revenues for financing purposes from all its facilities, rather than reducing tools on each facility as it is amortized, places an undue burden on the channels of interstate commerce and is contrary to national transportation policy. It has been alleged that the port authority has extended its operations beyond the geographic limits contemplated by the Congress. It has been alleged that in the letting of certain service and construction contracts, the port authority has not permitted competition and has failed to grant the award to the lowest qualified bidder. It has also been asserted that the overall operations of the port authority have at no time been subjected to a comprehensive independent audit by any governmental agency.

By letter dated March 11, 1960, I initiated the inquiry by requesting the executive director of the port authority to make certain of the authority's files available for examination by committee staff members. Notwithstanding this request, the port authority failed for the most part to make available the documents requested. Rather, it limited itself to supply documents virtually all of which were already matters of public record.

Against this background, the subcommittee voted on June 8, 1960, to begin a full inquiry into the activities and operations of the Port of New York Authority under the 1921 and 1922 compacts. Also on the same date, the subcommittee addressed a letter to the executive director of the authority requesting him to make available for examination by subcommittee staff representatives specified documents dating from January 1, 1946, and indicating that counsel for the subcommittee would call at the offices of the authority on June 15 for the purpose of examining these files at that time.

Two days later, by letter dated June 10, the executive director of the authority raised a number of objections to the request for inspection of documents in the port authority's files. In the same letter he nevertheless expressed the hope that when subcommittee counsel called at the offices of the authority and met with its general counsel, those present would reach agreement as to the materials to be furnished in aid of the subcommittee's inquiry. On June 15, counsel for the subcommittee met with the executive director and the general counsel of the authority at its office. The port authority failed to make the requested documents available.

Accordingly, on June 15, 1960, subpenas duces tecum were served upon Austin J. Tobin, executive director, S. Sloan Colt, chairman, board of commissioners, and Joseph G. Carty, secretary to the board of commissioners, of the Port of New York Authority, directing them to appear before the subcommittee on June 29, 1960, and to bring with them certain records and documents of the

port authority.

On June 29, the three port authority officials appeared before the subcommittee and brought with them part of the documents demanded in the subpenas, but failed and refused to produce certain other documents in compliance with the subpenas or as ordered by the subcommittee. The withheld documents are necessary to the subcommittee's inquiry. On the same day, following the appearance of the witnesses, the subcommittee unanimously resolved to report the failure of the officials to honor the subpenas to the Committee on the Judiciary and to recommend that the committee report this conduct to the House with recommendation that the port authority officials be cited for contempt. On June 30, 1960, the Committee on the Judiciary adopted this recommendation. On August 23, 1960, the Committee on the Judiciary filed its reports—Reports Nos. 2117, 2120, and 2121—on the matter and the House of Representatives adopted House Resolution 606, House Resolution 607, and House Resolution 608, whereby the Speaker of the House was directed to and did certify the reports of the Committee on the Judiciary to the U.S. attorney for the District of Columbia.

It is now the duty of the U.S. attorney to bring the matter before the grand jury for its action—title II, United States Code, section 194. By citing the port authority officials for contempt, the House has thus cleared the way for a judicial determination of certain constitutional and legal issues concerning the scope of the investigative powers of Congress which the port authority has seen fit to raise.

RECORD OF PUBLIC LAWS

I believe the voters are entitled to know which legislation I introduced in the past Congress which ultimately became law. This the voters must know in order to judge the scope of my activities, the success of my efforts, and the interests which I have pursued.

I attach herewith a list of the bills and the public law numbers of the 86th Congress which I authored and are now part

of the U.S. law.

Public Law	Title	Bill No.
86-24 86-49	To amend ch. 13, Wage Earners' Plans, of the Bankruptcy Act.  To repeal clause (9) of subdivision a of sec. 39 of the Bankruptcy Act (11 U.S.C. 67a(9), respecting the transmission of papers by the referee to the clerk of the court.	H.R. 4852. H.R. 4345.
86-64	To amend sees, 1, 18, 22, 331, and 631 of the Bankruptcy Act (11 U.S.C. 1, 41, 45, 731, 1031) to provide for automatic adjudication and reference in	H.R. 4092
